4. I am responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under my supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to me by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under my supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report my conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. I have disclosed, based on my most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Docket No. IN06-3-002

ORDER TO SHOW CAUSE AND
NOTICE OF PROPOSED PENALTIES

1. Pursuant to section 385.209(a)(2) of the Commission's regulations,[1] the Commission directs Energy Transfer Partners, L.P.; Energy Transfer Company (ETC); ETC Marketing Ltd. (ETC Marketing), and Houston Pipeline Company, (collectively, ETP)[2] to show cause no later than thirty days from the date of this order why the Commission should not find that: (1) ETP manipulated markets at Houston Ship Channel (HSC) and Waha, Texas, on dates specified below from December 2003 through December 2005; (2) ETP should pay civil penalties in the amount of $82,000,000 and disgorge $69,866,966, plus interest, in unjust profits resulting from its manipulations; and (3) ETP's blanket certificate to sell gas subject to the Commission's jurisdiction should be revoked.

2. The Commission also directs Oasis Pipeline, L.P.; Oasis Pipeline Company Texas, L.P.; and ETC Texas Pipeline LTD., Oasis Division (collectively, Oasis Pipeline) to show cause why the Commission should not find that Oasis Pipeline: (1) unduly discriminated against non-affiliated shippers and unduly preferred one or more affiliated shippers; (2) charged rates in excess of the maximum lawful rate for service under section

[1] 18 C.F.R. § 385.209(a)(2) (2006).

[2] ETP is a publicly-traded partnership that owns and operates natural gas pipelines and storage facilities in Texas, among other energy-related assets, and conducts natural gas trading operations. *See* www.energytransfer.com/aboutETP.asp.

311 of the Natural Gas Policy Act of 1978 (NGPA); (3) failed to file an amended operating statement; and (4) should pay civil penalties in the amount of $15,500,000 and disgorge $267,122 in unjust profits, plus interest.

3. ETP received multiple opportunities to present its position prior to the issuance of this order, both orally and in writing. Although the Commission is preliminarily of the view that ETP violated the Commission's rules, statutes, and regulations as set forth in this order, ETP is now provided with another chance to respond.[3]

I. SUMMARY

4. In late September 2005, the Commission staff received a call on its Enforcement Hotline[4] alleging that the market for prompt month (*i.e.,* next month) fixed price gas (*i.e.,* gas the price of which is determined in a bilateral trade or agreement) at HSC, a major trading hub, was manipulated on September 28, 2005. The Office of Enforcement (Enforcement or staff) conducted a formal, non-public investigation of ETP's trading from December 2003 through December 2005 and its operation of its Oasis Pipeline. The investigation concluded that ETP manipulated wholesale natural gas prices at HSC by suppressing them to benefit ETP's financial positions and other physical positions. The investigation also concluded that ETP manipulated daily prices at Waha on December 23, 2005 and December 28, 2005, and that Oasis Pipeline unduly discriminated against non-affiliated shippers, unduly preferred one or more affiliated shippers, charged some interstate customers transportation rates that exceeded the lawful maximum rate, and failed to file an amended Operating Statement.

5. The facts tell the story of ETP's manipulations. ETP set up its financial and

---

[3] This order constitutes notice of proposed civil penalties. *See Process for Assessing Civil Penalties*, 117 FERC ¶ 61,317, at P 7, 12 (2006). Under the applicable rule, 18 C.F.R. § 385.213 (2006), ETP must file an answer that provides a clear and concise statement regarding any disputed factual issues and any law upon which it relies. ETP must also, to the extent practicable, admit or deny, specifically and in detail, each material allegation of this order and set forth every defense relied upon. Upon receipt of ETP's answer, the Commission has many options of how to proceed. It may, with respect to the manipulation issues under the NGA, request briefs or set specified issues for a trial-type hearing, with full discovery, before an administrative law judge, or issue an order on the merits. And with respect to the transportation issues under the NGPA, the Commission may request briefs, set specified issues for a trial-type hearing before an administrative law judge, or issue an order on the merits. Should the Commission enter an order imposing penalties against ETP on the NGPA issues, ETP would have a right to have that order reviewed in a United States district court.

[4] *See* 18 C.F.R. § 1b.21 (2006).

physical portfolio to profit from lower prices at HSC. ETP then sold fixed price gas for prompt month delivery at HSC for less than a competitive price. ETP's HSC manipulations affected the Platts *Inside FERC* (IFERC) HSC index for monthly natural gas. This index is used by market participants to price gas and is critically important to understanding ETP's manipulations. Natural gas for prompt month delivery is commonly traded in the last week of the preceding month, known as bid week, for delivery on each day of the following month at a specified location. Many market participants voluntarily report their fixed price transactions for the sale and purchase of natural gas executed in bid week for prompt month delivery to *Inside FERC*. This industry newsletter, published by The McGraw-Hill Companies, receives reports of fixed price sales and purchases at certain trading points and compiles them to create an index price representative of transactions at those points. *Inside FERC* then publishes these index prices. Many physical and financial contracts are priced by reference to the IFERC index at various locations.

6. ETP dominated sales of fixed-price gas at HSC, often comprising 80 percent or more of total sales. ETP reported its fixed price sales at HSC to *Inside FERC* and thus was able to use its domination of the market to virtually set the IFERC HSC index. In spite of ETP's sales activity at HSC, it was consistently a net buyer of monthly gas priced at the IFERC HSC index, and thus was positioned to benefit from the lower prices it caused in the months it manipulated fixed-price sales at HSC. Under the index contracts ETP entered, ETP agreed that a producer or other market participant would deliver to ETP a certain volume of gas for a given month at a particular location, to be priced at the IFERC HSC index price, plus or minus a certain adjustment. ETP benefited from a lower IFERC HSC index because it nearly always bought more gas priced at IFERC HSC than it sold at suppressed prices in fixed price deals.

7. At the same time, ETP had entered into financial transactions known as basis swaps to leverage its benefit from suppressing monthly physical prices at HSC. A basis swap is a derivative instrument whose value is based on the difference between the New York Mercantile Exchange Natural Gas Futures Contract (NYMEX Contract) settlement price for a given month and the index at a specified location for that same month. The NYMEX Contract is a contract for the future delivery of gas at Henry Hub, a liquid trading point in Louisiana, which usually trades at a higher price than HSC. ETP profited if the difference between prices at HSC and the NYMEX Contract widened, *i.e.,* the price at HSC became lower relative to the higher priced NYMEX Contract. Stated another way, ETP took a "short" position in HSC basis swaps, meaning that it bet that prices at HSC would fall relative to the NYMEX Contract, *i.e.,* that the spread between these two points would widen. Because ETP had the power to suppress price at HSC, this was not really a bet at all, but a manipulation that was spectacularly successful in October 2005 -- ETP realized more than $40,000,000 in unjust profits -- and highly profitable in eight other months from January 2004 through December 2005. Forty million dollars for single day's trading represented a huge return for an asset-based, fee-based business. In

sum, ETP forewent potential profit of its fixed price sales to obtain far larger revenues in both its physical and financial portfolio.

8. On September 28, 2005, ETP's sales of October 2005 delivery of gas -- the trading that triggered the Enforcement Hotline call and hence the first trading that staff examined -- resulted in dramatically lower prices at HSC than existed at other South and East Texas points that historically have traded very close to HSC. For several years preceding ETP's September 28, 2005 manipulation, monthly prices between HSC and nearby points were typically within ten cents of each other. Yet for October 2005, monthly prices at HSC were at least $1.24 per MMBtu lower at HSC than at these other points. In the other eight months in which HSC manipulated fixed price gas at HSC, prices at HSC were still lower, albeit by smaller amounts, than indicated by the longstanding price relationship between HSC and nearby Texas points.

9. ETP's most significant manipulation occurred on September 28, 2005. ETP began selling at $10.25 at 2:11 p.m. (Eastern Time) after the most recent transaction in the market (a minute earlier) indicated that gas at HSC was valued at $11.95. Selling most of its 10 Bcf in sales that afternoon in a thirty minute burst, ETP suppressed prices in the face of significant increases in the NYMEX Contract and pricing points in South and East Texas. While ETP was selling a large amount of fixed price gas at HSC, it was actually a net buyer of 12.9 Bcf that month at the HSC IFERC index. In other words, ETP sold 10 Bcf in fixed price sales of prompt month gas on September 28, 2005 at HSC, but it had agreed to buy a larger volume of gas priced at the IFERC HSC index. In this situation, ETP was a net buyer of gas, despite being the dominant seller of fixed price gas at HSC. Further, ETP was short HSC basis swaps in the amount of 23.8 Bcf, meaning that it made a huge bet that the IFERC HSC index would fall relative to the NYMEX Contract settlement price. Accordingly, by suppressing the price of gas at HSC, ETP benefited enormously from its other physical and financial short basis positions. This was a risk-free, win-win situation for ETP. It knew to a certainty that by suppressing price at HSC, the losses it incurred by selling fixed price gas at less than a competitive price would more than be compensated by profits realized by its net physical long position and its financial positions. ETP's combined unjust profits from this activity were $40,286,727. The Commission proposes that ETP pay $34,000,000 in civil penalties for its manipulation, and to disgorge the unjust profits, plus interest.

10. ETP intended to manipulate market prices at HSC on September 28, 2005. The company officer in charge of trading at HSC, Marshall ("Mackie") McCrea, told at least one of his traders on September 26, 2005 that "as long as we sell as much as we can sell, it ought to push Ship down."[5] McCrea also stated, "You know, it'd be nice to have Ship

[5] Audio digital recording/Wav file of Timothy Small WAV557 (Sept. 26, 2005) (Small, WAV557 (Sept. 26, 2005)); Deposition of Marshall McCrea Exhibit 5 (Apr. 26, 2006) (McCrea Dep. Ex. 5).

kind of spread back out from, uh, both for this month or October, and also for our summer/winter business."[6] In this call, McCrea demonstrates that he intended ETP to "push Ship Down," *i.e.*, to suppress price at HSC, which would widen the price spread at HSC from Henry Hub. Further, ETP-affiliated traders coordinated their trading activities. In the same voice recording, ETP-affiliated traders discussed how they would share profits among the San Antonio, Houston and Dallas trading desks of the company.[7]

11. ETP's manipulative strategy worked. Fixed price gas for October delivery fell at HSC. As noted, prompt month gas at HSC historically traded within pennies or nickels of gas at nearby south and East Texas points.[8] But in this month, the price of gas at HSC traded between $1.29 below Katy and $2.20 below other south Texas points. Neither market fundamentals, nor Hurricane Rita, which hit landfall north of Houston on September 24, 2005, can explain this radical price divergence. ETP had no legitimate business purpose for suppressing the price of fixed price gas at HSC to benefit other positions.

12. ETP's strategy of taking physical and financial positions that benefited from artificially low prices at HSC, flooding the market with offers to suppress price, and then reaping the rewards of its manipulation was most successful in September 2005, but ETP practiced this strategy eight additional times from December 2003 through November 2005. The dates of ETP's additional manipulations are December 29, 2003 (for gas delivered in January 2004); September 24, 2004 and September 27, 2004 (for gas delivered in October 2004); November 23, 2004 and November 24, 2004 (for gas delivered in December 2004); December 28, 2004 (for gas delivered in January 2005); January 27, 28, and 31 (for gas delivered in February 2005); June 28, 2005 (for gas delivered in July 2005); August 29, 2005 (for gas delivered in September 2005); and November 28, 2005 (for gas delivered in December 2005).

13. While the profits that ETP earned from its manipulations varied month to month, ETP's strategy was consistent. In months it selected, ETP traded, usually in the last half-hour before the close of trading in the prompt-month NYMEX Contract, to suppress fixed price gas at HSC for prompt month delivery. ETP set up its portfolio to benefit from a suppressed price at HSC: ETP executed contracts to purchase gas at prices referenced to the IFERC index. Thus, even though ETP was a seller of gas at HSC on the days it executed its manipulations, in all but one of the months it manipulated the market at HSC, ETP was a net buyer of gas priced at the IFERC HSC index, thus benefiting from lower prices. ETP also had short HSC basis swap positions pegged to the IFERC HSC

---

[7] *Id.*

[8] *See infra* P 59 and Chart 5.

index that gained when ETP suppressed fixed price gas and the IFERC HSC index. Chart 1, *infra* at P 39, shows the profit that ETP derived from its physical and financial positions by reason of its manipulations to suppress price at HSC. ETP received more than $27,351,689 in unjust profits from its manipulations in these eight additional months. The Commission proposes that ETP disgorge this amount, plus interest, and that it pay $45,000,000 in civil penalties for these manipulations.

14. Contemporaneous voice recordings, in addition to the September 26, 2005 conversation of McCrea, further demonstrate ETP's manipulations. For example, voice recordings in the autumn and early winter of 2004 show that some market participants knew ETP was suppressing price at HSC and that prices at HSC were not the result of "fundamentals." Further, after ETP's huge September 28, 2005 manipulation, an ETP trader boasted that making money at HSC was "like taking candy from a baby."[9] The same trader also said in October of 2005, the company was "swimming in money right now … don't stress over not making money right now 'cause, it's, there's, they're, they're going to have more of a problem with explaining how we made this much money."[10] Another ETP trader that autumn, referencing ETP's trading, compared ETP to Enron.[11]

15. ETP's manipulations had severe adverse consequences for competitive wholesale natural gas markets and the country's natural gas customers. Consumers are harmed when prices are set by manipulation. The harm from an upward manipulation is immediate. Harm from downward manipulation is more long term. Entities that sold physical gas to ETP at the artificially-reduced IFERC HSC index were harmed by ETP's trading manipulations. When producers receive less than the market price for their gas, price signals that would otherwise tend to stimulate production, and thereby benefit gas customers nationwide, are frustrated. Manipulated markets discourage trading, rendering them less efficient and raising costs to consumers. In addition to producers, royalty owners and taxing authorities were harmed by the artificially-reduced prices. Counterparties in the referenced financial basis transactions were also harmed by ETP's manipulations. ETP wrongfully deprived counterparties of revenues they should have received but for ETP's manipulations. Market manipulation is necessarily inconsistent with competitive markets.

16. The Commission directs ETP to show cause why the Commission should not revoke ETP's blanket market certificate authorizing it to sell gas at wholesale in interstate

---

[9] Small WAV3697 (Oct. 7, 2005).

[10] Small WAV3B4A (Oct. 18, 2005).

[11] Audio digital recording/Wav file of Luke Fletcher WAVC27 (Nov. 30, 2005) (Fletcher WavC27 (Nov. 30, 2005)).

commerce subject to the Commission's jurisdiction. ETP's manipulations were flagrant, as evidenced by analyses of ETP's actual trades, the direction of senior management to commit them, the frequency with which they occurred and the large unjust profits ETP derived from them. They undermined competition in the wholesale interstate gas market at HSC.

17. ETP's market manipulations violated the Commission's anti-manipulation rule, promulgated under authority of the Natural Gas Act (NGA), that was then in effect.[12] Market Behavior Rule 2 prohibited the holder of a blanket certificate from "engaging in actions or transactions that are without a legitimate business purpose and that are intended to or foreseeably could manipulate market prices . . . ." ETP violated Market Behavior Rule 2, discussed *infra* at P 34, when it manipulated physical gas markets by artificially suppressing the IFERC HSC index to derive unjust profits in other physical and financial contracts. Courts and federal agencies have recognized that trading to artificially lower prices in one market in order to derive a financial benefit in the same or in a related market is a form of market manipulation.[13]

18. ETP also manipulated daily prices at Waha and Permian to benefit its short Waha and Permian index swap positions. A party that is short an index swap position profits from a lower *daily* index price, as published in Platts' *Gas Daily,* relative to a *monthly* index price at the same location. By suppressing the daily price at Waha, ETP benefited by realizing an increase in the value of its short index swap position that occurred when the daily index price fell relative to the monthly index price at Waha. ETP received unjust profits of $2,228,550 for this activity. The Commission proposes that ETP pay a civil penalty in connection with this activity in the amount of $3,000,000, and to disgorge the unjust profits, plus interest.

19. In sum, the Commission proposes that ETP disgorge in unjust profits $69,866,966, plus interest, and pay civil penalties in the amount of $82,000,000 for its unlawful market manipulations.

20. ETP also committed violations of Commission requirements under the Natural Gas Policy Act of 1978 (NGPA). ETP owns Oasis Pipeline, a Texas intrastate pipeline

A 2001 settlement with the Commodity Futures Trading Commission (CFTC) pertaining to manipulation of an electric power market is also instructive. *In re Avista Energy, Inc. and Michael T. Griswold,* CFTC Docket No. 01-21, 2001 CFTC LEXIS 107 (Aug. 21, 2001) (*Avista*).

that provides interruptible only transportation pursuant to section 311 of the NGPA.[14] Oasis Pipeline violated section 284.9(b) of the Commission's regulations and the provisions of its operating statement, which prohibit undue preferences and undue discrimination, as well as section 284.122(b) of the Commission's regulations, which prohibits intrastate pipelines from charging in excess of the maximum Commission-approved rate for NGPA section 311 transportation. First, Oasis Pipeline refused or discouraged requests for interstate transportation service from similarly-situated non-affiliated shippers, while at the same time it was providing this service to affiliated shippers. Second, Oasis Pipeline charged non-affiliated interstate shippers rates that exceeded the maximum Commission-approved rate of $0.1239 per MMBtu. Third, Oasis Pipeline unduly preferred its affiliate, ETC Marketing, by allowing it to ship interstate gas under a firm intrastate contract.

21. Oasis Pipeline had an economic incentive to discriminate against non-affiliates when the basis differential between Waha and Katy exceeded the maximum lawful rate for interstate transport of $0.1239 (plus fuel). If, for example, gas at Waha could be purchased for $6.00 per MMBtu and sold at Katy for $7.00 per MMBtu, a shipper could purchase interstate gas at Waha for shipment to Katy at the maximum transportation rate of $0.1239 (plus fuel) and pocket the amount above $0.1239. Oasis Pipeline used the three types of illegal practices described above to ensure that these profits stayed within the ETP corporate family, rather than losing them to non-affiliates. Oasis Pipeline's violations were continuous from January 26, 2004 through June 30, 2006. We propose to assess a civil penalty of $15,000,000 and disgorge $267,122 in unjust profits, plus interest.

22. Also, the owner of the Oasis Pipeline system, Oasis Pipeline Company Texas, L.P., violated section 284.123(e) of the Commission's regulations[15] when it failed to timely amend its Operating Statement to reflect a Capacity Lease and Commercial Operations Agreement that changed how it operated the pipeline. Oasis Pipeline's violation of the filing requirements has been continuous from January 26, 2004 to the present. We propose to assess a civil penalty of $500,000.

II. COMPANY BACKGROUND

A. ETP Has Substantial Physical Assets in Texas

23. ETP owns, among other entities, ETC, a midstream operating subsidiary. ETP is one of the largest master (*i.e.*, publicly-traded) limited partnerships in the United States by equity market capitalization. For the fiscal year ending August 31, 2006, ETP had

[14] 15 U.S.C. § 3371 (2000).

[15] 18 C.F.R. 284.123(e) (2006).

revenues of approximately $7,900,000,000, of which approximately 87 percent were from its natural gas operations (with the remainder from retail propane distribution).[16] ETP has a current market capitalization of roughly $8.6 billion.[17] ETP owns approximately 12,000 miles of natural gas pipeline systems that link supply areas in West Texas such as Waha with East and South Texas market centers such as Katy, HSC, and Carthage including: (1) the Houston Pipeline Company (HPL), an intrastate pipeline system, which serves the HSC market, and the associated Bammel Gas Storage Facility, one of the largest underground reservoir storage fields in North America with a total working gas capacity of 65 Bcf; (2) Oasis Pipeline, an intrastate natural gas pipeline that runs from the Waha Hub in West Texas to the Katy Hub in South Texas; and (3) the Energy Transfer Fuel, LP (ET Fuel) system, an intrastate pipeline system that extends from the Waha Hub in West Texas and traverses North, Central and East Texas.

B. ETP Optimizes its Physical Assets By Using Specific Trading Strategies

24. All of ETP's Texas pipelines are intrastate facilities that provide intrastate transportation service at market-based rates (normally a large percentage of the basis differential between the receipt and delivery points), rather than pursuant to a tariff on file with the Commission.[18] ETP optimizes assets such as ET Fuel and Oasis Pipeline by transporting third-party or ETP gas from West Texas supply areas to East/South Texas market centers such as Katy and HSC. It has limited ability to flow gas in the reverse direction from East/South Texas back to Waha. A wide price differential between Waha and East Texas increases the value of ETP's transportation and storage assets. In Autumn 2005, the price of gas at HSC was significantly higher than at Waha. ETP's asset optimization strategy for ET Fuel and Oasis also involves the use of financial contracts for both hedging and speculative purposes.

25. A financial contract that ETP traded in the period examined is the NYMEX Contract (or "look-alike" swaps traded on the Intercontinental Exchange, Inc. (ICE))[19]

---

[16] Press Release, Energy Transfer Partners, L.P. Reports Record Year-To-Date Results, Dallas, Texas (November 14, 2006).

[17] http://money.cnn.com/quote/quote.html?symb=ETP.

[18] Oasis Pipeline and ETP Fuel also provide interstate transportation services pursuant to section 311 of the NGPA, 15 U.S.C. § 3371 (2000).

[19] The NYMEX Contract is not a purely financial instrument because it converts at expiration into an obligation to make or take delivery of physical gas. NYMEX "look-alikes" swaps traded on the Intercontinental Exchange, Inc. (ICE), by contrast, are purely financial instruments that operate much like the NYMEX Contract, but settle financially at the close and do not entail delivery.

and "basis swaps." A basis swap is a derivative instrument whose value is based on the difference between the settlement price of the NYMEX Contract for a given month and the index at a specified location for that same month.[20] The buyer pays the seller the settlement price of the NYMEX Contract for a given month, plus or minus a fixed amount (which is the expected, or forward, basis differential between Henry Hub and the index at a specified location, such as the IFERC HSC index). The seller pays the buyer the agreed upon index price and receives the NYMEX Contract settlement price, plus or minus the agreed-upon fixed amount. This fixed amount can be considered to be the price of the basis swap.

26. An illustration of ETP's practices in September 2005 provides useful context. ETP sold a large volume of HSC basis swaps for October at a weighted-average price of ($1.15). As a seller, ETP was required to pay the IFERC HSC index, which was $10.46, and received in return the NYMEX Contract settlement price (which was $13.91). Since the HSC October basis settled at ($3.45) (*i.e.* the difference of $13.91 and $10.46), ETP profited by the difference of the price it had paid and the HSC basis, which is $2.30 in this example. Thus, ETP stood to reap a substantial benefit from the widening of the basis that occurred on September 28, 2005. ETP's leading trader of gas at HSC, Timothy Small, was of course aware of its potential to benefit from falling HSC prices as the following deposition testimony illustrates:

STAFF: How would your book benefit that day regarding price movement at Ship Channel?

SMALL: The lower Ship is from the NYMEX settle, the more money the basis position would make.

STAFF: Would your sales of fixed-price gas at Ship Channel tend to widen the Ship Channel basis out?

SMALL: At the market where it was trading, yes.

STAFF: Would---by widening it out, would your financial positions with respect to being short Ship Channel benefit?

SMALL: Yes.[21]

---

[20] *See generally*, Fletcher J. Sturm, *Trading Natural Gas: A Nontechnical Guide* 55-67 (1997).

[21] Deposition of Timothy Small, 63:3-15 (April 25, 2006) (Small Dep. 63:3-15); ICE Response to Subpoena Request No. 1 (Oct. 27, 2005) (Oct. 27 Subpoena).

27. A common strategy for hedging locational risk, *i.e.,* risk due to changes in prices between two points, is to sell basis swaps at the location where the physical gas will be sold, *e.g.,* HSC, and to purchase an equal volume of basis swaps at the location where the physical gas is purchased, *e.g.,* Waha. This strategy allows a trader to lock in a differential between two points, regardless of the relative prices movements between these points. Any profit or loss on the physical transactions will be offset by an equal and opposite profit or loss on the basis swap contracts. If the actual basis differential turns out to be narrower than the forward basis differential between the two points, *e.g.*, if the difference between the IFERC HSC index and the IFERC Waha index narrows, the reduction in the trader's profit margin on the physical sales will be exactly offset by the gain on the basis swap contract. By suppressing the IFERC HSC index, ETP reduced its profits on physical sales of gas on the referenced dates but more than compensated for these foregone profits because the lower HSC prices increased the value of its basis swaps and it lessened the cost of its IFERC HSC index purchases.

28. ETP's trading strategy was enabled by its ability to influence the IFERC HSC index due to its role as the dominant seller at HSC in this period. For example, in 2005, according to ICE and Platts data, ETP was responsible for over 95 percent of the fixed-price sales at HSC on ICE for October 2005 and December 2005 delivery.[22] The weighted-average of ETP's fixed-price sales on ICE was very close to the IFERC HSC index,[23] as would be expected given that ETP's sales essentially set this index.

29. ETP's ability to influence the IFERC HSC index was important not only because ETP could thereby profit consistently from its short HSC basis swap positions. Suppressing the price of fixed price gas at HSC, and thus the IFERC HSC index, meant that ETP could also profit from its position as a net buyer of physical gas priced at the IFERC HSC index. Industry contracts for the physical sale or purchase of gas at wholesale often have a price term that references the IFERC index price. This practice has gained commercial currency because the IFERC index provides an objective price reference for arms-length transactions that may be reflective of market values.[24] Accordingly, a producer and a market participant, such as a trader, might agree by contract that the producer will sell a certain volume of gas at a certain location, for delivery throughout the relevant month, based on the price for a specified location

---

[22] ICE Response to Oct. 27 Subpoena Request No. 1.

[23] On September 28, the weighted-average price of ETC's fixed-price sales at HSC was $10.49, and the IFERC HSC index settled at $10.46. On November 28, the weighted-average price of transactions on ICE was $7.82, and the IFERC HSC index settled at $7.88.

[24] *See generally, Policy Statement on Natural Gas and Electric Price Indices*, 104 FERC ¶ 61,121 (2003), *clarification granted*, 105 FERC ¶ 61,282 (2003).

published in *Inside FERC.* Market participants price physical deals on the IFERC index in part because it is understood that neither contracting party can manipulate the HSC IFERC index price on which their contract is based.

30. For the months in which ETP manipulated the market at HSC, ETP sold HSC basis swaps in amounts more than three times as large as the volume of fixed price gas it sold at HSC. Accordingly, one third, on average, of the volume of HSC basis swaps that ETP sold were necessary to lock in the differential between Waha and HSC, while the remainder of its short position was a "speculative" bet on the direction of the HSC basis, *i.e.,* difference between the IFERC HSC index and the NYMEX Contract settlement price. This bet was not really speculative, however, because ETP was able to determine the outcome of the Platts IFERC HSC index and thus skew the value of its short HSC financial position in its favor. ETP's net short position enabled ETP to reap the unjust profits of any widening of the HSC basis, without any offsetting losses from its physical transactions.

31. The direction in which the manipulative conduct moves the price is immaterial to its legality. Courts routinely find that a downward manipulation violates section 10(b) of the Exchange Act and SEC Rule 10b-5.[25] In such cases, the conduct is manipulative because it "creat[es] a false impression of supply and demand . . . "[26] Courts have emphasized that defendants' "[f]ailure to disclose that market prices are being artificially depressed operates as a deceit on the market place and is an omission of a material fact."[27] Similarly, courts and the CFTC have condemned downward manipulations under the Commodity Exchange Act.[28] The downward manipulation that occurred in *Avista* is

of particular relevance to the instant case. There, the CFTC found that Avista Energy engaged in a manipulative scheme to drive down the settlement price of NYMEX electricity futures contracts to increase the value of its positions in over-the-counter (OTC) derivative contracts.[29] The academic literature takes a similar view; making no distinction between the harms resulting from upward or downward manipulations. These harms may include: deadweight losses due to distortions in consumption, production, storage, and transportation, as well as a reduction in hedging effectiveness, and a decline in market liquidity.[30]

III. LEGAL AUTHORITY

A. The Commission has Jurisdiction Over ETP's Relevant Sales

32. The Commission has NGA jurisdiction over all sales of domestic natural gas for resale in interstate commerce by intrastate pipelines and their affiliates, other than sales from those pipelines' own production. Such sales are not "first sales" as defined by section 2(21)(A) of the NGPA[31] and thus were not exempted from the Commission's jurisdiction pursuant to the Natural Gas Wellhead Decontrol Act of 1989.[32]

33. The Commission has granted any person who is not an interstate pipeline a "blanket certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the certificate holder to make sales for resale at negotiated rates in interstate commerce of any category of gas that is subject to the Commission's Natural Gas Act jurisdiction."[33] ETP sold gas pursuant to this blanket certificate, which essentially authorizes intrastate pipelines and their affiliates, such as ETP, to make sales of gas subject to the Commission's jurisdiction. ETP's fixed price sales from December 2003 through November 2005 were made for resale in interstate commerce. For example, ETP made sales to interstate marketers and buyers, including Cinergy Marketing & Trading LP; ConocoPhillips Company; Duke Energy Field Services Marketing LP; ONEOK Energy Services Company L.P.; Coral Energy Resources L.P.;

---

[33] 18 C.F.R. § 284.402(a) (2005).

and others.[34] ETP also has an off-system strategy to market gas out-of-state that results in sales to out-of-state customers.[35]

B. Market Behavior Rule 2

34. Market Behavior Rule 2 proscribed ETP's manipulations at HSC and Waha.[36] Market Behavior Rule 2 stated in pertinent part as follows:

> Any person making natural gas sales for resale in interstate commerce pursuant to § 284.402 is prohibited from engaging in actions or transactions that are without a legitimate business purpose and that are intended to or foreseeably could manipulate market prices, market conditions, or market rules for natural gas.[[37]]

35. ETP violated Market Behavior Rule 2. ETP made sales in interstate commerce pursuant to section 284.402 (*i.e.*, its blanket certificate authority). ETP engaged in actions or transactions that were without a legitimate business purpose because there is no legitimate reason to suppress price in a market to benefit other positions. ETP's actions were intended to, or at a minimum foreseeably could have, manipulated prices because they were repeated and resulted in large unjust profits to ETP's other positions,

---

[34] ICE Response to Oct. 27 Subpoena Request No. 1.

[35] Deposition of Douglas Ray, 69:5-74:19 (April 18, 2006) (discussing Exhibit 2) (Ray Dep. 69:5-74:19); ICE Response to Oct. 27 Subpoena Request No. 1.

[36] The conduct of ETC at issue occurred before January 26, 2006, the effective date of new anti-manipulation regulations approved in Order No. 670, *Prohibition of Energy Market Manipulation*, III FERC Stats. & Regs., Regulation Preambles ¶ 31,202 (2006). In Order No. 670, the Commission amended its regulations to implement Section 4A of the Natural Gas Act and Section 22 of the Federal Power Act, that had recently been enacted as part of the Energy Policy Act of 2005 (EPAct 2005), prohibiting the employment of manipulative or deceptive devices or contrivances. The amended regulations became effective January 26, 2006 and appear at Part 1c of the Commission's regulations, 18 C.F.R. Part 1c (2006). Prior to this date, and at all times relevant to ETP's manipulations discussed in this order, Market Behavior Rule 2 was in effect. While Market behavior Rule 2 was enacted before EPAct 2005, all violations of Market Behavior Rule 2 that occurred after the August 8, 2005 enactment date of EPAct 2005 are subject to the maximum civil penalty provisions of section 314 of EPAct 2005, which are $1,000,000 per day per violation.

[37] 18 C.F.R. § 284.403(a) (2005).

and because the senior executive in charge of trading authorized the manipulation in September 2005. ETP manipulated prices by using its market power, and trading in such a way, as to artificially suppress prices for prompt month gas at HSC and daily gas at Waha on the noted dates that resulted in prices other than would have resulted if the forces of supply and demand had prevailed absent ETP's conduct at issue.

C. The Commission's Civil Penalty Authority

36. The Energy Policy Act of 2005 (EPAct 2005) amended the NGA to provide that any person who violates the NGA, "or any rule, regulation, restriction, condition or order made or imposed by the Commission thereunder, shall be subject to a civil penalty of not more than $1,000,000 per day per violation for as long as the violation continues."[38] Market Behavior Rule 2 was a regulation issued under the NGA. Accordingly, violations of Market Behavior Rule 2 that occurred on or after the August 8, 2005 enactment date of EPAct 2005 are subject to this civil penalty authority.

37. EPAct 2005 also amended the NGPA to increase the maximum civil penalty to $1,000,000 for any one violation, with each day constituting a separate violation in the case of a continuing violation.[39] Violations of Commission requirements under authority of the NGPA that occurred before the enactment date of EPAct 2005 are subject to a civil penalty in the amount of $5,500 per violation and violations that occurred on or after the enactment date of EPAct 2005 are subject to a civil penalty of $1,000,000 per violation.

IV. DISCUSSION

38. ETP committed three types of violations: (1) monthly manipulations at HSC; (2) daily manipulations at Waha; and (3) different types of transportation related violations by its Oasis Pipeline. These violations are discussed in turn.

A. ETP Manipulated the Price of Fixed-Price Natural Gas at HSC on Nine Occasions from December 2003 through November 2005

39. Chart 1 demonstrates the breadth and detail of ETP's manipulations of fixed price gas at HSC for prompt month delivery. This table also sets forth the unjust profits ETP derived from its manipulation based on a portfolio perspective. To calculate unjust profits, the Commission sums the short basis swap positions and the net IFERC HSC physical purchases and multiples this sum by ETP's effect on the market. This amount is

---

[38] 15 U.S.C. § 717t-1, *added by* EPAct 2005, Pub. L. No. 109-58, § 314(b)(1)(B), 119 Stat. 594, 691 (2005).

[39] 15 U.S.C. § 3414 (2000), *amended by* EPAct 2005, §§ 314(a)(2) and 314(b)(2), 119 Stat. 594, 690-91 (2005).

then netted for ETP's fixed price sales at HSC.

Chart 1

Month	Physical Gas @ IFHSC (MMBtu)	Financial Basis Position HSC (MMBtu)	Effect on HSC Basis	ICE %	Comparison to Texas Points	Gross Unjust Profits	Net Unjust Profits
Jan 04	(3,937,542)	(10,462,500)	($0.14)	100%	($0.19)	$913,494	$618,374

40. A brief explanation of the column headings in Chart 1 will be helpful.

- The first column on Chart 1 sets forth the month for delivery of gas at HSC that ETP manipulated.
- The second column sets forth ETP's net physical position priced at IFERC HSC.
- The third column sets forth ETP's net financial basis position priced at IFERC HSC.
- The fourth column sets forth the effect ETP's manipulative trading had on HSC basis.
- The fifth column sets forth ETP's sales of prompt month gas at HSC on ICE as a percentage of all such sales.

- The sixth column sets forth the difference in dollars between prices for prompt month gas at HSC and a weighted average of prices at a basket of other South and East Texas points as compared to the historical price difference among these points prior to ETP's market manipulations.

- The final columns set forth gross and net unjust profits ETP derived from its trading activity.

41. Before embarking on the discussion of ETP's trading, it is important to emphasize that the Commission does not consider high volume trading during a short period of time alone to be illegal or manipulative. Nor is it illegal, *per se,* to possess a large share of trading activity or to engage in speculation. However, where a firm uses some combination of market power and trading activity, against its economic interest in one market, in order to benefit its position in another market by artificially moving the market price, the firm likely crosses the line into the realm of manipulation. Our preliminary conclusion here is based on all of the facts and circumstances of the case, including, as discussed more fully below, the fact that ETP traded in a manner that had the effect of driving down the IFERC HSC index price; ETP's long physical position tied to the IFERC HSC index price and short HSC basis swap position, both of which benefited from a lower IFERC HSC index price; and ETP's manifested intent to manipulate. The Commission also considered ETP's repeated pattern, going back to December 2003, of suppressing the price of fixed price gas at HSC and positioning itself to benefit from a lower IFERC HSC index price.

42. The Commission now sets forth the specific activities ETP undertook to manipulate the price of fixed price gas at HSC for prompt month delivery. These activities show that ETP traded with the purpose and effect to manipulate physical gas prices at HSC.

1. October 2005

a. ETP Manipulated Fixed Price Gas at HSC to Benefit Other Physical and Financial Positions.

43. We begin with ETP's September 28, 2005 manipulation of October 2005 gas at HSC because it was the initial focus of staff's investigation and because it was the largest of ETP's manipulations of monthly gas at HSC. ETP's sales activity on this date suppressed the IFERC HSC index and thereby widened the HSC basis. The price of gas traded on ICE for prompt-month delivery at HSC dropped a total of $1.55 on that date as estimated based on a financial basis trade at ($1.90), when the NYMEX Contract price was $13.85, that occurred less than one minute prior to ETP's first, fixed price transaction at $10.25. ETP began selling fixed price gas on ICE at $10.25 per MMBtu, which was $1.70 below a trade that occurred just one minute before. ETP manipulated

the market by hitting a low bid that did not reflect market value and continued to sell gas in that range for the remainder of the day. This radical leap down to $10.25 shows that ETP intended to suppress price at HSC that day.

44. A review of the chronology of relevant trades on September 28, 2005 demonstrates how ETP manipulated fixed price gas at HSC for prompt month delivery, and thereby manipulated the HSC IFERC index. Between 2:11 p.m. and 5:32 p.m. (EST) on September 28, ETP engaged in 34 sales transactions on ICE for 288,900 MMBtu/d, or 8.96 Bcf, fixed-price gas at HSC for October delivery.[40] At 1:23 p.m., ETP sold fixed-price gas through a broker at $10.72. ETP, by hitting a bid at $10.72, potentially signaled that it would be a heavy seller as the value imputed from a basis trade, also through the broker market, roughly twenty minutes earlier had been $11.15.

45. Although there was weakening in value of HSC basis in the broker market with a trade at an implied price of $10.50 at 1:31 p.m., the market recovered such that at 2:10 p.m. and 2:11 p.m., financial basis traded on ICE at ($1.90) and ($2.00),[41] respectively, implying HSC pricing of $11.95 and $11.90. By implied price we simply mean a proxy for the value of fixed price gas that is the NYMEX Contract price (or the ICE swap) minus the HSC basis swap price. Because the then-current price of the NYMEX Contract was $13.85, an HSC-NYMEX basis trade of $1.90 at 2:10 p.m. indicated that the current value of gas at HSC was $11.95, *i.e,* $13.85 less $1.90 equals $11.95. Implying the value of gas at HSC from the prices of the NYMEX Contract and the basis swap contract is a valid and accurate means to determine actual, real value at HSC. As one accomplished trader has noted:

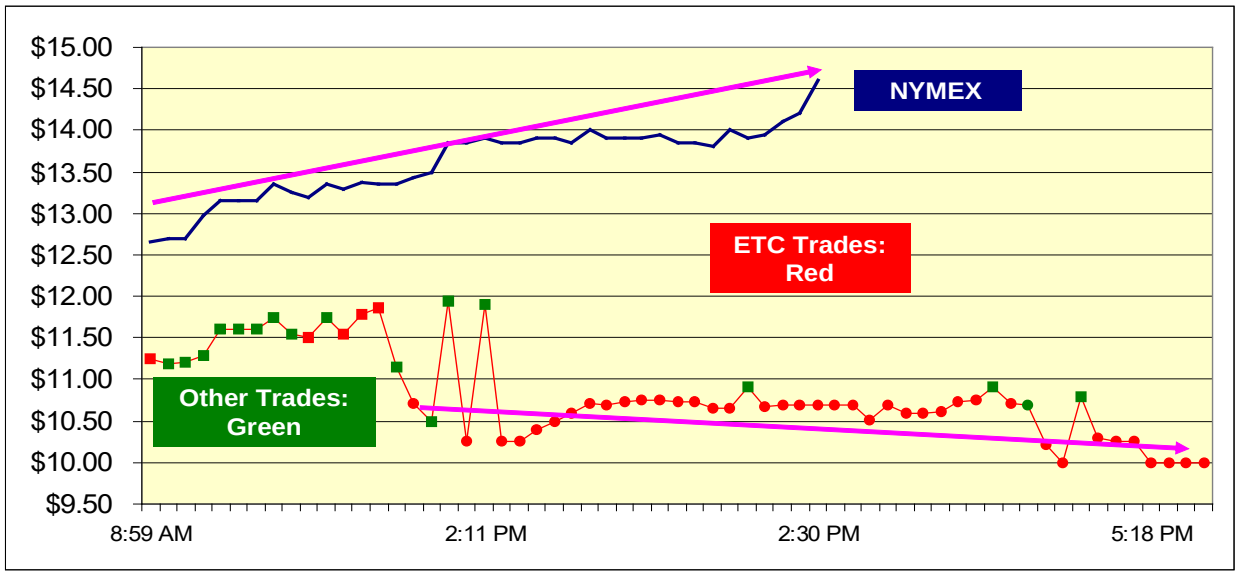
> Given the current futures price for a particular month at a point in time, and by adjusting that price by the current basis differential for a location which has a corresponding index published for it, the fixed price value of gas at that location can be determined for that particular month at that point in time.[[42]]

---

[40] ETP Response to Request No. 1.

[41] ETP traders watched basis closely at HSC. In a conversation on September 15, 2005, two ETC traders (Bob Bourne and Luke Fletcher) discuss HSC basis fundamentals. Bourne, after some explanation from Fletcher, asks "oh well, then it'll get back to the, to the numbers we need, right?" Fletcher WAV7CE (Sept. 15, 2005).

[42] Sturm, *Trading Natural Gas, supra* note 21, at 57. The methodology that Platts uses to determine index prices published in its IFERC Index is based on the same understanding. Platts states that when points are illiquid, it will "make an assessment if adequate alternative market information is available on which to base an assessment[,]" which includes "implied physical values derived from financial swaps." Platts Methodology and Specifications Guide North American Natural Gas Latest Update:



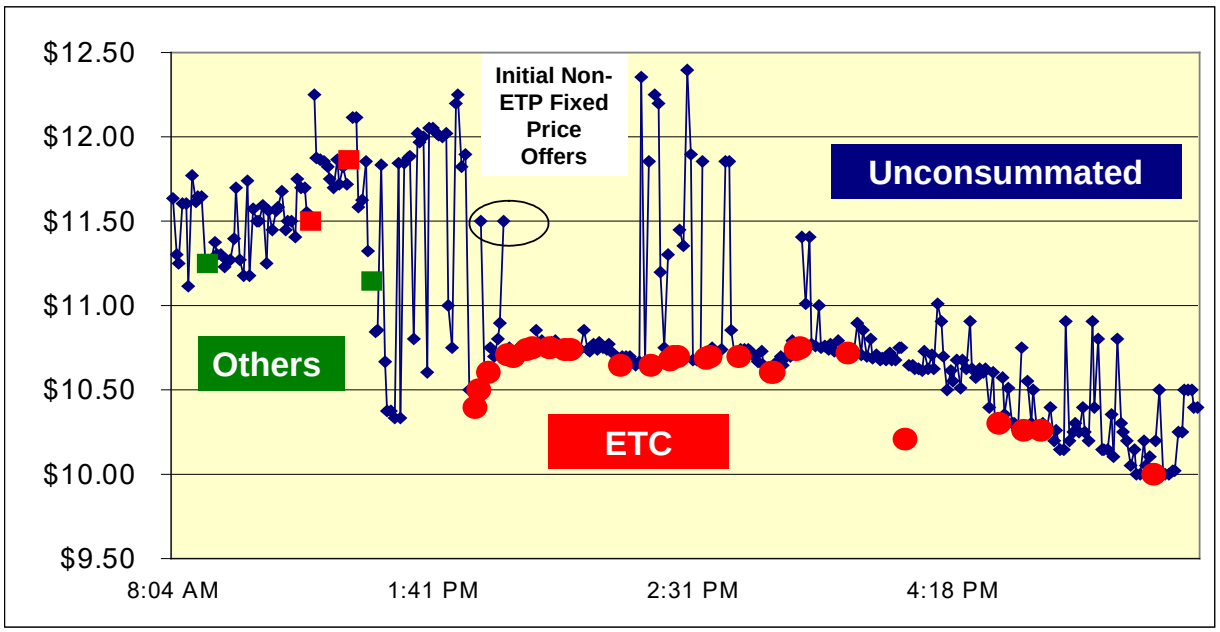
In other words, the fixed price value of gas at a location can be determined from the basis differential, *i.e.*, a basis trade, the current futures price, in this case, at Henry Hub. This approach is a recognized and appropriate way to determine the value of gas at HSC immediately prior to ETP's trading that began at 2:11 p.m.

46. ETP's trading did not instantly cause prices to decline, resulting in a classic downward sloping price curve, but its manipulation was no less effective. ETP began at 2:09 p.m. with an offer to sell at $11.00 and at 2:10 p.m. offered to sell at $10.75. A minute later, a bid was made on ICE at the extraordinarily low price of $10.25, and ETP hit this bid. The $10.25 bid did not reflect market value because of the basis trades that valued gas at HSC one minute before at $11.95. ETP's hitting of the $10.25 bid thus is a significant step it took to suppress price. At $10.25, significant buyer demand emerged and the price rose to $10.75, falling to $10.70 at 2:32 p.m. During this time, the NYMEX Contract traded at $13.80 at 2:00 p.m. and rose to $14.60 at 2:30 p.m. While gas fell at HSC from a value of $11.95 at HSC to $10.70, the NYMEX Contract rose by $0.80. ETP continued to suppress price, and in a number of transactions executed after the NYMEX closed at 2:30 p.m., ETP sold the market down to $10.00. During the time that ETP manipulated the market, bids to buy were posted at prices even lower than the prices at which ETP was transacting. These bids merely show that traders will test the market and seek the lowest possible price, even when that price is already below the price that would exist if the forces of supply and demand prevailed.

47. Chart 2 summarizes prompt month gas trading at HSC and Henry Hub on September 28, 2005 and helps demonstrate why price fell dramatically at HSC. Chart 2 is a graph of NYMEX versus either fixed price or in the case of basis trades, implied price (NYMEX Contract price minus the basis swap price) for September 28, 2005. The data is sourced from ICE, Bloomberg and broker calls. ETP's fixed price sales (circles are fixed price while squares are prices calculated from basis trades) represent a distinct change in valuation for HSC, decoupling from the increasing NYMEX and moving downward in value.

February 2007, http://www.platts.com/Natural%20Gas/Resources/Methodology%20&%20Specifications/na_gas_methodology.pdf?S=n.

Chart 2
ETC CAUSED HSC VALUATIONS ON SEPT. 28 TO DECOUPLE FROM NYMEX



48. Chart 2 shows that gas valuations rose at HSC in tandem with the NYMEX Contract until ETP began selling fixed price gas. ETP's sales caused the price of gas at HSC to decouple from that of the NYMEX Contract. When ETP began selling fixed price gas at HSC, the HSC basis, as traded on ICE, was still relatively stable at ($1.90), implying HSC prices of almost $12.00, keeping pace with NYMEX Contract which had increased to $13.80. Once ETP began selling fixed price gas, however, the basis widened, *i.e.*, the difference in price between the NYMEX Contract and HSC increased. ETP's trading was the cause of this widening.

49. Other market participants were trying to sell fixed-price gas for prompt month delivery at HSC that afternoon at prices above the bids that ETP was hitting but they were unsuccessful. For example, one seller made offers of $11.50 at 2:14 p.m. and 2:16 p.m. These prices were similar to where the market would have been trading absent ETP's conduct, and consistent with the valuation of HSC gas implied by the HSC basis swap trades that occurred at 2:10 p.m. and 2:11 p.m.[43] However, with ETP offering gas at lower prices, these higher offers were, of course, not accepted. Chart 3 provides a more detailed picture of trading activity at HSC on ICE on September 28, 2005, showing all financial and physical offers, both consummated (squares are financial and circles are fixed price) and unconsummated. Chart 3 shows that ETP entered the fixed price market by posting an offer of $11.00, which was well below previous offers or trades, and then hit an even lower bid at $10.25. ETP's trading activity "framed" the market in a price

[43] ICE Response to Oct. 27 Subpoena Request Nos. 1 and 2; ETP Response to Request No. 20.

range much lower than that prevailing earlier in the day, based on where the NYMEX Contract and HSC basis swaps had traded. ETP then traded in a manner to prevent prices for fixed price gas at HSC from running up along with the NYMEX and with other nearby South Texas Points.

