

November 24, 2025

Dear CPS Energy Customer:

Thank you for being our customer. We invite you to attend an open house to learn about a proposed transmission line project in your area—the Foster Road Substation and Transmission Line Project.

The project involves the proposed installation of a new 138-kV substation in East Bexar County and a new 138-kV double-circuit transmission line approximately 2-5 miles long. The transmission line will connect the future Foster Road Substation to the existing Beck to Kirby transmission line and will require a new Right-of-Way (ROW).

At the Open House, you will have the opportunity to learn more about the project and the steps required to complete the work. We welcome your questions, comments, and input regarding this project. CPS Energy team members directly involved with the project will be present to answer your questions and receive feedback you provide. The Open House will have an informal “come and go” format with information stations addressing specific areas of the proposed project.

**CPS Energy Open House
Foster Road Substation and Transmission Line Project**

December 10, 2025
5:00 P.M. - 7:00 P.M.

Santo Nino Catholic Church
5655 Rigsby Ave., San Antonio, TX 78222

A brochure describing the proposed project and a map of the study area is included in this packet. Additional information will also be available at www.cpsenergy.com/infrastructure. Scroll down to the substation portion and select “Foster Road Project.”

We look forward to meeting you, receiving feedback you provide, and answering your questions. Thank you in advance for taking the time to join us.

Sincerely,

Oscar Luevanos
Project Manager II
