

September 26, 2008

Dear CPS Energy Customer,

CPS Energy, your natural gas and electric provider, would like to provide you with an update and construction schedule for the Hunt Lane substation project.

To improve electric reliability and meet electric demands in our growing community, we will relocate the existing Marbach Rd substation, located east of Hunt Lane, to a new location in an existing CPS Energy owned, 200-foot-wide transmission right-of-way adjacent to the Westbury Place and Adams Hill subdivisions. The new substation will be called the Hunt Lane substation.

Construction is tentatively scheduled to begin on October 3, 2008. Pre-construction activity such as crew mobilization and clearing will begin immediately in October (2008). Also, please remove any personal items that may have been placed within the right-of-way area. Access to this right-of-way will be restricted when this project is complete. The new Hunt lane substation is scheduled to be completed by October 5, 2009.

If you have any questions about this important project, please call me at (210) 353-2969 or Mr. Shelby Mayer at (210) 353-4454. Thank you again for your cooperation and understanding as we seek to continue delivering dependable, affordable energy to you and your neighbors!

Sincerely,

Yvonne Long