Chart 3

50. One reason for ETP's dominance is that it was selling at such low levels that few if any other market participants would sell in that market. Even ETP's own affiliate, Houston Pipe Line Company (HPL), refused a suggestion that it sell in this market. In a conversation at 3:58 p.m. on September 28, 2005, John Hymel, a trader at HPL, was asked by a trader identified only as "Louis" to sell 3,000 MMBtu at Bammel, a large HPL storage facility near Houston. Hymel refused to sell, stating that the price was low. Hymel stated, "Those numbers that I'm looking at there . . . I wouldn't even touch that or index. You know? That's nuts." Upon being pressed by Louis, Hymel says he would sell gas at the Gas Daily (not the fixed price for monthly gas) plus five cents. Louis persists: "You don't want to do a fixed price?" Hymel answers that he does not.[44] This conversation shows that even an affiliate of ETP recognized that the HSC monthly price was "nuts," *i.e.*, artificially low.

b. ETP Intended to Manipulate HSC Prices

51. Senior management at ETP was aware of and directed ETP's manipulative

[44] Audio digital recording/Wav file of John Hymel WAV218 (Sept. 28, 2005) (Hymel WAV218 (Sept. 28, 2005)).

strategy to suppress fixed price gas at HSC. On September 26, 2005, McCrea, ETP's senior executive responsible for commercial operations,[45] instructed at least one ETP trader that:

> [A]s long as we sell as much as we can sell, it ought to push ship down . . . . You know, it'd be nice to have Ship kind of spread back out from, uh, both for this month or October, and also for our summer/winter business.[46]

Douglas Ray, an HPL trader on the telephone conversation, responded, "Exactly."[47]

52. In this conversation, McCrea stated that if ETP sold as much as it could sell, it would reduce price at HSC, *i.e.,* "push Ship down." By stating that "it'll be nice to have Ship kind of spread back from . . . October," McCrea explicitly stated that he wanted HSC prices to be lower for October. "[S]pread back out from" is a reference to the price at HSC widening from the NYMEX Contract price. McCrea's reference to "summer/winter business" suggests that ETP intended to purchase some of the gas at a suppressed price, inject it into storage and withdraw it during the winter. This conversation indicates that McCrea intended ETP to trade to lower prices at HSC and thereby widen the HSC basis for October. At deposition, staff gave McCrea the opportunity to explain his conversation. McCrea was at a loss to explain his words. He simply testified that "I don't know why that statement was made, and I thought about it."[48] By trading to "push Ship down," ETP could execute its win-win, risk-free trading strategy to forego profits in its sales of fixed price gas at HSC on September 28, 2005, to gain outsized profits on its other physical and financial positions.

53. In addition, McCrea told Ray in the same conversation that "it probably makes a lot of sense to come out hard today for tomorrow" because of "where Hub's . . . trading sits, where HPL sits, where storage sits." Ray did indeed sell daily, fixed price gas at HSC on the Monday morning of September 26, 2005 for the next day at prices $2.50 less than market levels prior to the weekend.[49] This comment and the subsequent activity

---

[45] McCrea's title, as of February 2006 was President of La Grange Acquisition, LP, the midstream and natural gas transportation and storage operating partnership of Energy Transfer Partners, L.P. and its subsidiaries. Affidavit of Marshall McCrea, 1 (Feb. 28, 2006) (McCrea Aff. 1).

[46] Small WAV557 (Sept. 26, 2005).

[47] *Id.*

[48] Deposition of Marshall McCrea, 142:6-8 (May 1, 2006) (McCrea Dep. 142:6-8).

[49] ETP Response to Data Request No. 62 (as revised on Dec. 27, 2006).

shows that McCrea knew that selling at HSC would benefit a range of ETP's positions and that his instructions were followed.

54. ETP's trading desks in San Antonio, Houston, and Dallas coordinated their activities to assure that losses one desk took to help execute manipulations would be compensated by profits realized by another desk. In a conversation on September 26, 2005, prior to ETP's manipulation of HSC on September 28, 2005, Ray speaks as follows to Small, [50] another ETP trader:

> [L]et me toss something out I know Mackie's [McCrea] gonna probably want to get involved in this, but as far as how we're going to split this up … just say split it in thirds. You take a third, he'll take a third, and we'll take a third, how does that sound to you?[[51]]

In deposition testimony, Small stated that this conversation concerned the appropriate way to split profit and loss between the Houston and San Antonio trading desks regardless of how successful each desk was individually. [52] Other recordings reviewed by staff evince a pattern of coordination and profit-sharing between the various trading desks. [53] These recordings make clear that the traders at ETP's various business units (*i.e.*, traders for HPL, ET Fuel, Oasis Pipeline, ETC Marketing) acted in concert and considered the benefit to the ETP corporate

---

[50] Ray was responsible for the Houston/Dallas trading desk, which managed the operations of ET Fuel and HPL. Small was responsible for the San Antonio desk, and was responsible for the Oasis Pipeline, the vast majority of purchases at Waha and sales at HSC, as well as financial products for both speculation and hedging, including NYMEX Contracts and basis swaps.

[51] Small, WAV557 (Sept. 26, 2005).

[52] Small Dep. 111:5-112:1.

[53] In the following portion of a conversation between McCrea and Small that took place on November 28, 2005, McCrea advised Small on how to divide the profits from a transaction involving another ETP business unit:

> Hey after I got off, I wanted to come over. I, I was going to deal with you on the phone but I thought maybe. Uh, let me ask you something from a, kind of uh, from a political standpoint. It'd probably be helpful to the company if you could sell him gas back cheaper. And when you're looking, if if [sic] it's not hurting what you're trying to . . . .

Small WAV10E4 (Nov. 28, 2005).

family as a whole, rather than the benefit to their individual trading books considered in isolation. Thus, most or all the ETP traders would have been aware of ETP's net positions.

c. ETP Had Power to Suppress Price At HSC

55. ETP had a dominant position in the market at HSC. ETP owns three of the major pipelines in the HSC/Katy market area (HPL, Oasis Pipeline, ET Fuel) and the major storage facility (Bammel) in the area. ETP has captive producers who ship on its multiple gathering systems in South and East Texas, and it is responsible for bringing local production to the HSC/Katy market area on HPL and from West Texas/Waha production areas through Oasis, and from North Texas on ET Fuel.

56. ETP knew that by virtue of its position as the dominant seller, which was enabled by its control of substantial physical assets and contracts with captive producers, that it could move prices at HSC and nearby points. McCrea acknowledged in sworn testimony that ETP "move[d] enough volume" to affect prices at HSC.[54] Moreover, Small stated during his deposition that ETP has the ability to exert significant influence on prices at nearby points such as Katy and, by reversing the direction of flow on its Oasis Pipeline, it can reverse the basis differential between Waha and Katy.[55]

57. ETP's dominance of the market for monthly sales at HSC of ICE gave ETP the ability to suppress price. ETP comprised 34 out of 35 sales of monthly gas at HSC on ICE on September 28, 2005.[56] ETP's market power is shown by its power to effectively determine the market price at HSC on September 28, 2005. The volume-weighted average of ETP's fixed price sales at HSC on September 28 was $10.49,[57] while the IFERC HSC index settled at $10.46.

d. The HSC Price Radically Decoupled From Nearby Prices As a Result of ETP's Trading

58. Prompt month prices at HSC have a long historical relationship with prices at nearby pricing points in South and East Texas. As Chart 4 shows, this relationship was broken by trading on September 28, 2005 for October deliveries of gas at HSC.

59. Chart 5 provides a monthly perspective on the decoupling of price at HSC in October 2005 relative to the same comparable pricing points.

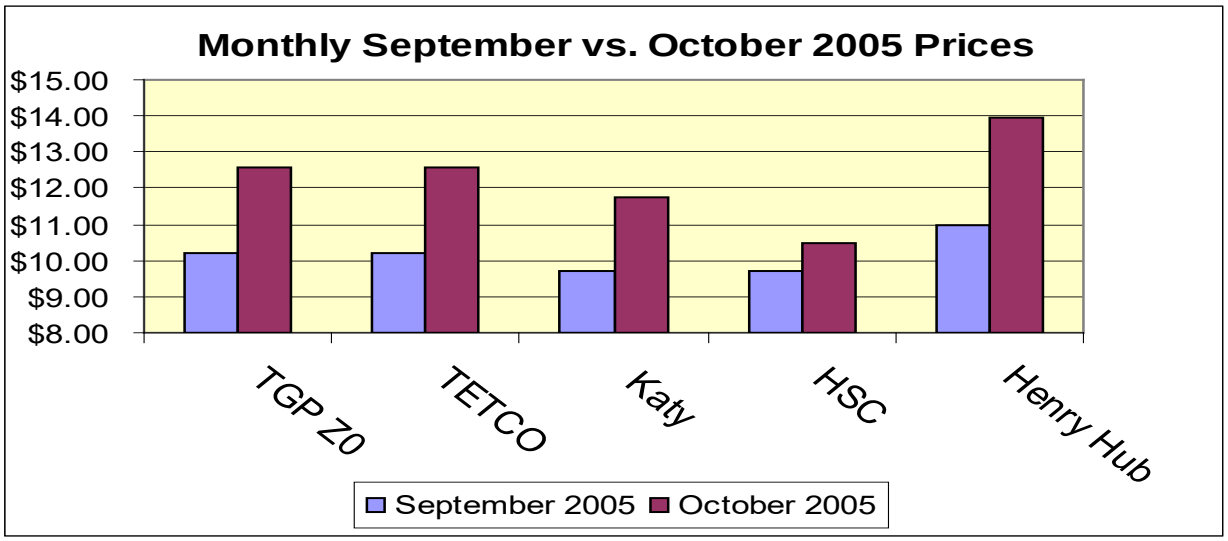

Chart 5

Source: Platts

60. Chart 6 shows that while Houston Ship Channel traded reasonably close to other South Texas points in September, it radically decoupled from these points in October.

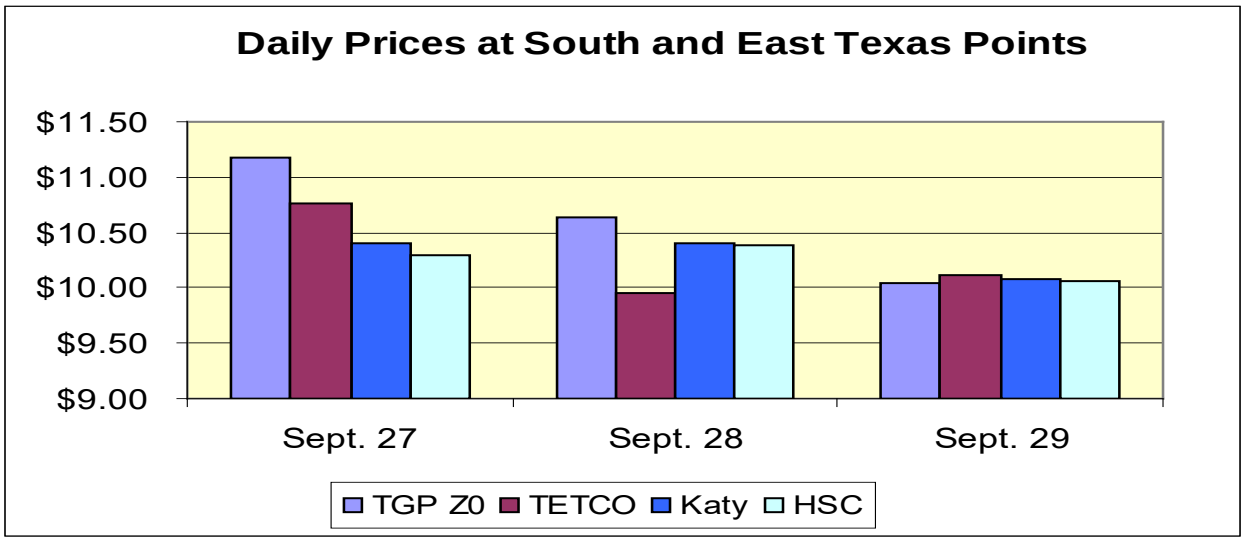

Chart 6

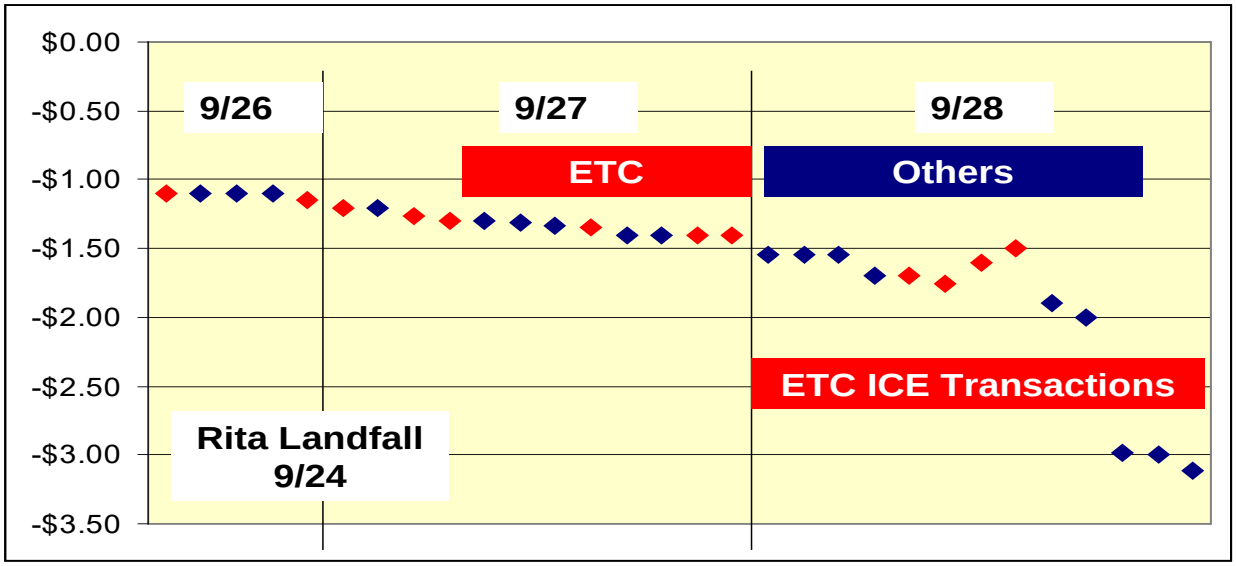
Source: Platts

61. Chart 7 shows that the divergence in prices observed in the monthly markets was not observed in the daily markets, where prices between the four referenced points converged. If fundamental factors had caused monthly prices to separate at HSC from other nearby points, the separation should also have been experienced in the daily markets.

Chart 7



Source: GasDaily

62. ETP suppressed prices at HSC on September 28, 2005. Although Hurricane Rita made landfall at Port Arthur and Beaumont near the Texas-Louisiana border on September 24, 2005, the hurricane did not cause the low prices at HSC relative to nearby south Texas points. Had the hurricane been responsible for the price drop observed

starting at 2:10 p.m. on September 28, 2005 at HSC, prices at nearby south Texas points would also have been affected. Basis swaps at Tennessee Zone 0 traded up with the NYMEX Contract on September 28 before ETP began trading fixed price gas at HSC on that date. Although no October fixed price gas traded at HSC until September 28, on September 26 and September 27 after Hurricane Rita, HSC basis did trade and was relatively flat. The extreme volatility in basis did not occur until ETP sold fixed price the afternoon of September 28. As fixed price was not trading at HSC immediately after Hurricane Rita, the basis trades serve as a proxy in Chart 8.

Chart 8
Basis Trading Was Stable Until September 28th

e. ETP Executed a Trading Strategy to Manipulate Monthly Prices at HSC

63. ETP's trading activity can be characterized as "open market manipulation." In an open market manipulation, a trader manipulates a market by buying or selling with other market participants.[58] ETP executed nominally legitimate sales transaction with sophisticated buyers, which ETP rendered manipulative by its intent and actions to manipulate the IFERC HSC index. The deceptive manner in which it concealed its role as a large net purchaser contributed to its ability to manipulate the market. In October 2005, ETP was a net purchaser at HSC (rather than a net seller, as it would appear based solely on its fixed-price sales), primarily due to the need to inject gas into storage. ETP

[58] *See, e.g.*, *Internet Law Library*, 223 F. Supp. 2d 474; *Nanopierce*, 2002 U.S. Dist. LEXIS 24049.

had a large contract to supply Centerpoint, a Houston-area utility, with gas.[59] ETP could have simply transported the gas purchased at Waha on its Oasis Pipeline to its Bammel storage facilities. ETP instead engaged in a circuitous process of first selling the gas at a fixed price to suppress the IFERC HSC index and then buying the gas back at the reduced price levels. ETP made net purchases at IFERC HSC of almost 13 Bcf in October 2005.[60] ETP's fixed-price sales artificially inflated the trading volume at HSC, falsely conveying the message to the market that HSC had excess supplies of gas. ETP's repeated sales of what amounted to the same gas set the IFERC HSC index at a price that did not reflect the true levels of supply and demand.

64. ETP established a short HSC basis swap position in excess of what it needed to hedge its sales. ETP sold HSC basis swaps in the amount of 24.1 Bcf for October 2005.[61] ETP's open short basis position (*i.e.,* the amount over and above what was necessary for hedging purpose), was substantially greater than it needed to hedge its 10 Bcf of sales at HSC. Further, ETP's short basis position for this month exceeded its average short basis swap position of 11.7 Bcf going back to December 2003.[62] ETP's short basis swap position was not merely one it had established well in advance of its trading on September 28, 2005. ETP increased its short basis position in the September 2005 bid week.[63] ETP's continued purchases during bid week significantly increased its open short basis position, in effect leveraging its existing speculative position and multiplying the returns it would receive from further widening of the HSC basis.

65. Courts have addressed this type of open market manipulation under the Securities Exchange Act. For example, in *Crane Co. v. Westinghouse Air Brake Co.,*[64] the court found that the defendant (Standard) had engaged in a manipulative scheme to artificially inflate the price of Westinghouse Air Brake's (Air Brake) stock to defeat Crane's tender offer for Air Brake. Specifically, Standard purchased, in a very large number of open market transactions, a substantial quantity of Air Brake's stock (representing 170,000 out of a total of 460,000 outstanding shares) on the day that Crane's tender offer was set to expire, pushing the stock's price from $45 to over $50, which was the maximum price for

[64] 419 F.2d 787.

the tender offer, in a single day. The court found that "[t]he net result of this buying was to represent to the public, whose primary source of information is the tape, that there was a great demand for Air Brake at an increased value."[65] The court further noted that only 50,000 of the 170,000 shares represented an actual increase in Standard's holding in Air Brake because Standard had simultaneously and secretly sold 120,000 shares. The court concluded that Standard's action, in concealing from the public and the Air Brake stockholders "the true situation as to the market it was making in Air Brake stock resulted in violations of sections 9(a)(2) and 10(b) of the [Securities and Exchange] Act."[66]

66. Trading similar to ETP's is often referred to as "marking the close" and has been found to be manipulative.[67] A trader marks the close when he or she trades at the end of the trading period with the purpose and effect of substantially affecting the closing price. ETP made the large majority of its sales on September 28, 2005 within 30 minutes of the NYMEX settlement. ETP's trading undermined market integrity and the integrity of the IFERC HSC index, which other traders rely on as a reference price, while reaping significant unjust profits both for transactions in the same market (*i.e*. October purchases priced at the IFERC HSC index) and its financial position in HSC basis swaps.

67. ETP's fixed-price sales at HSC were at a higher price than its fixed-price purchases at Waha. However, ETP had hedged these transactions to lock in the basis

---

[65] *Id*. at 792-93.

[66] *Crane*, 419 F.2d at 793. More recently, courts have found that such open market manipulation occurred in connection with the short selling of so-called "toxic convertibles" or "death spiral financing" schemes involving short-selling convertible preferred securities. The mechanics of such a scheme are described in *Internet Law Library,* 223 F. Supp. 2d 474 (holding plaintiffs satisfied the burden for pleading scienter by demonstrating that defendants stood to profit from short sales "on account of their ability to cheaply obtain additional shares of common stock upon conversion with which to cover their short positions").

[67] "Marking the close" conveys false information to the market as to the value of and the demand for the stock free of manipulative influences. The SEC considers such manipulation of the closing price particularly harmful to market integrity because the closing price is the basis on which analysts chart trading patterns, investors plan strategies, accountants evaluate portfolios, and broker-dealers compute customers' margin requirements and their own net capital. *See In re Kocherhans*, Admin. Proc. File No. 3-8611, 1995 SEC LEXIS 3308, 52 SEC 528, 530-31 (Dec. 6, 1995). *See also SEC v. Schiffer*, 97 Civ. 5853, 1998 U.S. Dist. LEXIS 8,579, Fed. Sec. L. Rep. (CCH) ¶ 90,247 (S.D.N.Y. 1998); *In re Pack*, 1993 SEC LEXIS 1,364, Exchange Act Release No. 32,374 (May 27, 1993); *In re Schultz Investment Advisors, Inc. and Scott Schultz*, 2005 SEC LEXIS 3331, Exchange Act Release No. 53,029 (Dec. 28, 2005).

differential between Waha and HSC.[68] Accordingly, the profit ETP would receive for its sales at HSC on September 28, 2005 was determined in advance and did not depend on the actual sales price ETP received at HSC. If ETP had acquired basis swaps purely for hedging (*i.e.,* if the volume of Waha and HSC basis swaps equaled the amount of its fixed-price Waha purchases and HSC sales), ETP would have been completely indifferent regarding whether prices at, or the basis differential between, Waha and HSC rose or fell. This was not the case. ETP leveraged its position at HSC, selling HSC basis swaps in an amount more than twice as large as that necessary for hedging. Accordingly, ETP had an incentive to drive down the fixed price and index at HSC.

68. ETP traders acknowledged unjust profits the company received from its September 28, 2005 trading. For example, in a conversation occurring on October 18, 2005, Small told Brent Ratliff, a Dallas office trader, that Small was "just trying to lay low" and that the company was "really swimming in money right now."[69] Small explained that ETP management was "going to have more of a problem with explaining how we made this much money. . . ."[70]

f. ETP Should Pay Civil Penalties and Disgorge its Unjust Profits

69. Under section 22 of the NGA,[71] as amended by the EPAct 2005, any person that violates the NGA or any requirement promulgated thereunder shall be subject to a civil penalty of not more than $1,000,000 per day per violation for as long as the violation continues.[72] Each sale of gas that ETP made, after the August 8, 2005 effective date of EPAct 2005, as part of its manipulation of fixed price gas at HSC constitutes a separate violation. ETP made 34 such sales on ICE on September 28, 2005, and thus is subject to a maximum civil penalty of $34,000,000 for its manipulations on this date. ETP also realized $40,286,727 in unjust profits, plus interest from its manipulations.[73]

---

[68] ETP Response to Request Nos. 2 and 19.

[70] *Id.*

[71] 15 U.S.C. § 717t-1.

[72] *See supra* at P 39.

[73] As noted above, the total civil penalties that the Commission proposes ETP should pay is $82,000,000 for its manipulations and the total amount of unjust profits that the Commission proposes ETP should disgorge is $69,866,966, plus interest. These amounts are for all of ETP's manipulations discussed in this order, including its

70. In the Commission's *Policy Statement on Enforcement*,[74] the Commission set forth the criteria we would apply to determine appropriate civil penalties to impose pursuant to the authority the Congress granted the Commission in EPAct 2005. The Commission began by noting that, as mandated by section 22 of the NGA, the seriousness of the offense is the first consideration in determining appropriate penalties.[75] The Commission noted a number of factors to be considered in judging the seriousness of the offense. These include the harm caused by the violation; whether the violation was the result of manipulation, fraud or deceit; whether the action was willful; whether the violation is a repeat offense and was the problem systematic or persistent and whether it lasted a long time; was senior management involved in the wrongdoing; how the wrongdoing came to light and whether senior management impeded the investigation; and what effect potential penalties would have on the financial viability of the company that committed the wrongdoing.[76]

71. The Commission noted in the *Policy Statement on Enforcement* that section 22 of the NGA also requires the Commission to take into account any effort the company made to remedy the violation in a timely manner. This consideration involves steps taken by the wrongdoer to prevent, monitor, and immediately stop misconduct, to report violations to the Commission, and to cooperate with the Commission's enforcement actions.[77] The Commission went on to state that internal compliance, which it defined at some length, and self-reporting are integral to considering the effort the company made to remedy the violation in a timely manner.[78]

72. In the *Policy Statement on Enforcement*, we stated that we expect cooperation with investigations – indeed, the NGA requires regulated entities to open their books and records to the Commission and its staff[79] -- but that we will give consideration to

---

manipulations of prices at HSC for months other than October 2005 and its daily price manipulations at Waha. A discussion of the reasons for the Commission's proposed civil penalties with respect to these other violations is set forth below.

[74] *Enforcement of Statutes, Orders, Rules, and Regulation*s, 113 FERC ¶ 61,068 (2005) (*Policy Statement on Enforcement*).

[79] 15 U.S.C. § 717g(b) (2000).

exemplary cooperation, that is, cooperation which quickly ends wrongful conduct, determines the facts, and corrects a problem.[80] We stated that cooperation must come early in the process and continue, and that no credit will be given if a company does no more than the minimum or delays cooperation, or engages in conduct that impedes the investigation.[81]

73. Application of these principles to ETP and its conduct dictates the maximum civil penalty. ETP's violations were serious. Market manipulation is harmful and inconsistent with free markets. One of the Commission's most important responsibilities is to exercise regulatory oversight to assure that wholesale energy markets are free, open and fair, where supply and demand may freely meet at prices uninfluenced by manipulation. Part of this exercise involves the determination in appropriate circumstances of whether facts show that a market participant manipulated wholesale energy prices subject to our jurisdiction and, upon making such a finding, the civil penalties that the wrongdoer should pay. In concluding that the maximum civil penalty is warranted, the Commission considered the following facts.

- ETP's violations caused harm. ETP harmed sellers of gas, including producers, royalty owners and taxing authorities, who received a percentage of the IFERC HSC index. ETP harmed counterparties of financial basis swap contracts. ETP also undermined the integrity of the wholesale gas market at HSC.

- ETP's violations were the result of manipulation, fraud or deceit. ETP manipulated market prices on September 28, 2005 by suppressing fixed price gas at HSC for prompt month delivery while being a net buyer of October gas priced at the IFERC HSC index. By suppressing price through large volume sales, ETP defrauded the market. ETP deceived the market by misrepresenting its position in the market as a net seller when it was really a net buyer of physical gas at HSC.

- ETP's actions were willful. As the September 26, 2005 conversation in which McCrea tells his trader that ETP's strategy "ought to push Ship down" demonstrates, ETP intended to suppress fixed price gas at HSC on September 28, 2005 and it took actions to execute that intent.

- Senior management was not only involved in the wrongdoing, senior management, in the person of McCrea, directed it.

---

[80] *Policy Statement on Enforcement,* 113 FERC ¶ 61,068 at P 26.

[81] *Id*.

- The wrongdoing was not self-reported. It came to light by a Hotline call that alerted staff to the trading activity at HSC on September 28, 2005 that was not driven by fundamental factors in the market.

- ETP is one of the largest publicly traded master limited partnerships in the country, with a market capitalization of approximately $8.6 billion. ETP, which reported $516,000,000 in net income for its fiscal year ending August 31, 2006,[82] is able to pay appropriate civil penalties warranted by its violations in this matter.

- ETP did not take steps to remedy its violations in a timely manner. In fact, it manipulated the market for fixed price gas at HSC in November 2005. The reason ETP's manipulations appear to have stopped is that ETP learned about staff's investigation of its trading practices in late November 2005.

- ETP's cooperation has not been exemplary and thus ETP is not entitled to a reduction in civil penalties based on its conduct in the investigation pertaining to its trading on September 28, 2005. ETP has not extended itself in a way that would merit a discount in the civil penalty or cooperated above the minimum level required by law.

74. Based on consideration of the foregoing factors, we believe that imposition of the full civil penalty authority of the Commission is appropriate. ETP's manipulation caused serious harm, involved fraud and deceit, was willful, involved senior management and was not self-reported. Accordingly, the Commission directs ETP to show cause why it should not pay civil penalties in the amount of $34,000,000 for its trading activity at HSC on September 28, 2005.

75. The Commission also directs ETP to show cause why it should not disgorge unjust profits. ETP realized $40,286,727 in unjust profits by reason of its violations. The amount disgorged must also include interest.[83]

2. ETP's Manipulated Fixed Price Gas at HSC in Eight Months From December 2003 Through November 2005: Summary and Overview

76. The Commission now turns to the relevant trade data that show that as early as December 2003, ETP suppressed monthly price at HSC to influence the IFERC HSC index to benefit the company's financial and physical positions in eight months. These manipulations were not as successful as ETP's manipulation on September 28, 2005. Nonetheless, these manipulations violated Market Behavior Rule 2, were significant in terms of the dollars involved and impacts on the market, and warrant the imposition of civil penalties and disgorgement of unjust profits.

77. For the period from December 2003 through November 2005, ETP suppressed fixed price gas at HSC for prompt month delivery on eight occasions in addition to the manipulation on September 28, 2005. The dates of ETP's additional manipulations are December 29, 2003 (for gas delivery in January 2004); September 24, 2004 and September 27, 2004 (for gas delivered in October 2004); November 23, 2004 and November 24, 2004 (for gas delivered in December 2004); December 28, 2004 (for gas delivered in January 2004); January 27, 28, and 31, 2005 (for gas delivered in February 2005); June 28, 2005 (for gas delivered in July 2005); August 29, 2005 (for gas delivered in September 2005); and November 28, 2005 (for gas delivered in December 2005). In other months in the December 2003 through November 2005 period, there is no current evidence that ETP manipulated monthly prices at HSC. ETP's total unjust profits from its manipulative activity at HSC, not counting its manipulative activity on September 28, 2005, discussed above, is $27,351,689. Chart 1 sets forth summary data regarding these violations. *See supra* at P 39.

a. ETP Suppressed Fixed Price Gas at HSC by a Consistent Strategy of Selling Gas at Low Prices

78. ETP manipulated fixed price gas at HSC in the eight relevant months using the same strategy that it employed on September 28, 2005. ETP would generally establish or frame a lower price by placing low price offers and often bids at HSC during bid week, frequently on the day the NYMEX Contract expired. ETP often placed fixed price bids, even though it did not buy fixed price gas on ICE. Instead, ETP used bids to establish or frame lower prices. A seller seeking to suppress price posts lower bids to induce traders to believe that the suppressed transactions prices are competitive, at least relative to outstanding bids. Further, during most of the eight remaining months that ETP manipulated the market, ETP's trades were concentrated during the last half hour of trading for the NYMEX Contract. This enabled ETP to ensure that the IFERC HSC index would settle lower relative to the settlement price of the NYMEX Contract. As ETP was always short HSC basis swaps, it traded to suppress prices. Typically for a market in which the NYMEX Contract was increasing, ETP would cap prices at HSC

such that the basis widened more from rising NYMEX Contract prices than declining prices at HSC.

79. ETP's manipulative trading varied slightly in October and December of 2004. In those months, ETP sold earlier in bid week and then reentered the market offering HSC down in conjunction with falling NYMEX prices, thereby preserving the basis differential. Bidding activity shows that at least a portion of the HSC market became accustomed to ETP's strategy because bids were placed at low levels in anticipation of the ETP's well offered gas, *i.e.,* gas offered at a relatively low price. The specific actions that ETP took to suppress fixed price gas at HSC are discussed in detail below.

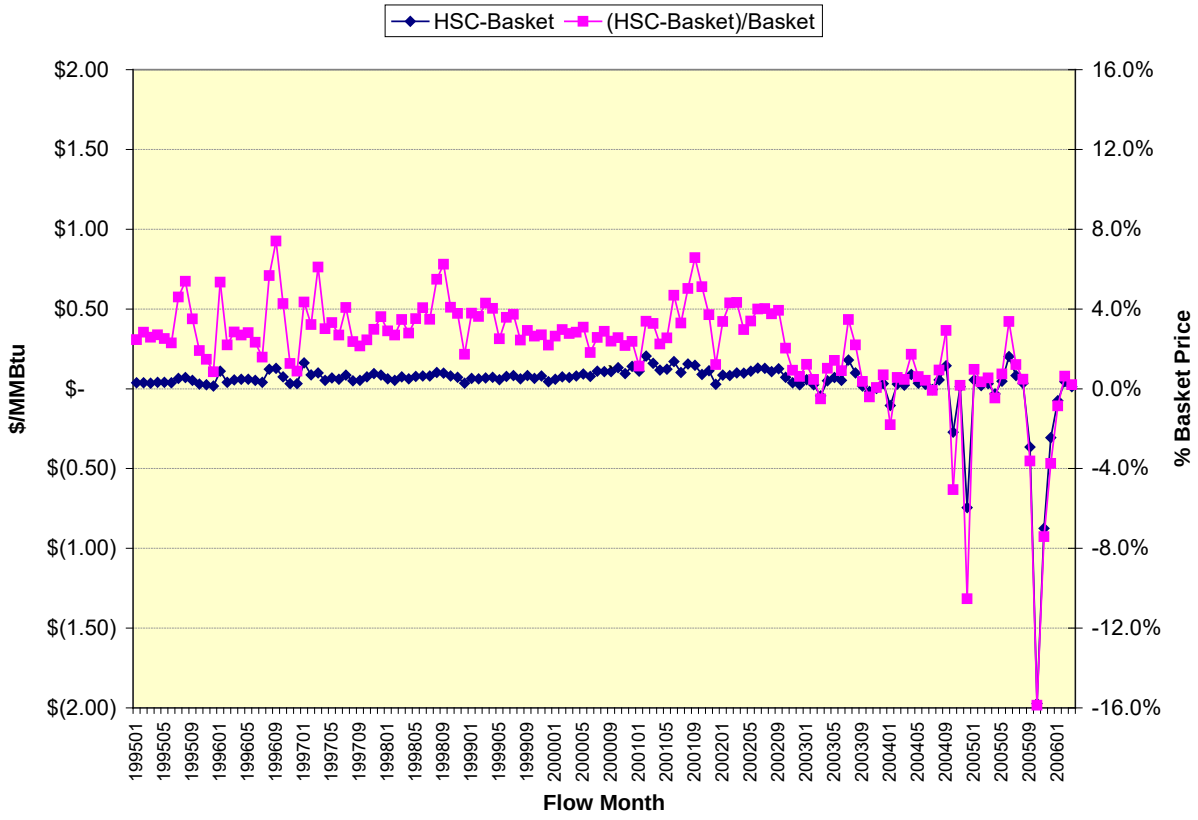
80. For the eight relevant months ETP lowered the HSC IFERC index price by an estimated 15 cents per month. Fifteen cents represents a small percent of commodity prices that often hovered near seven dollars per MMBtu, but it was a significant portion of the monthly HSC basis, the median value of which was $0.57 for the eight relevant months. ETP received unjust profits from these manipulations of $27,351,689.[84]

b. ETP Intended to Manipulate Fixed Price Gas at HSC

81. ETP intended to manipulate the price of prompt month fixed price gas at HSC for the eight relevant months. ETP sold gas at prices below levels suggested by objective reference points, such as HSC-Henry Hub basis at the time ETP began its offers and trades and prices at nearby pricing points. ETP consistently positioned its trading book to benefit from lower monthly prices at HSC and consistently profited from lower prices at HSC. ETP used a similar strategy in the relevant months to suppress price. ETP knew the actions it was taking would suppress fixed price gas at HSC to benefit its positions in the physical and financial markets.

c. ETP Had Power to Suppress Price at HSC

82. ETP dominated sales on ICE for prompt month, fixed price gas at HSC for the relevant months. As Chart 1 indicates, ETP comprised 100 percent of all such sales in two months, more than 90 percent of such sales in three others, more than 80 percent of such sales in two others and 55 percent of all such sales in one month. Month after month, ETP had the ability to suppress price by offering low and transacting at relatively low prices. Other potential sellers had little reason to actively sell gas in this suppressed market and bidders had no incentive to buy from sellers who were offering gas at higher prices. ETP's dominant position at HSC was enabled by its ownership of physical assets, namely, three major pipelines (HPL, ET Fuel, and Oasis Pipeline) and the Bammel



[84] ETP's manipulations in these eight months also place in context its manipulation on September 28, 2005, in which it lowered the HSC IFERC index by well over one dollar and ETP thereby unjustly realized $40,286,727.

storage facility, as well as its contractual relations with captive producers.

d. In the Eight Months, ETP's Manipulations Drove HSC Prices Lower Than the Historical Relationship of Nearby Prices

83. As noted above, prices at HSC long bore a stable relationship with prices at nearby South and East Texas points. This relationship, and the departure from it, is depicted in Chart 9, which compares the difference in monthly prices between HSC, on the one hand, and nearby pricing points (Katy, TENN Z0, TETCO-STX and NGPL-STX), on the other hand.

e. ETP's Manipulations Were Known to at Least Some Knowledgeable Market Participants

84. At least some knowledgeable market participants were aware that ETP's common practice was to begin trading at an artificially low price to establish a lower index price.

This group would not necessarily have included producers, who in any event, may have had little or no choice but to engage in transactions priced at the IFERC HSC index. In an October 26, 2004 conversation between Elsa Villareal, an HPL employee, and an unidentified trader, who was a buyer at HSC, Villareal told him, "You got a gift last month," referring to ETP's suppression of prices at HSC for October 2004 delivery. The unidentified trader responded that "ETC didn't get out and get the prices set early, like last month." The unidentified trader further stated "there hasn't been any, anybody to jump out there like ETP normally j-, I shouldn't have said that, like whoever is that jumps out there and gets it set, you know, starting yesterday, that hasn't happened this month."[85] The trader was referring to bid week trading for November 2004 as compared to October 2004.

85. A December 30, 2004 conversation between Ray at HPL and a trader identified as "Dan" further supports this conclusion. This conversation occurred before ETP's January 2005 acquisition of HPL. Dan noted prices at HSC, referring to prompt trading earlier in bid week. He asked whether those prices were due to "fundamental" factors. Ray replied as follows:

> RAY: No, no, it's, people -- there's a couple of players out there, in our opinion, I don't want to say their names on a recorded line 'cause it's probably not an appropriate thing to do, but some of the big players out there in Ship Channel, um, our opinion, our system has been that they swing pretty good wood on paper and, and they get out there doing fixed price things to, uh, support the position that they've got.
>
> DAN: Yeah, okay.
>
> RAY: Uh, now, we can't prove that, um, but it -- there have been months where's there's -- that kind of appearance --. The fact that there was so little fixed price trading this month means maybe they didn't do it. But, uh, I think the settle will be a lot closer to market's expectation than it was, say, last month, when we had that big run-up.[86]

When Ray states that they "swing pretty good wood on paper," he refers to large physical

[86] Audio digital recording/Wav file of Douglas Ray WAV302 (Dec. 30, 2004) (Ray WAV302 (Dec. 30, 2004)) (provided to Commission staff by ETP, the current owner of HPL).

trades, *i.e.,* "swing[ing] pretty good wood," affecting financial positions, or "paper." He then says "and they get out there doing fixed price things to, uh, support the position that they've got." This was indeed ETP's manipulative strategy.

86. In another October 2004 conversation about October 2004, an HPL employee, John Peyton, is told by a second trader named "Danny," "I mean, hell, Ship Channel is about as quiet as it could possibly be. … The guys that were selling the fixed price early on last month just obviously aren't doing it now." After Peyton agrees, Danny adds, "They definitely, uh, jumped out of the game a little bit." Peyton replies, "Yeah. So they must not have been too happy with it or maybe they made so much money they are all playing golf." Danny responds, "If they, uh, if that's who I think it is, then everybody knows who it was and they did what they have been doing for every month for the last year then yeah they hit a home run last month."[87]

87. In a November 22, 2004 conversation between Villareal and a trader identified as "Morgan," Morgan states, "[Y]ou know that Ship things tend to get skewed at the end."[88] ETP's manipulative strategy was to suppress price at HSC in the last half hour of trading on the day of the expiration of the NYMEX contract.

88. In a December 1, 2004 conversation between Gary Hanks, an HPL trader, and a trader identified only as "Chris,"[89] Chris observes that "I think overwhelmingly the trend in the last 18 months has been where Ship Channel has been a dog. If you sold the basis I think you made money probably 14 out of 16 months." ETP consistently sold HSC basis during this period and those positions benefited from its suppression of prices at HSC, prices that were "a dog." Hanks replied, "I think you are probably right. Of course you know we, we ahh buy all our gas pretty much on a Ship Channel basis and sell it to the interstates but we hedge it all." Chris agreed that "You lock in the spreads." Hanks told him, "Yeah, it doesn't do anything for me."[90] As this conversation reveals, market participants often hedged their positions at HSC. For this reason, ETP could be on the profitable side of short basis positions at HSC month after month; its counterparties had hedged their positions, at least in some instances, and thus were indifferent to price

[89] Audio digital recording/Wav file of Gary Hanks, WAV82 (Dec. 1, 2004) (Hanks WAV82 (Dec. 1, 2004) (provided to Commission staff by ETP, the current owner of HPL).

[90] *Id.*

outcomes at HSC. Chris observed, however, that "these producers they're going to hate it[,]" referring to producers who sell gas at prices determined by the HSC IFERC and who accordingly suffer losses from price suppression at HSC. The last comments of Hanks – "You know, cause so one of the guys was telling me that one of his, his people, his consumers had said 'How do I protest this and who do I sue?' And I said well I guess you better call IFERC or Platts. I don't know 'cause it has nothing to do with us." – underscores the view in the marketplace in the autumn and early winter of 2004 that natural gas trading at HSC was manipulated.[91]

f. ETP Manipulated Monthly Gas at HSC for Eight Months From December 2003 through November 2005

89. The Commission now presents an analysis of ETP's monthly trade activity at HSC for the eight months at issue. This analysis demonstrates how ETP manipulated price and what it gained from that manipulation.[92]

i. January 2004

90. On December 29, 2003, the NYMEX Contract expiration day, ETP sold approximately 2.1 Bcf of fixed-price gas for January 2004 deliveries. The sales were made on and off ICE. ICE sales were between 2:28 p.m. and 3:10 p.m., ET at a weighted average price of $5.71 within a range of $5.65 to $5.74. ETP's sales on ICE represented 100 percent of monthly volumes for the platform. ETP was short index gas of 4.0 Bcf, mitigating unjust profits somewhat. The IFERC HSC index for January 2004 was $5.71.

91. During ETP's sales, ICE swap[93] prices were approximately $6.15. This implies an

---

[91] *Id.*

[92] The analysis in this section is based on ETP's Responses to Request Nos. 62-65 (as revised on Dec. 27, 2006) and Request No. 76, as well *Platts Inside FERC Gas Monthly Index* and historical data from ICE, *available at*: https://www.theice.com/marketdata/naNaturalGas/naNatGasHistory.jsp.

[93] ICE swaps are also referred to as "NYMEX "look alikes." The ICE swap is a financial product traded on ICE that is largely identical to the NYMEX Contract, except that the ICE swap does not require the parties to make or take physical delivery of gas. The settlement price of the ICE swap is equal to the settlement price of the NYMEX Contract. *See* ICE, "Product Details for Natural Gas Swap, Fixed for NYMEX LD1," https://www.theice.com/naturalgas.jhtml. As such, the ICE swap trades at nearly the same price as the NYMEX Contract. Staff used these instruments in the analysis, as opposed to NYMEX Contracts because ETP generally trades ICE swaps instead of NYMEX Contracts, and the ICE data is more readily available.

HSC basis of ($0.44) when compared to ETP's average weighted price. On December 24, ETP sold HSC basis swaps at ($0.30). There were basis bids on December 29, just prior to ETP's fixed price sales of ($0.30). Accordingly, staff estimates ETP's activity widened the HSC basis by $0.14, the difference between the IFERC HSC index price of $5.71 and the $5.85 price implied by the difference between the ICE swap price of $6.15 and the price at which ETP sold HSC financial basis of ($0.30).

92. Additional evidence of the effect of ETP's trading is the decoupling that occurred between the IFERC HSC index and Katy, TENN ZO, TETCO-STX and NGPL STX, ("Benchmark Prices"). For January 2004, the price difference between the IFERC HSC index and the average of the Benchmark Prices compared to the long term difference was ($0.19).

93. ETP unjustly profited by $913,494 or $618,374 netted for selling physical gas at a lower price. ETP's short HSC basis swap position for January 2004 was (10,462,500) MMBtus. As noted, staff estimates that ETP sales activity suppressed the IFERC HSC index by at least $0.14. A reasonable measure of ETP's unjust profits from its HSC basis swaps is the product of 10.5 Bcf and $0.14 or $1,464,750. This figure nets to $1,169,630. Offsetting this gain would be a loss of $551,256 equal to the short physical position multiplied by $0.14.

ii. October 2004

94. ETP sold next-month gas at HSC on two dates in October 2004. On September, 24 2004, ETP sold approximately 1.86 Bcf of fixed price gas for October 2004 deliveries. The sales were made on ICE from 8:57 a.m. to 11:15 a.m., ET at a weighted average price of $5.27.

95. On September 27, the NYMEX expiration date, ETP sold an additional 5.8 Bcf of fixed-price gas for October deliveries. The sales were made on ICE from 8:34 a.m. to 2:26 p.m., ET at a weighted average price of $5.06. ETP's trades on these days represented 91 percent of volumes on ICE for October 2004.

96. The volume-weighted average price of all ETP sales was 8.6 Bcf and $5.12, respectively. ETP was long physical gas, primarily GasDaily hedged to IFERC HSC with index swaps in the amount of 3.3 Bcf. The IFERC HSC index for October 2004 was $5.11 and based on a volume of 14.1 Bcf.

97. When ETP sold on multiple days it is difficult to use the IFERC HSC price as a benchmark, and staff instead used a weighted average for the two days. During ETP's sales on September 24th, ICE swap prices ranged from approximately $5.33 to $5.39. The last basis trade on ICE prior to ETP's sales was on the 23rd and at ($0.12). Further, ETP sold 3.9 Bcf of basis on the 23rd at ($0.11). The NYMEX average price of $5.35 and the basis values imply an implicit HSC price of $5.24 on average. Thus ETP's fixed

price sales on the 24th at $5.27 did not contribute to the basis widening.

98. On September 27, ICE swap prices were approximately $5.25 from 8:34 a.m. to 11:15 a.m., ET. Adding the basis value of ($0.12) produces an implied HSC price of $5.13. Thus ETP's sales on September 27 at $5.06 contributed to the widening of the basis by $0.07. ETP's weighted average effect on the HSC price was ($0.05). For October 2004 the price difference between the IFERC HSC index and the average of Benchmark Prices was ($0.37).

99. ETP unjustly received $1,639,128 or $1,207,003 netted for selling physical gas at a lower price. ETP's short HSC basis swap position for October 2004 was (29,527,500) MMBtus. As noted, ETP suppressed the IFERC HSC index by $0.05. ETP's unjust profits from its HSC basis swaps is the product of 29.5 Bcf and $0.05 which is $1,476,375. This figure netted for fixed price sales is $1,044,250. Similarly, multiplying ETP's long physical position of 3.3 Bcf by $0.05 produces an additional gain of $162,753.

iii. December 2004

100. ETP sold next-month gas at HSC in December 2004 on two dates. On November 23, 2004, ETP sold on ICE approximately 4.03 Bcf of fixed price gas for December deliveries from 1:58 p.m. to 3:48 p.m., ET with a price range of $6.45 to $6.28 and at a weighted average price of $6.40.

101. On November 24, 2003, the NYMEX expiration day, ETP sold on ICE approximately 6.82 Bcf of fixed-price gas for December deliveries at prices ranging from $6.28 to $6.16. 1.86 Bcf of these sales were on ICE from 8:11 a.m. to 11:17 a.m. at a weighted average price of $6.24.

102. ETP's total sales for the two days were 10.85 Bcf at a weighted average price of $6.28. ETP's sales represented 88 percent of sales on ICE. ETP was long physical gas priced at IFERC HSC, including volumes hedged at GasDaily with index swaps, of 7,017,860 MMBtu. The Platts IFERC HSC index and volume for December 2004 were $6.33 with associated volume of 16.74 Bcf.

