

### Who is CPS Energy?

Established in 1860, CPS Energy is the nation's largest community-owned provider of electric and natural gas services. We provide safe, reliable, and competitively priced services to **976,622** electric and **394,600** natural gas customers in San Antonio and portions of seven adjoining counties. Our customers' combined energy bills rank among the lowest of the nation's 20 largest cities while generating \$10.1 billion in revenue for the City of San Antonio over the last 80 years.

Our Vision 2027 strategic plan is designed to guide CPS Energy through rapid transformational change in our city. As a trusted and reliable community partner, we continuously focus on job creation, economic development, and educational investment. We are powered by our skilled workforce, whose commitment to the community is demonstrated through our employees' volunteerism, our community engagement efforts and programs aimed at bringing value and assistance to our customers.

For more information, visit [cpsenergy.com](https://cpsenergy.com).

### How can you follow the progress of this project?

The CPS Energy project team will post project information on the CPS Energy website at [www.cpsenergy.com/infrastructure](https://www.cpsenergy.com/infrastructure).

### Who can answer your questions?

The website will include regular updates on the project as steps are completed.

# LEGEND FALLS

## SUBSTATION & TRANSMISSION LINE PROJECT

# INFORMATION ABOUT THE LEGEND FALLS SUBSTATION & TRANSMISSION PROJECT

## What is the Legend Falls Substation and Transmission Project?

CPS Energy is proposing to construct a new 138 kV substation and approximately two miles of new 138 kV transmission corridor in Medina County. The proposed transmission lines will require new Right of Way (ROW). One double-circuit transmission line will connect the new substation to the CPS Energy transmission system and the other single-circuit transmission line will connect the CPS Energy substation to the STEC San Geronimo substation.

## How might this project affect you?

CPS Energy is evaluating multiple geographically diverse transmission line options for the project. Your input and feedback are important to our evaluation of alternatives.

## Why is this project needed?

The new transmission line is needed to increase the resiliency and reliability of Texas' electric grid by adding another transmission pathway to increase support of the accelerating load growth south of San Antonio.

## Study Area Map
