

EMPOWERING OUR COMMUNITY FOR GENERATIONS

CPS Energy's mission is to safely power our community with reliable, affordable, and cleaner energy.

WHAT NOT-FOR-PROFIT MEANS

When your community owns its utility, the value stays close to home.

MORE THAN

**\$1 MILLION
A DAY RETURNED**

to our community to support essential services like fire and police, public parks, roads, and libraries.

WE FOCUS ON WHAT MATTERS MOST

RELIABILITY

Investing in the power you count on.

We own and operate the infrastructure that delivers power to homes and businesses, investing in generation, transmission, distribution, and technology to strengthen reliability for our growing community.

VALUE

Affordable prices, excellent options and service.

We deliver customer-centric innovation that improves affordability, elevates customer engagement, and strengthens community investment - maintaining the state's lowest combined gas and electric bill.

COMMUNITY CONTROL

Decisions made here, for the customers we serve.

Though owned by the City of San Antonio, our service territory extends beyond city limits. Every CPS Energy customer is represented by our Board of Trustees.

COMMUNITY INVESTMENT

As our community grows, we grow with it.

Our role extends beyond delivering energy. We invest in infrastructure, customer assistance, local jobs and partnerships that strengthen the community we serve.

NOT-FOR-PROFIT BENEFITS MORE THAN OUR COMMUNITY

CPS Energy helps to power Texas.

We are a major contributor to the reliability and strength of the Texas electric grid. Our energy, infrastructure and investments help to support jobs, businesses, energy resiliency and the state economy.