103. On November 23, ICE swap prices were approximately $6.81. These prices ranged from $6.87 at 1:58 PM to $6.74 at 3:48 p.m. The last basis trade on ICE prior to ETP's sales was on November at ($0.35). The NYMEX and basis values imply HSC prices of $6.46 on average. Accordingly, ETP's sales that day at $6.40 were $0.06 below prevailing market prices.

104. On November 24, ICE swap prices were approximately $6.71. These prices ranged from $6.68 at 8:11 a.m. to $6.74 at 11:17 a.m. Again adding the basis value, prior to ETP's sales, of ($0.35) to the ICE swap prices provides an implied HSC price of $6.36.

Thus, ETP's sales on December 24 at $6.24 likely contributed to the widening of the basis by $0.12 on average.

105. ETP's weighted average effect on the HSC price based on the previous analyses was $0.10. For December 2004, the price difference between the IFERC HSC index and the average Benchmark Prices was ($0.81). Most of the price difference is attributable to the NYMEX run up of over $1.00 on November 24 after ETP was out of the HSC market.

106. ETP unjustly profited by $2,109,186 or $1,132,886 netted for selling physical gas at a lower price. ETP's short HSC basis swap position for December 2004 equaled (14,074,000) MMBtus. As noted, ETP suppressed the IFERC HSC index by $0.10. ETP's unjust profits from its HSC basis swaps is the product of 14.1 Bcf and $0.10 which is $1,407,400. This figure nets to $431,000. Similarly, multiplying ETP's long physical position of 7.0 Bcf by $0.10 produces an additional gain of $701,786.

iv. January 2005

107. On December 28, 2004, the NYMEX expiration day, ETP sold approximately 3.1 Bcf of fixed-price gas for January 2005 deliveries. The sales were made at a weighted average price of $5.75. 1.0 Bcf of the sales were made on ICE from 2:17 p.m. to 3:10 p.m., ET at an average price of $5.72 and representing 100 percent of sales of fixed price gas for January 2005 on ICE. The remainder of the sales were over-the-counter. ETP was long physical gas priced at IFERC HSC of 21,616,611 MMBtus. The IFERC HSC index for January 2005 was $5.75 and based on a volume of 4.96 Bcf.

108. During ETP's sales, ICE swap prices were approximately $6.25. This implied a basis of ($0.50) when compared to ETP's average weighted sales price. As a comparison, on December 28, ETP sold HSC financial basis at a price of ($0.43). ETP's activity thus widened the HSC basis by $0.07, the difference between of the IFERC HSC index price of $5.75 and the price implied by the difference between the ICE swap price of $6.25 and ($0.43), the price at which ETP sold basis. The January 2005 price difference between the IFERC HSC index and the average of Benchmark Prices was ($0.03).

109. ETP unjustly profited by $1,849,583 or $1,636,783 netted for selling physical gas at a lower price. ETP's short HSC basis swap position for January 2005 was (4,805,000) MMBtus. As noted, ETP suppressed the IFERC HSC index by $0.07. ETP's unjust profits are the product of 4.9 Bcf and $0.07, which is $336,350. This figure nets to $123,550. A reasonable measure of ETP's unjust profits from its net purchases of physical gas is the product of 21.6 Bcf and $0.07, which is $1,513,233.

v. February 2005

110. ETP sold next-month gas at HSC for February 2005 on three dates. On January 27, 2005, the NYMEX expiration day, ETP sold approximately 5.3 Bcf of fixed-price gas for February 2005 deliveries. The sales were made at a weighted average price of $5.76. 1.5 Bcf of the sales were made on ICE from 2:20 p.m. to 3:02 p.m., and also at an average price of $5.76, and representing 55 percent of sales of fixed price gas for February 2005 on ICE. The remainder of the sales were over-the-counter. On January 28 and 31, ETP sold an additional 2.0 Bcf at weighted average prices of $5.69 and $5.64, respectively.

111. In total, ETP's fixed price sales at HSC for February 2005 delivery were 7.3 Bcf at a weighted average price of $5.74. The IFERC HSC index for February 2005 was $5.74 and based on a volume of 16.5 Bcf. ETP was a net purchaser at the IFERC HSC in February 2005 of 27.5 Bcf.

112. During ETP's sales on January 27, ICE swap prices were approximately $6.30. This implied a basis of ($0.56) when compared to ETP's average weighted sales price. On January 26, ETP sold HSC basis swaps at a price of ($0.51). Accordingly, ETP's activity widened the HSC basis by $0.05, the difference between the IFERC HSC index and the price implied by the difference between the ICE swap price of $6.30 and the price at which ETP sold basis of ($0.51). Market comparisons on January 28 and January 31 are not possible because: (1) ETP's trades were not on ICE; (2) ETP did not provide time stamps for market activity off of ICE and (3) the NYMEX Contract had expired. The February 2005 price difference between the IFERC HSC index and the average of Benchmark Prices was ($0.10).

113. ETP unjustly profited by $2,349,571 or $2,062,386 netted for selling physical gas at a lower price. ETP's short HSC basis swap position for February 2005 was (19,457,428) MMBtus. As noted, ETP's sales activity suppressed the IFERC HSC index by $0.05. ETP's unjust profits from its HSC basis swaps is the product of 19.5 Bcf and $0.05, which is $972,871. This figure nets to $685,686. Similarly, multiplying ETP's long physical position of 27.5 Bcf by $0.05 produces an additional gain of $1,376,700.

vi. July 2005

114. On June 28, 2005, the NYMEX expiration day, ETP sold approximately 13.2 Bcf of fixed-price gas for July 2005 deliveries. The sales were made at a weighted average price of $6.87. 9.5 Bcf of the sales were made on ICE, also at a weighted average price of $6.87, from 2:22 p.m. to 2:33 p.m., ET and represented 81 percent of sales of fixed price gas for July 2005 on ICE. The remainder of the sales were over-the-counter. ETP was long 9.5 Bcf at the IFERC HSC in July 2005. The Platts IFERC HSC index for July 2005 was $6.88 and based on a volume of 25.2 Bcf.

115. During ETP's sales, ICE swap prices were approximately $6.98. This implied a basis of ($0.11) when compared to ETP's average weighted sales price. As a comparison, on June 28, ETP sold HSC basis swaps at a price of ($0.045). Accordingly, ETP widened HSC basis by $0.055, the difference between of the IFERC HSC price of $6.88 and the price implied by the difference between the ICE swap price of $6.98 and the price at which ETP sold basis, ($0.045).

116. A comparison to similar points is not entirely consistent with this analysis. The July 2005 price difference between the IFERC HSC index and the average of Benchmark Prices was ($0.03). This discrepancy is due to one of the similar points, Texas Eastern, South Texas being unusual low for the month. Excluding this aberration, and making a comparison only to Katy, Tennessee South Texas and NGPL South Texas, reveals a difference of ($0.06).

117. ETP unjustly profited by $1,766,692 or $1,039,086 netted for selling physical gas at a lower price. ETP's short HSC basis swap position for July 2005 was (22,610,848) MMBtus. As noted, ETP's sales activity suppressed the IFERC HSC index by $0.055. ETP's unjust profits from its HSC basis swaps is the product of 22.6 Bcf and $0.055 or $1,243,597. This figure nets to $515,991. ETP's unjust profits from its net purchases of physical gas is the product of 9.5 Bcf and $0.055, which is $523,096.

vii. September 2005

118. On August 29, 2005, the NYMEX expiration day, ETP's subsidiary, HPL, sold approximately 3.9 Bcf of fixed-price gas in fourteen separate transactions on ICE for September 2005 delivery at a weighted average price of $9.61. The sales were on ICE from 2:25 p.m. to 2:34 p.m., and represented 100 percent of sales of fixed price gas on ICE for September 2005 delivery. ETP was a net purchaser of physical gas at IFERC HSC for September 2005 of 5.1 Bcf. The IFERC HSC index for September 2005 was $9.72 on a volume of 7.9 Bcf.

119. Hurricane Katrina hit the coast of Louisiana the morning of August 29, 2005. The hurricane significantly disrupted production in the Gulf of Mexico and a significant number of on-shore gathering and pipeline operations in Louisiana. According to Natural Gas Intelligence (NGI), regarding trading at Henry Hub:

> After opening at $11.20 on Monday, September natural gas got as high as $11.70, before exploring lower on profit-taking. After bouncing off $10.65, the prompt month expired at an all time high of $10.847, up $1.055 from Friday's settle.[94]

Notwithstanding this volatility, a comparison of ETP's trades to the price of ICE swaps

[94] Natural Gas Intelligence, Daily Gas Price Index, Aug. 30, 2005.

and prevailing HSC financial basis levels shows an intention and effect by ETP to suppress prices at HSC, thus widening the basis and benefiting ETP's financial positions and reducing the cost of physical purchases to be priced at the IFERC HSC index.

120. ETP's initial HSC trade at 2:25 p.m. was at $9.61. ICE swap prices were approximately $10.81. These prices imply an HSC basis of ($1.20). ETP's final trade at 2:34 p.m. was priced at $9.62. ICE swaps at 2:34 p.m. were trading at approximately $10.83, implying an HSC basis of ($1.21). As a comparison to the two implied pricing points, the final HSC basis transaction on August 29, just prior to fixed price sales, was a sale by ETP at ($0.75) at 1:30 p.m. Accordingly, staff estimates ETP's activity widened the IFERC HSC index by $0.46 or the difference between the basis of ($1.21) implied by ETP's average sales prices of $9.61 and the price of ETP's last basis trade of $0.75. For pricing context, the September 2005 price difference between the IFERC HSC index and the average Benchmark Prices was ($0.49).

121. ETP unjustly profited by $5,668,726 or $3,894,368 netted for selling physical gas at a lower price. ETP's short HSC basis swap position for September, 2005 was (7,241,520) MMBtus. ETP was long physical gas at IFERC HSC equal to 5,081,797, including daily transactions hedged to the IFERC HSC index. As noted, ETP's sales activity suppressed the IFERC HSC index by $0.46. ETP's unjust profits from its HSC basis swaps is the product of 7.2 Bcf and $0.46 which is $3,331,099. This figure nets to $1,556,741. A reasonable measure of ETP's gain from its net purchases of physical gas is the product of 5.1 Bcf and $0.46, which is $2,337,627.

viii. December 2005

122. ETP's sales of fixed-price gas for prompt-monthly delivery at HSC on November 28, 2005 also lowered the IFERC HSC index and widened the HSC basis. ETP's sales lowered the IFERC HSC index by $0.37. ETP engaged in 31 sales on ICE on this date. Fixed-price gas for prompt-month delivery at HSC traded at a price of $8.25 before ETP began trading. ETP sold roughly 9 Bcf of fixed-price gas in roughly 20 minutes beginning at 2:06 p.m. ETP's first sale on November 28, 2005 was at 2:06 p.m. for $7.80. ETP's remaining sales during the day were at increasing prices, with the last sale at its highest price of $7.87. ETP's weighted-average sales price for transactions on ICE for November 28, 2005 was $7.82. Again, ETP was the dominant seller in the market, accounting for over 95 percent of total sales volume on ICE, and effectively set the IFERC HSC index, which settled at $7.88, $0.37 lower than when ETP began trading.

123. The last HSC basis swap that traded prior to ETP's first sale on November 28, 2005 was at ($3.00) as compared to a settlement of ($3.30) thus implying ETP was responsible for a reduction of $0.30. This amount is consistent with the amount by which fixed–price sales and the IFERC HSC index were reduced.

124. Two transactions, the first a fixed price deal at $8.25 and the second a basis deal at

($3.00), along with the bids of $8.10, all of which preceded ETP's trading on November 28, 2005, are appropriate benchmarks for determining market value. Trading on November 28, 2005 did not progress along a classical, downward slope. Nonetheless, it became disconnected in value from prior transactions. The result that ETP achieved was lower prices to benefit its basis swaps and its repurchase of fixed price gas in December.

125. ETP unjustly profited by $18,469,116 or $15,760,802 netted for selling physical gas at a lower price. ETP's short HSC basis swap position for December 2005 was (45,181,360) MMBtus. ETP was long physical gas at IFERC HSC equal to 16,382,361. Given that ETP sales activity suppressed the IFERC HSC index by $0.30, a reasonable measure of ETP's unjust profits from its HSC basis swaps is the product of 45.2 Bcf and $0.30 which is $13,554,408. This figure nets to $10,846,094. A reasonable measure of ETP's gain from its net purchases of physical gas is the product of 16.4 Bcf and $0.30, which is $4,914,708.

g. ETP Should Pay Civil Penalties and Disgorge Unjust Profits

126. As discussed *supra* at P 70-73, the Commission set forth criteria in the *Policy Statement on Enforcement* that guide assessment of civil penalties. We now apply these criteria to ETP's trading activity for the eight months discussed above.

- ETP's violations caused harm for the same reasons we cited in our discussion of civil penalties for ETP's September 28, 2005 manipulations. Counterparties who sold gas to ETP and who were on HSC financial basis contracts with ETP realized less revenue or greater expense than they would have realized absent the violations.

- ETP's violations were the result of manipulation, and thus strongly implicate the Commission's authority to help assure that wholesale energy markets are free and open.

- ETP's actions were willful. ETP used a similar strategy for the eight months discussed above. It set up its book to benefit from its suppression of price at HSC and it benefited from its trading strategy. ETP intended to manipulate fixed price gas at HSC in the referenced months.

- Senior management of ETP was aware of ETP's trading strategy. The strategy was executed for a two year period, and ETP received substantial unjust profits from its manipulations. The September 26, 2005 telephone call of McCrea shows that ETP's senior management knew that "push[ing] Ship down," was a part of the company's trading strategy for selected months. This is not a case where one, or even a handful of employees, embarked on a practice of which senior management may plausibly claim

ignorance.

- ETP did not self-report its violations.

- ETP's cooperation was not exemplary and hence does not qualify ETP for a discount of the civil penalty. ETP impeded the investigation at one point by providing incorrect data responses to staff regarding the relevant eight months. After conferences with staff, ETP revised this data and after considerable delay, responded with corrected data.

- ETP did not take steps to remedy its violations in a timely manner. It continued to manipulate the market at HSC for two years.

127. Based on a consideration of the foregoing factors, we believe that imposition of the full civil penalty authority of the Commission is appropriate.[95] ETP's manipulation in the eight relevant months caused serious harm, involved manipulation, was willful, involved senior management and was not a self-report. Accordingly, the Commission directs ETP to show cause why it should not pay civil penalties in the amount of $45,000,000 for its trading activity at HSC in August and November 2005.

128. ETP realized $27,351,689 in unjust profits from its manipulations. The Commission directs ETP to show cause why it should not pay this amount, plus interest.

B. ETP Violated Market Behavior Rule 2 When it Manipulated Daily Prices at the Waha and Permian Hub

129. ETP manipulated the price of fixed price gas at Waha for next daily delivery (daily gas). ETP sold fixed price daily gas at Waha on December 23, 2005 and December 28, 2005, and bought back similar volumes of daily gas at the Gas Daily index on the same days. ETP had no legitimate business purpose to execute these transactions. However, by selling fixed price daily gas on the noted dates, ETP suppressed the price of that gas, thereby increasing the value of short index swaps. The Commission proposes that ETP pay a civil penalty in the amount of $3,000,000 and that ETP disgorge the benefit it

[95] As noted, *supra* P 36, the Commission has civil penalty authority in the amount of $1,000,000 per day per violation under the NGA for violations that occurred on or after the August 8, 2005 enactment date of EPAct 2005. Accordingly, the Commission has authority to assess civil penalties against ETP only for the manipulations discussed in this section of the order that occurred on August 28, 2005 and November 28, 2005. ETP made a total of 45 sales on ICE on these days, all of which were violations of Market Behavior Rule 2. Each trade was a manipulation of the market at HSC on those respective dates and thus each trade was a violation of the Commission's Market Behavior Rule 2.

derived from these manipulations, which was $2,228,550, plus interest.

1. December 23, 2005 for December 24 to 27, 2005

130. Prices at Waha and Katy had been trading nearly flat to one another in the days leading up to December 23, 2005, but the basis widened dramatically for December 24 to December 27, as indicated by Chart 10 below.

Chart 10

Flow Dates	Waha	Katy	Basis	Basis Change From Previous Day
12/14/05	$13.27	$13.51	$.25	NA
12/15/05	$13.04	$12.97	($.07)	($.32)
12/16/05	$12.22	$12.42	$.20	$.27
12/17 -19/05 (weekend package)	$11.62	$11.82	$.20	0
12/20/05	$11.91	$12.17	$.26	$.06

12/21/05	**$11.90**
12/22/05	**$11.35**
12/23/05	**$10.51**
12/24/05 to 12/27/05	**$8.34**

Source: Gas Daily

131. On December 23, 2005 gas prices fell at major trading points across the country.[96]

[96] *Natural Gas Intelligence*, an industry publication, reported for December 24 to 27, packages of gas that "with disappearing heating load and the previous day's screen

Nonetheless, the divergence of price between Waha and Katy on this date was unusual and extraordinary. From September 1, 1997 through September 1, 2006, approximately 2,200 trading days, Waha ended 80 cents lower than Katy compared to the preceding trading day, only five times, or roughly 0.25 percent of trading days in this period.

132. Company traders had previously discussed the relationship between Waha daily prices to the Waha-Katy basis. For example, on October 8, 2004, Luke Fletcher, an ETP trader, told Mark Mandl, an Oasis Pipeline dispatcher, that "Waha is going out well offered minus – yeah, and uh kind of set up for some good wide spreads."[97]

133. The separation of Waha and Permian relative to Katy pricing was exacerbated by ETP's activity at both points on December 23, 2005. ETP began sales on ICE of Waha fixed price daily gas for the 24th to 27th at 8:48 a.m. with a 10,000 MMBtu/d sale to Astra at $8.05. From 8:48 a.m. to 9:33 a.m., ETP was involved on ICE in fixed price transactions totaling sales of 584,000 MMBtus at a weighted average price of $8.06 and a purchase of 56,000 at $8.44. ETP's net short position was (528,000) at $8.02. The ICE average price was $8.16. ETP's activity represented 56 percent of transactions on ICE for Waha.

134. In addition, at the El Paso Waha Pool, a Permian pricing point, ETP from 8:48 a.m. to 10:32 a.m. sold 300,000 MMBtus at $8.01 and from 10:58 a.m. to 11:48 a.m. purchased 94,800 MMBtus at $8.54. ETP's net position was (205,200) at $7.77. The ICE average price was $8.22. ETP's activity represented 75 percent of ICE transactions at El Paso Waha.

135. ETP's total, net fixed price position for December 24, 2005 to December 27, 2005 for all trades on and off ICE for Waha and El Paso Waha Pool was (720,400) MMBtus, the total of twenty two sales transactions of 884,800 MMBtus at $8.04 and five purchase transactions of 164,400 MMBtus at $8.43. Total purchases and sales were 1,049,200 compared to Platts *Gas Daily* volumes for the two points of 1,536,000 MMBtus.

136. ETP covered its net short position by purchasing index or GasDaily gas. The index price for December 24 to December 27 was $8.18. On December 23, ETP purchased index volumes at Waha of 538,248 MMBtus. In addition, ETP had pre-existing arrangements for 36,374 MMBtu/d of Waha, GasDaily priced gas which totaled 145,496 MMBtus for the four day period. Accordingly, total index purchases were 683,744 MMBtus, roughly equal to the short fixed price position of (720,400) MMBtus.

---

plunge exacerbated by the extra reduction of industrial demand associated with a long holiday weekend, cash prices tanked by more than a dollar — more than $2 in quite a few cases — across the board Friday."

[97] Fletcher WAV198B (Oct. 8, 2004).

In effect, the evidence shows that ETP cycled its fixed trades into index gas, in the process misrepresenting itself to the marketplace as a net seller while actually having a flat position.

137. ETP benefited from this activity by virtue of short positions in Permian and Waha GasDaily index swaps. A short position in this context means that the holder, ETP, is buying the GasDaily index at Waha and selling the Inside FERC index at Waha. Thus, ETP's short index position profited from a falling GasDaily price. ETP has short GasDaily index positions of (337,500) MMBtu/d at Waha and (285,000) MMBtu/d at Keystone.[98] A good measure of ETP's benefit from their cycling of trades on December 23 is the increased differential to Katy for both points, Waha and Permian, times the daily short index swap positions times the number of days. This approach takes into account the generally falling gas prices for that day. It attributes to ETP price suppression on December 23, 2005 at Waha of $0.87 out of a total price decline that day of $2.37 at Waha and it attributes price suppression to ETP that day at Permian of $0.67 out of a total price decline that at Permian of $2.17. As such, the unjust profits that ETP accrued from its December 23, 2005 trading at issue at Waha and Permian for the four referenced days by reason of its trading activity that appears to have been manipulative is determined as follows: (4 days)*($0.87/MMBtu)*(337,500 MMBtu/d) or $1,174,500 at Waha; and (4 days)*($0.67/MMBtu)*(285,000 MMBtu/d) or $763,800 at Permian for a total of $1,938,300.[99]

2. December 28, 2005 for December 29, 2005

138. Daily natural gas prices were falling on December 29, 2005 in the range of $0.05 to $0.85 with the largest declines in the West. Charts 12 and 13 compare Waha and El Paso Permian to Katy.

[98] ETP Response to Request No. 26, Excel file "December2005.test.xls." Per Platts' methodology, the El Paso Keystone Station south to Waha is one of three pools that make up the index point, El Paso, Permian Basin, for daily and monthly surveys.

[99] ETP Response to Request No. 62 (as revised on Dec. 27, 2006). ETP does not distinguish between Waha and El Paso Waha in its transactional reporting per ETP Response to Request No. 64. *See also* ICE Natural Gas Index Historical Data, *available at:* https://www.theice.com/marketdata/naNaturalGas/naNatGasHistory.jsp.

Chart 12

Flow Dates	Waha	Katy	Basis	Basis Change From Previous Day

12/29/05	$7.29	$7.79	$.50	$.44

Source: GasDaily

139. As on December 23, 2005, ETP's activity on December 28, 2005 contributed to the separation of the Waha and Permian relative to Katy pricing. While prices also fell in parts of the country on this date, the drop at Waha relative to Katy was again unusual and extraordinary. From September 1, 1997 through September 1, 2006, Waha ended 40 cents lower than Katy, compared to the previous trading day, only 16 times, or approximately 0.75 percent of the trading days in this period.

140. ETP began sales on ICE of Waha fixed price gas for December 29, 2005 on December 28, 2005 at 8:35 a.m. with a 10,000 MMBtu/d sale to BP Energy at $7.25. From 8:35 a.m. to 10:25 a.m., ET ETP made fixed price sales of 183,500 MMBtu/d at a weighted average price of $7.21 and bought 55,000 MMBtu/d at $7.28. ETP's weighted average position was (128,500) at $7.18. The ICE average price was $7.26. ETP's transactions represented 59 percent of ICE trades.

141. At the El Paso Waha Pool, ETP on ICE from 8:37 a.m. to 10:20 a.m. sold 150,000 MMBtu/d at $7.20 and purchased 12,600 MMBtu/d at $7.30. ETP's net position was (137,400) at $7.19. The ICE average price was $7.28. ETP's transactions represented 64 percent of ICE trades.

142. ETP's net fixed price position for December 29, 2005 for all Waha and El Paso Waha trades on and off ICE was (286,900) MMBtus, the total of thirty sales transactions of 368,500 MMBtus at $7.23 and twelve purchase transactions of 81,600 MMBtus at $7.26. Total purchase and sales were 450,100 compared to Platts volumes for the two points of 1,432,000 MMBtus.

143. ETP largely covered its net short position by purchasing index or GasDaily gas. The index price for December 29, 2005 was $7.27. On December 28, 2005, ETP

purchased index volumes of 213,962 MMBtus. In addition, ETP had from pre-existing arrangements 36,374 MMBtu/d of GasDaily priced gas, thus totaling 250,336 MMBtus of index gas for December 29, 2005, which is similar to the short fixed price position of (286,900) MMBtus.

144. ETP benefited by virtue of short positions in Permian and Waha GasDaily index swaps. A good measure of ETP's benefit from their cycling of trades on December 28, 2005 is the increased differential to Katy for both points, Waha and Permian, times the daily short index swap positions. This approach takes into account the generally falling gas prices for that day. It attributes to ETP price suppression on December 29, 2005 at Waha of $0.48 out of a total price decline that day of $0.72 at Waha and it attributes price suppression to ETP that day at Permian of $0.45 out of a total price decline that day of $0.69 at Permian. As such, the unjust profits that ETP accrued from its December 29, 2005 trading at issue at Waha and Permian for December 29, 2005 by reason of its trading activity that appears to have been manipulative is determined as follows: ($0.48/MMBtu) (337,500 MMBtus) or $162,000 at Waha and ($0.45/MMBtu) (285,000 MMBtus) or $128,250 at Permian for a total of $290,250.[100]

145. The total unjust profits to ETP from its manipulations at Waha on December 23, 2005 and December 28, 2005 are summarized in Chart 14.

Chart 14

	Dec. 23 Trading	Dec. 29 Trading	Total
Waha	$1,174,500	$162,000	**$1,336,500**
Permian	$763,800	$128,250	**$892,050**
Total	**$1,938,300**	**$290,250**	**$2,228,550**

3. ETP Should Pay Civil Penalties and Disgorge its Unjust Profits

146. The Commission applies the criteria set forth in the *Policy Statement on Enforcement* for assessing appropriate civil penalties.[101] As was the case in ETP's manipulations at HSC, ETP's manipulations at Waha caused harm to counterparties and undermined integrity in the market. The violations were the result of manipulations, and were serious offenses. ETP's actions were willful because it must have intended to sell at fixed price and buy back at index similar volumes on December 23, 2005 and December 28, 2005. The timing of the trades indicate an intent to manipulate the market. It is

[100] ETP Response to Request No. 62 (as revised on Dec. 27, 2006). ETP does not distinguish between Waha and El Paso Waha in its transactional reporting per ETP Response to Request No. 64.

[101] *See supra* P 70-73.

unclear whether senior management was involved in these manipulations. ETP did not self-report the violations. The proposed civil penalties will not affect ETP's viability. ETP's cooperation with respect to the underlying investigation of the violations has been satisfactory, but ETP has not extended itself in a way that would merit a discount in the civil penalty or cooperation the minimum level required by law.

147. The maximum civil penalty is $58,000,000, based on the facts that ETP made 23 trades at Waha on December 23, 2005 and 35 trades at Waha on December 28, 2005, and that each trade constitutes a separate violation. Based on a consideration of the relevant foregoing factors, we believe that a reduction of the full civil penalty authority of the Commission is appropriate. We determine that a civil penalty in the amount of $3,000,000 is warranted and appropriate. [102] A civil penalty of $3,000,000 should serve to deter similar violations in the future while sufficiently punishing ETP for its unlawful conduct. We also propose to order ETP to disgorge $2,228,550 in unjust profits, plus interest.

C. Oasis Pipeline Violated Commission Requirements

148. Oasis Pipeline unduly preferred affiliated shippers and unduly discriminated against non-affiliated interstate shippers on its system in three ways, all of which constitute violations of section 284.9(b) of the Commissions regulations[103] and Oasis Pipeline's 1986 and 2006 Operating Statements.[104] First, Oasis Pipeline refused to provide interstate transportation service to similarly-situated non-affiliated shippers, at the same time it was providing this service to affiliated shippers.[105] Second, on 180 occasions, Oasis Pipeline charged non-affiliated interstate shippers rates that exceeded

[102] As noted *supra* P 37, the Commission has civil penalty authority for post-EPAct 2005 violations in the amount of $1,000,000 per day per violation. Each sale that ETP made at Waha for next day gas on December 23, 2005 and December 28, 2005 constituted a violation of Market Behavior Rule 2.

[103] 18 C.F.R. § 284.9(b) (2006).

[104] Oasis Pipeline Response to Request No. 21.

[105] The denied or discouraged requests from non-affiliates were made over the phone or by instant message, rather than through Oasis Pipeline's electronic bulletin board (EBB). Although formal requests for service are submitted through the EBB, there would be no point for a shipper to submit such an EBB request after being told that no capacity is available. Moreover, the voice recordings and instant messages reviewed by staff indicate that it was common practice – for both affiliates and non-affiliates alike – to first make inquiries regarding available space over the phone or by instant message before submitting a formal request through Oasis Pipeline's EBB.

the maximum Commission-approved rate of $0.1239 per MMBtu.[106] Third, Oasis Pipeline unduly preferred its affiliate, ETC Marketing, by allowing it to ship interstate gas under a firm intrastate contract. Oasis Pipeline's violations were continuous from January 26, 2004 through June 30, 2006. We propose to assess a civil penalty of $15,000,000 and order disgorgement of $267,122 in unjust profits, plus interest.

149. Also, the owner of the Oasis Pipeline system, Oasis Pipeline Company Texas, L.P., violated section 284.123(e) of the Commission's regulations[107] when it failed to timely amend its 1986 and 2006 Operating Statements and to file a Capacity Lease and Commercial Operations Agreement, which changed how it operated the pipeline. Oasis Pipeline's violation of the filing requirements has been continuous from January 26, 2004 to the present. We propose to assess a civil penalty of $500,000.

1. Undue Preference and Undue Discrimination

150. Oasis Pipeline provided interstate (NGPA section 311) service on an interruptible basis only and intrastate service on both a firm and an interruptible basis. The maximum rate that Oasis Pipeline could charge for interruptible interstate transportation was $0.1239.[108]

151. Oasis Pipeline had an economic incentive to discriminate against non-affiliates when the basis differential between Waha and Katy exceeded the maximum lawful rate for interstate transport of $0.1239. If, for example, gas at Waha could be purchased for $6.00 per MMBtu and sold at Katy for $7.00 per MMBtu, a shipper could purchase interstate gas at Waha for shipment to Katy at the maximum transportation rate of $0.1239 and pocket the amount above $0.1239. By providing this service to an affiliated shipper, Oasis Pipeline could ensure that these profits stayed within the ETP corporate family, rather than losing them to non-affiliates. As discussed below, Oasis Pipeline used a variety of illegal practices to ensure that this valuable service was available primarily to its affiliated shippers and to either foreclose or overcharge non-affiliates for this service.

---

[106] In addition to violating Commission regulations and the provisions of its Operating Statement that prohibit undue preferences and undue discrimination, these overcharges violate section 284.122(b) of the Commission's regulations,18 C.F.R. § 284.122(b) (2006). This regulation states that "No rate charged for transportation authorized under this subpart may exceed a fair and equitable rate under § 284.123."

[107] 18 C.F.R. § 284.123(e) (2006).

a. Summary of Evidence

i. Refused or Discouraged Requests for Interstate Service

152. On May 19, 2005, UBS requested transportation on Oasis Pipeline from Waha to Katy for June 2005.[109] The Oasis Pipeline dispatcher stated that interruptible service was not available, but that if UBS wanted to ship intrastate gas, Oasis Pipeline would sell UBS firm service if firm capacity was available. Oasis Pipeline shipped an average of 33,500 MMBtu/d using interstate, interruptible service for its affiliates in June.[110]

153. Oasis Pipeline appears to have rejected two requests for daily interruptible service on July 14 and July 25.[111] Oasis Pipeline shipped an average of over 12,000 MMBtu/d using interstate, interruptible service for affiliates in July 2005.[112]

154. In August 2005, Oasis Pipeline rejected two requests for interstate service. On August 17, 2005, an Oasis Pipeline dispatcher informed an Astra representative that Oasis Pipeline was full.[113] Also, on August 24, an unidentified, non-affiliated shipper called to inquire about interruptible capacity on Oasis Pipeline, and was told that nothing was available daily or for the next month.[114] Oasis Pipeline nevertheless shipped an average of over 35,000 MMBtu/d using interstate, interruptible service for its affiliates from August 18 until August 31.[115]

155. On September 19, 2005 at 7:37 a.m., an ETC Marketing shipper sent an instant message inquiring whether he should "work crosshaul." Oasis Pipeline's dispatcher replied that ETC Marketing should "work 50k," though Oasis Pipeline could probably do

[111] Mandl WAV281E (July 14, 2005); Mandl WAV2930 (July 25, 2005).

[112] Oasis Pipeline Response to Request Nos. 34 and 35.

[113] Audio digital recording/Wav file of Paul McPheeters WAV20B (Aug. 17, 2005) (McPheeters WAV20B (Aug. 17, 2005)).

[114] McPheeters WAV2D0 (Aug. 24, 2005). *See also* Oasis Pipeline Response to Request No. 6, Bates No. 002110 (IM dated Aug. 22, 2005) (Oasis Pipeline dispatcher tells non-affiliate that no space available from Waha to Katy for the next day).

[115] Oasis Pipeline Response to Request No. 35.

more and that he would "get right back if we can do more."[116] Seven minutes later, an non-affiliated shipper sent an instant message asking for crosshaul, to which the Oasis Pipeline dispatcher responded "no sir, we've been full up all month," and that he was "anticipating being as full next month as I am this."[117] Thus while he was still looking for more space for his affiliated shipper, the Oasis Pipeline dispatcher told the non-affiliate that there was no more space for this month or the next.

156. In October 2005, Oasis Pipeline rejected at least four requests from non-affiliated shippers. On October 10 and again on October 19, representatives of Dow Chemical called inquiring about shipping gas on a monthly basis from November forward.[118] The Oasis Pipeline dispatcher informed them that, although they had interruptible interstate and interruptible intrastate agreements in place, Oasis Pipeline did not have any space available for November and that "you are probably going to need to enter into a firm" intrastate agreement to be able to ship on Oasis Pipeline.[119] However, in three e-mail confirmations on October 26 and October 27, Oasis Pipeline agreed to transport nearly 80,000 MMBtu/d for its affiliate under a dual contract arrangement.[120] Moreover, Oasis Pipeline shipped over 13,000 MMBtu/d of interstate gas for its affiliate during November 2005.

157. Oasis Pipeline also provided affiliated shippers with preferential access to information regarding available capacity and pricing. For example, Oasis Pipeline

[118] McPheeters WAV8D1 (Oct. 10, 2005); Mandl WAV1216 (Oct. 19, 2005).

[119] McPheeters WAV8D1 (Oct. 10, 2005). Also, on October 19 and October 26, an Oasis Pipeline dispatcher informed non-affiliated shippers that daily space was doubtful and that he could not sell for November until producers had elected the volumes they would be shipping for November. *See* Mandl WAV1216 (Oct. 19, 2005) (second call on WAV1216); Mandl WAV1B83 (Oct. 26, 2005).

[120] *See, e.g.,* ETP Response to Request No. 84, Bates Nos. OA84-002446 (e-mail from Small to McPheeters for 65,000 MMBtu/d, Oct. 26, 2005); OA84-002447 (e-mail from O'Kane to McPheeters for 13,375 MMBtu/d, Oct. 26, 2005); OA84-002448 (e-mail from O'Kane to McPheeters for 370 MMBtu/d, Oct. 27, 2005).

personnel informed ETC Marketing personnel in advance when interruptible, interstate capacity became available.[121] This market advantage does not appear to have been extended to non-affiliated shippers, who had to call back day after day to see whether any space had become available.[122] Oasis Pipeline and ETC Marketing personnel also discussed where Oasis Pipeline should set its transportation rates.[123] In some cases, employees of ETC Marketing – a shipper on the system – even recommended that Oasis Pipeline charge *higher* prices for transport.[124]

ii. Overcharges

158. On 186 occasions from February 20, 2004 through February 2, 2006, Oasis Pipeline charged interstate shippers a rate in excess of the maximum lawful rate of $0.1239 per MMBtu.[125] All but six of these 186 overcharges were to non-affiliates. Oasis Pipeline made these overcharges for deliveries from interstate receipt points at Waha and upstream of Waha from interstate pipelines, which Oasis Pipeline's section 311 contracts identify as interstate receipt points.[126] The total amount of these 186

---

[121] Mandl WAV1035 (May 2, 2005) (Mandl told his counterpart at ETC Marketing in response to a request for capacity that there is "nothing yet, but as soon as I do I will, uh, I'll send you an IM.").

[122] For instance, Astra's representative called on September 20, 2005 inquiring about capacity for October. The Oasis Pipeline dispatcher informed her that none was available, but that she should keep calling back every day to see if some amount did become available. McPheeters WAV58D (Sept. 20, 2005). However, on September 26 and September 30, Oasis Pipeline agreed to transport 80,000 MMBtu/d for the month of October for its affiliate, pursuant to the "dual contract" arrangement discussed below in which shippers could reserve capacity under a firm intrastate contract while shipping interstate gas under the related interstate interruptible contract. *See, e.g.,* ETP Response to Request No. 84, Bates Nos. OA84-001659 (e-mail from Small to McPheeters for 50,000 MMBtu/d, Sept. 26, 2005); OA84-002417 (e-mail from Fletcher to Mandl for 30,000 MMBtu/d, Sept. 30, 2005).

[123] *See, e.g.,* Mandl WAVC87 (Aug. 23, 2005); Mandl WAVE9C (Sept. 16, 2005); McPheeters WAV13B (Aug. 12, 2005).

[124] *See, e.g.,* Mandl WAV1818 (Sept. 29, 2004).

[125] Oasis Pipeline Responses to Request Nos. 1 and 2. *See* Appendix A for a list of these overcharges.

[126] Oasis Pipeline Response to Request No. 24, Bates No. OA24-02-000686 (BP Energy Contract). For example, some contracts identify Oasis Meter No. 0728 / 1265 as follows: "Gas delivered to El Paso / PG&E / Valero (Oasis meter No. 0728 / 1265) that is

overcharges is $267,122. Appendix A to this order forth the dates, receipt points and rates Oasis Pipeline charged on the 186 occasions at issue.

159. Oasis Pipeline dispatchers and ETC Marketing employees frequently informed non-affiliated shippers that they could not transport their gas unless shippers warranted that the gas was intrastate.[127] Moreover, they did so even for gas that was received from an interstate pipeline and even where shippers stated that they believed the gas to be interstate in character, as the following conversation demonstrates.

SHIPPER:	It's Texas produced gas, but it hits an interstate before it goes into Oasis.
FLETCHER:	That doesn't matter. I mean if it's from the ground in Texas, it's from the ground in Texas . . .
SHIPPER:	Well, if that how the San Antonio folks, ah, figure out jurisdictional issues, then that works for me.
FLETCHER:	What do you think?
SHIPPER:	I, I think realistically it uh – I, I want to say that once it goes into an interstate . . . It may, it may a be colored as interstate gas and then, uh, it can't, it can't be uncolored, but I'm not positive on that [. . .]
FLETCHER:	Sure, uh there's some gas that I buy on an interstate line, El Paso Natural Gas . . . but the guy that I buy it from, he's drilling in Texas . . . And so I just ask him to send me a letter warranting that the gas is intrastate.

---

considered by El Paso / Valero as Permian / Waha Hub delivery (HUB Delivery), is subject to the provisions of Section 311 (a)(2) of the Natural Gas Policy Act (NGPA) and Subpart C of Part 284 of the Federal Energy Regulatory Commission's (FERC) regulations"; Bates No. OA24-03-000675 (Interruptible NGPA Section 311 Transportation Agreement for Constellation Power Source, Inc., dated June 1, 2002). Meter No. 1265 is a meter used for a number of the transportations resulting in violations, though there are interconnections upstream of Waha for El Paso (1335/6541), Northern Natural Gas (8724/8725), and NGPL (1329/6481); Bates No. 0A24-03-000447 (Intrastate Interruptible Transportation Contract for Constellation Power Source, Inc., dated September 1, 2001).

[127] *See, e.g.,* McPheeters WAV11FF (May 19, 2005); McPheeters WAV1BE9 (June 3, 2005); Mandl WAV149D (Aug. 19, 2004); Mandl WAV16AB (Sept. 17, 2004).

SHIPPER: Even though it's moving on the interstate?

FLETCHER: Yeah. I mean that's all.

SHIPPER: And that's all as long as you can show where it's coming from --

FLETCHER: Right.

SHIPPER: -- if the FERC police ever show up, it's probably, not an issue.

FLETCHER: Right.[128]

Finally, we note that Oasis Pipeline did not make any effort to verify the truth of shippers' warranties when the gas in question was received from an interstate pipeline.[129]

iii. Dual Contracts

160. Oasis Pipeline unduly preferred its affiliate by allowing it to reserve capacity under a firm intrastate contract, but ship interstate gas (in place of intrastate gas) by submitting nominations under a "parallel" or "related" interruptible interstate contract. Oasis allowed shippers to use a single transaction confirmation indicating the firm intrastate contract pursuant to which the capacity was reserved and the related interstate interruptible contract pursuant to which interstate gas was nominated.

161. Oasis Pipeline affiliates accounted for roughly 95 percent of the volumes confirmed under this dual contract arrangement.[130] Review of the confirmation e-mails provided by ETP and Oasis Pipeline[131] indicates that, in a total of 60 transactions from January 26, 2004 through June 30, 2006, Oasis Pipeline affiliates confirmed nominations

---

[128] Deposition of Luke Fletcher Exhibit 3 (Mar. 2, 2007) (Fletcher Dep. Ex. 3); Fletcher, WAV9B6 (Sept. 19, 2005).

[129] *See, e.g.*, McPheeters WAV512 (Aug. 20, 2004) (caller asked what the "burden of proof" was for shipper warranties, and McPheeters responded that just giving the warranty is enough because he "doesn't have enough time" to verify that the warranty is correct).

[130] Oasis Pipeline Responses to Request No. 24; ETP Responses to Request No. 84. *See* Appendix B for a list of the reference transactions.

[131] *See* Oasis Pipeline Response to Request No. 24; ETP Response to Request No. 84.

of roughly 74 Bcf under these arrangements (almost exclusively monthly or longer-term deals).[132] By contrast, BP confirmed nominations of roughly 3.4 Bcf in 11 transactions (mostly daily deals) from April through September 2005, Chevron confirmed .5 Bcf in a single monthly deal in April 2006. Appendix B to this order forth the dates, terms, prices, volumes, etc. for each of these transactions pursuant to dual contracts.

162. An Instant Message from an Oasis Pipeline dispatcher explains how this process worked:

> I could do up to 50,000/day from TW [Transwestern] or El Paso [Natural Gas Company] to the Hub. I would do 50,000 at a demand of .10 and no commodity. The .10 would be billed on the Firm [intrastate] 204 [contract] and you'd nom[inate] on the related interstate agreement. If I ran into a meter capacity issue at any of those points, you would by noming them on an IT [interruptible] Interstate agreement so it would be subject to cut even though I'm still collecting my .10.[133]

163. In deposition testimony, Mandl explained that the dual contract arrangement permitted a shipper who was unable to ship its full contractual entitlement with intrastate gas to substitute interstate gas on an interruptible basis.[134] This dual contract arrangement thus allowed a shipper who was unable to fill the full capacity reserved (or nominated) with intrastate gas the flexibility to substitute interstate gas to fill the remainder of the reserved capacity, instead of being forced to pay the full demand charge for capacity that it could not use.[135]

iv. Other Evidence of Discriminatory Effects and Motive

164. The cumulative effect of this discrimination against similarly-situated non-

---

[132] *Id.* Based on staff's review of the confirmation e-mails provided by Oasis Pipeline, all or nearly all of the interstate gas that Oasis Pipeline shipped for affiliates from Waha to Katy was a shipped using the dual contract arrangement.

[133] Deposition of Mark Mandl Exhibit 4 (Mar. 5, 2007) (Mandl Dep. Ex. 4), Oasis Pipeline Response to Request No. 6, Bates No. 001935 (IM dated October 13, 2005). We note that, although Oasis Pipeline informed non-affiliated shippers that interstate gas shipped pursuant to the dual contract arrangement was interruptible, we have not found any instances in which Oasis Pipeline interrupted interstate volumes shipped by its affiliates under the dual contract arrangement.

[134] Mandl Dep. 141:4-43:11.

[135] Fletcher Dep. at 122:5-23:7.

affiliated shippers is apparent from the large disparities between the interstate volumes shipped by affiliates versus non-affiliates.[136] Oasis Pipeline transported interstate gas from Waha to Katy more often, and in substantially larger volumes, for affiliated interstate shippers than it did for all non-affiliated shippers combined throughout the relevant period. With respect to firm intrastate service – which accounted for a substantially larger percentage of Oasis Pipeline's total shipments from Waha to Katy – the ratio of gas shipped for affiliates versus non-affiliates is reversed.

165. Oasis Pipeline provided the vast majority of interstate capacity to its affiliates. Oasis Pipeline's stated practice was to sell transportation on a first come, first served basis, but its affiliates received (among over 30 other, non-affiliated shippers) 80 or more percent of interstate volumes transported from Waha to Katy.[137] Moreover, Oasis Pipeline's affiliates' share of interstate volumes increased along with the Waha-to-Katy basis differential. In other words, as the capacity from Waha to Katy became more valuable, the percentage of interstate capacity shipped by Oasis Pipeline's affiliates increased.

166. For the period from June 2005 through April 2006, Oasis Pipeline transported a total of 13,794,697 MMBtu under interstate contracts for affiliated shippers and 3,739,318 MMBtu under interstate contracts for non-affiliated shippers, a ratio of roughly 3.7:1 in favor of its affiliates. Chart 15 sets forth interstate volumes shipped from Waha to Katy for affiliates and non-affiliates from January 2005 through April 2006. The listed months are the time periods in which Oasis Pipeline unduly discriminated against non-affiliated shippers in the transportation of interstate gas from Waha to Katy.

[136] Oasis Pipeline provided conflicting data responses with respect the volumes of interstate gas it transported for affiliated and non-affiliated shippers to Katy. For the purposes of this order, we refer to the data that Oasis Pipeline provided that is more favorable to Oasis Pipeline.

[137] Oasis Pipeline's 2005 Annual Report indicates that it transported interstate gas for 32 shippers. Oasis Pipeline Response to Request No. 20.

Chart 15

	Affiliate (MMBtu)	Non Affiliate (MMBtu)	Total (MMBtu)	% Affiliate	Average of Daily Basis
Jun-05	1,006,546	691,914	1,698,460	59.3%	$ 0.58
Jul-05	373,115	20,000	393,115	94.9%	$0.39
Aug-05	1,234,619	1,481,224	2,715,843	45.5%	$0.57
Sep-05	2,968,242	217,500	3,185,742	93.2%	$0.54
Oct-05	1,317,590	232,500	1,550,090	85.0%	$0.76
Nov-05	404,719	185,065	589,784	68.6%	$0.26
Dec-05	304,084	46,115	350,199	86.8%	$0.17
Jan-06	-	135,000	135,000	0.0%	$0.22
Feb-06	1,993,892	210,000	2,203,892	90.5%	$0.43
Mar-06	1,976,964	225,000	2,201,964	89.8%	$0.61
Apr-06	2,214,926	295,000	2,509,926	88.2%	$0.89

167. However, the disparity between affiliates and non-affiliates is reversed for firm intrastate service.

Chart 16

	Affiliate (MMBtu)	Non-Affiliate (MMBtu)	Total (MMBtu)	% Affiliate
Jun-05	2,536,204	8,565,924	11,102,128	22.8%
Jul-05	805,344	7,912,981	8,718,325	9.2%
Aug-05	1,181,096	10,213,401	11,394,497	10.4%
Sep-05	1,715,176	10,865,621	12,580,797	13.6%
Oct-05	5,386,456	11,963,270	17,349,726	31.0%
Nov-05	2,584,936	12,154,090	14,739,026	17.5%
Dec-05	232,725	13,001,232	13,233,957	1.8%
Jan-06	2,203,259	12,406,924	14,610,183	15.1%
Feb-06	1,226,925	12,729,008	13,955,933	8.8%
Mar-06	2,083,776	13,782,726	15,866,502	13.1%
Apr-06	1,682,421	13,956,218	15,638,639	10.8%

Thus, while affiliated shippers accounted for over 80 percent of the interstate volumes shipped in seven of the 11 months from June 2005 through April 2006, non-affiliates account for over 80 percent of the (much larger volumes of) intrastate firm service in nine of the eleven months. We note that the non-affiliated shippers included major producers and marketers such as BP, Burlington Resources, Calpine, Cargill, Chevron Texaco, Cinergy, Conoco Phillips, Constellation, Coral, Sempra and Dynegy.[138] Thus, this is not

[138] *See* Oasis Pipeline Response to Request No. 34.

a case where affiliates of an intrastate pipeline are much larger than other shippers combined and hence might be expected to do more business on the affiliated pipeline.

168. Oasis Pipeline and ETP had a strong incentive to discriminate against non-affiliates in the provision of interstate service due to the fact that interstate rates were capped at $0.1239. Oasis Pipeline generally set its rates for intrastate transportation from Waha to Katy equal to the basis differential between these two points,[139] but it could not do so for interstate transportation rates due to the fact that these rates cannot exceed the maximum lawful rate. When the basis differential between these two points exceeds $0.1239 per MMBtu, ETC Marketing (and thus the ETP corporate family) can capture the basis differential above $0.1239 by shipping gas from Waha to Katy, an opportunity that is lost when a non-affiliate ships gas from Waha to Katy at the maximum interstate rate. Chart 17 below demonstrates that the share of interstate volumes shipped for affiliates increased as a function of the Waha-to-Katy basis differential.

Chart 17

	Affiliate (MMBtu)	Non-Affiliate (MMBtu)	Total (MMBtu)	% Affiliate	% Non-Affiliate
Basis > $.75	**5,232,675**	**807,359**	**6,040,034**	**86.6%**	**13.4%**
Basis > $.30	**13,919,023**	**6,821,127**	**20,740,150**	**67.1%**	**32.9%**
Basis < $.30	**2,845,909**	**2,845,670**	**5,691,579**	**50.0%**	**50.0%**
Basis < $.1239	**199,746**	**386,957**	**586,703**	**34.0%**	**66.0%**

b. Legal Analysis

169. To prove the existence of undue discrimination or undue preference, it must be shown that: (1) two classes of customers are treated differently; and (2) that the two classes of customers are similarly situated.[140] In the voice recordings and instant messages summarized above, Oasis Pipeline rejected or discouraged non-affiliated shippers' requests for transportation during the period from June 1, 2005 through November 30, 2005. Oasis Pipeline rejected or discouraged non-affiliated shippers'

[139] *See, e.g.*, Fletcher Dep 104:16-19; Deposition of Paul McPheeters 51:9-52:1 (Feb. 27, 2007) (McPheeters Dep. 51:9-52:1) ("we would be looking at ICE and trying to capture the Waha-to-Katy spread.").

[140] *See, e.g., "Complex" Consol. Edison v. FERC*, 165 F.3d 992, 1012 (D.C. Cir. 1999); *Sebring Utility Comm'n v. FERC*, 591 F.2d 1003, 1009, n.24 (D.C. Cir. 1979); *Transwestern Pipeline Co.*, 36 FERC ¶ 61,175, at 61,433 (1986) (undue discrimination is in essence an unjustified difference in treatment of similarly-situated customers); *Tennessee Gas Pipeline Co.*, 77 FERC ¶ 61,215, at 61,877 (1996).

requests for interstate service, then either agreed to ship or actually shipped interstate gas for affiliates during the time period covered by the non-affiliates' requests.

170. Oasis Pipeline discriminated against non-affiliates on a systematic basis, and not just in the instances captured by voice recordings. Oasis Pipeline's affiliates accounted for the vast majority of the interstate volumes shipped from Waha to Katy during these periods and its affiliates' share of interstate transportation increased as the Waha-to-Katy price spread increased and the vast majority (roughly 95 percent) of the volumes confirmed under the dual contract arrangement, while non-affiliates account for 180 out of 186 overcharges. Oasis Pipeline had an economic incentive to unduly prefer its affiliate. When the basis between Waha and Katy is greater than the maximum lawful rate of $0.1239, the difference between the basis differential and the maximum lawful rate for interstate gas would be simply lost if Oasis Pipeline shipped gas for a non-affiliate. However, if it ships for ETC Marketing or another affiliate, the revenue from this difference stays within the ETP family.

i. Refused or Discouraged Requests for Interstate Service

171. In several of the calls discussed above, the Oasis Pipeline dispatchers explained to non-affiliated shippers that they could not say whether or not they could provide interstate service because producers shipping on Oasis Pipeline had not yet elected the volumes that they were going to ship for the period in question or due to uncertainty about the volumes shipped for generators.[141] Nevertheless, Oasis Pipeline subsequently granted affiliates requests to ship interstate volumes after these requests by non-affiliates were made. Thus, Oasis Pipeline was not in fact following a first-come, first-served priority system and that the claims it made to non-affiliated shippers regarding producer or generator volumes may have been a pretext.

172. Oasis Pipeline gave affiliated shippers information regarding available capacity and pricing in advance of that given to non-affiliated shippers.[142] In *Panhandle Eastern Pipe Line Co.*,[143] we found that Panhandle's provision of such advance notice to its marketing affiliate and certain customers to be unduly preferential in violation of section 311.

[143] Opinion No. 275, 39 FERC ¶ 61,274, at 61,900 (1987).

ii. Overcharges

173. By charging in excess of the maximum lawful rate – overwhelmingly for non-affiliates (180 out of 186 instances) – Oasis Pipeline violated sections 284.9(b) and 284.122(b) of the Commission's regulations. An intrastate pipeline is not permitted to charge rates for interstate transportation that exceed the fair and equitable rate, or maximum lawful rate. Oasis Pipeline violated this provision by charging in excess of the maximum lawful rate for interstate transportation on 186 occasions; no maximum rate applies for intrastate transportation. The gas received at the specified interstate points was interstate gas because, under the "commingling" doctrine, gas transported on an interstate pipeline (and thus "commingled" with interstate gas) is interstate in character for purposes of the Commission's jurisdiction.[144]

174. We note that Oasis Pipeline's intrastate contracts provide that the shipper warrants the intrastate character of the gas and that the gas has not been commingled with interstate gas in such a manner as to make it subject to the Commission's jurisdiction and that the shipper shall be liable for any breaches of this warranty.[145] Oasis Pipeline and

---

[144] *See*, *e.g., California v. Lo-Vaca Gathering Co.*, 379 U.S. 366 (1965) (commingling in a pipeline of gas destined for sale in interstate commerce with gas destined for sale in intrastate commerce causes all of the gas moving through the pipeline to be dedicated for sale in interstate commerce). *See also FPC v. Florida Power & Light Co.,* 404 U.S. 453, 461 n.10 (1972); *Oklahoma Natural Gas Co. v. FERC,* 28 F.3d 1281, 1285 (D.C. Cir. 1994); *Louisiana Power & Light Co.,* 483 F.2d 623 (1973); *Lee 8 Storage P'ship,* 73 FERC ¶ 61,159 (1995).

[145] A typical example of this warranty is found in Oasis's contract with Constellation Power Source, Inc.:

> Shipper represents and warrants to Oasis (i) that all gas delivered to Oasis hereunder will be produced in the State of Texas from reserves not dedicated or committed to interstate commerce, or (ii) that the gas which Shipper delivers or receives hereunder will not have been or be sold, consumed, transported or otherwise utilized in interstate commerce at any point upstream of the Points of Receipt or downstream of the Points of Delivery, nor have been or be commingled at any point upstream of the Points of Receipt or downstream of the Points of Delivery with other gas which is or may be sold, consumed, transported or otherwise utilized in interstate commerce in such a manner which will subject the gas subject to this Agreement or Oasis's or its designee's pipeline system, or any portion thereof, to the jurisdiction of the Federal Energy Regulatory Commission or any successor authority under the Natural Gas Act.

Oasis Pipeline Response to Request No. 24, Bates Nos. OA24-03-000550-51.

ETC Marketing personnel frequently required non-affiliated shippers to provide these warranties for gas that they knew was received from interstate pipelines at points that Oasis Pipeline's contracts designated as interstate receipt points and thus had been commingled in interstate commerce. Requiring shippers to certify that gas is intrastate – when it is in fact interstate – circumvents the Commission's authority.

175. Oasis Pipeline cannot rely on the fact that shippers – at Oasis Pipeline's insistence – provided warranties, which Oasis Pipeline knew or should have known were erroneous, to charge a rate for interstate gas in excess of the maxim lawful rate or to shift liability for its own violations onto the shippers. Both Commission and judicial precedent are clear that neither a shipper's mistake nor misrepresentation as to the intrastate character of the gas permits a pipeline to charge a rate in excess of the maximum interstate rate for gas that is in fact interstate. To do so would violate the filed rate doctrine. In *Southern Union Gathering Co. v. FERC*,[146] the United States Court of Appeals for the District of Columbia Circuit invoked the filed rate doctrine to vacate a Commission order allowing the enforcement of a state court judgment awarding damages for negligent misrepresentation as to the interstate character of the gas in question because to do so would have allowed the producer to charge in excess of the maximum lawful rate for interstate gas.[147] In subsequent orders, the Commission has interpreted *Southern Union* as "clear precedent" that any agreement to pay more than the maximum lawful rate is unenforceable.[148]

176. Although in limited circumstances interstate pipelines can demonstrate compliance with section 284.102 of the Commission's regulations[149] by obtaining a certificate from shippers,[150] this precedent is not applicable to the shipper certifications at issue here.

---

[146] 857 F. 2d 812 (D.C. Cir. 1988) (*Southern Union*).

[147] *Id*. at 817-818 (the state court held that Southern Union had negligently misrepresented that the gas in question was intrastate (and thus not subject to the applicable NGPA price ceiling), when it was in fact interstate and subject to the NGPA price ceiling).

[148] *Burlington Res. Oil & Gas Co., L.P. v. FERC*, 396 F.3d 405 (D.C. Cir. 2005), *order on remand, Burlington Res. Oil & Gas Co., L.P.*, 112 FERC ¶ 61,257 (2005), *reh'g denied*, 113 FERC ¶ 61,257 at P 42 (2005).

[149] 18 C.F.R. § 284.102 (2006). This regulation sets forth the conditions under which an interstate pipeline may transport gas "on behalf of" an intrastate pipeline or LDC pursuant to section 311(a)(1) of the NGPA.

[150] S*ee, e.g., Williams Natural Gas Co*., 86 FERC ¶ 61,213 (1999) (*Williams*); *Missouri Gas Energy v. Williams Natural Gas Co*., 79 FERC ¶ 61,204 (1997); *Peoples Natural Gas Company v. Williams Natural Gas Co*., 59 FERC ¶ 61,121 (1992).

Cases such as *Williams* simply found that the interstate pipeline did not violate section 284.102 of the Commission's regulations, which includes an express requirement that pipelines obtain a certification from shippers that the requirements of this section are met, because the pipeline did in fact obtain the necessary certification and therefore complied with the certification requirement. Here, the Commission regulations at issue (which prohibit pipelines from charging in excess of the maximum lawful rate) do not mandate that pipeline obtain a certification from shippers. The mere fact that Oasis Pipeline used boilerplate warranty language in its transportation contracts, or even requested warranties for particular transportation transactions, does not immunize the pipeline from liability for charging an excessive rate.

177. Finally, even if Oasis Pipeline sought warranties as to the intrastate character of the gas received at interstate points, the warranties that they requested from shippers did not establish that the gas was in fact intrastate. Oasis Pipeline's two primary schedulers, Paul McPheeters and Mark Mandl, and ETC Marketing trader Luke Fletcher, testified that they only required warranties on certain occasions that the gas in question was produced in Texas. They did not inform shippers that shippers could not transport under an intrastate contract gas that had been transported on an interstate pipeline.[151] In a September 19, 2005 conversation between Fletcher and an unaffiliated shipper, the shipper pointed out that gas produced in Texas and transported on an interstate pipeline is interstate in character, but Fletcher still charged as if it were intrastate.[152]

iii. Dual Contracts

178. With respect to the dual contracts, Oasis Pipeline unduly preferred its affiliated shippers by providing this interstate transportation service option almost exclusively to its affiliates, but not to similarly-situated, non-affiliated shippers. Oasis Pipeline's affiliates accounted for over 95 percent of the volumes confirmed and generally did so under monthly or longer-term deals. This service option provided Oasis Pipeline's affiliated shippers an advantage – largely unavailable to non-affiliates – insofar as they had the flexibility to ship interstate gas using capacity reserved for intrastate gas; in the absence of this option, Oasis Pipeline's affiliates would simply have had to pay the full demand charge for capacity that they could not have used.

179. Further, Oasis Pipeline used these dual contract arrangements to circumvent the first come, first served priority system for access to interstate interruptible capacity in two respects. First, while Oasis Pipeline did not permit shippers to reserve interruptible capacity, the dual contract arrangement allowed its affiliated shippers to reserve capacity

[151] McPheeters Dep. 154:4-155:16; Fletcher Dep. 141:13-142:13; Mandl Dep. 56:6-59:8.

[152] Fletcher Dep. Ex.3; Fletcher WAV9B6 (Sept. 19, 2005).

that could be used to ship interstate gas months in advance. This option was not available to similarly-situated non-affiliated shippers who did not have access to Oasis Pipeline capacity under the dual contract arrangement. Second, Oasis Pipeline allowed affiliated shippers to obtain capacity that could be used for interruptible interstate transport after a request by a non-affiliate had been made. As noted above, in late September and October of 2005, non-affiliated shippers were told that there was no interstate capacity available from Waha to Katy, while subsequent requests from affiliates for the same time period were accepted, under the dual contract arrangement. Thus, Oasis Pipeline allowed its affiliates to jump to the front of the line in Oasis Pipeline's first come, first served system.

c. Notice of Proposed Penalties

i. Oasis Pipeline Knowingly Committed Violations

180. For civil penalties to be assessed under the NGPA, violations must be committed "knowingly." The statute defines "knowing" as having "actual knowledge" or "the constructive knowledge deemed to be possessed by a reasonable individual who acts under similar circumstances."[153] The Commission has construed this requirement as a "knew or should have known" standard.[154]

181. Oasis Pipeline knowingly committed the violations described above. Oasis Pipeline repeatedly refused or discouraged requests for interstate transportation from similarly-situated non-affiliated shippers, while shipping interstate gas for its affiliates. In some occasions, Oasis Pipeline granted its affiliates requests for interstate service after it had denied or discouraged those of non-affiliates. Oasis Pipeline knew or should have known that these actions were unduly preferential towards its affiliates and unduly discriminatory to non-affiliates.

182. Oasis Pipeline's overcharge violations were committed knowingly because interstate receipt points are listed and identified as such in Oasis Pipeline transportation contracts. Company personnel knew or should have known that transportation of gas on an interstate pipeline to a receipt point at which Oasis Pipeline received the gas rendered the gas it received to be interstate in character and thus that Oasis could not charge a transportation rate for this gas in excess of the applicable maximum lawful rate of $0.1239.

183. With respect to the dual contracts, Oasis Pipeline committed these violations knowingly because Oasis Pipeline and its dispatchers were aware of the benefits that this

---

[153] 15 U.S.C. § 3414(b)(6)(B) (2000).

[154] *Panhandle Eastern Pipe Line Co.*, 40 FERC ¶ 61,187, at 61,582-583 (1987).

arrangement provided to affiliated shippers. That benefit was the increased flexibility to ship interstate gas using capacity reserved under a firm intrastate contract. Oasis Pipeline and its transportation personnel thus knew or should have known that providing this dual contract arrangement, and its attendant benefits, almost exclusively to its affiliate constituted an undue preference to its affiliate.

184. The Commission proposes to assess a civil penalty in the amount of $15,000,000 for Oasis Pipeline's and to order disgorgement of $267,122 in unjust profits. Oasis Pipeline's violations were continuous throughout the periods from January 26, 2004 through June 30, 2006. As noted, *supra* at P 37, for a continuing violation, each day constitutes a separate violation.[155] The maximum civil penalty for the pre-EPAct 2005 violations is $5,500 per day,[156] and the maximum civil penalty for the post-EPAct 2005 violations is $1,000,000 per day.[157]

ii. Policy Statement on Enforcement Penalty Factors

185. In the Commission's Policy Statement on Enforcement,[158] the Commission set forth the factors it would consider in assessing civil penalties.

- Oasis Pipeline's violations were serious, as they involve discriminatory treatment of non-affiliates in favor of a pipeline's marketing affiliates. One of the core purposes of the statutes that it administers is to prevent unduly discriminatory or unduly preferential treatment and set maximum rates for interstate transportation. The various types of violations above all served to give Oasis Pipeline's unduly preferential treatment and to deprive non-affiliates of the ability to move interstate gas from Waha to Katy and thereby capture the basis differential above the maximum lawful rate. Also, Oasis Pipeline's undue discrimination against non-affiliated shippers was not limited to interstate shippers.[159]

---

[155] 15 U.S.C. § 3414(b)(6)(C) (2000).

[156] 18 U.S.C. § 385.1602(a) (2006).

[157] EPAct 2005, Pub. L. 109-58 § 314(b)(2) (2005).

[158] *Enforcement of Statutes, Orders, Rules, and Regulations*, 113 FERC ¶ 61,068 (2005).

[159] For example, on August 12, 2005, an Oasis Pipeline dispatcher tells his counterpart at ETC Marketing that he "threw out 52 to somebody to scare them off," in other words, quoted a transportation price of 52 cents, which was high, to discourage the non-affiliate from purchasing the capacity. The ETC Marketing employee then said he

- Oasis Pipeline's violations were willful. Oasis Pipeline repeatedly refused or discouraged requests from non-affiliates for interstate transportation service, while flowing substantial volumes for affiliates. Tellingly, affiliates' share of interstate transport increased along with the Waha-to-Katy basis differential, indicating that this set of violations was part of corporate policy to ensure that the ETP corporate family would get the full Waha-to-Katy spread. Oasis Pipeline must have known that gas received from an interstate pipeline – which has been commingled with gas in interstate commerce – was interstate gas subject to the maximum lawful rate under the NGPA and applicable Commission orders and that it could not attempt to contract out of Commission jurisdiction. Oasis Pipeline appears to have used the dual contract arrangement to benefit its affiliates both by providing them with greater flexibility in using firm intrastate service than non-affiliates, and to allow them to circumvent Oasis Pipeline's purported first come, first serve system.

- Oasis Pipeline's violations harmed non-affiliated interstate shippers (as well as their suppliers and customers) who were denied access to a key pipeline asset for transporting gas from production areas in West Texas to key markets in East and South Texas, frequently charged in excess of the maximum lawful rate, and denied the opportunity to use Oasis Pipeline to transport interstate gas and the flexibility to use the dual contract arrangement to do so.

- Oasis Pipeline did not self-report its violations.

- Oasis Pipeline's cooperation was not exemplary. It failed to make witnesses available for depositions in a timely manner. Moreover, on May 18, 2007, Oasis Pipeline informed staff that transportation-related data that had been provided to, and relied upon by, staff over eight months earlier was incorrect.[160]

186. Based on consideration of the foregoing factors as set forth in the Policy Statement on Enforcement, the proposed civil penalty of $15,000,000 is warranted and appropriate. A civil penalty of $15,000,000 is considerably less than the maximum civil penalty the Commission could propose, considering that the penalty period is each day from January 26, 2004 through June 30, 2006 and that the maximum civil penalty for each post-EPAct

---

would make a nomination for 50,000 to 80,000 MMBtu for that week-end, and the Oasis Pipeline dispatcher responded that that would be fine. McPheeters WAV13B (Aug. 12, 2005).

[160] *See* Oasis Pipeline Response to Request Nos. 11, 12, 34 and 35.

2005 violation is $1,000,000 per day per violation. The Commission believes that appropriate remedial, deterrence and punitive objectives can be achieved by a civil penalty of this size. We also propose to order ETP to disgorge $267,122 in unjust profits, plus interest.

2. Oasis Pipeline's Capacity Lease and Commercial Operations Agreement Violates Section 284.123 of the Commission's Regulations

187. The owner of the Oasis Pipeline system, Oasis Pipeline Company Texas, L.P., violated section 284.123(e) of the Commission's regulations[161] when it failed to timely amend its Operating Statement to reflect a Capacity Lease and Commercial Operations Agreement (Agreement) that changed how it operated the pipeline and varied the terms of its Operating Statements on file with the Commission. Oasis Pipeline should have amended its Operating Statements on file with the Commission to reflect a change in the pipeline's operations that occurred when a new commercial operator took over in January 2004 and again when a subsequent commercial operator took over in March 2004.

188. Oasis Pipe Line Company Texas L.P. (Oasis Pipe Line Company Texas), the owner of the Oasis Pipeline system, executed the Agreement with ETC Texas Pipeline LTD., Oasis Division (ETC Texas), a predecessor-in-interest of Oasis Pipeline.[162] The Agreement, which became effective January 1, 2004, and is still in effect, is essentially a lease of all Oasis Pipeline capacity by Oasis Pipe Line Company Texas to ETC Texas. On March 1, 2004, ETC Texas assigned its interest in the Agreement to Oasis Pipeline, L.P.[163]

189. The Agreement became effective January 1, 2004 and expires January 1, 2009.[164] Under the Agreement, Oasis Pipe Line Company Texas continues to "perform or cause to be performed, emergency operation and maintenance services"[165] and continues to "have

---

[161] 18 C.F.R. § 284.123(e) (2007).

[162] Oasis Pipeline Response to Request No. 23, Bates Nos. OA23-000001-000036.

[163] Oasis Pipeline Response to Request No. 23, Bates No. OA23-000019-20, Bates No. OA23-000008 ("Consent to Assign Pipeline Capacity Lease and Commercial Operations Agreement," letter dated March 1, 2004).

[164] Subsequent name changes can cause confusion. Currently, Oasis Pipeline, L.P. leases all the capacity from Oasis Pipeline Line Company Texas L.P, i.e., Oasis Owner. McPheeters Dep. 38:13-16.

[165] Oasis Pipeline Response to Request No. 23, Bates No. OA23-000015 (Operations Agreement § 3.3).

the sole right and discretion to determine and perform necessary operation and maintenance activities."[166] The Agreement further recites that ETC Texas shall receive revenue for all capacity sold on the pipeline.[167] ETC Texas agreed to pay Oasis Pipe Line Company Texas an annual fee,[168] which currently is $27 million per year.[169]

190. On January 11, 2006, Oasis Pipeline filed its 2006 Operating Statement pursuant to section 284.123(e) of the Commission's regulations. The 2006 Operating Statement does not reference the Agreement.

191. Subpart C of Part 284 of the Commission's regulations sets forth requirements for an intrastate pipeline to transport natural gas pursuant to NGPA section 311. Section 284.123(e) requires an intrastate pipeline that undertakes service pursuant to NGPA section 311(a)(2) to file with the Commission a statement of the terms and conditions under which the pipeline provides that service.[170] If the pipeline changes its operations, section 284.123(e) states that the company must amend its operating statement and file the amendment with the Commission within 30 days after commencement of the change.

192. Oasis Pipeline should have timely filed an amendment to its 1986 Operating Statement because the Agreement constitutes a change in pipeline operations. The Agreement changes the way the Oasis Pipeline is operated by leasing all pipeline capacity to Oasis Pipeline, which would sell that capacity, and keep revenues from that sold capacity, in exchange for payment of a fee to Oasis Pipe Line Company Texas. Oasis Pipeline's failure to file has frustrated the Commission's opportunity to review changes in operations of a pipeline that provides NGPA section 311 service.

---

[166] Oasis Pipeline Response to Request No. 23, Bates No. OA23-000015 (Operations Agreement § 3.4).

[167] Oasis Pipeline Response to Request No. 23, Bates No. OA23-000013 (Operations Agreement § 2.4).

[168] Oasis Pipeline Response to Request No. 23, Bates No. OA23-000019-20 (Operations Agreement § 6.1).

[169] Oasis Pipeline Response to Request No. 23, Bates Nos. OA23-000004-5.

[170] Section 284.123(e) states in part that:

> If the pipeline changes its operations or rate election under this subpart, it must amend the [operating] statement and file such amendments not later than 30 days after commencement of the change in operations or the change in rate election.

18 C.F.R. § 284.123(e) (2006).

193. Finally, Oasis Pipeline's 2006 Operating Statement is inconsistent with the Agreement. The 2006 Operating Statement provides that all requests for service are to be sent to "Oasis Pipe Line Company of Texas L.P.[,]" *i.e.*, Oasis Pipe Line Company Texas. Though the Agreement assigns the management of the commercial operations to ETC Texas (and currently Oasis Pipeline, L.P.), the 2006 Operating Statement directs the shipper seeking capacity to seek approvals (e.g. creditworthiness) for such capacity from "Transporter," i.e., Oasis Pipe Line Company Texas, not Oasis Pipeline. Under the Agreement, it is Oasis Pipeline, L.P. that is responsible for "[n]ominations, confirmations, and negotiation of transportation rates."[171]

194. Oasis Pipeline's violation of the Commission's regulation of intrastate pipelines under subpart C of the Commission's regulations has frustrated the Commission's ability to review its changes in operations. Oasis Pipeline' failure to amend its Operating Statement may have contributed to the undue preference and overcharge violations described above by impliedly conveying to Oasis Pipeline the sense that, as a lessee not known to the Commission, it could violate Commission requirements with impunity. Moreover, Oasis Pipeline's failure to amend its Operating Statement is inexplicable because it involved a failure to comply with a straightforward regulatory requirement.

195. We propose to assess a civil penalty of $500,000 to address Oasis Pipeline's violation of section 284.123(e) of the Commission's regulations, and require that Oasis Pipeline amend its 2006 Operating Statement within 60 days of the date of this order. Oasis Pipeline's violation has been continuous from January 26, 2004 to the present.

V. DIRECTION TO ETP TO SHOW CAUSE

The Commission orders:

(A) ETP, within 30 days of the date of this order, to file an answer in accordance with 18 C.F.R. § 385.213 (2006) showing why it should not be found to have manipulated prices in violation of Market Behavior Rule 2with respect to fixed price natural gas for prompt month delivery at Houston Ship Channel (Ship Channel) in the months of January 2004, October 2004, December 2004, January 2005, February 2005, July 2005, September 2005, October 2005 and December 2005 and with respect to fixed price natural gas for next day delivery at Waha, Texas, on December 23 and December 28, 2005.

(B) ETP to show cause, no later than 30 days from the date of this order, why the Commission should not revoke ETP's blanket marketing certificate of public convenience and necessity pursuant to section 7 of the NGA authorizing ETP to make sales for resale at negotiated rates in interstate commerce of gas subject to the

[171] McPheeters Dep. 35:8-14.

Commission's jurisdiction for a period of one year, such period to commence 120 days from the date of this order and assess a civil penalty pursuant to the Commission's authority under the NGA in the amount of $82,000,000 and order ETP to disgorge unjust profits in the amount of $69,866,966, plus interest.

(C) Oasis Pipeline, within 30 days of the date of this order, to file an answer in accordance with 18 C.F.R. § 385.213 (2006), showing why it should not be found to have violated section 284.9(b) of the Commission's regulations by unduly discriminating against non-affiliated shippers and unduly preferring affiliated shippers from January 26, 2004 through June 30, 2006, to have violated of section 284.122(b) of the Commission's regulations charging certain shippers rates in excess of the prevailing Commission–approved fair and equitable rate for interstate transportation, and to have violated section 284.123(e) of the Commission's regulations when it failed to amend its Operating Statement to reference the Capacity Lease Agreement.

(D) Oasis Pipeline to show cause, no later than 30 days from the date of this order, why the Commission should not assess a civil penalty pursuant to the Commission's authority under the NGPA in the amount of $15,500,000 and order ETP to disgorge unjust profits in the amount of $267,122, plus interest.

By the Commission.

(S E A L)

Kimberly D. Bose,
Secretary.

Exhibit A-44

Sender	Recipient	Date	Body
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	01/14/2021 12:01:48	Hey there, in Dec
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	01/14/2021 12:02:00	Hi Jennifer
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	01/14/2021 12:02:20	there were some unallocated volumes at #1483 GD 11,22,29
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	01/14/2021 12:03:11	I would assume you'd want those volumes allocated to your Tport vs putting a buy/sell in place?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	01/14/2021 12:03:33	yes ma'am....xport, please
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	01/14/2021 12:03:41	thanks
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	01/14/2021 12:04:02	many thanks for checking
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	01/14/2021 12:04:13	have a good Thursday
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	01/14/2021 12:04:18	of course
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	01/14/2021 12:04:20	thank you
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 15:43:48	Good afternoon, Miss Jennifer!
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 15:43:55	has all been well with you?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 15:53:35	hi
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 15:54:01	have you been staying away from the Covid bug?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 15:54:08	so far, so good on this side.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 15:54:37	doubt that they'll be getting to us any time soon with the vaccinations
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 15:55:41	I get my second dose on the 16th, I'm nervous
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 15:56:15	chris got his second on Sat and he ended up sick about 24hr later but it only lasted for about 8 hours
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 15:56:22	I don't want to get sick
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 15:57:20	Wow. I'm impressed that you and Chris were able to get the shots already.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 15:57:45	We've never been more happy to be chunky
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 15:57:52	I've heard some have had issues with the second one...but others haven't....luck of the draw, I guess.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 15:57:56	haha
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 15:57:56	the one and only time it's served us well
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 15:58:52	Chris's best friend Jeff had the same reaction Chris did but Jeff's wife Julie had nothing other than the sore arm
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:00:37	When Diane and I got our Shingles shots a year or two ago....we had a weird thing.....I had it really bad (flu like) after the first one...but the second dose was nothing. Diane had no problem with the first...but the 2nd really knocked her back.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:07:39	fyi...with the cold blast coming, we'll have some more opportunities to do some more business with you....as I'm sure that you are aware. (you've probably been expecting my chat! :)
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:23:08	I think that we'll be interested in looking at some delivered gas at Oasis 1483....and maybe even something later like a delivered sale to us at the Karnes meter (7357/1608).
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:23:54	I've been working on plans for the rest of week and weekend most of the afternoon. Who knows how/if the temperarture forecasts are going to change again this week.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 16:27:37	ok let's keep talking as we get closer
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 16:28:00	it will be a day to day look for us (and of course we're trading for a long weekend)
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 16:28:13	to wee what we have available delivered at karnes
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:29:34	is Monday a trading holiday? President's Day? I didn't even think about that
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 16:30:31	yep you know it
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 16:30:35	geezzzz
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:30:40	Wow!
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 16:30:42	on top of everything else
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:30:54	incredible
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/09/2021 16:31:31	you thinking you will start looking to for friday flow?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:32:31	fyi...what I'm sort of thinking about is 50k/d at Oasis 1483...starting Friday...through the weekend
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:34:08	sorry....we could start that Thursday

CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/09/2021 16:34:59	the delivered volume at Karnes was more like a weekend thing
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/10/2021 09:59:28	GM Miss Jennifer!
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/10/2021 09:59:43	how is your morning going over there?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/10/2021 09:59:52	Fast and furious!!! :)
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/10/2021 09:59:58	good morning
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/10/2021 10:00:22	fun times in the gas business!
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/10/2021 11:08:25	no kidding
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/10/2021 11:09:30	we had a bit of a curveball thrown at us this morning...so had to accomodate our loads a little differently than we anticipated.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/10/2021 11:11:20	I think that for Friday going forward...we'll still going to be interested in some delivered Oasis 1483 volume.....and also possibly some delivered volume at Rio Nogales or CPS Karnes points
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/10/2021 11:11:44	sounds good
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/10/2021 11:12:14	just didn't want you to think that I forgot about you! :)
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 07:52:51	GM Miss Jennifer
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 07:53:01	Good Morning
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 07:53:13	all good with you today?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 07:54:46	hoping that you might have some gas to point our way...,..for tomorrow...and even today, if available.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 07:56:09	We should have vol avail, will need to see how FP shapes up before showing any offers. it may be a bit
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 07:56:22	still looking fro 50Kish at 1483?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 07:57:05	looking for 50k at 1483....for tomorrow...and today, as well....if available
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 07:57:54	and maybe even 50k delivered at Rio Nogales for tomorrow.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 07:58:12	we'll work on getting pricing together
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 07:58:29	we have a morning call at 7:10 after that call I can get you a same day offer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 08:00:13	for the intraday....I am looking for 50k at Oasis 1483...and maybe another 50k delivered at the Karnes point, as well...if available
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 08:01:53	for day ahead...I am looking for the 50k at 1483....and will have room to buy 50k delivered at Rio Nogales, as well.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 08:02:01	thought that I'd better summarize it
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 08:02:05	sorry for duplication
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 08:02:57	no worries
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 08:03:12	thank you, ma'am
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:05:42	ok same day, I can show you 50K Valero and Karnes $15.00 offer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:10:44	any chance of shaving the price a little, Jennifer? Could we get it a little closer to something like a $13 type number?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:11:04	I want the gas, however.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:11:45	I can do the 13K at valero but need to hold at $14 Karnes
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:12:20	'$14 at karnes or $15 at Karnes?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:12:41	I can do 14 at karnes
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:12:57	and $13 at valero
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:14:18	Perfect. Just wanted to make sure that we are on the same page. I'll put you down for 50k at Oasis 1483 and 50k at the Karnes point....same day (11th)....$13 and $14 prices, respectively
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:14:34	thanks so much, Jennifer
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:14:41	yes I agree, sorry I can't type this morning
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:14:50	haha...no worries
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:15:43	should still have room for tomorrow, as well, Jennifer....50k again at Oasis 1483...and 50k at Rio Nogales....if you are interested
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:16:27	I'll have pricing for tomorrow shortly

CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:16:48	cool...thanks!
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:17:37	'$15.00 offer for tomorrow
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:23:09	such a wide two way out there for tomorrow
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:23:51	I hear ya
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:25:01	could we try something a little closer to a $10 or $11 range
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:35:14	what would you think about this, Jennifer? If we did the 50k and 50k for tomorrow at your $15 price...would you put it to bed through Tuesday 16th?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:39:10	not for tomorrow, holiding at $15
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:39:25	I won't be able to price Weekend until tomorrow
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:39:30	gotcha
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:40:21	let's go ahead and do the 50k at Oasis 1483 and 50k at Rio Nogales.....$15 for tomorrow
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:40:23	please
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 09:42:06	I'll get this in
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:42:15	Great...got you down for it.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 09:42:21	thanks for your business today
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 11:06:26	thanks for your patience this morning
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 11:06:28	geezzzzx
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 11:06:40	yes ma'am
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 11:06:41	thanks!
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 13:34:47	hey just so we dont' get into confirm issues
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 13:35:05	HPL sold karnes and I have Oasis selling you rio at #1702
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 13:35:11	10-4
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 13:35:14	does that cause you any heart ache
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 13:35:27	no ma'am
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 13:35:35	I didn't even think about confirming THAT part of it unil just now
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 13:35:40	geez
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 13:35:43	whes
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 13:35:53	whew!
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 13:35:54	that is how I set it up on our side
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 13:36:50	thanks for the clarification, however.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 14:44:14	Jennifer...question
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 14:44:20	yes
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 14:45:10	do you have anything else that you could offer to us for today (11th)?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 14:46:18	We still have xport room...so could do something at Katy area...or possible increase the delivered Karnes volume.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 14:46:36	seems like Ercot is really leaning on us
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 14:49:57	how much?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 14:50:36	25k to 50k
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 14:50:45	somewhere up to that range
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 14:55:39	yes, can sell another 50K offer $35.00
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 14:56:40	delivered at Karnes
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 14:58:48	crunching my numbers
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 14:59:08	yes sir
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:04:42	haven't forgetten about you, Jennifer. The $35 is pretty steep...trying to see what we can work around
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 15:05:15	understood, we are just getting slammed over here
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:05:43	yes ma'am...I hear you

CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:07:36	there is a little out there offered at Katy Oasis....5k and 10k.....$20 and $30....I realize that that is a smaller volume
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:07:48	trying to see what the honchos have an appetite for.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 15:09:47	I will do the $30
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:11:12	great...thanks...still having to wait for one of the big guys. Can you give me a few more mins?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 15:11:21	of course
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:11:32	thanks
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:21:24	sorry for the delay....dang meetings have everyone tied up.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 15:24:41	no worries
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:28:55	having my breakfast/lunch while I wait! haha
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:29:02	I was starting to get a little shaky
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:46:14	again...apologies for slow response
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:55:00	Jennifer....
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:55:58	can you still show me the 50k at $30 delivered at Karnes for today (11th)? (The 2nd intraday package there)
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 15:58:36	yes
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:58:48	let's do it, please
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:58:54	thank you for your patience
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:58:58	much appreciatedf
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 15:59:24	I'll get that in
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/11/2021 15:59:41	gracias
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/11/2021 16:08:41	of course
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 08:14:21	GM Miss Jenni.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 08:14:29	how is the morning treating you?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 08:27:58	good
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 08:29:46	could you work up a couple of prices for us, Jennifer, for the weekend?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 08:30:30	whatcha looking for
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 08:35:20	thinking about looking for 50k at CP5 Karnes, 50k at Oasis 1483, and 50k at Rio Nogales.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 08:35:30	whew,...that's a lot of 50k volumes! haha
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 08:55:13	ok I've got you on the list
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 08:55:50	ok...thanks
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 10:05:00	ok, are you sitting down?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 10:05:46	'$150.00 offer for the weekend 13-16
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:07:14	Wow
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 10:13:05	I can't sit on that long, it's screaming over here
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:13:23	one sec
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 10:16:13	out
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:17:53	dang....had to update one of the honchos
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:20:00	are you out at that price, Jennifer, or out of gas?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 10:21:06	'$225.00 offer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:24:27	ok....I can do that, Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:24:52	my credit card is maxing out!
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:25:21	50k oasis 1483, 50k Karnes, and 50k Rio
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:33:16	was that OK on your side, Jennifer?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/12/2021 10:34:08	yes, rio will be oasis
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/12/2021 10:34:17	got it...thanks
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 08:57:32	gm

CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 08:57:52	gm
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 08:58:02	all good with you today?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 08:59:41	I'm in the office, I stayed in town last night, I was still at the office at 9:45, it didn't make sense to drive home
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:00:11	wow!
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:00:18	probably smart to just stay put
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:02:36	expecting another pretty busy day today?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 09:03:54	yep
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:07:24	I've been on webex meetings and conference calls since 7am...started at around 6am
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:08:18	going to be an interesting day again
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 09:08:55	hang in there my friend
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:09:02	you too
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:10:46	would you all have anything left to show us, Jennifer, if we find ourselves in a situation where we might need some more?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:10:57	specifially at the Karnes point.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 09:11:13	checking
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 09:13:50	Yes we would have up to 50K $250.00 offer same day
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:15:35	ok...good to know. I'm not sure that we are ready to pull the trigger on anything quite yet...but glad that you might have some, if need be.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:15:51	I'll be in contact
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:15:55	thanks, Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 09:16:42	got another meeting at 9am.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 10:58:08	Just checking back in
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 11:05:39	on phone call meeting number 4 or 5 right now.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 11:05:43	nothing new at the moment
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 11:07:59	'$225 offer same day just in case
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 11:08:50	thank you, ma'am....not sure how this is all going to shake out.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/13/2021 11:09:11	no worries, just wanted to keep you in the loop
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/13/2021 11:09:17	thank you!
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/14/2021 08:57:11	good morning
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/14/2021 08:57:17	just checking in
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 08:59:30	Gm Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 08:59:38	hope that all is well with you
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 08:59:47	were you able to get back home yesterday?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/14/2021 09:00:23	Nope, I'll I'll be residing at the Drury thru Tuesday??????
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 09:00:56	dang...sorry about that
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 09:01:22	hope that hubby will weather the storm ok alone at home
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 09:02:10	doing ok for now for today.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 09:02:20	we'll see how it changes as the day develops
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 09:04:05	thanks for checking on us! ?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/14/2021 09:21:47	Have a wonderful day
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 09:23:10	same to you, Ma'am
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/14/2021 09:23:22	if something changes with us, I'll let you know asap.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 10:26:07	Hey
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 10:46:56	ru there
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 11:18:07	Sorry that I missed your IM's this morning...but thanks for the call.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 11:18:20	passed along the information
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 11:20:12	ok hang in there

CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 11:35:01	thanks!!
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 12:26:31	I haven't forgotten about you, Miss Jennifer.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 13:41:38	Just checking in
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 13:42:38	sitting on another big meeting. We had another message in with Brian Riley again, as well.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 13:43:59	hope that your morning went well after we chatted this morning
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 16:35:23	Away
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 16:35:23	Bruce, are there any updates? based on the noms vs projected flows CPS is exceeding their storage rights by 15K
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 16:35:51	we need to have a back up deal in place in the event CPS exceeds their contrantual capacities for the day
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 16:38:46	still in another mtg with the honchos....I will pass it along again
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 16:44:17	Right now, we do not have the gas
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 16:44:22	we can not support the over pull
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 16:44:35	outside of your contractual rights
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 16:52:15	Jennifer...what about a nom change moving some of our Karnes gas away from there and point it to Rio instead?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 16:52:33	would that be something that would work or help the situation?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 16:53:26	trying to decide the best way to accomodate
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 16:58:58	its all net/net right
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 16:59:03	noms vs flow
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 16:59:46	if your noms stay the same (just juggled) and your flow stays the same (just juggled) still the same net effect right?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 17:00:57	or am I missing something?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 17:03:28	we were just talking options. Rio is on pressure control...whereas the other points you control. I was thinking about having you possibly reduce our flows at Karnes by X...then that would offset what we are overtaking at Rio.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 17:03:59	in any event...the idea didn't go over so good....so they are going to start getting the Rio volumes to drop,.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 17:04:51	They missed the 4pm window,,,so it night be an hour or so for it to go through Ercot and be seen.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 17:04:57	Does that sound cool with you?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 18:26:55	Hey the volumes have not lined out
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 18:27:25	the Rio nom has increased since our last chat
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 18:27:32	we need that back on rate now
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 18:34:37	trying to get an update
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 18:35:00	sent note informing that you all aren't seeing a drop
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 18:35:20	trying to get it done
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 18:37:22	got two of the operations guys responding and working on it
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 18:54:25	updates?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 18:58:27	I'm trying Jennifer...it sounds like they are having to figure out how to drop it without losing the unit. I'm caught in the midde
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 18:58:30	middle
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 18:58:43	We are still not seeing the flow back off. We will need to put a sale in place for $300.00 for any volumes delivered over your contractual rights
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 18:59:11	we've got the right people looking at it.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 18:59:18	'$300.00/mmbtu
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 18:59:58	ok we've just been asking to get back on rate for a few hours now and we're only seeing the rate increase
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 19:00:56	I need to have a confirmation that you are agreeing to the $300.00/MMbtu for any overrun volumes.

CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 19:04:47	would you have that volume to cover it....or you still want us to get on rate and are just telling me what the charge will be for whatever we go over? Just trying to make sure that we are on the same page.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 19:05:35	I'm relaying everything that you've been telling me
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 19:07:15	call me
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 19:20:50	my rides here
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 19:20:58	call/text on my cell please
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/15/2021 19:21:03	830-660-7803
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/15/2021 19:21:07	ok
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:37:51	GM Miss Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:38:04	hope that it was a nice eveing for you.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:44:27	Good morning
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:44:30	I did
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:45:01	Glad for that,.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:45:15	sorry if we made your day a little longer than it should have been
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:45:29	i turned it off about 930p
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:45:32	long enough day
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:48:55	I did to, no worries at all
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:49:02	nature of the beast
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:49:11	I guess so
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:49:54	are you all doing ok on that side.? Ship staying afloat? :)
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:50:10	gosh watching the news last night for the 1st time in 4 days, it looks like we're going to be in this wet winter mix cycle for a few day still
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:50:54	that is what it seems like
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:50:55	Oasis said they were stable this morning which is the best they could hope for after all the crazy yesterday
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:51:05	I'm glad to hear that.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:51:13	we have a 7:10 call this morning to see how we are shapping up for the new day
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:51:47	gotcha...let's reconvene after that to see what we can get going.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:51:59	sure will
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 07:52:02	I suspect that it's going to be a little slow to get going this morning.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 07:55:38	I agree
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 08:56:49	any updates, Jennifer?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 09:01:21	no, already slammed over her
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 09:01:43	I'll let you know as soon as I have infor for same day/tomorrow
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 09:02:29	Ok...thanks
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 09:03:17	we are having a hard time at Oasis 1483 this morning, I believe....what I'm hearing through the grapevine, anyway.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 09:04:45	ok
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 09:46:49	same day pricing $400.00/day
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 09:52:02	sorry missed seeing your note. Is that a price offer for selling me additional volume...or are you talking about the overflow price?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 09:52:14	just want to make sure that we are on same page.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 09:52:27	both right now
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 09:55:18	both same day and no notice
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 09:56:30	OK....good to know....mgmt will need to discuss. Do you think that you'll have any volume available for tomrrow, as well.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 10:09:11	we should
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 10:10:36	an if you haven't seen it, $400.00 has already traded next day on ICE at Enstor

CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 10:13:36	yes ma'am! running up! :)
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:14:50	Hey there
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:14:50	Away
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:14:52	Just checking in
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:15:08	you're right on the bubble for today
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:15:19	2K over contracutal rights
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:15:35	want to make sure we have a back $ in place
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:15:51	I'll get you GD 15 numbers as soon as I can
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:15:53	we have same day 20k that we'll be pointing to Rio for today
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:18:23	how are you looking for tomorrow, Jennifer? Will you have anything to sell to us delivered again?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:19:32	I think that we are still looking for 50k each delivered again at Oasis 1483, Rio Nogales, and the Karnes meter again.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:20:15	sorry....I'm not sure that Amber has gotten the Intraday in....it was pretty much hot off the presses.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:21:19	for tomorrow $400.00 offer
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:21:28	Rio, Karnes, Valero
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:22:56	any chance of doing something on an index basis, Jennifer?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:23:08	is that something that you would consider?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:23:18	no
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:25:59	Katy price has been coming off a bit. Can we wiggle some on your $400 price offer?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:27:12	No wiggle room
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:27:36	man..you are tough! :)
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:29:37	got Kevin, Paul, and Ken on the line...talking about it
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:29:49	trying to come up with something
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:30:28	ok,
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:31:40	trying to get a decision
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 12:39:27	I think that the $400 price is causing quite a bit of heartburn over here. I think that I could get it done right away at the $350 level. we can definitley attest that this would be for human needs
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:41:22	We are not able to get there.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 12:41:54	We have to hold at $400.00
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:33:01	hi Jennifer...I think that I finally got some concensus for tomorrow
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:33:11	are you still talking to me? :)
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:35:04	I should have the green light for some of the $400 price...if you still have it for tomorrow.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:35:51	I think that what we'd be looking for is 25k at Oasis/Valero 1483 meter...and 50k at Oasis Rio Nogales.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 13:37:29	ok please let me know
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:38:07	I'll put you down for the 25k and 50k respectively
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:38:11	thank you, ma'am
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:38:18	appreciate the patience
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:38:45	the numbers are so large...it's got everyone pretty freaked out.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 13:41:59	I'll get these deals in
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 13:42:44	and nothing at Karnes correct?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 13:44:17	not at the moment, Jennifer....thanks again!!!
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 13:47:01	perfect
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 13:47:03	thank you
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 17:11:10	Hi Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 17:12:17	do you have anything left to play with for tomorrow? Specifically at the Valero/Oasis 1483 meter...and also at the Karnes meter?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 17:12:36	one moment,

ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 17:18:10	We'll have to wait and look at it tomorrow
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 17:18:13	same day
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/16/2021 17:18:27	I'm not sure what we'll look like in the morning
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 17:18:50	Understood Jennifer.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 17:19:08	thanks....hope that it's a good night for everyone
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/16/2021 17:19:26	will circle back to see what you look like in the morning.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 07:48:27	GM Mrs. Merritt.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 07:48:37	hope that it was a good evening for you.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 07:54:40	gm
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 07:58:14	did you get some more good use out of those fancy boots?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 08:02:03	hope that your pipes made it through the night ok.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 08:02:14	gm good here
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 08:03:31	I'm sure that we'll be interested in looking at some same day gas for today, Jennifer...when you get in a position to look at it.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 08:03:51	as well as business for tomorrow, as well.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 08:05:47	ok I'll circle back once we get thru the ops calls this morning
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 08:05:58	cool...thank you, ma'am
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 09:07:22	are you still looking for Valero/Karnes same day? Volumes?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 09:10:20	for same day....I think that we are still looking for up to another 50k at the Valero/Oasis 1483 meter...and up to 85k at Karnes
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 09:12:45	ok we're looking at numbers
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 09:23:57	Bruce, Karnes does not look good, I don't think we will have the supply there. We are still crunching numbers for Valero
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 09:24:03	I'll let you know as soon as I can
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 09:25:08	darn...ok Jennifer...thanks.
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 09:25:19	working on numbers for tomrrow
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 09:25:24	tomorrow
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 09:34:25	ok
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 09:36:40	as things evolve this morning I will keep in touch but as of right now I do not have a same day offer to show at either location
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 09:37:27	dang. Ok, Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 10:03:55	do you have a feel for if you might have anything to offer for tomorrow, as well, Jennifer?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 10:25:05	Jennifer...it looks like we need some help for today. Is there anything at all that you all can do?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 10:25:38	I'll regroup with them but I was completely shot down
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 10:25:43	earlier.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 10:25:47	let me circle back
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 10:26:07	thanks much
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 10:26:12	we're working on it
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 10:26:32	I'm hoping for some next day gas, as well.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 10:29:14	understood
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 10:29:21	we are still working on it
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 10:29:32	10-4...thanks
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 10:42:01	I'm $500 offered for GD 18 right now
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 10:43:33	I will pass that along to Mgmt, Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 10:59:46	thanks for your patience
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 11:02:13	of course
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 11:10:49	'$300.00 offer for GD 18
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 11:13:00	ok...trying to get the right players on the phone call oh this side

CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 11:13:06	on
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 11:54:41	Hi Jennifer....do you have a refresh for tomorrow....or are you still thinking $300?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:06:47	anything?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:06:55	sorry to be a pest
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:07:23	hey
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:08:04	was just looking to see if you were still at $300 for tomorrow, or had a refresh
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:14:21	yes still $300.00 offer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:15:01	ok on the price for tomorrow, Jennifer
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:15:52	volumes/locations?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:16:01	I'm thinking about 50k delivered at Rio...up to 75k at Valero.Oasis 1483...if possible
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:16:34	thinking about Karnes, as well....need to scrub my numbers for a few mins...if those others work for you
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:17:24	Ok I'll get you in for 75KValero/50K Rio, $300.00
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:17:30	let me know on karnes
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:17:58	great...done and done. give me just a few mins for Karnes, please
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:18:04	ok
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:26:12	how about 35k at the Karnes point, Jennifer?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:26:52	ok I'll get the karnes in for tomorrow
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:26:55	SAME DAY
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:27:12	after hours of numbers crunching and gas control crying
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:27:16	great...got you down for the 35k at Karnes for tomorrow, as well
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:27:34	I can show you an offer same day Karnes up to 80K offer $500.00
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:28:28	one sec on the same day...will need to get some honcho approval on that one
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:30:25	understood
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:31:04	for the same gas, Jennifer....would we be able to split it between the Valero/Oasis point and Karnes point or would you need to keep it all at Karnes?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:31:32	same day gas
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:32:14	our big guy, Kevin, was taking the $500 price up the chain .
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:33:39	we're checking again but right now sounds like it's all carnes
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:37:06	for the Karnes it's only Karnes
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:37:29	gotcha
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:39:40	Big guy still asking for a few more minutes...can you still give me a few, Jennifer?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:39:51	for the same day offer
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:48:13	ok
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:50:29	thanks....for these big $$$, they have to chat about it for a bit
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:50:59	I understand
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:51:04	this is just crazy
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:51:12	yes ma'am
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 12:58:26	Jennifer...got the green light for the intraday 80k at Karnes...if still good for you
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 12:59:27	Yes, I'll get that in
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 13:00:25	if anything changes today, Jennifer, and you end up having some more flexibility at the Oasis/Valero point...please let me know
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 13:00:35	thanks again for today
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 13:02:08	we are talking every two hours over here with OPS if anything comes up same day I will let you know
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 13:04:22	cool...thanks
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 16:14:37	are you still looking for Same day at Valero?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 16:15:34	yes ma'am...if available

ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 16:16:30	how much do you need same day?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 16:17:59	we had been looking for up to an extra 50k there
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 16:18:42	I can sell you 50K same daty at 1483 $500.00
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 16:18:47	GD 17
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 16:20:16	scrubbing my numbers again...one sec, please
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 16:23:53	I can buy the 50k, Jennifer...if still good for you
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 16:25:14	same day 17th...Valero/Oasis 1483....50k volume...$500 price
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/17/2021 16:29:31	I'll get that in
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/17/2021 16:30:05	thanks so much!!
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 08:16:51	GM Miss Jennifer
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 08:19:04	good morning
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 08:37:54	hope that all is well with you all this morning.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 08:43:26	good thanks
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 08:44:00	we've had power all along..but water has been spotty the last24 hours
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 08:44:19	what has Chris been seeing? Has he been ok?
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 08:45:12	power has been rolling for him
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 08:46:10	he had the thrill of victory and the agony of defeat yesterday.....the water FINALLY came back on but out in our back building where the water softner is the pipe was leaking
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 08:46:25	so he had to turn the water off
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 08:46:33	oh no
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 08:46:36	dang
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 08:58:36	Are you looking for volumes tomorrow?
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 09:00:23	I think that we will looking for up to 75k again delivered at the Valero/Oasis 1483 meter, for sure, Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 09:00:59	trying to see what the market is going to do to decide about the others.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 09:24:44	ok I'll let you know
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 09:25:21	thank you, Ma'am
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 10:30:29	'$50.00 offer for 75K Valero GD 19
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:32:57	still interested in the 75k...give me a sec, please
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 10:33:32	ok
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:33:49	thank you, ma'am
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:41:06	big fluffy snowflakes have been falling for the last 30-45 mins or so
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 10:42:39	out of the $50
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 10:42:46	'$75.00 offer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:43:08	gotcha
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:47:05	i can do the $75 price, Jennifer...if still good for you
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 10:50:02	yes I'll get that in
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:50:16	cool...thank you, ma'am!
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:50:19	appreciatged
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:50:23	appreciated
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/18/2021 10:53:43	75K valero @ $75.00
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:53:53	agreed
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/18/2021 10:53:58	thank you
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:18:50	hey can you give me a call
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:18:54	in ref to GD 18
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:19:17	we're seeing a large over pull for the day, need to see about getting a deal in place
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:20:48	Wait

ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:20:59	I'm just an idiot
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:21:06	I check all the numbers twice
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:21:18	but then realized I was checking them for the wrong date
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:21:31	lets just act like this never happened
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/19/2021 16:21:39	haha
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:21:44	please
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/19/2021 16:21:46	it's been a long week, Jennifer
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/19/2021 16:22:03	I hope that your day went better today
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:22:18	of course as soon as I type it over to you I look back at the screen and realize I have a bad date
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:22:24	I'm ready to go home
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/19/2021 16:22:26	I'm sure that you're looking forward to being able to go home...
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/19/2021 16:22:35	thanks for all of your help this week
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/19/2021 16:22:40	greatly appreciated
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/19/2021 16:22:59	hope that you get some down time this weekend to recharge your batteries a little
CPS - Bruce Bordovsky	ETC - Jennifer Merritt	02/19/2021 16:23:06	that is what I'm hoping for anyway.
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:25:39	me too
ETC - Jennifer Merritt	CPS - Bruce Bordovsky	02/19/2021 16:25:44	have a wonderful weekend

Governor Abbott Issues Disaster Declaration In Response To Severe Winter Weather In Texas

CPSE Response in Opp to ET MSJ
Exhibit A-45
MDL-2022-CI-02879
exhibitsticker.com

February 12, 2021 | Austin, Texas | Proclamation

TO ALL TO WHOM THESE PRESENTS SHALL COME:

I, GREG ABBOTT, Governor of the State of Texas, do hereby certify that severe winter weather poses an imminent threat of widespread and severe property damage, injury, and loss of life due to prolonged freezing temperatures, heavy snow, and freezing rain statewide.

THEREFORE, in accordance with the authority vested in me by Section 418.014 of the Texas Government Code, I do hereby declare a state of disaster in all 254 counties based on the existence of such threat.

Pursuant to Section 418.017 of the code, I authorize the use of all available resources of state government and of political subdivisions that are reasonably necessary to cope with this disaster.

Pursuant to Section 418.016 of the code, any regulatory statute prescribing the procedures for conduct of state business or any order or rule of a state agency that would in any way prevent, hinder, or delay necessary action in coping with this disaster shall be suspended upon written approval of the Office of the

Governor. However, to the extent that the enforcement of any state statute or administrative rule regarding contracting or procurement would impede any state agency's emergency response that is necessary to protect life or property threatened by this declared disaster, I hereby authorize the suspension of such statutes and rules for the duration of this declared disaster.

In accordance with the statutory requirements, copies of this proclamation shall be filed with the applicable authorities.

IN TESTIMONY WHEREOF, I have hereunto signed my name and have officially caused the Seal of State to be affixed at my office in the City of Austin, Texas, this the 12th day of February, 2021.

GREG ABBOTT
Governor

RAILROAD COMMISSION OF TEXAS

EMERGENCY ORDER

WHEREAS, after Notice of Emergency Meeting to consider this Emergency Order was duly posted on February 12, 2021 with the Secretary of State within the time period provided by law pursuant to Tex. Gov't Code Chapter 551, *et seq*., the Railroad Commission of Texas ("Commission") determined that an Emergency Order is necessary to protect human needs customers in the State of Texas because of current conditions which threaten and health, safety and welfare of those customers, and determined that the existing regulations and Orders of the Commission do not sufficiently address the specific conditions of this emergency; and

WHEREAS, on February 12, 2021, the Governor of the State of Texas issued a State of Disaster in all 254 counties due to severe weather posing an imminent threat of widespread and severe property damage, injury, and loss of life due to prolonged freezing temperatures, heavy snow, and freezing rain statewide; and

WHEREAS, pursuant to the authority granted to the Commission in the Texas Utilities Code, the Commission has the authority to issue this Emergency Order affecting the operation of the gas utility systems in this state to prevent such threats to the public; and

WHEREAS, the transportation, delivery and/or sale of natural gas in the State of Texas for any other purpose other than serving human needs customers should be curtailed to the extent possible and necessary for the duration of this Emergency Order.

NOW, THEREFORE, IT IS HEREBY ORDERED BY THE RAILROAD COMMISSION OF TEXAS that Rule 2 of Docket 489 is temporarily amended as follows:

RULE 2.

Until such time as the Commission has specifically approved a utilities curtailment program, the following priorities in descending order shall be observed:

A. Deliveries of gas by natural gas utilities to ~~for~~ residences, hospitals, schools, churches and other human needs customers, and deliveries to Local Distribution Companies which serve human needs customers.

B. Deliveries of gas to electric generation facilities which serve human needs customers.

~~B.~~C. Deliveries of gas to small industrials and regular commercial loads (defined as those customers using less than 3,000 MCF per day) and delivery of gas for use as pilot lights or in accessory or auxiliary equipment essential to avoid serious damage to industrial plants.

~~C~~. D. Large users of gas for fuel or as a raw material where an alternate cannot be used and operation and plant production would be curtailed or shut down completely when gas is curtailed.

~~D~~. E. Large users of gas for boiler fuel or other fuel users where alternate fuels can be used. This category is not to be determined by whether or not a user has actually installed alternate fuel facilities, but whether or not an alternate fuel "could" be used.

DocuSign Envelope ID: 0C2B7A07-F56B-491B-9942-7BEFBA0BB574

~~E.~~ F. Interruptible sales made subject to interruption or curtailment at Seller's sole discretion under contracts or tariffs which provide in effect for the sale of such gas as Seller may be agreeable to selling and Buyer may be agreeable to buying from time to time.

IT IS FURTHER ORDERED that gas utilities which have a specific curtailment plan/program that has been approved by the Commission shall ensure that their top two priorities in the plan/program are A and B as listed above for the duration of this Emergency Order.

IT IS FURTHER ORDERED that this Emergency Order is in effect until 11:59 p.m. Central Standard Time Friday, February 19, 2021, unless otherwise renewed by the Commission in a subsequent Emergency Order.

SIGNED this 12th day of February 2021.

generators because it needs to keep the load balanced; is that right?

A. That's correct.

Q. So ERCOT wants to keep the power going in and the power going out balanced. So if a generator is just trying to throw power into the market, ERCOT will say, you can't do that because that is going to be imbalanced, right?

A. That's correct.

Q. If there is an imbalance in terms of there is more demand than supply, what does ERCOT do?

A. ERCOT would have to either get additional generation online by whatever tools it has to be able to do that. If the load is greater than the generation online, ERCOT will have to shed firm load to maintain the balance.

Q. Okay. So one thing ERCOT could do was try to incentivize generators to put more power onto the grid; is that right?

A. That is correct.

Q. And another thing they could do is shed load, and in layman's terms that means basically shut off power to the users; is that correct?

A. That's correct.

Q. And did ERCOT do either of those things during

Winter Storm Uri?

A. Yes.

Q. Which of those things did it do?

A. Both.

Q. Okay. So ERCOT shed load because too many people were using it; is that right?

A. ERCOT shed load because generation online started falling offline --

Q. Okay.

A. -- and then the load was at a higher level than they have seen, yes.

Q. Okay. And you said ERCOT did both?

A. Correct.

Q. What did ERCOT do to try and get more generation online?

A. ERCOT in -- in -- preceding the storm asked for any available generation or transmission equipment to come back into service before the storm hit so the grid could be as strong as possible to be able to manage the storm.

Q. Did ERCOT ask CPS to bring any generation that was offline back online before the storm?

A. CPS had no generation. It was -- it was out for a major outage -- major outage work, was not able to come back online with the -- approaching the storm.

PUC ISSUES EMERGENCY ORDER ON ELECTRICITY PRICING

Austin, TX – In response to the weather-induced electricity crisis currently affecting Texas, the Public Utility Commission of Texas met in an emergency open meeting this evening to address concerns that certain pricing mechanisms were not generating an optimal response to the challenge.

In its order, the Commission directed the Electric Reliability Council of Texas to modify pricing models to more accurately reflect the scarcity conditions in the market. Specifically, the Commission directed ERCOT to ensure that firm load being shed in ERCOT's Energy Emergency Alert Level 3 operating condition is accounted for in ERCOT's scarcity pricing.

The decision was spurred by ERCOT's discovery that energy prices across the system were clearing at less than the current system-wide offer cap of $9,000 established by Commission rule. When notified, the Commissioners agreed that energy prices across the system clearing as low as approximately $1,200 during the first day of the weather crisis was inconsistent with the fundamental design of the ERCOT market. Because energy prices should reflect scarcity of the supply, the market price for the energy needed to serve load being shed in the face of scarcity should also be at its highest.

Click **here** to read the Commission order.

###

About the Public Utility Commission

Our mission is to serve Texans by regulating the state's electric, telecommunication, and water and sewer utilities, implementing respective legislation, and offering customer assistance in resolving consumer complaints. Since its founding in 1975, the Commission has a long and proud history of service to Texas, protecting customers, fostering competition, and promoting high quality infrastructure. To learn more, please visit http://www.puc.texas.gov.

In addition to downloading the ERCOT mobile app (on both the **Apple Store** and **Google Play**), Texans are advised to bookmark the PUC's **Storm Resources** page for helpful advice and features like a statewide outage restoration map.

Customers are also encouraged to leverage social media for up-to-date information:

- PUC: **Facebook** | **Twitter** | **Instagram**
- ERCOT: **Facebook** | **Twitter**

FOSSIL FUEL EXECUTIVES GLOAT ABOUT PROFITS, PR FROM TEXAS WINTER STORM CRISIS

Comstock Resources, a shale drilling company, apologized for describing gas prices from the Texas storm as a "jackpot."

Lee Fang

February 23 2021, 1:04 p.m.

As much of Texas struggles with historic cold weather, power outages, and a shortage of potable water, volunteers direct traffic at a water distribution event in Houston on Feb. 20, 2021. Photo: Justin Sullivan/Getty Images

AS A SEVERE winter storm swept Texas last week, cutting electricity from millions of residents in freezing temperatures and causing nearly 70 deaths so far, some energy executives saw an upside to the catastrophe.

“Obviously, this week is like hitting the jackpot,” boasted Roland Burns, the chief executive and chief financial officer of Comstock Resources, a shale drilling company that benefited from the sudden demand for natural gas, in a call with investors last Wednesday. The price for gas, said Burns, has been “incredible.”

Marshall McCrea, the co-chief executive of pipeline firm Energy Transfer, told investors last Wednesday that his company has “been able to benefit,” given its ability to transport gas from storage facilities near Houston to power plants across the state. The company, McCrea said, has transported large volumes of gas in Texas and capitalized on “very strong commodity prices.” Energy Transfer, when reached for comment, said that McCrea’s comments “are pretty clear.”

Ronald Mills, the vice president of investor relations at Comstock Resources, said the company apologizes for the use of the word “jackpot” to describe natural gas prices last week. “That description was inappropriate and insensitive to the millions of Texans that did not have electricity or power, including many of our own employees who suffered through the same since we are based in the Dallas area,” said Mills in an email to The Intercept.

The price of natural gas, which skyrocketed as power plants and industrial consumers scrambled to secure additional supply, benefited other energy interests. Macquarie Group, an investment bank that is the second-biggest physical gas supplier in the U.S., reported a windfall of $210 million from the swing in gas and electricity prices. The company also owns Griddy, a residential energy utility that has billed customers as much as $16,752 and $8,000 in recent days.

There was another "upside" to the Texas storm, McCrea noted during the call. "Just over the last four or five days," he added, "the number one thing that everybody is recognizing, I've already said, and we all know on this call, how important fossil fuels are for this country, in this world."

THE CRISIS HAS indeed sparked a debate over the role of fossil fuels, with some prominent Republicans taking to the air to disingenuously blame only wind and solar energy rather than the failure of the grid as a whole. Texas Gov. Greg Abbott appeared on Fox News to falsely claim that the storm showed the Green New Deal — a slogan for a package of renewable energy policies favored by some in Congress that has not been debated or implemented — "would be a deadly deal for the United States of America."

Rick Perry, the former Texas governor, appeared on Fox News on Friday with host Sean Hannity to also point blame at renewable energy.

“Last week in Texas,” said Perry, “as people were losing their power, thank God we had fossil fuels in this state, because if all we had had was the AOC Green New Deal plan, wind and solar, we would have had a massive disaster on our hands.”

Related

Texas Republicans Ran a 20-Year Experiment. The Results Are In.

Despite the intense focus on the failures of some wind turbines during the storm, many point to a diffuse set of causes for the blackouts, including the deregulated design of the Texas energy grid. Texas is the only state in the nation that is not connected to other states to import energy in times of crisis and does not require any “capacity market” to compel power plants to produce additional standby energy during the winter. Many of the critical power plants that failed last week were reliant on fossil fuels such as natural gas.

A follow-up story on the Fox News website, published after Perry’s appearance, noted that “natural gas, coal and nuclear energy systems were responsible for nearly twice as many outages as frozen wind turbines and solar panels combined.”

Many of the power outages were due to a lack of weatherization at power plants and pipelines, upgrades that were fiercely resisted by energy companies in Texas. Following a winter storm in 2011, which similarly caused rolling blackouts, both state and federal energy regulators recommended extensive work to prepare the electricity infrastructure in the state for severe winter weather events. The warnings produced little change.

In 2014, the Public Utility Commission of Texas also proposed rules to require power plants to identify and address "weather design limits." The proposal was opposed by leading power generation companies, including the Texas subsidiary of utility and energy giant Sempra Energy. The rules were then weakened to allow power plants to only address previously known problems, not identify any new potential weaknesses.

Another fact that went unmentioned during the Hannity segment was his guest's personal financial stake in the debate. Perry, following his resignation as secretary of energy in the Trump administration, rejoined the board of Energy Transfer last year. The part-time position provides stock and cash awards of $174,997 a year, according to a new filing to the Securities and Exchange Commission.

Update: February 23, 2021, 4:08 p.m. ET

This story has been updated to include a response from Comstock Resources.

WAIT! BEFORE YOU GO on about your day, ask yourself: How likely is it that the story you just read would have been produced by a different news outlet if The Intercept hadn't done it?

Consider what the world of media would look like without The Intercept. Who would hold party elites accountable to the values they proclaim to have? How many covert wars, miscarriages of justice, and dystopian technologies would remain hidden if our reporters weren't on the beat?

The kind of reporting we do is essential to democracy, but it is not easy, cheap, or profitable. The Intercept is an independent nonprofit news outlet. We don't have ads, so we depend on our members to help us hold the powerful to account. Joining is simple and doesn't need to cost a lot: You can become a sustaining member for as little as $3 or $5 a month. That's all it takes to support the journalism you rely on.

We're independent of corporate interests. Will you help us?

ENERGY TRANSFER REPORTS FIRST QUARTER 2021 RESULTS

Dallas - May 6, 2021 - Energy Transfer LP (NYSE:ET) ("ET" or the "Partnership") today reported record financial results for the quarter ended March 31, 2021.

ET reported net income attributable to partners for the three months ended March 31, 2021 of $3.29 billion, an increase of $4.14 billion compared to the same period the previous year. For the three months ended March 31, 2021, net income per limited partner unit (diluted) was $1.21 per unit.

Adjusted EBITDA for the three months ended March 31, 2021 was $5.04 billion compared with $2.64 billion for the three months ended March 31, 2020.

Distributable Cash Flow attributable to partners, as adjusted, for the three months ended March 31, 2021 was $3.91 billion compared to $1.42 billion for the three months ended March 31, 2020.

Results for the first quarter reflected the one-time impacts of the winter storm in February and reliable operations of ET's flexible, well-maintained asset base, particularly its storage and transportation facilities in Texas. Prior to the storm, ET pre-deployed employees and specialized equipment to key assets, and added line pack to pipelines to serve as additional storage. During the storm, employees manned facilities 24 hours a day, ET's transmission lines remained fully operational and the Partnership did everything within its control to keep plants running and field compression idling so that ET would be prepared to deliver natural gas to facilities throughout Texas for residential consumption and power generation. ET was able to continuously provide energy to help meet critical needs throughout the historic storm, due to years of significant capital investments, strategic planning and a dedicated workforce.

Key accomplishments and current developments:

Operational

- During the first quarter of 2021, the Partnership commissioned its ethane export facilities at Nederland, Texas, and through April has successfully loaded three very large ethane carriers ("VLEC") and three additional ships with ethane, bringing the total ethane loaded out of this facility to nearly three and a half million barrels.
- The Partnership also recently completed the final drill necessary to commission its PA Access Pipeline for refined products service.
- In April 2021, ET announced an agreement which utilizes existing pipeline assets to expand crude oil transportation opportunities from the Denver-Julesburg Basin and Cushing, Oklahoma to ET's Nederland, Texas terminal.

Strategic

- In February 2021, the Partnership announced the acquisition of Enable Midstream Partners, LP ("Enable") in a $7.2 billion, all-equity transaction. Pursuant to support agreements entered into in connection with the merger agreement, the two largest Enable unitholders have delivered their written consents to approve the merger. These unitholders collectively own 79% of Enable's outstanding common units and those consents are therefore sufficient to approve the merger. The transaction is subject to the satisfaction of customary closing conditions, including Hart-Scott-Rodino Act ("HSR") clearance. We anticipate that the Federal Trade Commission ("FTC") will issue requests for additional information and documentary material. We continue to believe that the FTC will grant unconditional clearance of the transaction, and we remain fully committed to closing the Enable merger under the terms of the merger agreement and we now expect to close the transaction in the second half of 2021.
- In April 2021, the Partnership completed several internal reorganization transactions, including the merger of Energy Transfer Operating, L.P. directly into Energy Transfer LP. These internal transactions will benefit the Partnership going forward by simplifying the Partnership's structure and reducing certain administrative costs.

- ET continues to pursue opportunities to reduce the Partnership's environmental footprint throughout its operations with increased use of technologies, such as the Partnership's dual drive compressors, and by supporting electric generation projects, such as the Maplewood 2 solar project, which is the Partnership's first-ever dedicated solar power contract.

Financial

- During the first quarter of 2021, the Partnership used cash from operations to reduce outstanding debt by approximately $3.7 billion.
- In April 2021, ET announced a quarterly distribution of $0.1525 per unit ($0.61 annualized) on ET common units for the quarter ended March 31, 2021.
- As of March 31, 2021, the Partnership's $6.00 billion revolving credit facilities had an aggregate $5.08 billion of available capacity, and the leverage ratio, as defined by the credit agreement, was 3.23x.
- For 2021, the Partnership's previous full-year Adjusted EBITDA guidance was $10.6 billion to $11.0 billion, which included approximately $200 million related to Winter Storm Uri. The Partnership now expects to realize a total impact of approximately $2.4 billion from the storm for 2021. As a result, ET is updating its full-year Adjusted EBITDA guidance to $12.9 billion to $13.3 billion. This represents an increase of approximately $100 million compared to ET's previous Adjusted EBITDA guidance, excluding the full impact of Winter Storm Uri. These estimates exclude any contribution from the recently announced Enable acquisition.
- For the three months ended March 31, 2021, the Partnership spent approximately $360 million on growth capital expenditures. The Partnership now expects to spend approximately $1.6 billion on growth capital expenditures for the full year of 2021.

ET benefits from a portfolio of assets with exceptional product and geographic diversity. The Partnership's multiple segments generate high-quality, balanced earnings with no single segment contributing more than 30% of the Partnership's consolidated Adjusted EBITDA (excluding the impacts of the February 2021 winter storm) for the three months ended March 31, 2021. The vast majority of the Partnership's segment margins are fee-based and therefore have limited commodity price sensitivity.

Conference Call information:

The Partnership has scheduled a conference call for 4:00 p.m. Central Time, Thursday, May 6, 2021 to discuss its first quarter 2021 results and provide a partnership update. The conference call will be broadcast live via an internet webcast, which can be accessed through www.energytransfer.com and will also be available for replay on the Partnership's website for a limited time.

Energy Transfer LP (NYSE: ET) owns and operates one of the largest and most diversified portfolios of energy assets in the United States, with a strategic footprint in all of the major domestic production basins. ET is a publicly traded limited partnership with core operations that include complementary natural gas midstream, intrastate and interstate transportation and storage assets; crude oil, NGL and refined product transportation and terminalling assets; NGL fractionation; and various acquisition and marketing assets. ET also owns Lake Charles LNG Company, as well as the general partner interests, the incentive distribution rights and 28.5 million common units of Sunoco LP (NYSE: SUN), and the general partner interests and 46.1 million common units of USA Compression Partners, LP (NYSE: USAC). For more information, visit the Energy Transfer LP website at www.energytransfer.com.

Sunoco LP (NYSE: SUN) is a master limited partnership with core operations that include the distribution of motor fuel to approximately 10,000 convenience stores, independent dealers, commercial customers and distributors located in more than 30 states, as well as refined product transportation and terminalling assets. SUN's general partner is owned by Energy Transfer LP (NYSE: ET). For more information, visit the Sunoco LP website at www.sunocolp.com.

USA Compression Partners, LP (NYSE: USAC) is a growth-oriented Delaware limited partnership that is one of the nation's largest independent providers of compression services in terms of total compression fleet horsepower. USAC partners with a broad customer base composed of producers, processors, gatherers and transporters of natural gas and crude oil. USAC focuses on providing compression services to infrastructure applications primarily in high-volume gathering systems, processing facilities and transportation applications. For more information, visit the USAC website at www.usacompression.com.

Forward-Looking Statements

This news release may include certain statements concerning expectations for the future that are forward-looking statements as defined by federal law. Such forward-looking statements are subject to a variety of known and unknown risks, uncertainties, and other factors that are difficult to predict and many of which are beyond management's control. An extensive list of factors

that can affect future results are discussed in the Partnership's Annual Report on Form 10-K and other documents filed from time to time with the Securities and Exchange Commission, including the Partnership's Quarterly Report on Form 10-Q to be filed for the current period. In addition to the risks and uncertainties previously disclosed, the Partnership has also been, or may in the future be, impacted by new or heightened risks related to the COVID-19 pandemic, and we cannot predict the length and ultimate impact of those risks. The Partnership has also been, and may in the future be, impacted by the winter storm in February 2021 and the resolution of related contingencies, including credit losses, disputed purchases and sales, litigation and/or potential legislative action. The Partnership undertakes no obligation to update or revise any forward-looking statement to reflect new information or events.

The information contained in this press release is available on our website at www.energytransfer.com.

(a) Winter Storm Uri, which occurred in February 2021, resulted in one-time impacts to the Partnership's consolidated net income, Adjusted EBITDA and Distributable Cash Flow. Please see additional discussion of these impacts, as well as the potential impacts to future periods, included in the "Summary Analysis of Quarterly Results by Segment" below.

(b) Adjusted EBITDA, Distributable Cash Flow and distribution coverage ratio are non-GAAP financial measures used by industry analysts, investors, lenders and rating agencies to assess the financial performance and the operating results of ET's fundamental business activities and should not be considered in isolation or as a substitute for net income, income from operations, cash flows from operating activities or other GAAP measures.

There are material limitations to using measures such as Adjusted EBITDA, Distributable Cash Flow and distribution coverage ratio, including the difficulty associated with using any such measure as the sole measure to compare the results of one company to another, and the inability to analyze certain significant items that directly affect a company's net income or loss or cash flows. In addition, our calculations of Adjusted EBITDA, Distributable Cash Flow and distribution coverage ratio may not be consistent with similarly titled measures of other companies and should be viewed in conjunction with measurements that are computed in accordance with GAAP, such as operating income, net income and cash flow from operating activities.

Definition of Adjusted EBITDA

We define Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Inventory adjustments that are excluded from the calculation of Adjusted EBITDA represent only the changes in lower of cost or market reserves on inventory that is carried at last-in, first-out ("LIFO"). These amounts are unrealized valuation adjustments applied to Sunoco LP's fuel volumes remaining in inventory at the end of the period.

Adjusted EBITDA reflects amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates. The use of Adjusted EBITDA or Adjusted EBITDA related to unconsolidated affiliates as an analytical tool should be limited accordingly.

Adjusted EBITDA is used by management to determine our operating performance and, along with other financial and volumetric data, as internal measures for setting annual operating budgets, assessing financial performance of our numerous business locations, as a measure for evaluating targeted businesses for acquisition and as a measurement component of incentive compensation.

Definition of Distributable Cash Flow

We define Distributable Cash Flow as net income, adjusted for certain non-cash items, less distributions to preferred unitholders and maintenance capital expenditures. Non-cash items include depreciation, depletion and amortization, non-cash compensation expense, amortization included in interest expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and deferred income taxes. For unconsolidated affiliates, Distributable Cash Flow reflects the Partnership's proportionate share of the investee's distributable cash flow.

Distributable Cash Flow is used by management to evaluate our overall performance. Our partnership agreement requires us to distribute all available cash, and Distributable Cash Flow is calculated to evaluate our ability to fund distributions through cash generated by our operations.

On a consolidated basis, Distributable Cash Flow includes 100% of the Distributable Cash Flow of ET's consolidated subsidiaries. However, to the extent that noncontrolling interests exist among our subsidiaries, the Distributable Cash Flow generated by our subsidiaries may not be available to be distributed to our partners. In order to reflect the cash flows available for distributions to our partners, we have reported Distributable Cash Flow attributable to partners, which is calculated by adjusting Distributable Cash Flow (consolidated), as follows:

- For subsidiaries with publicly traded equity interests, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiary, and Distributable Cash Flow attributable to our partners includes distributions to be received by the parent company with respect to the periods presented.
- For consolidated joint ventures or similar entities, where the noncontrolling interest is not publicly traded, Distributable Cash Flow (consolidated) includes 100% of Distributable Cash Flow attributable to such subsidiaries, but Distributable Cash Flow attributable to partners reflects only the amount of Distributable Cash Flow of such subsidiaries that is attributable to our ownership interest.

For Distributable Cash Flow attributable to partners, as adjusted, certain transaction-related adjustments and non-recurring expenses that are included in net income are excluded.

Definition of Distribution Coverage Ratio

Distribution coverage ratio for a period is calculated as Distributable Cash Flow attributable to partners, as adjusted, divided by distributions expected to be paid to the partners of ET in respect of such period.

ENERGY TRANSFER LP AND SUBSIDIARIES
SUMMARY ANALYSIS OF QUARTERLY RESULTS BY SEGMENT
(Tabular dollar amounts in millions)
(unaudited)

	Three Months Ended March 31,	
	2021	2020
Segment Adjusted EBITDA:		
Intrastate transportation and storage	$ 2,813	$ 240
Interstate transportation and storage	453	404
Midstream	288	383
NGL and refined products transportation and services	647	663
Crude oil transportation and services	510	591
Investment in Sunoco LP	157	209
Investment in USAC	100	106
All other	72	39
Total Segment Adjusted EBITDA	$ 5,040	$ 2,635

In the following analysis of segment operating results, a measure of segment margin is reported for segments with sales revenues. Segment margin is a non-GAAP financial measure and is presented herein to assist in the analysis of segment operating results and particularly to facilitate an understanding of the impacts that changes in sales revenues have on the segment performance measure of Segment Adjusted EBITDA. Segment margin is similar to the GAAP measure of gross margin, except that segment margin excludes charges for depreciation, depletion and amortization. Among the GAAP measures reported by the Partnership, the most directly comparable measure to segment margin is Segment Adjusted EBITDA; a reconciliation of segment margin to Segment Adjusted EBITDA is included in the following tables for each segment where segment margin is presented.

In addition, for certain segments, the sections below include information on the components of segment margin by sales type, which components are included in order to provide additional disaggregated information to facilitate the analysis of segment margin and Segment Adjusted EBITDA. For example, these components include transportation margin, storage margin and other margin. These components of segment margin are calculated consistent with the calculation of segment margin; therefore, these components also exclude charges for depreciation, depletion and amortization.

Winter Storm Uri, which occurred in February 2021, resulted in one-time impacts to the Partnership's Adjusted EBITDA and also affected the results of operations in certain segments, as discussed in segment analysis below. The recognition of the impacts of Winter Storm Uri during the three months ended March 31, 2021 required management to make certain estimates and assumptions, including estimates of expected credit losses and assumptions related to the resolution of disputes with counterparties with respect to certain purchases and sales of natural gas. The ultimate realization of credit losses and the resolution of disputed purchases and sales of natural gas could impact the Partnership's financial condition and results of operations in future periods.

Intrastate Transportation and Storage

	Three Months Ended March 31,	
	2021	2020
Natural gas transported (BBtu/d)	11,851	13,135
Withdrawals from storage natural gas inventory (BBtu)	19,045	6,975
Revenues	$ 4,900	$ 593
Cost of products sold	1,994	303
Segment margin	2,906	290
Unrealized gains on commodity risk management activities	(12)	(6)
Operating expenses, excluding non-cash compensation expense	(80)	(41)
Selling, general and administrative expenses, excluding non-cash compensation expense	(8)	(9)
Adjusted EBITDA related to unconsolidated affiliates	6	6
Other	1	—
Segment Adjusted EBITDA	$ 2,813	$ 240

Transported volumes decreased primarily due to the bankruptcy filing of a transportation customer, a contract step-down, and impacts of Winter Storm Uri.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our intrastate transportation segment increased due to the net effects of the following:

- an increase of $1.52 billion in realized storage margin due to higher physical storage margin from withdrawals during Winter Storm Uri;
- an increase of $983 million in realized natural gas sales and other primarily due to natural gas sales at prevailing market prices during Winter Storm Uri;
- an increase of $84 million in retained fuel revenues primarily due to natural gas prices during Winter Storm Uri; and
- an increase of $19 million in transportation fees due to demand volume ramp-ups from the Permian and fees related to Winter Storm Uri, partially offset by the expiration of certain contracts on our Regency Intrastate Gas System; partially offset by
- an increase of $39 million in operating expenses primarily due to a $29 million increase in the cost of fuel consumption during Winter Storm Uri and a $9 million increase in electricity costs.

Interstate Transportation and Storage

	Three Months Ended March 31,	
	2021	2020
Natural gas transported (BBtu/d)	9,654	10,630
Natural gas sold (BBtu/d)	21	15
Revenues	$ 525	$ 464
Operating expenses, excluding non-cash compensation, amortization and accretion expenses	(134)	(143)
Selling, general and administrative expenses, excluding non-cash compensation, amortization and accretion expenses	(21)	(21)
Adjusted EBITDA related to unconsolidated affiliates	85	106
Other	(2)	(2)
Segment Adjusted EBITDA	$ 453	$ 404

Transported volumes decreased primarily due to foundation shipper contract expirations and a shipper bankruptcy on our ETC Tiger system, maintenance of third-party facilities, and lower crude production resulting in lower associated gas production.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our interstate transportation and storage segment increased due to the net impacts of the following:

- an increase of $61 million in revenues primarily due to an $88 million increase in operational gas sales and a $6 million increase in reservation revenues from higher contracted volumes and increased short-term firm contracts. These increases were partially offset by a $31 million decrease due to contract expirations and a shipper bankruptcy during 2020 on our ETC Tiger system; and
- a decrease of $9 million in operating expenses primarily due to a $5 million decrease in employee costs, a $2 million decrease in maintenance expenses and a $2 million decrease in ad valorem tax expense; partially offset by
- a decrease of $21 million in Adjusted EBITDA related to unconsolidated affiliates primarily due to a $19 million decrease from our Fayetteville Express Pipeline joint venture as a result of the expiration of foundation shipper contracts and a $3 million decrease from our Midcontinent Express Pipeline joint venture as a result of less capacity sold and lower rates received following the expiration of foundation shipper contracts, partially offset by a $1 million increase from our Citrus joint venture resulting from higher revenues.

Midstream

	Three Months Ended March 31,	
	2021	2020
Gathered volumes (BBtu/d)	12,024	13,346
NGLs produced (MBbls/d)	534	610
Equity NGLs (MBbls/d)	30	36
Revenues	$ 2,672	$ 1,170
Cost of products sold	2,202	575
Segment margin	470	595
Operating expenses, excluding non-cash compensation expense	(164)	(193)
Selling, general and administrative expenses, excluding non-cash compensation expense	(25)	(26)
Adjusted EBITDA related to unconsolidated affiliates	7	7
Segment Adjusted EBITDA	$ 288	$ 383

Gathered volumes and NGL production decreased compared to the same period last year primarily due to basin declines and Winter Storm Uri in the South Texas, Mid-Continent/Panhandle, Permian and North Texas regions partially offset by volume growth in the Ark-La-Tex region.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our midstream segment decreased due to the net impacts of the following:

- a decrease of $145 million in non-fee-based margin due to the impacts of Winter Storm Uri; and
- a decrease of $32 million in fee-based margin due to lower volumes primarily in the South Texas Region as a result of basin declines and Winter Storm Uri; partially offset by
- an increase of $52 million in non-fee-based margin due to favorable natural gas prices of $26 million and NGL prices of $26 million;
- a decrease of $29 million in operating expenses due to cost-saving initiatives, including a decrease of $19 million in outside services, $7 million in materials and $3 million in ad valorem taxes; and
- a decrease of $1 million in selling, general and administrative expenses due to a decrease in overhead costs resulting from corporate cost reductions.

NGL and Refined Products Transportation and Services

	Three Months Ended March 31,	
	2021	2020
NGL transportation volumes (MBbls/d)	1,502	1,398
Refined products transportation volumes (MBbls/d)	462	542
NGL and refined products terminal volumes (MBbls/d)	1,042	847
NGL fractionation volumes (MBbls/d)	726	804
Revenues	$ 3,990	$ 2,715
Cost of products sold	3,141	1,836
Segment margin	849	879
Unrealized gains on commodity risk management activities	(23)	(55)
Operating expenses, excluding non-cash compensation expense	(172)	(159)
Selling, general and administrative expenses, excluding non-cash compensation expense	(28)	(25)
Adjusted EBITDA related to unconsolidated affiliates	21	23
Segment Adjusted EBITDA	$ 647	$ 663

Refined products transportation volumes decreased due to less domestic demand for jet fuel and other refined products, as well as COVID-19 related demand reductions.

NGL and refined products terminal volumes increased primarily due to higher volumes from our Mariner East system. In addition, loaded vessels at our Nederland Terminal increased due to the additional supply from the initiation of service on our propane and ethane export pipelines in the fourth quarter of 2020. These increases were partially offset by lower domestic demand for jet fuel and other refined products at our refined product terminals due primarily to COVID-19 related demand reductions.

Average fractionated volumes at our Mont Belvieu, Texas fractionation facility decreased primarily due to lower NGL volumes feeding our Mont Belvieu fractionation facility as a result of production interruptions, primarily in the Permian region, due to Winter Storm Uri during the first quarter of 2021.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our NGL and refined products transportation and services segment decreased due to the net impacts of the following:

- a decrease of $34 million in fractionators and refinery services margin primarily due to a $28 million decrease resulting from downtime on our various fractionators due to the previously mentioned weather-driven and COVID-19 related volume reductions in the first quarter of 2021 and a $17 million decrease relating to a cavern withdrawal in the first quarter of 2021, the impact of which was partially offset in our transportation margin. These decreases were partially offset by an $8 million increase due to a more favorable pricing environment impacting our refinery services business;
- an increase of $13 million in operating expenses primarily due to a $14 million increase in power costs; and
- a decrease of $10 million in terminal services margin primarily due to a $32 million decrease resulting from an expiration of a third-party contract at our Nederland Terminal in the second quarter of 2020. This decrease was partially offset by increases of $13 million in loading fees due to higher LPG export volumes at our Nederland Terminal, $7 million due to the startup of our ethane export facilities at our Nederland Terminal in the first quarter of 2021, and $1 million due to higher throughput at our Marcus Hook Terminal; partially offset by
- an increase of $26 million in marketing margin primarily due to a $45 million increase resulting from higher optimization gains and from the sale of NGL component products at our Mont Belvieu facility, a $14 million increase from our optimization and blending operations from our northeast NGL and refined products marketing operations, and a $7 million increase due to inventory write-downs taken on various products during 2020 as a result of market price declines. These increases were partially offset by intrasegment charges of $24 million in the first quarter of 2021 which were fully offset within our transportation margin, as well as a $15 million decrease in butane blending margin due to less favorable prices; and
- an increase of $16 million in transportation margin primarily due to intrasegment revenues of $24 million in the first quarter of 2021, which are fully offset by a charge reflected in our marketing margin, a $20 million increase due to higher

export volumes feeding into our Nederland Terminal resulting from the initiation of service on our propane and ethane export pipelines in the fourth quarter of 2020, a $19 million increase from higher throughput on our Mariner East pipeline system and an $11 million gain relating to a cavern withdrawal in the first quarter of 2021 that is partially offset on our fractionators margin. These increases were partially offset by a $58 million decrease resulting from lower throughput across the various regions in Texas due to Winter Storm Uri related production outages.

Crude Oil Transportation and Services

	Three Months Ended March 31,	
	2021	2020
Crude transportation volumes (MBbls/d)	3,491	4,424
Crude terminals volumes (MBbls/d)	2,327	2,996
Revenues	$ 3,500	$ 4,213
Cost of products sold	2,838	3,458
Segment margin	662	755
Unrealized (gains) losses on commodity risk management activities	(5)	10
Operating expenses, excluding non-cash compensation expense	(122)	(158)
Selling, general and administrative expenses, excluding non-cash compensation expense	(30)	(28)
Adjusted EBITDA related to unconsolidated affiliates	5	12
Segment Adjusted EBITDA	$ 510	$ 591

Crude transportation volumes were lower on our Texas pipeline system and Bakken pipeline, driven by COVID-19 related demand reductions impacting both regions, as well as lower crude oil production along our Texas systems due to Winter Storm Uri during the first quarter of 2021. These volume reductions also resulted in lower terminal volumes compared to the prior period.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our crude oil transportation and services segment decreased due to the net impacts of the following:

- a decrease of $108 million in segment margin (excluding unrealized gains and losses on commodity risk management activities) primarily due to a $111 million decrease from our Texas crude pipeline system due to lower volumes transported and lower average tariff rates realized, a $55 million decrease due to lower volumes on our Bakken Pipeline resulting from lower Bakken crude oil production, a $26 million decrease in crude terminal margin primarily driven by lower Permian and Bakken pipeline volumes, reduced Gulf Coast refinery utilization from adverse weather, and decreased export demand, a $5 million decrease due to lower volumes on our Bayou Bridge pipeline, and a $3 million decrease in Mid-Continent gathering volumes due to lower production. These decreases were partially offset by a $92 million increase (excluding a net change of $15 million in unrealized gains and losses on commodity risk management activities) from our crude oil acquisition and marketing business primarily due to losses realized in the first quarter of 2020 on the write down of crude inventory due to significant market price declines;
- an increase of $2 million in selling, general and administrative expenses primarily due to higher insurance premiums and allocated overhead costs; and
- a decrease of $7 million in Adjusted EBITDA related to unconsolidated affiliates due to lower volumes on White Cliffs Pipeline due to lower crude oil production in the DJ basin, partly offset by higher margin from jet fuel sales by our joint ventures, partially offset by
- a decrease of $36 million in operating expenses primarily due to lower volume-driven expenses and corporate cost reduction initiatives.

Investment in Sunoco LP

	Three Months Ended March 31,	
	2021	2020
Revenues	$ 3,471	$ 3,272
Cost of products sold	3,120	3,164
Segment margin	351	108
Unrealized (gains) losses on commodity risk management activities	(5)	6
Operating expenses, excluding non-cash compensation expense	(76)	(109)
Selling, general and administrative expenses, excluding non-cash compensation expense	(20)	(30)
Adjusted EBITDA related to unconsolidated affiliates	2	2
Inventory valuation adjustments	(100)	227
Other	5	5
Segment Adjusted EBITDA	$ 157	$ 209

The Investment in Sunoco LP segment reflects the consolidated results of Sunoco LP.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our investment in Sunoco LP segment decreased due to the net impacts of the following:

- a decrease in the gross profit on motor fuel sales of $78 million primarily due to a 20.7% decrease in gross profit per gallon sold and a 7.5% decrease in gallons sold; and
- a decrease in non-motor fuel sales and lease gross profit of $17 million primarily due to reduced credit card transactions; partially offset by
- a decrease in operating expenses and selling, general and administrative expenses of $43 million primarily due to lower expected credit losses, employee costs, professional fees, credit card processing fees, insurance and maintenance.

Investment in USAC

	Three Months Ended March 31,	
	2021	2020
Revenues	$ 158	$ 179
Cost of products sold	21	24
Segment margin	137	155
Operating expenses, excluding non-cash compensation expense	(28)	(35)
Selling, general and administrative expenses, excluding non-cash compensation expense	(9)	(14)
Segment Adjusted EBITDA	$ 100	$ 106

The Investment in USAC segment reflects the consolidated results of USAC.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our investment in USAC segment decreased due to the net impacts of the following:

- a decrease of $18 million in segment margin primarily due to a decrease in demand for compression services driven by decreased U.S. crude oil and natural gas activity compared to the prior period, partially offset by
- a decrease of $7 million in operating expenses is primarily driven by the decrease in average revenue generating horsepower and reduced headcount in the current period; and
- a decrease of $5 million in selling, general and administrative expenses primarily due to changes in the allowance for expected credit losses and lower employee-related expenses.

All Other

	Three Months Ended March 31,	
	2021	2020
Revenues	$ 1,512	$ 513
Cost of products sold	1,342	415
Segment margin	170	98
Unrealized gains on commodity risk management activities	(1)	(5)
Operating expenses, excluding non-cash compensation expense	(51)	(38)
Selling, general and administrative expenses, excluding non-cash compensation expense	(39)	(35)
Adjusted EBITDA related to unconsolidated affiliates	(1)	—
Other and eliminations	(6)	19
Segment Adjusted EBITDA	$ 72	$ 39

For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our all other segment increased due to the net impacts of the following:

- an increase of $52 million from power trading activities primarily due to short-term, favorable market conditions created by Winter Storm Uri in February 2021;
- an increase of $17 million primarily due to revenues earned under the Electric Reliability Council of Texas (“ERCOT”) responsive reserve program during the Winter Storm Uri, and
- an increase of $5 million primarily due to increased gains from sales of storage natural gas; partially offset by
- a decrease of $22 million primarily due to insurance proceeds received in the prior period on settled claims related to our MTBE litigation; and
- a decrease of $10 million due to higher utility expense related to freezing temperatures.

SUPPLEMENTAL INFORMATION ON LIQUIDITY
(In millions)
(unaudited)

The following table is a summary of our revolving credit facilities. We also have other consolidated subsidiaries with revolving credit facilities which are not included in this table.

	Facility Size	Funds Available at March 31, 2021	Maturity Date
Five-Year Revolving Credit Facility	$ 5,000	$ 4,079	December 1, 2023
364-Day Revolving Credit Facility	1,000	1,000	November 26, 2021
	$ 6,000	$ 5,079	

ENERGY TRANSFER LP AND SUBSIDIARIES
SUPPLEMENTAL INFORMATION ON UNCONSOLIDATED AFFILIATES
(In millions)
(unaudited)

The table below provides information on an aggregated basis for our unconsolidated affiliates, which are accounted for as equity method investments in the Partnership's financial statements for the periods presented.

	Three Months Ended March 31,	
	2021	2020
Equity in earnings (losses) of unconsolidated affiliates:		
Citrus	$ 37	$ 35
FEP	—	(70)
MEP	(3)	—
White Cliffs	—	8
Other	21	20
Total equity in earnings (losses) of unconsolidated affiliates	$ 55	$ (7)
Adjusted EBITDA related to unconsolidated affiliates:		
Citrus	$ 79	$ 79
FEP	—	19
MEP	5	8
White Cliffs	5	14
Other	34	34
Total Adjusted EBITDA related to unconsolidated affiliates	$ 123	$ 154
Distributions received from unconsolidated affiliates:		
Citrus	$ 56	$ 49
FEP	4	18
MEP	4	11
White Cliffs	15	13
Other	21	19
Total distributions received from unconsolidated affiliates	$ 100	$ 110

ENERGY TRANSFER LP AND SUBSIDIARIES
SUPPLEMENTAL INFORMATION ON NON-WHOLLY-OWNED JOINT VENTURE SUBSIDIARIES
(Dollars in millions)
(unaudited)

The table below provides information on an aggregated basis for our non-wholly-owned joint venture subsidiaries, which are reflected on a consolidated basis in our financial statements. The table below excludes Sunoco LP and USAC, our non-wholly-owned subsidiaries that are publicly traded.

	Three Months Ended March 31,	
	2021	2020
Adjusted EBITDA of non-wholly-owned subsidiaries (100%) [(a)]	$ 540	$ 646
Our proportionate share of Adjusted EBITDA of non-wholly-owned subsidiaries [(b)]	275	335
Distributable Cash Flow of non-wholly-owned subsidiaries (100%) [(c)]	$ 504	$ 608
Our proportionate share of Distributable Cash Flow of non-wholly-owned subsidiaries [(d)]	253	318

Below is our current ownership percentage of certain non-wholly-owned subsidiaries:

Non-wholly-owned subsidiary:	ET Percentage Ownership [(e)]
Bakken Pipeline	36.4 %
Bayou Bridge	60.0 %
Maurepas	51.0 %
Ohio River System	75.0 %
Permian Express Partners	87.7 %
Red Bluff Express	70.0 %
Rover	32.6 %
SemCAMS	51.0 %
Others	various

(a) Adjusted EBITDA of non-wholly-owned subsidiaries reflects the total Adjusted EBITDA of our non-wholly-owned subsidiaries on an aggregated basis. This is the amount of Adjusted EBITDA included in our consolidated non-GAAP measure of Adjusted EBITDA.

(b) Our proportionate share of Adjusted EBITDA of non-wholly-owned subsidiaries reflects the amount of Adjusted EBITDA of such subsidiaries (on an aggregated basis) that is attributable to our ownership interest.

(c) Distributable Cash Flow of non-wholly-owned subsidiaries reflects the total Distributable Cash Flow of our non-wholly-owned subsidiaries on an aggregated basis.

(d) Our proportionate share of Distributable Cash Flow of non-wholly-owned subsidiaries reflects the amount of Distributable Cash Flow of such subsidiaries (on an aggregated basis) that is attributable to our ownership interest. This is the amount of Distributable Cash Flow included in our consolidated non-GAAP measure of Distributable Cash Flow attributable to the partners of ET.

(e) Our ownership reflects the total economic interest held by us and our subsidiaries. In some cases, this percentage comprises ownership interests held in (or by) multiple entities.

Definitions

References to the "Partnership" or "ET" refer to Energy Transfer LP. In addition, the following is a list of certain acronyms and terms used throughout this document:

/d	per day
AOCI	accumulated other comprehensive income (loss)
BBtu	billion British thermal units
Btu	British thermal unit, an energy measurement used by gas companies to convert the volume of gas used to its heat equivalent, and thus calculate the actual energy content
Citrus	Citrus, LLC, a 50/50 joint venture which owns FGT
Dakota Access	Dakota Access, LLC
DOJ	U.S. Department of Justice
Enable	Enable Midstream Partners, LP, a Delaware limited partnership
Energy Transfer Canada	Energy Transfer Canada ULC (formerly SemCAMS Midstream ULC), a less than wholly-owned subsidiary of ET
EPA	U.S. Environmental Protection Agency
ET Preferred Units	Collectively, the Series A Preferred Units, Series B Preferred Units, Series C Preferred Units, Series D Preferred Units, Series E Preferred Units, Series F Preferred Units and Series G Preferred Units (all originally issued by ETO and exchanged for preferred units issued by ET on April 1, 2021)
ETC Tiger	ETC Tiger Pipeline, LLC, a wholly-owned subsidiary of ET, which owns the Tiger Pipeline
ETO	Energy Transfer Operating, L.P.
Exchange Act	Securities Exchange Act of 1934
FEP	Fayetteville Express Pipeline LLC
FERC	Federal Energy Regulatory Commission
FGT	Florida Gas Transmission Company, LLC, a wholly-owned subsidiary of Citrus
GAAP	accounting principles generally accepted in the United States of America
HFOTCO	Houston Fuel Oil Terminal Company, a wholly-owned subsidiary of ET, which owns the Houston Terminal
Lake Charles LNG	Lake Charles LNG Company, LLC, a wholly-owned subsidiary of ET
LE GP	LE GP, LLC, the general partner of ET
LIBOR	London Interbank Offered Rate
MBbls	thousand barrels
MEP	Midcontinent Express Pipeline LLC
MTBE	methyl tertiary butyl ether
NGL	natural gas liquid, such as propane, butane and natural gasoline
NYMEX	New York Mercantile Exchange
OSHA	Federal Occupational Safety and Health Act
OTC	over-the-counter
Panhandle	Panhandle Eastern Pipe Line Company, LP, a wholly-owned subsidiary of ET
Regency	Regency Energy Partners LP

Rover	Rover Pipeline LLC
SEC	Securities and Exchange Commission
Series A Preferred Units	6.250% Series A Fixed-to-Floating Rate Cumulative Redeemable Perpetual Preferred Units
Series B Preferred Units	6.625% Series B Fixed-to-Floating Rate Cumulative Redeemable Perpetual Preferred Units
Series C Preferred Units	7.375% Series C Fixed-to-Floating Rate Cumulative Redeemable Perpetual Preferred Units
Series D Preferred Units	7.625% Series D Fixed-to-Floating Rate Cumulative Redeemable Perpetual Preferred Units
Series E Preferred Units	7.600% Series E Fixed-to-Floating Rate Cumulative Redeemable Perpetual Preferred Units
Series F Preferred Units	6.750% Series F Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Units
Series G Preferred Units	7.125% Series G Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Units
Sunoco Logistics Operations	Sunoco Logistics Partners Operations L.P, a wholly-owned subsidiary of ET
Sunoco R&M	Sunoco (R&M), LLC (formerly Sunoco, Inc. (R&M))
Transwestern	Transwestern Pipeline Company, LLC, a wholly-owned subsidiary of ET
Trunkline	Trunkline Gas Company, LLC, a wholly-owned subsidiary of Panhandle
USAC	USA Compression Partners, LP, a subsidiary of ET
USAC Preferred Units	USAC Series A preferred units
White Cliffs	White Cliffs Pipeline, L.L.C.

ENERGY TRANSFER LP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Tabular dollar and unit amounts, except per unit data, are in millions)
(unaudited)

1. ORGANIZATION AND BASIS OF PRESENTATION

Organization

The consolidated financial statements presented herein contain the results of Energy Transfer LP and its subsidiaries (the "Partnership," "we," "us," "our" or "ET").

On April 1, 2021, ET, ETO and certain of ETO's subsidiaries consummated several internal reorganization transactions (the "Rollup Mergers"). In connection with the Rollup Mergers, Sunoco Logistics Operations and its general partner merged with and into ETO, with ETO surviving, and immediately thereafter, ETO merged with and into ET, with ET surviving. The impacts of the Rollup Mergers also included the following:

- All of ETO's long-term debt was assumed by ET, as more fully described in Note 7.
- Each issued and outstanding ETO preferred unit was converted into the right to receive one newly created ET preferred unit. A description of the ET Preferred Units is included in Note 9.
- Each of ETO's issued and outstanding Class K, Class L, Class M and Class N units, all of which were held by ETP Holdco Corporation, a wholly-owned subsidiary of ETO, were converted into an aggregate 675,625,000 newly created Class B Units representing limited partner interests in ET.

Our financial statements reflect the following reportable segments:

- intrastate transportation and storage;
- interstate transportation and storage;
- midstream;
- NGL and refined products transportation and services;
- crude oil transportation and services;
- investment in Sunoco LP;
- investment in USAC; and
- all other.

Basis of Presentation

The unaudited financial information included in this Form 10-Q has been prepared on the same basis as the audited consolidated financial statements included in the Partnership's Annual Report on Form 10-K for the year ended December 31, 2020, filed with the SEC on February 19, 2021. In the opinion of the Partnership's management, such financial information reflects all adjustments necessary for a fair presentation of the financial position and the results of operations for such interim periods in accordance with GAAP. All intercompany items and transactions have been eliminated in consolidation. Certain information and footnote disclosures normally included in annual consolidated financial statements prepared in accordance with GAAP have been omitted pursuant to the rules and regulations of the SEC.

The consolidated financial statements of the Partnership presented herein include the results of operations of our controlled subsidiaries, including Sunoco LP and USAC.

Our subsidiaries also own varying undivided interests in certain pipelines. Ownership of these pipelines has been structured as an ownership of an undivided interest in assets, not as an ownership interest in a partnership, limited liability company, joint venture or other forms of entities. Each owner controls marketing and invoices separately, and each owner is responsible for any loss, damage or injury that may occur to their own customers. As a result, we apply proportionate consolidation for our interests in these entities.

Certain prior period amounts have also been reclassified to conform to the current period presentation. These reclassifications had no impact on net income or total equity.

Use of Estimates

The unaudited consolidated financial statements have been prepared in conformity with GAAP, which includes the use of estimates and assumptions made by management that affect the reported amounts of assets, liabilities, revenues, expenses and the accrual for and disclosure of contingent assets and liabilities that exist at the date of the consolidated financial statements. Although these estimates are based on management's available knowledge of current and expected future events, actual results could be different from those estimates.

2. ACQUISITIONS AND RELATED TRANSACTIONS

Pending Enable Acquisition

On February 16, 2021, the Partnership entered into a definitive merger agreement to acquire Enable. Under the terms of the merger agreement, Enable's common unitholders will receive 0.8595 of an ET common unit in exchange for each Enable common unit. In addition, each outstanding Enable preferred unit will be exchanged for 0.0265 of a Series G Preferred Unit, and ET will make a $10 million cash payment for Enable's general partner. Pursuant to support agreements entered into in connection with the merger agreement, the two largest Enable unitholders have delivered their written consents to approve the merger. These unitholders collectively own 79% of Enable's outstanding common units, and those consents are therefore sufficient to approve the merger. The transaction is subject to the satisfaction of customary closing conditions, including Hart-Scott-Rodino Act ("HSR") clearance.

We anticipate that the Federal Trade Commission ("FTC") will issue requests for additional information and documentary material, commonly known as "second requests," which would extend the HSR waiting period until the 30th calendar day after the date that both parties substantially comply with the second requests. We continue to believe that the FTC will grant unconditional clearance of the transaction, and we remain fully committed to closing the Enable merger under the terms of the merger agreement. We expect to close the transaction in the second half of 2021.

3. CASH AND CASH EQUIVALENTS

Cash and cash equivalents include all cash on hand, demand deposits, and investments with original maturities of three months or less. We consider cash equivalents to include short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value. The Partnership's consolidated balance sheets did not include any material amounts of restricted cash as of March 31, 2021 or December 31, 2020.

We place our cash deposits and temporary cash investments with high credit quality financial institutions. At times, our cash and cash equivalents may be uninsured or in deposit accounts that exceed the Federal Deposit Insurance Corporation insurance limit.

The net change in operating assets and liabilities (net of effects of acquisitions) included in cash flows from operating activities is comprised as follows:

	Three Months Ended March 31,	
	2021	2020
Accounts receivable	$ (1,413)	$ 1,667
Accounts receivable from related companies	(11)	(20)
Inventories	30	281
Other current assets	(12)	110
Other non-current assets, net	(31)	(101)
Accounts payable	1,958	(1,704)
Accounts payable to related companies	(7)	(21)
Accrued and other current liabilities	194	(233)
Other non-current liabilities	51	37
Derivative assets and liabilities, net	(226)	160
Net change in operating assets and liabilities, net of effects of acquisitions	$ 533	$ 176

Non-cash activities were as follows:

	Three Months Ended March 31,	
	2021	2020
NON-CASH INVESTING AND FINANCING ACTIVITIES:		
Accrued capital expenditures	$ 559	$ 1,015
Accrued distributions to partners	—	822
Lease assets obtained in exchange for new lease liabilities	14	17

4. INVENTORIES

Inventories consist principally of natural gas held in storage, NGLs, and refined products, crude oil and spare parts, all of which are valued at the lower of cost or net realizable value utilizing the weighted-average cost method.

Sunoco LP's fuel inventories are stated at the lower of cost or market using the last-in, first-out ("LIFO") method. As of March 31, 2021 and December 31, 2020, the carrying value of Sunoco LP's fuel inventory included lower of cost or market reserves of $211 million and $311 million, respectively, and the inventory carrying value equaled or exceeded its replacement cost. For the three months ended March 31, 2021 and 2020, the Partnership's consolidated income statements did not include any material amounts of income from the liquidation of LIFO fuel inventory.

	March 31, 2021	December 31, 2020
Natural gas, NGLs and refined products	$ 1,020	$ 1,013
Crude oil	350	287
Spare parts and other	440	439
Total inventories	$ 1,810	$ 1,739

We utilize commodity derivatives to manage price volatility associated with our natural gas inventory. Changes in fair value of designated hedged inventory are recorded in inventory on our consolidated balance sheets and cost of products sold in our consolidated statements of operations.

5. FAIR VALUE MEASURES

We have commodity derivatives and interest rate derivatives that are accounted for as assets and liabilities at fair value in our consolidated balance sheets. We determine the fair value of our assets and liabilities subject to fair value measurement by using the highest possible "level" of inputs. Level 1 inputs are observable quotes in an active market for identical assets and liabilities. We consider the valuation of marketable securities and commodity derivatives transacted through a clearing broker with a published price from the appropriate exchange as a Level 1 valuation. Level 2 inputs are inputs observable for similar assets and liabilities. We consider OTC commodity derivatives entered into directly with third parties as a Level 2 valuation since the values of these derivatives are quoted on an exchange for similar transactions. Additionally, we consider our options transacted through our clearing broker as having Level 2 inputs due to the level of activity of these contracts on the exchange in which they trade. We consider the valuation of our interest rate derivatives as Level 2 as the primary input, the LIBOR curve, is based on quotes from an active exchange of Eurodollar futures for the same period as the future interest swap settlements. Level 3 inputs are unobservable. During the three months ended March 31, 2021, no transfers were made between any levels within the fair value hierarchy.

The following tables summarize the gross fair value of our financial assets and liabilities measured and recorded at fair value on a recurring basis as of March 31, 2021 and December 31, 2020 based on inputs used to derive their fair values:

		Fair Value Measurements at March 31, 2021

Total liabilities	$ (717)	$ (265)	$ (452)

Based on the estimated borrowing rates currently available to us and our subsidiaries for loans with similar terms and average maturities, the aggregate fair value and carrying amount of our consolidated debt obligations as of March 31, 2021 were $51.39 billion and $47.74 billion, respectively. As of December 31, 2020, the aggregate fair value and carrying amount of our consolidated debt obligations were $56.21 billion and $51.44 billion, respectively. The fair value of our consolidated debt obligations is a Level 2 valuation based on the respective debt obligations' observable inputs used for similar liabilities.

6. NET INCOME (LOSS) PER LIMITED PARTNER UNIT

A reconciliation of income and weighted average units used in computing basic and diluted income (loss) per unit is as follows:

	Three Months Ended March 31,	
	2021	2020
Net income (loss)	$ 3,641	$ (964)
Less: Net income (loss) attributable to noncontrolling interests	341	(121)
Less: Net income attributable to redeemable noncontrolling interests	12	12
Net income (loss), net of noncontrolling interests	3,288	(855)
Less: General Partner's interest in income (loss)	3	(1)
Income (loss) available to Limited Partners	$ 3,285	$ (854)
Basic Income (Loss) per Limited Partner Unit:		
Weighted average limited partner units	2,702.8	2,691.7
Basic income (loss) per Limited Partner unit	$ 1.22	$ (0.32)
Diluted Income (Loss) per Limited Partner Unit:		
Income (loss) available to Limited Partners	$ 3,285	$ (854)
Dilutive effect of equity-based compensation of subsidiaries [(1)]	—	—
Diluted income (loss) available to Limited Partners	$ 3,285	$ (854)
Weighted average limited partner units	2,702.8	2,691.7
Dilutive effect of unvested unit awards [(1)]	5.8	—
Weighted average limited partner units, assuming dilutive effect of unvested unit awards	2,708.6	2,691.7
Diluted income (loss) per Limited Partner unit	$ 1.21	$ (0.32)

(1) Dilutive effects are excluded from the calculation for periods where the impact would have been antidilutive.

7. DEBT OBLIGATIONS

As discussed in Note 1 above, in connection with the Rollup Mergers on April 1, 2021, ET entered into various supplemental indentures and assumed all the obligations of ETO under the respective indentures and credit agreements.

During the first quarter of 2021, ETO redeemed its $600 million of 4.40% senior notes due April 1, 2021 and its $800 million of 4.65% senior notes due June 1, 2021, using proceeds from the Five-Year Credit Facility.

Credit Facilities and Commercial Paper

Term Loan

As a result of the Rollup Mergers, on April 1, 2021, ET assumed all of ETO's obligations in respect of its term loan credit agreement (the "Term Loan") and Sunoco Logistics Operations was released as a guarantor in respect of the Term Loan. The Partnership's Term Loan provides for a $2.00 billion three-year term loan credit facility. Borrowings under the Term Loan mature on October 17, 2022 and are available for working capital purposes and for general partnership purposes. As of March 31, 2021, the Term Loan had $2.00 billion outstanding and was fully drawn. The weighted average interest rate on the total amount outstanding as of March 31, 2021 was 1.11%.

Five-Year Credit Facility

As a result of the Rollup Mergers, on April 1, 2021, ET assumed all of ETO's obligations in respect of its revolving credit facility (the "Five-Year Credit Facility") and Sunoco Logistics Operations was released as a guarantor in respect of the Five-Year Credit Facility. The Partnership's Five-Year Credit Facility allows for unsecured borrowings up to $5.00 billion and matures on December 1, 2023. The Five-Year Credit Facility contains an accordion feature, under which the total aggregate commitment may be increased up to $6.00 billion under certain conditions.

As of March 31, 2021, the Five-Year Credit Facility had $800 million of outstanding borrowings, all of which consisted of commercial paper. The amount available for future borrowings was $4.08 billion, after accounting for outstanding letters of

credit in the amount of $121 million. The weighted average interest rate on the total amount outstanding as of March 31, 2021 was 0.45%.

364-Day Facility

As a result of the Rollup Mergers, on April 1, 2021, ET assumed all of ETO's obligations in respect of its 364-day revolving credit facility (the "364-Day Facility") and Sunoco Logistics Operations was released as a guarantor in respect of the 364-Day Facility. The Partnership's 364-Day Facility allows for unsecured borrowings up to $1.00 billion and matures on November 26, 2021. As of March 31, 2021, the 364-Day Facility had no outstanding borrowings.

Sunoco LP Credit Facility

Sunoco LP maintains a $1.50 billion revolving credit facility (the "Sunoco LP Credit Facility"). As of March 31, 2021, the Sunoco LP Credit Facility had $381 million of outstanding borrowings and $8 million in standby letters of credit. The amount available for future borrowings at March 31, 2021 was $1.10 billion. The weighted average interest rate on the total amount outstanding as of March 31, 2021 was 1.86%.

USAC Credit Facility

USAC maintains a $1.60 billion revolving credit facility (the "USAC Credit Facility"), which matures on April 2, 2023 and permits up to $400 million of future increases in borrowing capacity. As of March 31, 2021, USAC had $503 million of outstanding borrowings and no outstanding letters of credit under the USAC Credit Facility. As of March 31, 2021, USAC had $1.10 billion of availability under the USAC Credit Facility. The weighted average interest rate on the total amount outstanding as of March 31, 2021 was 3.20%.

Energy Transfer Canada Credit Facilities

Energy Transfer Canada is party to a credit agreement providing for a C$350 million (US$278 million at the March 31, 2021 exchange rate) senior secured term loan facility, a C$525 million (US$417 million at the March 31, 2021 exchange rate) senior secured revolving credit facility, and a C$300 million (US$239 million at the March 31, 2021 exchange rate) senior secured construction loan facility (the "KAPS Facility"). The term loan facility and the revolving credit facility mature on February 25, 2024. The KAPS Facility matures on June 13, 2024. Energy Transfer Canada may incur additional term loans and revolving commitments in an aggregate amount not to exceed C$250 million (US$199 million at the March 31, 2021 exchange rate), subject to receiving commitments for such additional term loans or revolving commitments from either new lenders or increased commitments from existing lenders. As of March 31, 2021, the Energy Transfer Canada senior secured term loan facility and senior secured revolving credit facility had $261 million and $65 million, respectively, of outstanding borrowings. As of March 31, 2021, the KAPS Facility had no outstanding borrowings.

Compliance with our Covenants

We and our subsidiaries were in compliance with all requirements, tests, limitations, and covenants related to our debt agreements as of March 31, 2021. For the quarter ended March 31, 2021, our leverage ratio, as calculated pursuant to the covenant related to our revolving credit facility, was 3.23x.

8. REDEEMABLE NONCONTROLLING INTERESTS

Certain redeemable noncontrolling interests in the Partnership's subsidiaries are reflected as mezzanine equity on the consolidated balance sheets. Redeemable noncontrolling interests as of March 31, 2021 included a balance of $477 million related to the USAC Preferred Units described below and a balance of $15 million related to noncontrolling interest holders in one of the Partnership's consolidated subsidiaries that have the option to sell their interests to the Partnership. In addition, redeemable noncontrolling interests includes a balance of $277 million related to Energy Transfer Canada preferred shares.

USAC Preferred Units

As of March 31, 2021, USAC had 500,000 USAC Preferred Units issued and outstanding. The USAC Preferred Units are entitled to receive cumulative quarterly distributions equal to $24.375 per USAC Preferred Unit, subject to increase in certain limited circumstances. The USAC Preferred Units will have a perpetual term, unless converted or redeemed. Certain portions of the USAC Preferred Units will be convertible into USAC common units at the election of the holders beginning in 2021. To the extent the holders of the USAC Preferred Units have not elected to convert their preferred units by the fifth anniversary of the issue date, USAC will have the option to redeem all or any portion of the USAC Preferred Units for cash. In addition, at any time on or after the tenth anniversary of the issue date, the holders of the USAC

Preferred Units will have the right to require USAC to redeem all or any portion of the USAC Preferred Units, and the Partnership may elect to pay up to 50% of such redemption amount in USAC common units.

Energy Transfer Canada Redeemable Preferred Stock

Energy Transfer Canada has 300,000 shares of cumulative preferred stock issued and outstanding. The preferred stock is redeemable at Energy Transfer Canada's option at a redemption price of C$1,100 (US$875 at the March 31, 2021 exchange rate) per share. The preferred stock is redeemable by the holder contingent upon a change of control or liquidation of Energy Transfer Canada. The preferred stock is convertible to Energy Transfer Canada common shares in the event of an initial public offering by Energy Transfer Canada.

Dividends on the preferred stock are payable in-kind through the quarter ending June 30, 2021. The dividends paid-in-kind increased the liquidation preference such that, as of March 31, 2021, the preferred stock was convertible into 351,954 shares.

9. EQUITY

ET Common Units

The change in ET common units during the three months ended March 31, 2021 was as follows:

	Number of Units
Number of common units at December 31, 2020	2,702.4
Common units issued in connection with the distribution reinvestment plan	0.9
Common units vested under equity incentive plans and other	0.2
Number of common units at March 31, 2021	2,703.5

ET Repurchase Program

During the three months ended March 31, 2021, ET did not repurchase any ET common units under its current buyback program. As of March 31, 2021, $911 million remained available to repurchase under the current program.

ET Distribution Reinvestment Program

During the three months ended March 31, 2021, distributions of $6 million were reinvested under the distribution reinvestment program. As of March 31, 2021, a total of 20 million ET common units remain available to be issued under the existing registration statement in connection with the distribution reinvestment program.

Cash Distributions on ET Common Units

Distributions declared and/or paid with respect to ET common units subsequent to December 31, 2020 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2020	February 8, 2021	February 19, 2021	$ 0.1525
March 31, 2021	May 11, 2021	May 19, 2021	0.1525

The Partnership's distribution on its common units with respect to the quarter ended March 31, 2020 was declared on March 31, 2020 and accrued as of that date. For the three months ended March 31, 2020, the consolidated statement of equity reflects distributions to common unitholders for two quarters.

ET Preferred Units

Conversion of ETO Preferred Units to ET Preferred Units

In connection with the Rollup Mergers on April 1, 2021, as discussed in Note 1, all of ETO's previously outstanding preferred units were converted to ET Preferred Units with identical distribution and redemption rights, as described under "Description of ET Preferred Units" below.

As of and prior to March 31, 2021, the ET Preferred Units were reflected as noncontrolling interests on the Partnership's consolidated financial statements. Beginning April 1, 2021, the ET Preferred Units will be reflected as limited partner interests in the Partnership's consolidated financial statements.

Cash Distributions on ET Preferred Units

Distributions declared on the ET Preferred Units were as follows:

Period Ended	Record Date	Payment Date	Series A [1]	Series B [1]	Series C	Series D	Series E	Series F [1]	Series G [1]
December 31, 2020 [2]	February 1, 2021	February 16, 2021	$ 31.25	$ 33.125	$ 0.4609	$ 0.4766	$ 0.4750	$ —	$ —
March 31, 2021	May 3, 2021	May 17, 2021	—	—	0.4609	0.4766	0.4750	33.75	35.63

[1] Series A, Series B, Series F and Series G distributions are paid on a semi-annual basis.

[2] Distributions for the period ended December 31, 2020 reflect distributions paid on the ETO preferred units prior to the conversion to ET Preferred Units, as discussed above.

Description of ET Preferred Units

Following is a summary of the distribution and redemption rights associated with the ET Preferred Units:

- *Series A Preferred Units*. Distributions on the Series A Preferred Units will accrue and be cumulative to, but excluding, February 15, 2023, at a rate of 6.250% per annum of the stated liquidation preference of $1,000. On and after February 15, 2023, distributions on the Series A Preferred Units will accumulate at a percentage of the $1,000 liquidation preference equal to an annual floating rate of the three-month LIBOR, determined quarterly, plus a spread of 4.028% per annum. Distributions on the Series A Preferred Units will be payable semi-annually in arrears on the 15th day of February and August of each year. The Series A Preferred Units are redeemable at ET's option on or after February 15, 2023 at a redemption price of $1,000 per Series A Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.
- *Series B Preferred Units.* Distributions on the Series B Preferred Units will accrue and be cumulative to, but excluding, February 15, 2028, at a rate of 6.625% per annum of the stated liquidation preference of $1,000. On and after February 15, 2028, distributions on the Series B Preferred Units will accumulate at a percentage of the $1,000 liquidation preference equal to an annual floating rate of the three-month LIBOR, determined quarterly, plus a spread of 4.155% per annum. Distributions on the Series B Preferred Units will be payable semi-annually in arrears on the 15th day of February and August of each year. The Series B Preferred Units are redeemable at ET's option on or after February 15, 2028 at a redemption price of $1,000 per Series B Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.
- *Series C Preferred Units.* Distributions on the Series C Preferred Units will accrue and be cumulative to, but excluding, May 15, 2023, at a rate of 7.375% per annum of the stated liquidation preference of $25. On and after May 15, 2023, distributions on the Series C Preferred Units will accumulate at a percentage of the $25 liquidation preference equal to an annual floating rate of the three-month LIBOR, determined quarterly, plus a spread of 4.530% per annum. Distributions on the Series C Preferred Units will be payable quarterly in arrears on the 15th day of February, May, August and November of each year. The Series C Preferred Units are redeemable at ET's option on or after May 15, 2023 at a redemption price of $25 per Series C Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.
- *Series D Preferred Units.* Distributions on the Series D Preferred Units will accrue and be cumulative to, but excluding, August 15, 2023, at a rate of 7.625% per annum of the stated liquidation preference of $25. On and after August 15, 2023, distributions on the Series D Preferred Units will accumulate at a percentage of the $25 liquidation preference equal to an annual floating rate of the three-month LIBOR, determined quarterly, plus a spread of 4.738% per annum. Distributions on the Series D Preferred Units will be payable quarterly in arrears on the 15th day of February, May, August and November of each year. The Series D Preferred Units are redeemable at ET's option on or after August 15, 2023 at a redemption price of $25 per Series D Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.
- *Series E Preferred Units.* Distributions on the Series E Preferred Units will accrue and be cumulative to, but excluding, May 15, 2024, at a rate of 7.600% per annum of the stated liquidation preference of $25. On and after May 15, 2024, distributions on the Series E Preferred Units will accumulate at a percentage of the $25 liquidation preference equal to an annual floating rate of the three-month LIBOR, determined quarterly, plus a spread of 5.161% per annum. Distributions on the Series E Preferred Units will be payable quarterly in arrears on the 15th day of February, May, August and November of each year. The Series E Preferred Units are redeemable at ET's option on or after May 15, 2024 at a redemption price of $25 per Series E Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.

- *Series F Preferred Units.* Distributions on the Series F Preferred Units will accrue and be cumulative to, but excluding, May 15, 2025, at a rate equal to 6.750% per annum of the $1,000 liquidation preference. On and after May 15, 2025, the distribution rate on the Series F Preferred Units will equal a percentage of the $1,000 liquidation preference equal to the five-year U.S. treasury rate plus a spread of 5.134% per annum. Distributions on the Series F Preferred Units will be payable semi-annually in arrears on the 15th day of May and November of each year. The Series F Preferred Units are redeemable at ET's option on or after May 15, 2025 at a redemption price of $1,000 per Series F Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.
- *Series G Preferred Units.* Distributions on the Series G Preferred Units will accrue and be cumulative to, but excluding, May 15, 2030, at a rate equal to 7.125% per annum of the $1,000 liquidation preference. On and after May 15, 2030, the distribution rate on the Series G Preferred Units will equal a percentage of the $1,000 liquidation preference equal to the five-year U.S. treasury rate plus a spread of 5.306% per annum. Distributions on the Series G Preferred Units will be payable semi-annually in arrears on the 15th day of May and November of each year. The Series G Preferred Units are redeemable at ET's option on or after May 15, 2030 at a redemption price of $1,000 per Series G Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.

Noncontrolling Interests

The Partnership's consolidated financial statements include Sunoco LP and USAC, both of which are publicly traded master limited partnerships, as well as other less-than-wholly-owned, consolidated joint ventures. The following sections describe cash distributions made by our publicly traded subsidiaries, Sunoco LP and USAC, both of which are required by their respective partnership agreements to distribute all cash on hand (less appropriate reserves determined by the boards of directors of their respective general partners) subsequent to the end of each quarter.

Sunoco LP Cash Distributions

Distributions on Sunoco LP's units declared and/or paid by Sunoco LP subsequent to December 31, 2020 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2020	February 8, 2021	February 19, 2021	$ 0.8255
March 31, 2021	May 11, 2021	May 19, 2021	0.8255

USAC Cash Distributions

Distributions on USAC's units declared and/or paid by USAC subsequent to December 31, 2020 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2020	January 25, 2021	February 5, 2021	$ 0.5250
March 31, 2021	April 26, 2021	May 7, 2021	0.5250

Accumulated Other Comprehensive Income (Loss)

The following table presents the components of AOCI, net of tax:

	March 31, 2021	December 31, 2020
Available-for-sale securities	$ 18	$ 18
Foreign currency translation adjustment	21	7
Actuarial loss related to pensions and other postretirement benefits	(2)	(7)
Investments in unconsolidated affiliates, net	(23)	(14)
Total AOCI, net of tax	14	4
Amounts attributable to noncontrolling interest	(6)	2
Total AOCI included in partners' capital, net of tax	$ 8	$ 6

10. INCOME TAXES

The Partnership's effective tax rate differs from the statutory rate primarily due to partnership earnings that are not subject to United States federal and most state income taxes at the partnership level.

11. REGULATORY MATTERS, COMMITMENTS, CONTINGENCIES AND ENVIRONMENTAL LIABILITIES

Winter Storm Impacts

Winter Storm Uri, which occurred in February 2021, resulted in one-time impacts to the Partnership's consolidated net income and also affected the results of operations in certain segments. The recognition of the impacts of Winter Storm Uri during the three months ended March 31, 2021 required management to make certain estimates and assumptions, including estimates of expected credit losses and assumptions related to the resolution of disputes with counterparties with respect to certain purchases and sales of natural gas. The ultimate realization of credit losses and the resolution of disputed purchases and sales of natural gas could materially impact the Partnership's financial condition and results of operations in future periods.

FERC Proceedings

By Order issued January 16, 2019, the FERC initiated a review of Panhandle's existing rates pursuant to Section 5 of the Natural Gas Act ("NGA") to determine whether the rates currently charged by Panhandle are just and reasonable and set the matter for hearing. On August 30, 2019, Panhandle filed a general rate proceeding under Section 4 of the NGA. The Natural Gas Act Section 5 and Section 4 proceedings were consolidated by the order of the Chief Judge dated October 1, 2019. A hearing in the combined proceedings commenced on August 25, 2020 and adjourned on September 15, 2020. The initial decision by the administrative law judge was issued on March 26, 2021. On April 26, 2021, Panhandle filed its brief on exceptions to the initial decision.

Commitments

In the normal course of business, our subsidiaries purchase, process and sell natural gas pursuant to long-term contracts and enter into long-term transportation and storage agreements. Such contracts contain terms that are customary in the industry. We believe that the terms of these agreements are commercially reasonable and will not have a material adverse effect on its financial position or results of operations.

Our joint venture agreements require that we fund our proportionate share of capital contributions to our unconsolidated affiliates. Such contributions will depend upon the unconsolidated affiliates' capital requirements, such as for funding capital projects or repayment of long-term obligations.

We have certain non-cancelable rights-of-way ("ROW") commitments, which require fixed payments and either expire upon our chosen abandonment or at various dates in the future. The table below reflects ROW expense included in operating expenses in the accompanying consolidated statements of operations:

	Three Months Ended March 31,	
	2021	2020
ROW expense	$ 6	$ 10

Litigation and Contingencies

We may, from time to time, be involved in litigation and claims arising out of our operations in the normal course of business. Natural gas and crude oil are flammable and combustible. Serious personal injury and significant property damage can arise in connection with their transportation, storage or use. In the ordinary course of business, we are sometimes threatened with or named as a defendant in various lawsuits seeking actual and punitive damages for product liability, personal injury and property damage. We maintain liability insurance with insurers in amounts and with coverage and deductibles management believes are reasonable and prudent, and which are generally accepted in the industry. However, there can be no assurance that the levels of insurance protection currently in effect will continue to be available at reasonable prices or that such levels will remain adequate to protect us from material expenses related to product liability, personal injury or property damage in the future.

We or our subsidiaries are a party to various legal proceedings and/or regulatory proceedings incidental to our businesses. For each of these matters, we evaluate the merits of the case, our exposure to the matter, possible legal or settlement strategies, the likelihood of an unfavorable outcome and the availability of insurance coverage. If we determine that an

unfavorable outcome of a particular matter is probable and can be estimated, we accrue the contingent obligation, as well as any expected insurance recoverable amounts related to the contingency. As new information becomes available, our estimates may change. The impact of these changes may have a significant effect on our results of operations in a single period.

As of March 31, 2021 and December 31, 2020, accruals of approximately $49 million and $77 million, respectively, were reflected on our consolidated balance sheets related to contingent obligations that met both the probable and reasonably estimable criteria. In addition, we may recognize additional contingent losses in the future related to (i) contingent matters for which a loss is currently considered reasonably possible but not probable and/or (ii) losses in excess of amounts that have already been accrued for such contingent matters. In some of these cases, we are not able to estimate possible losses or a range of possible losses in excess of amounts accrued. For such matters where additional contingent losses can be reasonably estimated, the range of additional losses is estimated to be up to approximately $80 million.

The outcome of these matters cannot be predicted with certainty and there can be no assurance that the outcome of a particular matter will not result in the payment of amounts that have not been accrued for the matter. Furthermore, we may revise accrual amounts or our estimates of reasonably possible losses prior to resolution of a particular contingency based on changes in facts and circumstances or changes in the expected outcome.

Dakota Access Pipeline

On July 27, 2016, the Standing Rock Sioux Tribe (“SRST”) filed a lawsuit in the United States District Court for the District of Columbia (“District Court”) challenging permits issued by the United States Army Corps of Engineers (“USACE”) that allowed Dakota Access to cross the Missouri River at Lake Oahe in North Dakota. The case was subsequently amended to challenge an easement issued by the USACE that allowed the pipeline to cross land owned by the USACE adjacent to the Missouri River. Dakota Access and the Cheyenne River Sioux Tribe (“CRST”) intervened. Separate lawsuits filed by the Oglala Sioux Tribe (“OST”) and the Yankton Sioux Tribe (“YST”) were consolidated with this action and several individual tribal members intervened (collectively, with SRST and CRST, the “Tribes”). On March 25, 2020, the District Court remanded the case back to the USACE for preparation of an Environment Impact Statement (“EIS”). On July 6, 2020, the District Court vacated the easement and ordered Dakota Access to be shut down and emptied of oil by August 5, 2020. Dakota Access and the USACE appealed to the United States Court of Appeals for the District of Columbia (“Court of Appeals”) which granted an administrative stay of the District Court’s July 6 order and ordered further briefing on whether to fully stay the July 6 order. On August 5, 2020, the Court of Appeals 1) granted a stay of the portion of the District Court order that required Dakota Access to shut the pipeline down and empty it of oil, 2) denied a motion to stay the March 25 order pending a decision on the merits by the Court of Appeals as to whether the USACE would be required to prepare an EIS, and 3) denied a motion to stay the District Court’s order to vacate the easement during this appeal process. The August 5 order also states that the Court of Appeals expected the USACE to clarify its position with respect to whether USACE intended to allow the continued operation of the pipeline notwithstanding the vacatur of the easement and that the District Court may consider additional relief, if necessary.

On August 10, 2020, the District Court ordered the USACE to submit a status report by August 31, 2020, clarifying its position with regard to its decision-making process with respect to the continued operation of the pipeline. On August 31, 2020, the USACE submitted a status report that indicated that it considered the presence of the pipeline at the Lake Oahe crossing without an easement to constitute an encroachment on federal land, and that it was still considering whether to exercise its enforcement discretion regarding this encroachment. The Tribes subsequently filed a motion seeking an injunction to stop the operation of the pipeline and both of the USACE and Dakota Access filed briefs in opposition of the motion for injunction. The motion for injunction was fully briefed as of January 8, 2021.

On January 26, 2021, the Court of Appeals affirmed the District Court’s March 25, 2020 order requiring an EIS and its July 6, 2020 order vacating the easement. In this same January 26 order, the Court of Appeals also overturned the District Court’s July 6, 2020 order that the pipeline shut down and be emptied of oil. Dakota Access filed for rehearing en banc on April 12, 2021, which the Court of Appeals denied. Dakota Access has until September 30, 2021 to petition the U.S. Supreme Court to hear the case.

The District Court scheduled a status conference for February 10, 2021 to discuss the effects of the Court of Appeals’ January 26, 2021 order on the pending motion for injunctive relief, as well as USACE’s expectations as to how it will proceed regarding its enforcement discretion regarding the easement. At the request of the USACE, on February 9, 2021 the District Court granted a two-month continuance for the status conference until April 9, 2021. On April 9, 2021, the District Court granted Dakota Access’s request for the opportunity to file updates to its declarations supporting the opposition to injunctive relief and thereafter granted the Tribes’ request to file updates to their declarations supporting their position with respect to injunctive relief. Dakota Access and the Tribes filed their supplemental declarations on April 19,

2021 and April 26, 2021, respectively. On April 26, 2021, the District Court requested that USACE advise it by May 3, 2021 as to USACE's current position, if it has one, with respect to the Motion. On May 3, 2021, USACE advised the District Court that it had not changed its position with respect to its opposition to the Tribes' motion for injunction. The USACE also advised the District Court that it expected that the EIS will be completed by March 2022. The District Court is expected to rule on the motion in the near future.

The pipeline continues to operate pending rulings from the District Court. ET cannot determine when or how these lawsuits will be resolved or the impact they may have on the Dakota Access pipelines; however, ET expects after the law and complete record are fully considered, the issues in this litigation will be resolved in a manner that will allow the pipeline to continue to operate.

In addition, lawsuits and/or regulatory proceedings or actions of this or a similar nature could result in interruptions to construction or operations of current or future projects, delays in completing those projects and/or increased project costs, all of which could have an adverse effect on our business and results of operations.

Mont Belvieu Incident

On June 26, 2016, a hydrocarbon storage well located on another operator's facility adjacent to Lone Star NGL LLC's ("Lone Star") facilities in Mont Belvieu, Texas experienced an over-pressurization resulting in a subsurface release. The subsurface release caused a fire at Lone Star's South Terminal and damage to Lone Star's storage well operations at its South and North Terminals. Normal operations have resumed at the facilities with the exception of one of Lone Star's storage wells; however, Lone Star is still quantifying the extent of its incurred and ongoing damages and has obtained, and will continue to seek, reimbursement for these losses.

MTBE Litigation

ETC Sunoco Holdings LLC and Sunoco R&M (collectively, "Sunoco Defendants") are defendants in lawsuits alleging MTBE contamination of groundwater. The plaintiffs, state-level governmental entities, assert product liability, nuisance, trespass, negligence, violation of environmental laws, and/or deceptive business practices claims. The plaintiffs seek to recover compensatory damages, and in some cases also seek natural resource damages, injunctive relief, punitive damages, and attorneys' fees.

As of March 31, 2021, Sunoco Defendants are defendants in five cases, including one case each initiated by the States of Maryland and Rhode Island, one by the Commonwealth of Pennsylvania and two by the Commonwealth of Puerto Rico. The more recent Puerto Rico action is a companion case alleging damages for additional sites beyond those at issue in the initial Puerto Rico action. The actions brought by the State of Maryland and Commonwealth of Pennsylvania have also named as defendants ETO, ETP Holdco Corporation, and Sunoco Partners Marketing & Terminals L.P. ("SPMT").

It is reasonably possible that a loss may be realized in the remaining cases; however, we are unable to estimate the possible loss or range of loss in excess of amounts accrued. An adverse determination with respect to one or more of the MTBE cases could have a significant impact on results of operations during the period in which any such adverse determination occurs, but such an adverse determination likely would not have a material adverse effect on the Partnership's consolidated financial position.

Regency Merger Litigation

On June 10, 2015, Adrian Dieckman ("Dieckman or Plaintiff"), a purported Regency unitholder, filed a class action complaint related to the Regency-ETO merger (the "Regency Merger") in the Court of Chancery of the State of Delaware (the "Regency Merger Litigation"), on behalf of Regency's common unitholders against Regency GP LP, Regency GP LLC, ET, ETO, Energy Transfer Partners GP, L.P., and the members of Regency's board of directors.

The Regency Merger Litigation alleges that the Regency Merger breached the Regency partnership agreement. On March 29, 2016, the Delaware Court of Chancery granted the defendants' motion to dismiss the lawsuit in its entirety. Plaintiff appealed, and the Delaware Supreme Court reversed the judgment of the Court of Chancery. Plaintiff then filed an Amended Verified Class Action Complaint, which defendants moved to dismiss. The Court of Chancery granted in part and denied in part the motions to dismiss, dismissing the claims against all defendants other than Regency GP LP and Regency GP LLC (the "Regency Defendants"). The Court of Chancery later granted plaintiff's unopposed motion for class certification. Trial was held on December 10-16, 2019, and a post-trial hearing was held on May 6, 2020. On February 15, 2021, the Court of Chancery ruled in favor of the Regency Defendants on all claims at issue in this litigation, determined that the Regency Merger was fair and reasonable to Regency, and denied plaintiff any relief.

On March 19, 2021, Plaintiff filed a notice of appeal. The Regency Defendants cannot predict the outcome of this appeal but intend to vigorously oppose it.

Litigation Filed By or Against Williams

In April and May 2016, the Williams Companies, Inc. ("Williams") filed two lawsuits (the "Williams Litigation") against ET, LE GP, and, in one of the lawsuits, Energy Transfer Corp LP, ETE Corp GP, LLC, and Energy Transfer Equity GP, LLC (collectively, "ET Defendants"), alleging that ET Defendants breached their obligations under the ET-Williams merger agreement (the "Merger Agreement"). In general, Williams alleges that ET Defendants breached the Merger Agreement by (a) failing to use commercially reasonable efforts to obtain from Latham & Watkins LLP ("Latham") the delivery of a tax opinion concerning Section 721 of the Internal Revenue Code ("721 Opinion"), (b) issuing the Partnership's series A convertible preferred units (the "Issuance"), and (c) making allegedly untrue representations and warranties in the Merger Agreement.

After a two-day trial on June 20 and 21, 2016, the Court ruled in favor of ET Defendants and issued a declaratory judgment that ET could terminate the merger after June 28, 2016 because of Latham's inability to provide the required 721 Opinion. The Court did not reach a decision regarding Williams' claims related to the Issuance nor the alleged untrue representations and warranties. On March 23, 2017, the Delaware Supreme Court affirmed the Court's ruling on the June 2016 trial.

In September 2016, the parties filed amended pleadings. Williams filed an amended complaint seeking a $410 million termination fee based on the alleged breaches of the Merger Agreement listed above. ET Defendants filed amended counterclaims and affirmative defenses, asserting that Williams materially breached the Merger Agreement by, among other things, (a) failing to use its reasonable best efforts to consummate the merger, (b) failing to provide material information to ET for inclusion in the Form S-4 related to the merger, (c) failing to facilitate the financing of the merger, and (d) breaching the Merger Agreement's forum-selection clause.

In July 2020, the Court denied ET Defendant's Motion for Summary Judgment and Williams' Motion for Partial Summary Judgment. Trial is currently set for May 10-17, 2021. ET Defendants cannot predict the outcome of the Williams Litigation or any lawsuits that might be filed subsequent to the date of this filing; nor can ET Defendants predict the amount of time and expense that will be required to resolve these lawsuits. ET Defendants believe that Williams' claims are without merit and intend to defend vigorously against them.

Rover

On November 3, 2017, the State of Ohio and the Ohio Environmental Protection Agency ("Ohio EPA") filed suit against Rover and other defendants seeking to recover civil penalties allegedly owed and certain injunctive relief related to permit compliance. The defendants filed several motions to dismiss, which were granted on all counts. The Ohio EPA appealed, and on December 9, 2019, the Fifth District Court of Appeals entered a unanimous judgment affirming the trial court. The Ohio EPA sought review from the Ohio Supreme Court, which the defendants opposed in briefs filed in February 2020. On April 22, 2020, the Ohio Supreme Court granted the Ohio EPA's request for review. Briefing has concluded and oral argument was held on January 26, 2021. The parties are awaiting a decision.

Revolution

On September 10, 2018, a pipeline release and fire (the "Incident") occurred on the Revolution pipeline, a natural gas gathering line located in Center Township, Beaver County, Pennsylvania. There were no injuries. On February 8, 2019, the Pennsylvania Department of Environmental Protection ("PADEP") issued a Permit Hold on any requests for approvals/permits or permit amendments for any project in Pennsylvania pursuant to the state's water laws. The Partnership filed an appeal of the Permit Hold with the Pennsylvania Environmental Hearing Board. On January 3, 2020, the Partnership entered into a Consent Order and Agreement with the PADEP in which, among other things, the Permit Hold was lifted, the Partnership agreed to pay a $28.6 million civil penalty and fund a $2 million community environmental project, and all related appeals were withdrawn. On November 11, 2020, the PADEP issued an order that required additional approvals and work prior to placing the Revolution Pipeline back in service. The Partnership filed an appeal of this order on December 8, 2020. On February 26, 2021, the Partnership entered into a Consent Order and Agreement with the Department in which, among other things, allowed the Partnership to place the Revolution pipeline back in service, the Partnership agreed to pay a $125,000 penalty, and all related appeals were withdrawn.

The Pennsylvania Office of Attorney General has commenced an investigation regarding the Incident, and the United States Attorney for the Western District of Pennsylvania has issued a federal grand jury subpoena for documents relevant to the Incident. The scope of these investigations is not further known at this time.

Chester County, Pennsylvania Investigation

In December 2018, the former Chester County District Attorney (the "Chester County DA") sent a letter to the Partnership stating that his office was investigating the Partnership and related entities for "potential crimes" related to the Mariner East pipelines.

Subsequently, the matter was submitted to an Investigating Grand Jury in Chester County, Pennsylvania, which has issued subpoenas seeking documents and testimony. On September 24, 2019, the Chester County DA sent a Notice of Intent to the Partnership of its intent to pursue an abatement action if certain conditions were not remediated. The Partnership responded to the Notice of Intent within the prescribed time period.

In December 2019, the Chester County DA announced charges against a current employee related to the provision of security services. On June 25, 2020, a preliminary hearing was held on the charges against the employee, and the judge dismissed all charges.

Delaware County, Pennsylvania Investigation

On March 11, 2019, the Delaware County District Attorney's Office (the "Delaware County DA") announced that the Delaware County DA and the Pennsylvania Attorney General's Office, at the request of the Delaware County DA, are conducting an investigation of alleged criminal misconduct involving the construction and related activities of the Mariner East pipelines in Delaware County. On March 16, 2020, the Pennsylvania Attorney General Office served a Statewide Investigating Grand Jury subpoena for documents relating to inadvertent returns and water supplies related to the Mariner East pipelines. While the Partnership will cooperate with the subpoena, it intends to vigorously defend itself.

Shareholder Litigation Regarding Pennsylvania Pipeline Construction

Four purported unitholders of ET filed derivative actions against various past and current members of ET's Board of Directors, LE GP, and ET, as a nominal defendant that assert claims for breach of fiduciary duties, unjust enrichment, waste of corporate assets, breach of ET's limited partnership agreement, tortious interference, abuse of control, and gross mismanagement related primarily to matters involving the construction of pipelines in Pennsylvania. They also seek damages and changes to ET's corporate governance structure. See *Bettiol v. LE GP*, Case No. 3:19-cv-02890-X (N.D. Tex.); *Davidson v. Kelcy L. Warren*, Cause No. DC-20-02322 (44th Judicial District of Dallas County, Texas); *Harris v. Kelcy L. Warren*, Case No. 2:20-cv-00364-GAM (E.D. Pa.); and *King v. LE GP*, Case No. 3:20-cv-00719-X (N.D. Tex.). Another purported unitholder of ET, Allegheny County Employees' Retirement System ("ACERS"), individually and on behalf of all others similarly situated, filed a suit under the federal securities laws purportedly on behalf of a class, against ET and three of ET's directors, Kelcy L. Warren, John W. McReynolds, and Thomas E. Long. See *Allegheny County Emps.' Ret. Sys. v. Energy Transfer LP*, Case No. 2:20-00200-GAM (E.D. Pa.). On June 15, 2020, ACERS filed an amended complaint and added as additional defendants ET directors Marshall McCrea and Matthew Ramsey, as well as Michael J. Hennigan and Joseph McGinn. The amended complaint asserts claims for violations of Sections 10(b) and 20(a) of the Exchange Act and Rule 10b-5 promulgated thereunder related primarily to matters involving the construction of pipelines in Pennsylvania. On August 14, 2020, the defendants filed a motion to dismiss ACERS' amended complaint. On April 6, 2021, the court granted in part and denied in part the defendants' motion to dismiss. The court held that ACERS could proceed with its claims regarding certain statements put at issue by the amended complaint while also dismissing claims based on other statements. The court also dismissed without prejudice the claims against defendants McReynolds, McGinn, and Hennigan. The defendants cannot predict the outcome of these lawsuits or any lawsuits that might be filed subsequent to the date of this filing; nor can the defendants predict the amount of time and expense that will be required to resolve these lawsuits. However, the defendants believe that the claims are without merit and intend to vigorously contest them.

Cline Class Action

On July 7, 2017, Perry Cline filed a class action complaint in the Eastern District of Oklahoma against Sunoco R&M and Sunoco Partners Marketing & Terminals L.P. (collectively, "SPMT") that alleged SPMT failed to make timely payments of oil and gas proceeds from Oklahoma wells and to pay statutory interest for those untimely payments. On October 3, 2019, the Court certified a class to include all persons who received untimely payments from Oklahoma wells on or after July 7, 2012 and who have not already been paid statutory interest on the untimely payments (the "Class"). Excluded from the Class are those entitled to payments of proceeds that qualify as "minimum pay," prior period adjustments, and pass through payments, as well as governmental agencies and publicly traded oil and gas companies.

After a bench trial, on August 17, 2020, Judge John Gibney (sitting from the Eastern District of Virginia) issued an opinion that awarded the Class actual damages of $74.8 million for late payment interest for identified and unidentified royalty

owners and interest-on-interest. This amount was later amended to $80.7 million to account for interest accrued from trial (the "Order"). Judge Gibney also awarded punitive damages in the amount of $75 million. The Class is also seeking attorneys' fees.

On August 27, 2020, SPMT filed its Notice of Appeal with the 10th Circuit and appealed the entirety of the Order. SPMT cannot predict the outcome of the case, nor can SPMT predict the amount of time and expense that will be required to resolve the appeal, but intends to vigorously appeal the entirety of the Order.

Environmental Matters

Our operations are subject to extensive federal, tribal, state and local environmental and safety laws and regulations that require expenditures to ensure compliance, including related to air emissions and wastewater discharges, at operating facilities and for remediation at current and former facilities as well as waste disposal sites. Historically, our environmental compliance costs have not had a material adverse effect on our results of operations but there can be no assurance that such costs will not be material in the future or that such future compliance with existing, amended or new legal requirements will not have a material adverse effect on our business and operating results. Costs of planning, designing, constructing and operating pipelines, plants and other facilities must incorporate compliance with environmental laws and regulations and safety standards. Failure to comply with these laws and regulations may result in the assessment of administrative, civil and criminal penalties, the imposition of investigatory, remedial and corrective action obligations, natural resource damages, the issuance of injunctions in affected areas and the filing of federally authorized citizen suits. Contingent losses related to all significant known environmental matters have been accrued and/or separately disclosed. However, we may revise accrual amounts prior to resolution of a particular contingency based on changes in facts and circumstances or changes in the expected outcome.

Environmental exposures and liabilities are difficult to assess and estimate due to unknown factors such as the magnitude of possible contamination, the timing and extent of remediation, the determination of our liability in proportion to other parties, improvements in cleanup technologies and the extent to which environmental laws and regulations may change in the future. Although environmental costs may have a significant impact on our results of operations for any single period, we believe that such costs will not have a material adverse effect on our financial position.

Based on information available at this time and reviews undertaken to identify potential exposure, we believe the amount reserved for environmental matters is adequate to cover the potential exposure for cleanup costs.

In February 2017, we received letters from the DOJ on behalf of EPA and Louisiana Department of Environmental Quality ("LDEQ") notifying SPLP and Mid-Valley Pipeline Company ("Mid-Valley") that enforcement actions were being pursued for three separate crude oil releases: (a) an estimated 550 barrels released from the Colmesneil-to-Chester pipeline in Tyler County, Texas ("Colmesneil") which allegedly occurred in February 2013; (b) an estimated 4,509 barrels released from the Longview-to-Mayersville pipeline in Caddo Parish, Louisiana (a/k/a Milepost 51.5) which allegedly occurred in October 2014; and (c) an estimated 40 barrels released from the Wakita 4-inch gathering line in Oklahoma which allegedly occurred in January 2015. In January 2019, a Consent Decree approved by all parties as well as an accompanying Complaint was filed in the United States District Court for the Western District of Louisiana seeking public comment and final court approval to resolve all penalties with the DOJ and LDEQ for the three releases. Subsequently, the court approved the Consent Decree and the penalty payment of $5.4 million was satisfied. The Consent Decree requires certain injunctive relief to be completed on the Longview-to-Mayersville pipeline within three years but the injunctive relief is not expected to have any material impact on operations. In addition to resolution of the civil penalty and injunctive relief, we continue to discuss natural resource damages with the Louisiana trustees related to the Caddo Parish, Louisiana release.

On June 4, 2019, the Oklahoma Corporation Commission's ("OCC") Transportation Division filed a complaint against SPLP seeking a penalty of up to $1 million related to a May 2018 rupture near Edmond, Oklahoma. The rupture occurred on the Noble to Douglas 8-inch pipeline in an area of external corrosion and caused the release of approximately fifteen barrels of crude oil. SPLP responded immediately to the release and remediated the surrounding environment and pipeline in cooperation with the OCC. The OCC filed the complaint alleging that SPLP failed to provide adequate cathodic protection to the pipeline causing the failure. SPLP is finalizing a settlement agreement with the OCC for a lesser penalty

Environmental Remediation

Our subsidiaries are responsible for environmental remediation at certain sites, including the following:

- certain of our interstate pipelines conduct soil and groundwater remediation related to contamination from past uses of polychlorinated biphenyls ("PCBs"). PCB assessments are ongoing and, in some cases, our subsidiaries could be contractually responsible for contamination caused by other parties.

- certain gathering and processing systems are responsible for soil and groundwater remediation related to releases of hydrocarbons.
- legacy sites related to Sunoco, Inc. are subject to environmental assessments, including formerly owned terminals and other logistics assets, retail sites that Sunoco no longer operates, closed and/or sold refineries and other formerly owned sites.
- Sunoco Inc. is potentially subject to joint and several liability for the costs of remediation at sites at which it has been identified as a potentially responsible party ("PRP"). As of March 31, 2021, Sunoco, Inc. had been named as a PRP at approximately 35 identified or potentially identifiable "Superfund" sites under federal and/or comparable state law. Sunoco Inc. is usually one of a number of companies identified as a PRP at a site. Sunoco, Inc. has reviewed the nature and extent of its involvement at each site and other relevant circumstances and, based upon Sunoco Inc.'s purported nexus to the sites, believes that its potential liability associated with such sites will not be significant.

To the extent estimable, expected remediation costs are included in the amounts recorded for environmental matters in our consolidated balance sheets. In some circumstances, future costs cannot be reasonably estimated because remediation activities are undertaken as claims are made by customers and former customers. To the extent that an environmental remediation obligation is recorded by a subsidiary that applies regulatory accounting policies, amounts that are expected to be recoverable through tariffs or rates are recorded as regulatory assets on our consolidated balance sheets.

The table below reflects the amounts of accrued liabilities recorded in our consolidated balance sheets related to environmental matters that are considered to be probable and reasonably estimable. Currently, we are not able to estimate possible losses or a range of possible losses in excess of amounts accrued. Except for matters discussed above, we do not have any material environmental matters assessed as reasonably possible that require disclosure in our consolidated financial statements.

	March 31, 2021	December 31, 2020
Current	$ 46	$ 44
Non-current	255	262
Total environmental liabilities	$ 301	$ 306

We have established a wholly-owned captive insurance company to bear certain risks associated with environmental obligations related to certain sites that are no longer operating. The premiums paid to the captive insurance company include estimates for environmental claims that have been incurred but not reported, based on an actuarially determined fully developed claims expense estimate. In such cases, we accrue losses attributable to unasserted claims based on the discounted estimates that are used to develop the premiums paid to the captive insurance company.

During the three months ended March 31, 2021 and 2020, the Partnership recorded $6 million and $9 million, respectively, of expenditures related to environmental cleanup programs.

Our pipeline operations are subject to regulation by the United States Department of Transportation under PHMSA, pursuant to which PHMSA has established requirements relating to the design, installation, testing, construction, operation, replacement and management of pipeline facilities. Moreover, PHMSA, through the Office of Pipeline Safety, has promulgated a rule requiring pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines and take measures to protect pipeline segments located in what the rule refers to as "high consequence areas." Activities under these integrity management programs involve the performance of internal pipeline inspections, pressure testing or other effective means to assess the integrity of these regulated pipeline segments, and the regulations require prompt action to address integrity issues raised by the assessment and analysis. Integrity testing and assessment of all of these assets will continue, and the potential exists that results of such testing and assessment could cause us to incur future capital and operating expenditures for repairs or upgrades deemed necessary to ensure the continued safe and reliable operation of our pipelines; however, no estimate can be made at this time of the likely range of such expenditures.

Our operations are also subject to the requirements of OSHA, and comparable state laws that regulate the protection of the health and safety of employees. In addition, the Occupational Safety and Health Administration's hazardous communication standard requires that information be maintained about hazardous materials used or produced in our operations and that this information be provided to employees, state and local government authorities and citizens. We believe that our past costs for OSHA required activities, including general industry standards, record keeping requirements, and monitoring of occupational exposure to regulated substances have not had a material adverse effect on our results of operations, but there is no assurance that such costs will not be material in the future.

12. REVENUE

Disaggregation of Revenue

The Partnership's consolidated financial statements reflect eight reportable segments, which also represent the level at which the Partnership aggregates revenue for disclosure purposes. Note 15 depicts the disaggregation of revenue by segment.

Contract Balances with Customers

The Partnership satisfies its obligations by transferring goods or services in exchange for consideration from customers. The timing of performance may differ from the timing the associated consideration is paid to or received from the customer, thus resulting in the recognition of a contract asset or a contract liability.

The Partnership recognizes a contract asset when making upfront consideration payments to certain customers or when providing services to customers prior to the time at which the Partnership is contractually allowed to bill for such services.

The Partnership recognizes a contract liability if the customer's payment of consideration precedes the Partnership's fulfillment of the performance obligations. Certain contracts contain provisions requiring customers to pay a fixed minimum fee, but allow customers to apply such fees against services to be provided at a future point in time. These amounts are reflected as deferred revenue until the customer applies the deficiency fees to services provided or becomes unable to use the fees as payment for future services due to expiration of the contractual period the fees can be applied or physical inability of the customer to utilize the fees due to capacity constraints. Additionally, Sunoco LP maintains some franchise agreements requiring dealers to make one-time upfront payments for long term license agreements. Sunoco LP recognizes a contract liability when the upfront payment is received and recognizes revenue over the term of the license.

The following table summarizes the consolidated activity of our contract liabilities:

	Contract Liabilities
Balance, December 31, 2020	$ 290
Additions	249
Revenue recognized	(165)
Balance, March 31, 2021	$ 374
Balance, December 31, 2019	$ 365
Additions	170
Revenue recognized	(196)
Balance, March 31, 2020	$ 339

The balances of Sunoco LP's contract assets were as follows:

	March 31, 2021	December 31, 2020
Contract balances:		
Contract assets	$ 134	$ 121
Accounts receivable from contracts with customers	324	256

Costs to Obtain or Fulfill a Contract

Sunoco LP recognizes an asset from the costs incurred to obtain a contract (e.g., sales commissions) only if it expects to recover those costs. On the other hand, the costs to fulfill a contract are capitalized if the costs are specifically identifiable to a contract, would result in enhancing resources that will be used in satisfying performance obligations in the future and are expected to be recovered. These capitalized costs are recorded as a part of other current assets and other non-current assets and are amortized on a systematic basis consistent with the pattern of transfer of the goods or services to which such costs relate. The amount of amortization expense that Sunoco LP recognized for the three months ended March 31, 2021 and 2020 was $4 million and $5 million, respectively. Sunoco LP has also made a policy election of expensing the costs to obtain a contract, as and when they are incurred, in cases where the expected amortization period is one year or less.

Performance Obligations

At contract inception, the Partnership assesses the goods and services promised in its contracts with customers and identifies a performance obligation for each promise to transfer a good or service (or bundle of goods or services) that is distinct. To identify the performance obligations, the Partnership considers all the goods or services promised in the contract, whether explicitly stated or implied based on customary business practices. For a contract that has more than one performance obligation, the Partnership allocates the total contract consideration it expects to be entitled to, to each distinct performance obligation based on a standalone-selling price basis. Revenue is recognized when (or as) the performance obligations are satisfied, that is, when the customer obtains control of the good or service. Certain of our contracts contain variable components, which, when combined with the fixed component are considered a single performance obligation. For these types of contacts, only the fixed component of the contracts are included in the table below.

As of March 31, 2021, the aggregate amount of transaction price allocated to unsatisfied (or partially satisfied) performance obligations is $40.32 billion, and the Partnership expects to recognize this amount as revenue within the time bands illustrated below:

	Years Ending December 31,				
	2021 (remainder)	2022	2023	Thereafter	Total
Revenue expected to be recognized on contracts with customers existing as of March 31, 2021	$ 4,673	$ 5,621	$ 5,094	$ 24,935	$ 40,323

13. DERIVATIVE ASSETS AND LIABILITIES

Commodity Price Risk

We are exposed to market risks related to the volatility of commodity prices. To manage the impact of volatility from these prices, we utilize various exchange-traded and OTC commodity financial instrument contracts. These contracts consist primarily of futures, swaps and options and are recorded at fair value in our consolidated balance sheets.

We use futures and basis swaps, designated as fair value hedges, to hedge our natural gas inventory stored in our Bammel storage facility. At hedge inception, we lock in a margin by purchasing gas in the spot market or off peak season and entering into a financial contract. Changes in the spreads between the forward natural gas prices and the physical inventory spot price result in unrealized gains or losses until the underlying physical gas is withdrawn and the related designated derivatives are settled. Once the gas is withdrawn and the designated derivatives are settled, the previously unrealized gains or losses associated with these positions are realized.

We use futures, swaps and options to hedge the sales price of natural gas we retain for fees in our intrastate transportation and storage segment and operational gas sales in our interstate transportation and storage segment. These contracts are not designated as hedges for accounting purposes.

We use NGL and crude derivative swap contracts to hedge forecasted sales of NGL and condensate equity volumes we retain for fees in our midstream segment whereby our subsidiaries generally gather and process natural gas on behalf of producers, sell the resulting residue gas and NGL volumes at market prices and remit to producers an agreed upon percentage of the proceeds based on an index price for the residue gas and NGL. These contracts are not designated as hedges for accounting purposes.

We utilize swaps, futures and other derivative instruments to mitigate the risk associated with market movements in the price of refined products and NGLs to manage our storage facilities and the purchase and sale of purity NGL. These contracts are not designated as hedges for accounting purposes.

We use futures and swaps to achieve ratable pricing of crude oil purchases, to convert certain expected refined product sales to fixed or floating prices, to lock in margins for certain refined products and to lock in the price of a portion of natural gas purchases or sales. These contracts are not designated as hedges for accounting purposes.

We use financial commodity derivatives to take advantage of market opportunities in our trading activities which complement our transportation and storage segment’s operations and are netted in cost of products sold in our consolidated statements of operations. We also have trading and marketing activities related to power and natural gas in our all other segment which are also netted in cost of products sold. As a result of our trading activities and the use of derivative financial instruments in our transportation and storage segment, the degree of earnings volatility that can occur may be

significant, favorably or unfavorably, from period to period. We attempt to manage this volatility through the use of daily position and profit and loss reports provided to our risk oversight committee, which includes members of senior management, and the limits and authorizations set forth in our commodity risk management policy.

The following table details our outstanding commodity-related derivatives:

	March 31, 2021		December 31, 2020	
	Notional Volume	Maturity	Notional Volume	Maturity
Mark-to-Market Derivatives				
(Trading)				
Natural Gas (BBtu):				
Basis Swaps IFERC/NYMEX [1]	21,125	2021-2022	(44,225)	2021-2022
Fixed Swaps/Futures	1,493	2021-2022	1,603	2021-2022
Power (Megawatt):				
Forwards	408,800	2021-2029	1,392,400	2021-2029
Futures	(32,918)	2021-2022	18,706	2021-2022
Options – Puts	174,398	2021-2022	519,071	2021
Options – Calls	(202,034)	2021-2022	2,343,293	2021
(Non-Trading)				
Natural Gas (BBtu):				
Basis Swaps IFERC/NYMEX	(25,610)	2021-2022	(29,173)	2021-2022
Swing Swaps IFERC	(13,573)	2021	11,208	2021
Fixed Swaps/Futures	(18,425)	2021-2022	(53,575)	2021-2022
Forward Physical Contracts	(15,338)	2022	(11,861)	2021
NGLs (MBbls) – Forwards/Swaps	(2,759)	2021-2022	(5,840)	2021-2022
Refined Products (MBbls) – Futures	(1,724)	2021-2023	(2,765)	2021
Crude (MBbls) – Forwards/Swaps	(3,592)	2021-2022	—	—
Fair Value Hedging Derivatives				
(Non-Trading)				
Natural Gas (BBtu):				
Basis Swaps IFERC/NYMEX	(14,068)	2021	(30,113)	2021
Fixed Swaps/Futures	(14,068)	2021	(30,113)	2021
Hedged Item – Inventory	14,068	2021	30,113	2021

[1] Includes aggregate amounts for open positions related to Houston Ship Channel, Waha Hub, NGPL TexOk, West Louisiana Zone and Henry Hub locations.

Interest Rate Risk

We are exposed to market risk for changes in interest rates. To maintain a cost effective capital structure, we borrow funds using a mix of fixed rate debt and variable rate debt. We also manage our interest rate exposure by utilizing interest rate swaps to achieve a desired mix of fixed and variable rate debt. We also utilize forward starting interest rate swaps to lock in the rate on a portion of our anticipated debt issuances.

The following table summarizes our interest rate swaps outstanding, none of which were designated as hedges for accounting purposes:

Term	Type[1]	Notional Amount Outstanding March 31, 2021	Notional Amount Outstanding December 31, 2020
July 2021[2]	Forward-starting to pay a fixed rate of 3.55% and receive a floating rate	$ 400	$ 400
July 2022[2]	Forward-starting to pay a fixed rate of 3.80% and receive a floating rate	400	400

(1) Floating rates are based on 3-month LIBOR.

(2) Represents the effective date. These forward-starting swaps have terms of 30 years with a mandatory termination date the same as the effective date.

Credit Risk

Credit risk refers to the risk that a counterparty may default on its contractual obligations resulting in a loss to the Partnership. Credit policies have been approved and implemented to govern the Partnership's portfolio of counterparties with the objective of mitigating credit losses. These policies establish guidelines, controls and limits to manage credit risk within approved tolerances by mandating an appropriate evaluation of the financial condition of existing and potential counterparties, monitoring agency credit ratings, and by implementing credit practices that limit exposure according to the risk profiles of the counterparties. Furthermore, the Partnership may, at times, require collateral under certain circumstances to mitigate credit risk as necessary. The Partnership also uses industry standard commercial agreements which allow for the netting of exposures associated with transactions executed under a single commercial agreement. Additionally, we utilize master netting agreements to offset credit exposure across multiple commercial agreements with a single counterparty or affiliated group of counterparties.

The Partnership's counterparties consist of a diverse portfolio of customers across the energy industry, including petrochemical companies, commercial and industrial end-users, oil and gas producers, municipalities, gas and electric utilities, midstream companies and independent power generators. Our overall exposure may be affected positively or negatively by macroeconomic or regulatory changes that impact our counterparties to one extent or another. Currently, management does not anticipate a material adverse effect in our financial position or results of operations as a consequence of counterparty non-performance.

The Partnership has maintenance margin deposits with certain counterparties in the OTC market, primarily with independent system operators and with clearing brokers. Payments on margin deposits are required when the value of a derivative exceeds our pre-established credit limit with the counterparty. Margin deposits are returned to us on or about the settlement date for non-exchange traded derivatives, and we exchange margin calls on a daily basis for exchange traded transactions. Since the margin calls are made daily with the exchange brokers, the fair value of the financial derivative instruments are deemed current and netted in deposits paid to vendors within other current assets in the consolidated balance sheets.

For financial instruments, failure of a counterparty to perform on a contract could result in our inability to realize amounts that have been recorded on our consolidated balance sheets and recognized in our statement of operations or statement of comprehensive income (loss).

Derivative Summary

The following table provides a summary of our derivative assets and liabilities:

	Fair Value of Derivative Instruments			
	Asset Derivatives		Liability Derivatives	
	March 31, 2021	December 31, 2020	March 31, 2021	December 31, 2020
Derivatives designated as hedging instruments:				
Commodity derivatives (margin deposits)	$ 6	$ 25	$ (12)	$ (32)
	6	25	(12)	(32)
Derivatives not designated as hedging instruments:				
Commodity derivatives (margin deposits)	98	90	(164)	(166)
Commodity derivatives	162	53	(148)	(71)
Interest rate derivatives	—	—	(254)	(448)
	260	143	(566)	(685)
Total derivatives	$ 266	$ 168	$ (578)	$ (717)

The following table presents the fair value of our recognized derivative assets and liabilities on a gross basis and amounts offset on the consolidated balance sheets that are subject to enforceable master netting arrangements or similar arrangements:

		Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	March 31, 2021	December 31, 2020	March 31, 2021	December 31, 2020
Derivatives without offsetting agreements	Derivative liabilities	$ —	$ —	$ (254)	$ (448)
Derivatives in offsetting agreements:					
OTC contracts	Derivative assets (liabilities)	162	53	(148)	(71)
Broker cleared derivative contracts	Other current assets (liabilities)	104	115	(176)	(198)
Total gross derivatives		266	168	(578)	(717)
Offsetting agreements:					
Counterparty netting	Derivative assets (liabilities)	(146)	(44)	146	44
Counterparty netting	Other current assets (liabilities)	(92)	(64)	92	64
Total net derivatives		$ 28	$ 60	$ (340)	$ (609)

We disclose the non-exchange traded financial derivative instruments as derivative assets and liabilities on our consolidated balance sheets at fair value with amounts classified as either current or long-term depending on the anticipated settlement date.

The following table summarizes the location and amounts recognized in our consolidated statements of operations with respect to our derivative financial instruments:

	Location	Amount of Gain (Loss) Recognized in Income on Derivatives	
		Three Months Ended March 31,	
		2021	2020
Derivatives not designated as hedging instruments:			
Commodity derivatives – Trading	Cost of products sold	$ 3	$ 5
Commodity derivatives – Non-trading	Cost of products sold	(42)	112
Interest rate derivatives	Gains (losses) on interest rate derivatives	194	(329)
Total		$ 155	$ (212)

14. RELATED PARTY TRANSACTIONS

The Partnership has related party transactions with several of its unconsolidated affiliates. In addition to commercial transactions, these transactions include the provision of certain management services and leases of certain assets.

The following table summarizes the revenues from related companies on our consolidated statements of operations:

	Three Months Ended March 31,	
	2021	2020
Revenues from related companies	$ 130	$ 133

The following table summarizes the accounts receivable from related companies on our consolidated balance sheets:

	March 31, 2021	December 31, 2020
Accounts receivable from related companies:		
FGT	$ 14	$ 12
Phillips 66	21	30
Various	55	37
Total accounts receivable from related companies	$ 90	$ 79

As of March 31, 2021 and December 31, 2020, accounts payable to related companies on our consolidated balance sheets totaled $23 million and $27 million, respectively.

15. REPORTABLE SEGMENTS

Our reportable segments, which conduct their business primarily in the United States, are as follows:

- intrastate transportation and storage;
- interstate transportation and storage;
- midstream;
- NGL and refined products transportation and services;
- crude oil transportation and services;
- investment in Sunoco LP;
- investment in USAC; and
- all other.

Consolidated revenues and expenses reflect the elimination of all material intercompany transactions.

Revenues from our intrastate transportation and storage segment are primarily reflected in natural gas sales and gathering, transportation and other fees. Revenues from our interstate transportation and storage segment are primarily reflected in gathering, transportation and other fees. Revenues from our midstream segment are primarily reflected in natural gas sales, NGL sales and gathering, transportation and other fees. Revenues from our NGL and refined products transportation and services segment are primarily reflected in NGL sales and gathering, transportation and other fees. Revenues from our crude oil transportation and services segment are primarily reflected in crude sales. Revenues from our investment in Sunoco LP segment are primarily reflected in refined product sales. Revenues from our investment in USAC segment are primarily reflected in gathering, transportation and other fees. Revenues from our all other segment are primarily reflected in natural gas sales and gathering, transportation and other fees.

We report Segment Adjusted EBITDA and consolidated Adjusted EBITDA as measures of segment performance. We define Segment Adjusted EBITDA and consolidated Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Inventory adjustments that are excluded from the calculation of Adjusted EBITDA represent only the changes in lower of cost or market reserves on inventory that is carried at LIFO. These amounts are unrealized valuation adjustments applied to Sunoco LP’s fuel volumes remaining in inventory at the end of the period.

Segment Adjusted EBITDA and consolidated Adjusted EBITDA reflect amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA and consolidated Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates. The use of Segment Adjusted EBITDA or Adjusted EBITDA related to unconsolidated affiliates as an analytical tool should be limited accordingly.

The following tables present financial information by segment:

	Three Months Ended March 31,	
	2021	2020
Revenues:		
Intrastate transportation and storage:		
Revenues from external customers	$ 3,976	$ 536
Intersegment revenues	924	57
	4,900	593
Interstate transportation and storage:		
Revenues from external customers	501	459
Intersegment revenues	24	5
	525	464
Midstream:		
Revenues from external customers	578	501
Intersegment revenues	2,094	669
	2,672	1,170
NGL and refined products transportation and services:		
Revenues from external customers	3,397	2,118
Intersegment revenues	593	597
	3,990	2,715
Crude oil transportation and services:		
Revenues from external customers	3,500	4,213
Intersegment revenues	—	—
	3,500	4,213
Investment in Sunoco LP:		
Revenues from external customers	3,469	3,260
Intersegment revenues	2	12
	3,471	3,272
Investment in USAC:		
Revenues from external customers	155	176
Intersegment revenues	3	3
	158	179
All other:		
Revenues from external customers	1,419	364
Intersegment revenues	93	149
	1,512	513
Eliminations	(3,733)	(1,492)
Total revenues	$ 16,995	$ 11,627

	Three Months Ended March 31,	
	2021	2020
Segment Adjusted EBITDA:		
Intrastate transportation and storage	$ 2,813	$ 240
Interstate transportation and storage	453	404
Midstream	288	383
NGL and refined products transportation and services	647	663
Crude oil transportation and services	510	591
Investment in Sunoco LP	157	209
Investment in USAC	100	106
All other	72	39
Adjusted EBITDA (consolidated)	5,040	2,635
Depreciation, depletion and amortization	(954)	(867)
Interest expense, net of interest capitalized	(589)	(602)
Impairment losses	(3)	(1,325)
Gains (losses) on interest rate derivatives	194	(329)
Non-cash compensation expense	(28)	(22)
Unrealized gains on commodity risk management activities	46	51
Inventory valuation adjustments (Sunoco LP)	100	(227)
Losses on extinguishments of debt	(7)	(62)
Adjusted EBITDA related to unconsolidated affiliates	(123)	(154)
Equity in earnings (losses) of unconsolidated affiliates	55	(7)
Other, net	(15)	(27)
Income (loss) before income tax expense	3,716	(936)
Income tax expense	(75)	(28)
Net income (loss)	$ 3,641	$ (964)

	March 31, 2021	December 31, 2020
Segment assets:		
Intrastate transportation and storage	$ 7,461	$ 7,549
Interstate transportation and storage	17,974	17,730
Midstream	19,364	18,816
NGL and refined products transportation and services	21,614	21,578
Crude oil transportation and services	19,235	18,335
Investment in Sunoco LP	5,380	5,267
Investment in USAC	2,896	2,949
All other	2,294	2,920
Total segment assets	$ 96,218	$ 95,144

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Tabular dollar and unit amounts, except per unit data, are in millions)

The following is a discussion of our historical consolidated financial condition and results of operations, and should be read in conjunction with (i) our historical consolidated financial statements and accompanying notes thereto included elsewhere in this Quarterly Report on Form 10-Q; and (ii) the consolidated financial statements and management's discussion and analysis of financial condition and results of operations included in the Partnership's Annual Report on Form 10-K for the year ended December 31, 2020 filed with the SEC on February 19, 2021. This discussion includes forward-looking statements that are subject to risk and uncertainties. Actual results may differ substantially from the statements we make in this section due to a number of factors that are discussed in "Part I – Item 1A. Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2020 filed with the SEC on February 19, 2021. Additional information on forward-looking statements is discussed below in "Forward-Looking Statements."

Unless the context requires otherwise, references to "we," "us," "our," the "Partnership" and "ET" mean Energy Transfer LP and its consolidated subsidiaries.

RECENT DEVELOPMENTS

Winter Storm Impacts

Winter Storm Uri, which occurred in February 2021, resulted in one-time impacts to the Partnership's consolidated net income and Adjusted EBITDA and also affected the results of operations in certain segments, as discussed in "Results of Operations" below. The recognition of the impacts of Winter Storm Uri during the three months ended March 31, 2021 required management to make certain estimates and assumptions, including estimates of expected credit losses and assumptions related to the resolution of disputes with counterparties with respect to certain purchases and sales of natural gas. The ultimate realization of credit losses and the resolution of disputed purchases and sales of natural gas could materially impact the Partnership's financial condition and results of operations in future periods.

Enable Acquisition

On February 16, 2021, the Partnership entered into a definitive merger agreement to acquire Enable. Under the terms of the merger agreement, Enable's common unitholders will receive 0.8595 of an ET common unit in exchange for each Enable common unit. In addition, each outstanding Enable preferred unit will be exchanged for 0.0265 of a Series G Preferred Unit, and ET will make a $10 million cash payment for Enable's general partner. Pursuant to support agreements entered into in connection with the merger agreement, the two largest Enable unitholders have delivered their written consents to approve the merger. These unitholders collectively own 79% of Enable's outstanding common units, and those consents are therefore sufficient to approve the merger. The transaction is subject to the satisfaction of customary closing conditions, including Hart-Scott-Rodino Act ("HSR") clearance.

We anticipate that the Federal Trade Commission ("FTC") will issue requests for additional information and documentary material, commonly known as "second requests," which would extend the HSR waiting period until the 30th calendar day after the date that both parties substantially comply with the second requests. We continue to believe that the FTC will grant unconditional clearance of the transaction, and we remain fully committed to closing the Enable merger under the terms of the merger agreement. We expect to close the transaction in the second half of 2021.

Rollup Mergers

On April 1, 2021, ET, ETO and certain of ETO's subsidiaries consummated several internal reorganization transactions (the "Rollup Mergers"). In connection with the Rollup Mergers, Sunoco Logistics Operations and its general partner merged with and into ETO, with ETO surviving, and immediately thereafter, ETO merged with and into ET, with ET surviving. The impacts of the Rollup Mergers also included the following:

- All of ETO's long-term debt was assumed by ET, as more fully described in Note 7 to the consolidated financial statements in "Item 1. Financial Statements."
- Each issued and outstanding ETO preferred unit was converted into the right to receive one newly created ET preferred unit. A description of the ET Preferred Units is included in Note 9 to the consolidated financial statements in "Item 1. Financial Statements."
- Each of ETO's issued and outstanding Class K, Class L, Class M and Class N units, all of which were held by ETP Holdco Corporation, a wholly-owned subsidiary of ETO, were converted into an aggregate 675,625,000 newly created Class B Units representing limited partner interests in ET.

Quarterly Cash Distribution

In April 2021, ET announced its quarterly distribution of $0.1525 per unit ($0.61 annualized) on ET common units for the quarter ended March 31, 2021.

Regulatory Update

Interstate Natural Gas Transportation Regulation

Rate Regulation

Effective January 2018, the 2017 Tax Cuts and Jobs Act (the "Tax Act") changed several provisions of the federal tax code, including a reduction in the maximum corporate tax rate. On March 15, 2018, in a set of related proposals, the FERC addressed treatment of federal income tax allowances in regulated entity rates. The FERC issued a Revised Policy Statement on Treatment of Income Taxes ("Revised Policy Statement") stating that it will no longer permit master limited partnerships to recover an income tax allowance in their cost-of-service rates. The FERC issued the Revised Policy Statement in response to a remand from the United States Court of Appeals for the District of Columbia Circuit in United Airlines v. FERC, in which the court determined that the FERC had not justified its conclusion that a pipeline organized as a master limited partnership would not "double recover" its taxes under the current policy by both including an income-tax allowance in its cost of service and earning a return on equity calculated using the discounted cash flow methodology. On July 18, 2018, the FERC issued an order denying requests for rehearing and clarification of its Revised Policy Statement. In the rehearing order, the FERC clarified that a pipeline organized as a master limited partnership will not be precluded in a future proceeding from arguing and providing evidentiary support that it is entitled to an income tax allowance and demonstrating that its recovery of an income tax allowance does not result in a double-recovery of investors' income tax costs. On July 31, 2020, the United States Court of Appeals for the District of Columbia Circuit issued an opinion upholding the FERC's decision denying a separate master limited partnership recovery of an income tax allowance and its decision not to require the master limited partnership to refund accumulated deferred income tax balances. In light of the rehearing order's clarification regarding an individual entity's ability to argue in support of recovery of an income tax allowance and the court's subsequent opinion upholding denial of an income tax allowance to a master limited partnership, the impact of the FERC's policy on the treatment of income taxes on the rates we can charge for FERC-regulated transportation services is unknown at this time.

Even without application of the FERC's recent rate making-related policy statements and rulemakings, the FERC or our shippers may challenge the cost-of-service rates we charge. The FERC's establishment of a just and reasonable rate is based on many components, including ROE and tax-related components, although changes in these components may tend to decrease our cost-of-service rate, other components in the cost-of-service rate calculation may increase and result in a newly calculated cost-of-service rate that is less than, the same as, or greater than the prior cost-of-service rate. Moreover, we receive revenues from our pipelines based on a variety of rate structures, including cost-of-service rates, negotiated rates, discounted rates and market-based rates. Many of our interstate pipelines, such as ETC Tiger, Midcontinent Express and Fayetteville Express, have negotiated market rates that were agreed to by customers in connection with long-term contracts entered into to support the construction of the pipelines. Other systems, such as FGT, Transwestern and Panhandle, have a mix of tariff rate, discount rate, and negotiated rate agreements. The revenues we receive from natural gas transportation services we provide pursuant to cost-of-service based rates may decrease in the future as a result of the Revised Policy Statement, changes to ROE methodology, or other FERC policies, combined with the reduced corporate federal income tax rate established in the Tax Act. The extent of any revenue reduction related to our cost-of-service rates, if any, will depend on a detailed review of all of our cost-of-service components and the outcomes of any challenges to our rates by the FERC or our shippers.

On July 18, 2018, the FERC issued a final rule establishing procedures to evaluate rates charged by the FERC-jurisdictional gas pipelines in light of the Tax Act and the FERC's Revised Policy Statement. By order issued January 16, 2019, the FERC initiated a review of Panhandle's existing rates pursuant to Section 5 of the NGA to determine whether the rates currently charged by Panhandle are just and reasonable and set the matter for hearing. Panhandle filed a cost and revenue study on April 1, 2019 and an NGA Section 4 rate case on August 30, 2019. The Section 4 and Section 5 proceedings were consolidated by order of the Chief Judge on October 1, 2019. A hearing in the combined proceedings commenced on August 25, 2020 and adjourned on September 15, 2020. The initial decision by the administrative law judge was issued on March 26, 2021. On April 26, 2021, Panhandle filed its brief on exceptions to the initial decision.

Pipeline Certification

The FERC issued a Notice of Inquiry on April 19, 2018 ("Pipeline Certification NOI"), thereby initiating a review of its policies on certification of natural gas pipelines, including an examination of its long-standing Policy Statement on Certification of New Interstate Natural Gas Pipeline Facilities, issued in 1999, that is used to determine whether to grant certificates for new pipeline projects. We are unable to predict what, if any, changes may be proposed as a result of the Pipeline Certification NOI

that will affect our natural gas pipeline business or when such proposals, if any, might become effective. Comments in response to the Pipeline Certification NOI were due on or before July 25, 2018. We do not expect that any change in this policy would affect us in a materially different manner than any other natural gas pipeline company operating in the United States.

Interstate Common Carrier Regulation

The FERC utilizes an indexing rate methodology which, as currently in effect, allows common carriers to change their rates within prescribed ceiling levels that are tied to changes in the Producer Price Index for Finished Goods, or PPI-FG. Many existing pipelines utilize the FERC liquids index to change transportation rates annually. The indexing methodology is applicable to existing rates, with the exclusion of market-based rates. The FERC's indexing methodology is subject to review every five years. In a December 2020 order, FERC determined that during the five-year period commencing July 1, 2021 and ending June 30, 2026, common carriers charging indexed rates will be permitted to adjust their indexed ceilings annually by PPI-FG plus 0.78 percent. Requests for rehearing of the December 2020 order were filed on January 19, 2021, and remain pending before FERC. Accordingly, the FERC's final determination of the index rate coupled with the anticipated and subsequent appeals of the December 2020 order could adversely impact the final determination of the FERC approved index.

FERC has also implemented changes related to its treatment of federal income taxes. The change in treatment impacts two rate components. Those components are the allowance for income taxes and the amount for accumulated deferred income taxes. These changes will primarily impact any cost-of-service related filing and our revenues associated with any cost-based service could be adversely affected by future FERC or judicial rulings. However, we believe that these impacts, if any, will be minimal.

Results of Operations

We report Segment Adjusted EBITDA and consolidated Adjusted EBITDA as measures of segment performance. We define Segment Adjusted EBITDA and consolidated Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Inventory adjustments that are excluded from the calculation of Adjusted EBITDA represent only the changes in lower of cost or market reserves on inventory that is carried at LIFO. These amounts are unrealized valuation adjustments applied to Sunoco LP's fuel volumes remaining in inventory at the end of the period.

Segment Adjusted EBITDA and consolidated Adjusted EBITDA reflect amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA and consolidated Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates. The use of Segment Adjusted EBITDA or Adjusted EBITDA related to unconsolidated affiliates as an analytical tool should be limited accordingly.

Segment Adjusted EBITDA, as reported for each segment in the table below, is analyzed for each segment in the section titled "Segment Operating Results." Adjusted EBITDA is a non-GAAP measure used by industry analysts, investors, lenders and rating agencies to assess the financial performance and the operating results of the Partnership's fundamental business activities and should not be considered in isolation or as a substitution for net income, income from operations, cash flows from operating activities or other GAAP measures.

Consolidated Results

	Three Months Ended March 31,		
	2021	2020	Change
Segment Adjusted EBITDA:			
Intrastate transportation and storage	$ 2,813	$ 240	$ 2,573
Interstate transportation and storage	453	404	49
Midstream	288	383	(95)
NGL and refined products transportation and services	647	663	(16)
Crude oil transportation and services	510	591	(81)
Investment in Sunoco LP	157	209	(52)
Investment in USAC	100	106	(6)
All other	72	39	33
Adjusted EBITDA (consolidated)	5,040	2,635	2,405
Depreciation, depletion and amortization	(954)	(867)	(87)
Interest expense, net of interest capitalized	(589)	(602)	13
Impairment losses	(3)	(1,325)	1,322
Gains (losses) on interest rate derivatives	194	(329)	523
Non-cash compensation expense	(28)	(22)	(6)
Unrealized gains on commodity risk management activities	46	51	(5)
Inventory valuation adjustments (Sunoco LP)	100	(227)	327
Losses on extinguishments of debt	(7)	(62)	55
Adjusted EBITDA related to unconsolidated affiliates	(123)	(154)	31
Equity in earnings (losses) of unconsolidated affiliates	55	(7)	62
Other, net	(15)	(27)	12
Income (loss) before income tax expense	3,716	(936)	4,652
Income tax expense	(75)	(28)	(47)
Net income (loss)	$ 3,641	$ (964)	$ 4,605

Adjusted EBITDA (consolidated). For the three months ended March 31, 2021 compared to the same period last year, Adjusted EBITDA increased 91%, primarily due to the impacts of Winter Storm Uri in February 2021. The most significant impacts from the storm were recognized in our intrastate transportation and storage segment, where realized storage margin increased by $1.52 billion compared to the prior period as a result of withdrawals during the storm, realized natural gas sales increased $983 million primarily due to sales during the storm, and retained fuel revenues increased $84 million primarily due to unprecedented natural gas prices during the storm. Additional information on changes impacting Adjusted EBITDA, including other impacts from Winter Storm Uri and other non-storm-related factors, is available below in “Segment Operating Results.”

Depreciation, Depletion and Amortization. Depreciation, depletion and amortization increased for the three months ended March 31, 2021 compared to the same period last year primarily due to the incremental depreciation related to assets recently placed in service.

Interest expense, net. Interest expense, net of interest capitalized decreased for the three months ended March 31, 2021 compared to the same periods last year primarily due to the following:

- a decrease of $10 million for the Partnership primarily due to lower average debt balance and borrowing costs on recently refinanced and floating rate debt, partially offset by lower interest capitalized; and
- a decrease of $3 million for Sunoco LP primarily attributable to a slight decrease in average total long-term debt and decrease in the weighted average interest rate on long-term debt for the respective periods.

Impairment Losses. During the three months ended March 31, 2021, USAC recognized an impairment of $3 million related to its compression equipment as a result of its evaluations of the future deployment of its idle fleet under current market conditions. During the three months ended March 31, 2020, the Partnership performed an interim impairment test on certain reporting units within its midstream, interstate, crude, NGL and all other operations. As a result of the interim impairment test, the Partnership recognized goodwill impairments totaling of $706 million due to decreases in projected future cash flows as a

result of overall market demand decline. In addition, USAC recognized a goodwill impairment of $619 million based on changes in market condition.

Gains (Losses) on Interest Rate Derivatives. Gains and losses on interest rate derivatives during the three months ended March 31, 2021 resulted from changes in forward interest rates, which caused our forward-starting swaps to change in value.

Unrealized Gains (Losses) on Commodity Risk Management Activities. See additional information on the unrealized gains (losses) on commodity risk management activities included in "Segment Operating Results" below.

Losses on Extinguishments of Debt. During the three months ended March 31, 2021, amounts were related to Sunoco LP's January 2021 repurchase of the remainder of its 2023 senior notes. During the three months ended March 31, 2020, amounts were related to ETO's senior notes redemption in January 2020.

Inventory Valuation Adjustments. Inventory valuation adjustments represent changes in lower of cost or market using the last-in, first-out method on Sunoco LP's inventory. These amounts are unrealized valuation adjustments applied to fuel volumes remaining in inventory at the end of the period. For the three months ended March 31, 2021, an increase in fuel prices reduced lower of cost or market reserve requirements for the period by $100 million. For the three months ended March 31, 2020, a decline in fuel prices increased lower of cost or market reserve requirements for the period by $227 million.

Adjusted EBITDA Related to Unconsolidated Affiliates and Equity in Earnings of Unconsolidated Affiliates. See additional information in "Supplemental Information on Unconsolidated Affiliates" and "Segment Operating Results" below.

Other, net. Other, net primarily includes the amortization of regulatory assets and other income and expense amounts.

Income Tax Expense. For the three months ended March 31, 2021 compared to the same period in the prior year, income tax expense increased due to higher earnings from the Partnership's consolidated corporate subsidiaries in the current period.

Supplemental Information on Unconsolidated Affiliates

The following table presents financial information related to unconsolidated affiliates:

	Three Months Ended March 31,		
	2021	2020[1]	Change
Equity in earnings (losses) of unconsolidated affiliates:			
Citrus	$ 37	$ 35	$ 2
FEP	—	(70)	70
MEP	(3)	—	(3)
White Cliffs	—	8	(8)
Other	21	20	1
Total equity in earnings (losses) of unconsolidated affiliates	$ 55	$ (7)	$ 62
Adjusted EBITDA related to unconsolidated affiliates[2]:			
Citrus	$ 79	$ 79	$ —
FEP	—	19	(19)
MEP	5	8	(3)
White Cliffs	5	14	(9)
Other	34	34	—
Total Adjusted EBITDA related to unconsolidated affiliates	$ 123	$ 154	$ (31)
Distributions received from unconsolidated affiliates:			
Citrus	$ 56	$ 49	$ 7
FEP	4	18	(14)
MEP	4	11	(7)
White Cliffs	15	13	2
Other	21	19	2
Total distributions received from unconsolidated affiliates	$ 100	$ 110	$ (10)

(1) For the three months ended March 31, 2020, equity in earnings (losses) of unconsolidated affiliates includes the impact of non-cash impairments recorded by FEP, which reduced the Partnership's equity in earnings by $85 million.

(2) These amounts represent our proportionate share of the Adjusted EBITDA of our unconsolidated affiliates and are based on our equity in earnings or losses of our unconsolidated affiliates adjusted for our proportionate share of the unconsolidated affiliates' interest, depreciation, depletion, amortization, non-cash items and taxes.

Segment Operating Results

We evaluate segment performance based on Segment Adjusted EBITDA, which we believe is an important performance measure of the core profitability of our operations. This measure represents the basis of our internal financial reporting and is one of the performance measures used by senior management in deciding how to allocate capital resources among business segments.

The tables below identify the components of Segment Adjusted EBITDA, which is calculated as follows:

- *Segment margin*, *operating expenses*, and *selling, general and administrative expenses*. These amounts represent the amounts included in our consolidated financial statements that are attributable to each segment.
- *Unrealized gains or losses on commodity risk management activities and inventory valuation adjustments*. These are the unrealized amounts that are included in cost of products sold to calculate segment margin. These amounts are not included in Segment Adjusted EBITDA; therefore, the unrealized losses are added back and the unrealized gains are subtracted to calculate the segment measure.
- *Non-cash compensation expense*. These amounts represent the total non-cash compensation recorded in operating expenses and selling, general and administrative expenses. This expense is not included in Segment Adjusted EBITDA and therefore is added back to calculate the segment measure.

- *Adjusted EBITDA related to unconsolidated affiliates*. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates.

In the following analysis of segment operating results, a measure of segment margin is reported for segments with sales revenues. Segment margin is a non-GAAP financial measure and is presented herein to assist in the analysis of segment operating results and particularly to facilitate an understanding of the impacts that changes in sales revenues have on the segment performance measure of Segment Adjusted EBITDA. Segment margin is similar to the GAAP measure of gross margin, except that segment margin excludes charges for depreciation, depletion and amortization. Among the GAAP measures reported by the Partnership, the most directly comparable measure to segment margin is Segment Adjusted EBITDA; a reconciliation of segment margin to Segment Adjusted EBITDA is included in the following tables for each segment where segment margin is presented.

In addition, for certain segments, the sections below include information on the components of segment margin by sales type, which components are included in order to provide additional disaggregated information to facilitate the analysis of segment margin and Segment Adjusted EBITDA. For example, these components include transportation margin, storage margin and other margin. These components of segment margin are calculated consistent with the calculation of segment margin; therefore, these components also exclude charges for depreciation, depletion and amortization.

Winter Storm Uri, which occurred in February 2021, resulted in one-time impacts to the Partnership's Adjusted EBITDA and also affected the results of operations in certain segments, as discussed in segment analysis below. The recognition of the impacts of Winter Storm Uri during the three months ended March 31, 2021 required management to make certain estimates and assumptions, including estimates of expected credit losses and assumptions related to the resolution of disputes with counterparties with respect to certain purchases and sales of natural gas. The ultimate realization of credit losses and the resolution of disputed purchases and sales of natural gas could materially impact the Partnership's financial condition and results of operations in future periods.

Intrastate Transportation and Storage

	Three Months Ended March 31,		
	2021	2020	Change
Natural gas transported (BBtu/d)	11,851	13,135	(1,284)
Withdrawals from storage natural gas inventory (BBtu)	19,045	6,975	12,070
Revenues	$ 4,900	$ 593	$ 4,307
Cost of products sold	1,994	303	1,691
Segment margin	2,906	290	2,616
Unrealized gains on commodity risk management activities	(12)	(6)	(6)
Operating expenses, excluding non-cash compensation expense	(80)	(41)	(39)
Selling, general and administrative expenses, excluding non-cash compensation expense	(8)	(9)	1
Adjusted EBITDA related to unconsolidated affiliates	6	6	—
Other	1	—	1
Segment Adjusted EBITDA	$ 2,813	$ 240	$ 2,573

Volumes. For the three months ended March 31, 2021 compared to the same period last year, transported volumes decreased primarily due to the bankruptcy filing of a transportation customer, a contract step-down, and impacts of Winter Storm Uri.

Segment Margin. The components of our intrastate transportation and storage segment margin were as follows:

	Three Months Ended March 31,		
	2021	2020	Change
Transportation fees	$ 180	$ 161	$ 19
Natural gas sales and other (excluding unrealized gains and losses)	1,071	88	983
Retained fuel revenues (excluding unrealized gains and losses)	93	9	84
Storage margin (excluding unrealized gains and losses and fair value inventory adjustments)	1,550	26	1,524
Unrealized gains on commodity risk management activities and fair value inventory adjustments	12	6	6
Total segment margin	$ 2,906	$ 290	$ 2,616

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our intrastate transportation segment increased due to the net effects of the following:

- an increase of $1.52 billion in realized storage margin due to higher physical storage margin from withdrawals during Winter Storm Uri;
- an increase of $983 million in realized natural gas sales and other primarily due to natural gas sales at prevailing market prices during Winter Storm Uri;
- an increase of $84 million in retained fuel revenues primarily due to natural gas prices during Winter Storm Uri; and
- an increase of $19 million in transportation fees due to demand volume ramp-ups from the Permian and fees related to Winter Storm Uri, partially offset by the expiration of certain contracts on our Regency Intrastate Gas System; partially offset by
- an increase of $39 million in operating expenses primarily due to a $29 million increase in the cost of fuel consumption during Winter Storm Uri and a $9 million increase in electricity costs.

Interstate Transportation and Storage

	Three Months Ended March 31,		
	2021	2020	Change
Natural gas transported (BBtu/d)	9,654	10,630	(976)
Natural gas sold (BBtu/d)	21	15	6
Revenues	$ 525	$ 464	$ 61
Operating expenses, excluding non-cash compensation, amortization and accretion expenses	(134)	(143)	9
Selling, general and administrative expenses, excluding non-cash compensation, amortization and accretion expenses	(21)	(21)	—
Adjusted EBITDA related to unconsolidated affiliates	85	106	(21)
Other	(2)	(2)	—
Segment Adjusted EBITDA	$ 453	$ 404	$ 49

Volumes. For the three months ended March 31, 2021 compared to the same period last year, transported volumes decreased primarily due to foundation shipper contract expirations and a shipper bankruptcy on our ETC Tiger system, maintenance of third-party facilities, and lower crude production resulting in lower associated gas production.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our interstate transportation and storage segment increased due to the net impacts of the following:

- an increase of $61 million in revenues primarily due to an $88 million increase in operational gas sales and a $6 million increase in reservation revenues from higher contracted volumes and increased short-term firm contracts. These increases were partially offset by a $31 million decrease due to contract expirations and a shipper bankruptcy during 2020 on our ETC Tiger system; and

- a decrease of $9 million in operating expenses primarily due to a $5 million decrease in employee costs, a $2 million decrease in maintenance expenses and a $2 million decrease in ad valorem tax expense; partially offset by
- a decrease of $21 million in Adjusted EBITDA related to unconsolidated affiliates primarily due to a $19 million decrease from our Fayetteville Express Pipeline joint venture as a result of the expiration of foundation shipper contracts and a $3 million decrease from our Midcontinent Express Pipeline joint venture as a result of less capacity sold and lower rates received following the expiration of foundation shipper contracts, partially offset by a $1 million increase from our Citrus joint venture resulting from higher revenues.

Midstream

	Three Months Ended March 31,		
	2021	2020	Change
Gathered volumes (BBtu/d)	12,024	13,346	(1,322)
NGLs produced (MBbls/d)	534	610	(76)
Equity NGLs (MBbls/d)	30	36	(6)
Revenues	$ 2,672	$ 1,170	$ 1,502
Cost of products sold	2,202	575	1,627
Segment margin	470	595	(125)
Operating expenses, excluding non-cash compensation expense	(164)	(193)	29
Selling, general and administrative expenses, excluding non-cash compensation expense	(25)	(26)	1
Adjusted EBITDA related to unconsolidated affiliates	7	7	—
Segment Adjusted EBITDA	$ 288	$ 383	$ (95)

Volumes. Gathered volumes and NGL production decreased during the three months ended March 31, 2021 compared to the same period last year primarily due to basin declines and Winter Storm Uri in the South Texas, Mid-Continent/Panhandle, Permian and North Texas regions partially offset by volume growth in the Ark-La-Tex region.

Segment Margin. The components of our midstream segment gross margin were as follows:

	Three Months Ended March 31,		
	2021	2020	Change
Gathering and processing fee-based revenues	$ 498	$ 530	$ (32)
Non-fee-based contracts and processing	(28)	65	(93)
Total segment margin	$ 470	$ 595	$ (125)

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our midstream segment decreased due to the net impacts of the following:

- a decrease of $145 million in non-fee-based margin due to the impacts of Winter Storm Uri; and
- a decrease of $32 million in fee-based margin due to lower volumes primarily in the South Texas Region as a result of basin declines and Winter Storm Uri; partially offset by
- an increase of $52 million in non-fee-based margin due to favorable natural gas prices of $26 million and NGL prices of $26 million;
- a decrease of $29 million in operating expenses due to cost-saving initiatives, including a decrease of $19 million in outside services, $7 million in materials and $3 million in ad valorem taxes; and
- a decrease of $1 million in selling, general and administrative expenses due to a decrease in overhead costs resulting from corporate cost reductions.

NGL and Refined Products Transportation and Services

	Three Months Ended March 31,		
	2021	2020	Change
NGL transportation volumes (MBbls/d)	1,502	1,398	104
Refined products transportation volumes (MBbls/d)	462	542	(80)
NGL and refined products terminal volumes (MBbls/d)	1,042	847	195
NGL fractionation volumes (MBbls/d)	726	804	(78)
Revenues	$ 3,990	$ 2,715	$ 1,275
Cost of products sold	3,141	1,836	1,305
Segment margin	849	879	(30)
Unrealized gains on commodity risk management activities	(23)	(55)	32
Operating expenses, excluding non-cash compensation expense	(172)	(159)	(13)
Selling, general and administrative expenses, excluding non-cash compensation expense	(28)	(25)	(3)
Adjusted EBITDA related to unconsolidated affiliates	21	23	(2)
Segment Adjusted EBITDA	$ 647	$ 663	$ (16)

Volumes. For the three months ended March 31, 2021 compared to the same period last year, NGL transportation volumes increased primarily due to the initiation of service on our propane and ethane export pipelines into our Nederland Terminal.

Refined products transportation volumes decreased for the three months ended March 31, 2021 compared to the same periods last year due to less domestic demand for jet fuel and other refined products, as well as COVID-19 related demand reductions.

NGL and refined products terminal volumes increased for the three months ended March 31, 2021 compared to the same periods last year primarily due to higher volumes from our Mariner East system. In addition, loaded vessels at our Nederland Terminal increased due to the additional supply from the initiation of service on our propane and ethane export pipelines in the fourth quarter of 2020. These increases were partially offset by lower domestic demand for jet fuel and other refined products at our refined product terminals due primarily to COVID-19 related demand reductions.

Average fractionated volumes at our Mont Belvieu, Texas fractionation facility decreased for the three months ended March 31, 2021 compared to the same period last year primarily due to lower NGL volumes feeding our Mont Belvieu fractionation facility as a result of production interruptions, primarily in the Permian region, due to Winter Storm Uri during the first quarter of 2021.

Segment Margin. The components of our NGL and refined products transportation and services segment margin were as follows:

	Three Months Ended March 31,		
	2021	2020	Change
Transportation margin	$ 492	$ 476	$ 16
Fractionators and refinery services margin	145	179	(34)
Terminal services margin	141	151	(10)
Storage margin	67	63	4
Marketing margin	(19)	(45)	26
Unrealized gains on commodity risk management activities	23	55	(32)
Total segment margin	$ 849	$ 879	$ (30)

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our NGL and refined products transportation and services segment decreased due to the net impacts of the following:

- a decrease of $34 million in fractionators and refinery services margin primarily due to a $28 million decrease resulting from downtime on our various fractionators due to the previously mentioned weather-driven and COVID-19 related volume reductions in the first quarter of 2021 and a $17 million decrease relating to a cavern withdrawal in the first quarter

of 2021, the impact of which was partially offset in our transportation margin. These decreases were partially offset by an $8 million increase due to a more favorable pricing environment impacting our refinery services business;

- an increase of $13 million in operating expenses primarily due to a $14 million increase in power costs; and
- a decrease of $10 million in terminal services margin primarily due to a $32 million decrease resulting from an expiration of a third-party contract at our Nederland Terminal in the second quarter of 2020. This decrease was partially offset by increases of $13 million in loading fees due to higher LPG export volumes at our Nederland Terminal, $7 million due to the startup of our ethane export facilities at our Nederland Terminal in the first quarter of 2021, and $1 million due to higher throughput at our Marcus Hook Terminal; partially offset by
- an increase of $26 million in marketing margin primarily due to a $45 million increase resulting from higher optimization gains and from the sale of NGL component products at our Mont Belvieu facility, a $14 million increase from our optimization and blending operations from our northeast NGL and refined products marketing operations, and a $7 million increase due to inventory write-downs taken on various products during 2020 as a result of market price declines. These increases were partially offset by intrasegment charges of $24 million in the first quarter of 2021 which were fully offset within our transportation margin, as well as a $15 million decrease in butane blending margin due to less favorable prices; and
- an increase of $16 million in transportation margin primarily due to intrasegment revenues of $24 million in the first quarter of 2021, which are fully offset by a charge reflected in our marketing margin, a $20 million increase due to higher export volumes feeding into our Nederland Terminal resulting from the initiation of service on our propane and ethane export pipelines in the fourth quarter of 2020, a $19 million increase from higher throughput on our Mariner East pipeline system and an $11 million gain relating to a cavern withdrawal in the first quarter of 2021 that is partially offset on our fractionators margin. These increases were partially offset by a $58 million decrease resulting from lower throughput across the various regions in Texas due to Winter Storm Uri related production outages.

Crude Oil Transportation and Services

	Three Months Ended March 31,		
	2021	2020	Change
Crude transportation volumes (MBbls/d)	3,491	4,424	(933)
Crude terminals volumes (MBbls/d)	2,327	2,996	(669)
Revenues	$ 3,500	$ 4,213	$ (713)
Cost of products sold	2,838	3,458	(620)
Segment margin	662	755	(93)
Unrealized (gains) losses on commodity risk management activities	(5)	10	(15)
Operating expenses, excluding non-cash compensation expense	(122)	(158)	36
Selling, general and administrative expenses, excluding non-cash compensation expense	(30)	(28)	(2)
Adjusted EBITDA related to unconsolidated affiliates	5	12	(7)
Segment Adjusted EBITDA	$ 510	$ 591	$ (81)

Volumes. For the three months ended March 31, 2021 compared to the same period last year, crude transportation volumes were lower on our Texas pipeline system and Bakken pipeline, driven by COVID-19 related demand reductions impacting both regions, as well as lower crude oil production along our Texas systems due to Winter Storm Uri during the first quarter of 2021. These volume reductions also resulted in lower terminal volumes compared to the prior period.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our crude oil transportation and services segment decreased due to the net impacts of the following:

- a decrease of $108 million in segment margin (excluding unrealized gains and losses on commodity risk management activities) primarily due to a $111 million decrease from our Texas crude pipeline system due to lower volumes transported and lower average tariff rates realized, a $55 million decrease due to lower volumes on our Bakken Pipeline resulting from lower Bakken crude oil production, a $26 million decrease in crude terminal margin primarily driven by lower Permian and Bakken pipeline volumes, reduced Gulf Coast refinery utilization from adverse weather, and decreased export demand, a $5 million decrease due to lower volumes on our Bayou Bridge pipeline, and a $3 million decrease in Mid-Continent gathering volumes due to lower production. These decreases were partially offset by a $92 million increase (excluding a

net change of $15 million in unrealized gains and losses on commodity risk management activities) from our crude oil acquisition and marketing business primarily due to losses realized in the first quarter of 2020 on the write down of crude inventory due to significant market price declines;

- an increase of $2 million in selling, general and administrative expenses primarily due to higher insurance premiums and allocated overhead costs; and
- a decrease of $7 million in Adjusted EBITDA related to unconsolidated affiliates due to lower volumes on White Cliffs Pipeline due to lower crude oil production in the DJ basin, partly offset by higher margin from jet fuel sales by our joint ventures, partially offset by
- a decrease of $36 million in operating expenses primarily due to lower volume-driven expenses and corporate cost reduction initiatives.

Investment in Sunoco LP

	Three Months Ended March 31,		
	2021	2020	Change
Revenues	$ 3,471	$ 3,272	$ 199
Cost of products sold	3,120	3,164	(44)
Segment margin	351	108	243
Unrealized (gains) losses on commodity risk management activities	(5)	6	(11)
Operating expenses, excluding non-cash compensation expense	(76)	(109)	33
Selling, general and administrative expenses, excluding non-cash compensation expense	(20)	(30)	10
Adjusted EBITDA related to unconsolidated affiliates	2	2	—
Inventory valuation adjustments	(100)	227	(327)
Other	5	5	—
Segment Adjusted EBITDA	$ 157	$ 209	$ (52)

The Investment in Sunoco LP segment reflects the consolidated results of Sunoco LP.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our investment in Sunoco LP segment decreased due to the net impacts of the following:

- a decrease in the gross profit on motor fuel sales of $78 million primarily due to a 20.7% decrease in gross profit per gallon sold and a 7.5% decrease in gallons sold; and
- a decrease in non-motor fuel sales and lease gross profit of $17 million primarily due to reduced credit card transactions; partially offset by
- a decrease in operating expenses and selling, general and administrative expenses of $43 million primarily due to lower expected credit losses, employee costs, professional fees, credit card processing fees, insurance and maintenance.

Investment in USAC

	Three Months Ended March 31,		
	2021	2020	Change
Revenues	$ 158	$ 179	$ (21)
Cost of products sold	21	24	(3)
Segment margin	137	155	(18)
Operating expenses, excluding non-cash compensation expense	(28)	(35)	7
Selling, general and administrative expenses, excluding non-cash compensation expense	(9)	(14)	5
Segment Adjusted EBITDA	$ 100	$ 106	$ (6)

The Investment in USAC segment reflects the consolidated results of USAC.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our investment in USAC segment decreased due to the net impacts of the following:

- a decrease of $18 million in segment margin primarily due to a decrease in demand for compression services driven by decreased U.S. crude oil and natural gas activity compared to the prior period, partially offset by
- a decrease of $7 million in operating expenses is primarily driven by the decrease in average revenue generating horsepower and reduced headcount in the current period; and
- a decrease of $5 million in selling, general and administrative expenses primarily due to changes in the allowance for expected credit losses and lower employee-related expenses.

All Other

	Three Months Ended March 31,		
	2021	2020	Change
Revenues	$ 1,512	513	$ 999
Cost of products sold	1,342	415	927
Segment margin	170	98	72
Unrealized gains on commodity risk management activities	(1)	(5)	4
Operating expenses, excluding non-cash compensation expense	(51)	(38)	(13)
Selling, general and administrative expenses, excluding non-cash compensation expense	(39)	(35)	(4)
Adjusted EBITDA related to unconsolidated affiliates	(1)	—	(1)
Other and eliminations	(6)	19	(25)
Segment Adjusted EBITDA	$ 72	$ 39	$ 33

Amounts reflected in our all other segment primarily include:

- our natural gas marketing operations;
- our wholly-owned natural gas compression operations;
- our investment in coal handling facilities; and
- our Canadian operations, which include natural gas gathering and processing assets.

Segment Adjusted EBITDA. For the three months ended March 31, 2021 compared to the same period last year, Segment Adjusted EBITDA related to our all other segment increased due to the net impacts of the following:

- an increase of $52 million from power trading activities primarily due to short-term, favorable market conditions created by Winter Storm Uri in February 2021;
- an increase of $17 million primarily due to revenues earned under the Electric Reliability Council of Texas (“ERCOT”) responsive reserve program during the Winter Storm Uri, and
- an increase of $5 million primarily due to increased gains from sales of storage natural gas; partially offset by
- a decrease of $22 million primarily due to insurance proceeds received in the prior period on settled claims related to our MTBE litigation; and
- a decrease of $10 million due to higher utility expense related to freezing temperatures.

LIQUIDITY AND CAPITAL RESOURCES

Overview

Our ability to satisfy obligations and pay distributions to unitholders will depend on our future performance, which will be subject to prevailing economic, financial, business and weather conditions, and other factors, many of which are beyond management’s control.

We currently expect capital expenditures in 2021 to be within the following ranges (excluding capital expenditures related to our investments in Sunoco LP and USAC):

	Growth		Maintenance	
	Low	High	Low	High
Intrastate transportation and storage	$ 15	$ 20	$ 30	$ 35
Interstate transportation and storage [1]	50	75	120	125
Midstream	425	450	110	115
NGL and refined products transportation and services	650	750	110	120
Crude oil transportation and services [1]	325	350	90	100
All other (including eliminations)	75	100	55	60
Total capital expenditures	$ 1,540	$ 1,745	$ 515	$ 555

[1] Includes capital expenditures related to our proportionate ownership of the Bakken, Rover and Bayou Bridge pipeline projects and our proportionate ownership of the Orbit Gulf Coast NGL export project.

The assets used in our natural gas and liquids operations, including pipelines, gathering systems and related facilities, are generally long-lived assets and do not require significant maintenance capital expenditures. Accordingly, we do not have any significant financial commitments for maintenance capital expenditures in our businesses. From time to time we experience increases in pipe costs due to a number of reasons, including but not limited to, delays from steel mills, limited selection of mills capable of producing large diameter pipe timely, higher steel prices and other factors beyond our control. However, we have included these factors in our anticipated growth capital expenditures for each year.

We generally fund maintenance capital expenditures and distributions with cash flows from operating activities. We generally expect to fund growth capital expenditures with proceeds of borrowings under our credit facilities, along with cash from operations.

Sunoco LP currently expects to invest approximately $150 million in growth capital expenditures and approximately $45 million on maintenance capital expenditures for the full year 2021.

USAC currently plans to spend approximately $22 million in maintenance capital expenditures and currently has budgeted between $30 million and $40 million in expansion capital expenditures for the full year 2021.

Cash Flows

Our cash flows may change in the future due to a number of factors, some of which we cannot control. These include regulatory changes, the price for our and services, the demand for such products and services, margin requirements resulting from significant changes in commodity prices, operational risks, the successful integration of our acquisitions and other factors.

Operating Activities

Changes in cash flows from operating activities between periods primarily result from changes in earnings (as discussed in “Results of Operations” above), excluding the impacts of non-cash items and changes in operating assets and liabilities. Non-cash items include recurring non-cash expenses, such as depreciation, depletion and amortization expense and non-cash compensation expense. The increase in depreciation, depletion and amortization expense during the periods presented primarily resulted from construction and acquisition of assets, while changes in non-cash compensation expense resulted from changes in the number of units granted and changes in the grant date fair value estimated for such grants. Cash flows from operating activities also differ from earnings as a result of non-cash charges that may not be recurring, such as impairment charges and allowance for equity funds used during construction. The allowance for equity funds used during construction increases in periods when we have a significant amount of interstate pipeline construction in progress. Changes in operating assets and liabilities between periods result from factors such as the changes in the value of price risk management assets and liabilities, the timing of accounts receivable collection, the timing of payments on accounts payable, the timing of purchase and sales of inventories and the timing of advances and deposits received from customers.

Three months ended March 31, 2021 compared to three months ended March 31, 2020. Cash provided by operating activities during 2021 was $5.16 billion compared to $1.83 billion for 2020, and net income was $3.64 billion for 2021 and net loss was $964 million for 2020. The difference between net income and net cash provided by operating activities for the three months ended March 31, 2021 primarily consisted of net changes in operating assets and liabilities (net of effects of acquisitions) of $533 million and other non-cash items totaling $942 million.

The non-cash activity in 2021 and 2020 consisted primarily of depreciation, depletion and amortization of $954 million and $867 million, respectively, non-cash compensation expense of $28 million and $22 million, respectively, inventory valuation adjustments of $100 million and $227 million, respectively, and deferred income taxes of $66 million and $42 million, respectively. Non-cash activity also included losses on extinguishments of debt in 2021 and 2020 of $7 million and $62 million, respectively, and impairment losses of $3 million and $1.33 billion in 2021 and 2020, respectively.

Net income (loss) includes equity in earnings of unconsolidated affiliates of $55 million in 2021 and equity in losses of unconsolidated affiliates of $7 million in 2020, and cash provided by operating activities includes cash distributions received from unconsolidated affiliates that are deemed to be paid from cumulative earnings, which distributions were $45 million in 2021 and $58 million in 2020.

Cash paid for interest, net of interest capitalized, was $562 million and $535 million for the three months ended March 31, 2021 and 2020, respectively. Interest capitalized was $27 million and $38 million for the three months ended March 31, 2021 and 2020, respectively.

Investing Activities

Cash flows from investing activities primarily consist of cash amounts paid for acquisitions, capital expenditures, cash contributions to our joint ventures, and cash proceeds from sales or contributions of assets or businesses. In addition, distributions from equity investees are included in cash flows from investing activities if the distributions are deemed to be a return of the Partnership's investment. Changes in capital expenditures between periods primarily result from increases or decreases in our growth capital expenditures to fund our construction and expansion projects.

Three months ended March 31, 2021 compared to three months ended March 31, 2020. Cash used in investing activities during 2021 was $635 million compared to $1.56 billion for 2020. Total capital expenditures (excluding the allowance for equity funds used during construction and net of contributions in aid of construction costs) for 2021 were $695 million compared to $1.60 billion for 2020. Additional detail related to our capital expenditures is provided in the table below.

The following is a summary of capital expenditures (including only our proportionate share of the Bakken, Rover and Bayou Bridge pipeline projects and net of contributions in aid of construction costs) on an accrual basis for the three months ended March 31, 2021:

	Capital Expenditures Recorded During Period		
	Growth	Maintenance	Total
Intrastate transportation and storage	$ 9	$ 4	$ 13
Interstate transportation and storage	9	9	18
Midstream	69	14	83
NGL and refined products transportation and services	187	23	210
Crude oil transportation and services	71	8	79
Investment in Sunoco LP	13	5	18
Investment in USAC	4	5	9
All other (including eliminations)	16	8	24
Total capital expenditures	$ 378	$ 76	$ 454

Financing Activities

Changes in cash flows from financing activities between periods primarily result from changes in the levels of borrowings and equity issuances, which are primarily used to fund our acquisitions and growth capital expenditures. Distributions increase between the periods based on increases in the number of common units outstanding or increases in the distribution rate.

Three months ended March 31, 2021 compared to three months ended March 31, 2020. Cash used in financing activities during 2021 was $4.53 billion compared to $366 million for 2020. During 2021, we had a net decrease in our debt level of $3.73 billion compared to a net decrease of $764 million for 2020. In 2020, we paid debt issuance costs of $51 million. During 2020, our subsidiaries received $1.58 billion in net proceeds from offerings of preferred units.

In 2021 and 2020, we paid distributions of $406 million and $770 million, respectively, to our partners. In 2021 and 2020, we paid distributions of $406 million and $444 million, respectively, to noncontrolling interests. In 2021 and 2020, we paid distributions of $12 million to our redeemable noncontrolling interests. In addition, we received capital contributions of $20 million in cash from noncontrolling interests in 2021 compared to $95 million in cash from noncontrolling interests in 2020.

Description of Indebtedness

Our outstanding consolidated indebtedness was as follows:

	March 31, 2021	December 31, 2020
ET Indebtedness:		
Senior Notes [1]	$ 36,455	$ 37,855
Term Loan [2]	2,000	2,000
Five-Year Credit Facility [2]	800	3,103
Subsidiary Indebtedness:		
Transwestern Senior Notes	400	400
Panhandle Senior Notes	235	235
Bakken Senior Notes	2,500	2,500
Sunoco LP Senior Notes and lease-related obligations	2,711	3,139
USAC Senior Notes	1,475	1,475
HFOTCO Tax Exempt Notes	225	225
Revolving credit facilities:		
Sunoco LP Credit Facility	381	—
USAC Credit Facility	503	474
Energy Transfer Canada Revolver due February 2024	65	57
Energy Transfer Canada Revolver Term Loan A due February 2024	261	261
Other long-term debt	3	3
Net unamortized premiums, discounts, and fair value adjustments	(10)	(10)
Deferred debt issuance costs	(269)	(279)
Total debt	47,735	51,438
Less: current maturities of long-term debt	23	21
Long-term debt, less current maturities	$ 47,712	$ 51,417

[1] The balances presented above include senior notes that were formerly obligations of ETO prior to the Rollup Mergers discussed below and in "Recent Developments" above. As of March 31, 2021 and December 31, 2020, the outstanding principal amount of ETO senior notes was $36.4 billion and $37.8 billion, respectively. Beginning April 1, 2021, these senior notes are obligations of ET. A description of the ETO senior notes that were assumed by ET is included in the Partnership's Annual Report on Form 10-K for the year ended December 31, 2020.

[2] The Term Loan and Five-Year Credit Facility were previously obligations of ETO. Subsequent to the completion of the Rollup Mergers on April 1, 2021, these facilities are obligations of ET.

Recent Transactions

In connection with the Rollup Mergers on April 1, 2021, ET entered into various supplemental indentures and assumed all the obligations of ETO under the respective indentures and credit agreements.

During the first quarter of 2021, ETO redeemed its $600 million of 4.40% senior notes due April 1, 2021 and its $800 million of 4.65% senior notes due June 1, 2021, using proceeds from the Five-Year Credit Facility.

Credit Facilities and Commercial Paper

Term Loan

As a result of the Rollup Mergers, on April 1, 2021, ET assumed all of ETO's obligations in respect of its term loan credit agreement (the "Term Loan") and Sunoco Logistics Operations was released as a guarantor in respect of the Term Loan. The Partnership's Term Loan provides for a $2.00 billion three-year term loan credit facility. Borrowings under the Term Loan mature on October 17, 2022 and are available for working capital purposes and for general partnership purposes. As of March 31, 2021, the Term Loan had $2.00 billion outstanding and was fully drawn. The weighted average interest rate on the total amount outstanding as of March 31, 2021 was 1.11%.

Five-Year Credit Facility

As a result of the Rollup Mergers, on April 1, 2021, ET assumed all of ETO's obligations in respect of its revolving credit facility (the "Five-Year Credit Facility") and Sunoco Logistics Operations was released as a guarantor in respect of the Five-Year Credit Facility.The Partnership's Five-Year Credit Facility allows for unsecured borrowings up to $5.00 billion and matures on December 1, 2023. The Five-Year Credit Facility contains an accordion feature, under which the total aggregate commitment may be increased up to $6.00 billion under certain conditions.

As of March 31, 2021, the Five-Year Credit Facility had $800 million of outstanding borrowings, all of which consisted of commercial paper. The amount available for future borrowings was $4.08 billion, after accounting for outstanding letters of credit in the amount of $121 million. The weighted average interest rate on the total amount outstanding as of March 31, 2021 was 0.45%.

364-Day Facility

As a result of the Rollup Mergers, on April 1, 2021, ET assumed all of ETO's obligations in respect of its 364-day revolving credit facility (the "364-Day Facility") and Sunoco Logistics Operations was released as a guarantor in respect of the 364-Day Facility.The Partnership's 364-Day Facility allows for unsecured borrowings up to $1.00 billion and matures on November 26, 2021. As of March 31, 2021, the 364-Day Facility had no outstanding borrowings.

Sunoco LP Credit Facility

As of March 31, 2021, the Sunoco LP Credit Facility had $381 million of outstanding borrowings and $8 million in standby letters of credit and matures in July 2023. The amount available for future borrowings at March 31, 2021 was $1.1 billion. The weighted average interest rate on the total amount outstanding as of March 31, 2021 was 1.86%.

USAC Credit Facility

As of March 31, 2021, USAC had $503 million of outstanding borrowings and no outstanding letters of credit under the credit agreement. As of March 31, 2021, USAC had $1.10 billion of availability under its credit facility. The weighted average interest rate on the total amount outstanding as of March 31, 2021 as 3.20%.

Energy Transfer Canada Credit Facilities

Energy Transfer Canada is party to a credit agreement providing for a C$350 million (US$278 million at the March 31, 2021 exchange rate) senior secured term loan facility, a C$525 million (US$417 million at the March 31, 2021 exchange rate) senior secured revolving credit facility, and a C$300 million (US$239 million at the March 31, 2021 exchange rate) senior secured construction loan facility (the "KAPS Facility"). The term loan facility and the revolving credit facility mature on February 25, 2024. The KAPS Facility matures on June 13, 2024. Energy Transfer Canada may incur additional term loans and revolving commitments in an aggregate amount not to exceed C$250 million (US$199 million at the March 31, 2021 exchange rate), subject to receiving commitments for such additional term loans or revolving commitments from either new lenders or increased commitments from existing lenders.

Compliance with our Covenants

We and our subsidiaries were in compliance with all requirements, tests, limitations, and covenants related to our debt agreements as of March 31, 2021.

CASH DISTRIBUTIONS

Cash Distributions Paid by ET

Under its partnership agreement, ET will distribute all of its Available Cash, as defined in the partnership agreement, within 50 days following the end of each fiscal quarter. Available Cash generally means, with respect to any quarter, all cash on hand at the end of such quarter less the amount of cash reserves that are necessary or appropriate in the reasonable discretion of our general partner that is necessary or appropriate to provide for future cash requirements.

Cash Distributions on ET Common Units

Distributions declared and/or paid with respect to ET common units subsequent to December 31, 2020 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2020	February 8, 2021	February 19, 2021	$ 0.1525
March 31, 2021	May 11, 2021	May 19, 2021	0.1525

Cash Distributions on ET Preferred Units

As discussed in "Recent Developments" above, in connection with the Rollup Mergers, ETO's outstanding preferred units were converted into ET Preferred Units.

Distributions declared on the ET Preferred Units were as follows:

Period Ended	Record Date	Payment Date	Series A [1]	Series B [1]	Series C	Series D	Series E	Series F [1]	Series G [1]
December 31, 2020 [2]	February 1, 2021	February 16, 2021	$ 31.25	$ 33.125	$ 0.4609	$ 0.4766	$ 0.4750	$ —	$ —
March 31, 2021	May 3, 2021	May 17, 2021	—	—	0.4609	0.4766	0.4750	33.75	35.63

[1] Series A, Series B, Series F and Series G distributions are paid on a semi-annual basis.

[2] Distributions for the period ended December 31, 2020 reflect distributions paid on the ETO preferred units prior to the conversion to ET preferred units, as discussed above.

A summary of the distribution and redemption rights associated with the ET Preferred Units is included in Note 9 in "Item 1. Financial Statements."

Cash Distributions Paid by Subsidiaries

The Partnership's consolidated financial statements include Sunoco LP and USAC, both of which are publicly traded master limited partnerships, as well as other less-than-wholly-owned, consolidated joint ventures. The following sections describe cash distributions made by our publicly traded subsidiaries, Sunoco LP and USAC, both of which are required by their respective partnership agreements to distribute all cash on hand (less appropriate reserves determined by the boards of directors of their respective general partners) subsequent to the end of each quarter.

Cash Distributions Paid by Sunoco LP

Distributions on Sunoco LP's units declared and/or paid by Sunoco LP subsequent to December 31, 2020 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2020	February 8, 2021	February 19, 2021	$ 0.8255
March 31, 2021	May 11, 2021	May 19, 2021	0.8255

Cash Distributions Paid by USAC

Distributions on USAC's units declared and/or paid by USAC subsequent to December 31, 2020 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2020	January 25, 2021	February 5, 2021	$ 0.5250
March 31, 2021	April 26, 2021	May 7, 2021	0.5250

ESTIMATES AND CRITICAL ACCOUNTING POLICIES

The selection and application of accounting policies is an important process that has developed as our business activities have evolved and as the accounting rules have developed. Accounting rules generally do not involve a selection among alternatives, but involve an implementation and interpretation of existing rules, and the use of judgment applied to the specific set of circumstances existing in our business. We make every effort to properly comply with all applicable rules, and we believe the proper implementation and consistent application of the accounting rules are critical. We describe our significant accounting policies in Note 2 to our consolidated financial statements in the Partnership's Annual Report on Form 10-K filed with the SEC on February 19, 2021.

RECENT ACCOUNTING PRONOUNCEMENTS

Currently, there are no accounting pronouncements that have been issued, but not yet adopted, that are expected to have a material impact on the Partnership's financial position or results of operations.

FORWARD-LOOKING STATEMENTS

This quarterly report contains various forward-looking statements and information that are based on our beliefs and those of our General Partner, as well as assumptions made by and information currently available to us. These forward-looking statements are identified as any statement that does not relate strictly to historical or current facts. When used in this quarterly report, words such as "anticipate," "project," "expect," "plan," "goal," "forecast," "estimate," "intend," "could," "believe," "may," "will" and similar expressions and statements regarding our plans and objectives for future operations, are intended to identify forward-looking statements. Although we and our General Partner believe that the expectations on which such forward-looking statements are based are reasonable, neither we nor our General Partner can give assurances that such expectations will prove to be correct. Forward-looking statements are subject to a variety of risks, uncertainties and assumptions. If one or more of these risks or uncertainties materialize, or if underlying assumptions prove incorrect, our actual results may vary materially from those anticipated, estimated, projected or expected. Among the key risk factors that may have a direct bearing on our results of operations and financial condition are:

- the volumes transported on our pipelines and gathering systems;
- the level of throughput in our processing and treating facilities;
- the fees we charge and the margins they realize for their gathering, treating, processing, storage and transportation services;
- the prices and market demand for, and the relationship between, natural gas and NGLs;
- energy prices generally;
- impacts of world health events, including the COVID-19 pandemic;
- the prices of natural gas and NGLs compared to the price of alternative and competing fuels;
- the general level of petroleum product demand and the availability and price of NGL supplies;
- the level of domestic oil, natural gas, and NGL production;
- the availability of imported oil, natural gas and NGLs;
- actions taken by foreign oil and gas producing nations;
- the political and economic stability of petroleum producing nations;
- the effect of weather conditions on demand for oil, natural gas and NGLs;
- availability of local, intrastate and interstate transportation systems;
- the continued ability to find and contract for new sources of natural gas supply;
- availability and marketing of competitive fuels;
- the impact of energy conservation efforts;
- energy efficiencies and technological trends;
- governmental regulation and taxation;
- changes to, and the application of, regulation of tariff rates and operational requirements related to our interstate and intrastate pipelines;
- hazards or operating risks incidental to the gathering, treating, processing and transporting of natural gas and NGLs;
- competition from other midstream companies and interstate pipeline companies;
- loss of key personnel;
- loss of key natural gas producers or the providers of fractionation services;
- reductions in the capacity or allocations of third-party pipelines that connect with our pipelines and facilities;
- the effectiveness of risk-management policies and procedures and the ability of our liquids marketing counterparties to satisfy their financial commitments;

- the nonpayment or nonperformance by our customers;
- regulatory, environmental, political and legal uncertainties that may affect the timing and cost of our internal growth projects, such as our construction of additional pipeline systems;
- risks associated with the construction of new pipelines and treating and processing facilities or additions to our existing pipelines and facilities, including difficulties in obtaining permits and rights-of-way or other regulatory approvals and the performance by third-party contractors;
- the availability and cost of capital and our ability to access certain capital sources;
- a deterioration of the credit and capital markets;
- risks associated with the assets and operations of entities in which we own less than a controlling interests, including risks related to management actions at such entities that we may not be able to control or exert influence;
- the ability to successfully identify and consummate strategic acquisitions at purchase prices that are accretive to our financial results and to successfully integrate acquired businesses;
- changes in laws and regulations to which we are subject, including tax, environmental, transportation and employment regulations or new interpretations by regulatory agencies concerning such laws and regulations;
- the costs and effects of legal and administrative proceedings; and
- the risks associated with a potential failure to successfully combine our business with that of Enable.

You should not put undue reliance on any forward-looking statements. When considering forward-looking statements, please review the risks described under “Part I - Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2020. Any forward-looking statement made by us in this Quarterly Report on Form 10-Q is based only on information currently available to us and speaks only as of the date on which it is made. We undertake no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information contained in Item 3 updates, and should be read in conjunction with, information set forth in Part II - Item 7A included in the Partnership’s Annual Report on Form 10-K for the year ended December 31, 2020 filed with the SEC on February 19, 2021, in addition to the accompanying notes and management’s discussion and analysis of financial condition and results of operations presented in Items 1 and 2 of this Quarterly Report on Form 10-Q. Our quantitative and qualitative disclosures about market risk are consistent with those discussed in our Annual Report on Form 10-K for the year ended December 31, 2020. Since December 31, 2020, there have been no material changes to our primary market risk exposures or how those exposures are managed.

Commodity Price Risk

The table below summarizes our commodity-related financial derivative instruments and fair values, including derivatives related to our consolidated subsidiaries, as well as the effect of an assumed hypothetical 10% change in the underlying price of the commodity. Dollar amounts are presented in millions.

	March 31, 2021			December 31, 2020		
	Notional Volume	Fair Value Asset (Liability)	Effect of Hypothetical 10% Change	Notional Volume	Fair Value Asset (Liability)	Effect of Hypothetical 10% Change
Mark-to-Market Derivatives						
(Trading)						
Natural Gas (BBtu):						
Basis Swaps IFERC/NYMEX [1]	21,125	$ —	$ 1	(44,225)	$ 2	$ 5
Fixed Swaps/Futures	1,493	—	—	1,603	—	—
Power (Megawatt):						
Forwards	408,800	5	—	1,392,400	4	—
Futures	(32,918)	(1)	—	18,706	(1)	—
Options – Puts	174,398	—	—	519,071	—	—
Options – Calls	(202,034)	—	—	2,343,293	1	—
(Non-Trading)						
Natural Gas (BBtu):						
Basis Swaps IFERC/NYMEX	(25,610)	4	—	(29,173)	—	1
Swing Swaps IFERC	(13,573)	1	1	11,208	(2)	—
Fixed Swaps/Futures	(18,425)	1	6	(53,575)	6	31
Forward Physical Contracts	(15,338)	4	5	(11,861)	4	5
NGLs (MBbls) – Forwards/Swaps	(2,759)	(71)	29	(5,840)	(100)	39
Refined Products (MBbls) – Futures	(1,724)	—	21	(2,765)	(8)	3
Crude (MBbls) – Forwards/Swaps	(3,592)	5	16	—	—	—
Fair Value Hedging Derivatives						
(Non-Trading)						
Natural Gas (BBtu):						
Basis Swaps IFERC/NYMEX	(14,068)	—	1	(30,113)	(1)	—
Fixed Swaps/Futures	(14,068)	(6)	27	(30,113)	(6)	8

[1] Includes aggregate amounts for open positions related to Houston Ship Channel, Waha Hub, NGPL TexOk, West Louisiana Zone and Henry Hub locations.

The fair values of the commodity-related financial positions have been determined using independent third-party prices, readily available market information and appropriate valuation techniques. Non-trading positions offset physical exposures to the cash market; none of these offsetting physical exposures are included in the above tables. Price-risk sensitivities were calculated by assuming a theoretical 10% change (increase or decrease) in price regardless of term or historical relationships between the contractual price of the instruments and the underlying commodity price. Results are presented in absolute terms and represent a potential gain or loss in net income or in other comprehensive income. In the event of an actual 10% change in prompt month natural gas prices, the fair value of our total derivative portfolio may not change by 10% due to factors such as when the financial instrument settles and the location to which the financial instrument is tied (i.e., basis swaps) and the relationship between prompt month and forward months.

Interest Rate Risk

As of March 31, 2021, we and our subsidiaries had $4.84 billion of floating rate debt outstanding. A hypothetical change of 100 basis points would result in a maximum potential change to interest expense of $48 million annually; however, our actual change in interest expense may be less in a given period due to interest rate floors included in our variable rate debt instruments. We manage a portion of our interest rate exposure by utilizing interest rate swaps, including forward-starting interest rate swaps to lock-in the rate on a portion of anticipated debt issuances.

The following table summarizes our interest rate swaps outstanding (dollars in millions), none of which are designated as hedges for accounting purposes:

Term	Type[1]	Notional Amount Outstanding	
		March 31, 2021	December 31, 2020
July 2021[2]	Forward-starting to pay a fixed rate of 3.55% and receive a floating rate	$ 400	$ 400
July 2022[2]	Forward-starting to pay a fixed rate of 3.80% and receive a floating rate	400	400

[1] Floating rates are based on 3-month LIBOR.

[2] Represents the effective date. These forward-starting swaps have terms of 30 years with a mandatory termination date the same as the effective date.

A hypothetical change of 100 basis points in interest rates for these interest rate swaps would result in a net change in the fair value of interest rate derivatives and earnings (recognized in gains and losses on interest rate derivatives) of $220 million as of March 31, 2021. For the forward-starting interest rate swaps, a hypothetical change of 100 basis points in interest rates would not affect cash flows until the swaps are settled.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that information required to be disclosed by us, including our consolidated entities, in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Under the supervision and with the participation of senior management, including the Co-Chief Executive Officers ("Co-Principal Executive Officer") and the Chief Financial Officer ("Principal Financial Officer") of our General Partner, we evaluated our disclosure controls and procedures, as such term is defined under Rule 13a–15(e) promulgated under the Exchange Act. Based on this evaluation, the Principal Executive Officers and the Principal Financial Officer of our General Partner concluded that our disclosure controls and procedures were effective as of March 31, 2021 to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to management, including the Principal Executive Officers and Principal Financial Officer of our General Partner, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as defined in Rule 13(a)-15(f) or Rule 15d-15(f) of the Exchange Act) during the three months ended March 31, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For information regarding legal proceedings, see our Annual Report on Form 10-K filed with the SEC on February 19, 2021 and Note 11 – Regulatory Matters, Commitments, Contingencies and Environmental Liabilities of the Notes to Consolidated Financial Statements of Energy Transfer LP and Subsidiaries included in this Quarterly Report on Form 10-Q for the quarter ended March 31, 2021.

Stoneman House

In late 2016, FERC Enforcement Staff began a non-public investigation of Rover's removal of the Stoneman House, an old structure, at a time when Rover's application was pending for permission to construct a new interstate natural gas pipeline and related facilities. On March 18, 2021, FERC issued an Order to Show Cause and Notice of Proposed Penalty (Docket No. IN19-4-000), ordering Rover to show cause why it should not be found to have violated Section 157.5 of the Commission's regulations and assessed civil penalties. Rover must file an answer responding to this Order by June 18, 2021. The Partnership disagrees with the findings and intends to vigorously defend against any proposed penalties. Given the stage of the proceedings, the Partnership is unable at this time to provide an assessment of the potential outcome or range of potential liability, if any.

Tuscarawas River

In mid-2017, FERC Enforcement Staff began a non-public investigation regarding allegations that diesel fuel may have been included in the drilling mud at the Tuscarawas River horizontal directional drilling ("HDD") operations. Rover and the Partnership are cooperating with the investigation. Enforcement Staff has provided Rover with a notice pursuant to Section 1b.19 of the FERC's regulations that Enforcement Staff intends to recommend that the FERC pursue an enforcement action against Rover and the Partnership. The Partnership disagrees with Enforcement Staff's findings and intends to vigorously defend against any potential penalty. Given the stage of the proceedings, and the non-public nature of the investigation, the Partnership is unable at this time to provide an assessment of the potential outcome or range of potential liability, if any.

Revolution

On September 10, 2018, a pipeline release and fire (the "Incident") occurred on the Revolution pipeline, a natural gas gathering line located in Center Township, Beaver County, Pennsylvania. There were no injuries. On February 8, 2019, the Pennsylvania Department of Environmental Protection ("PADEP") issued a Permit Hold on any requests for approvals/permits or permit amendments for any project in Pennsylvania pursuant to the state's water laws. The Partnership filed an appeal of the Permit Hold with the Pennsylvania Environmental Hearing Board. On January 3, 2020, the Partnership entered into a Consent Order and Agreement with the PADEP in which, among other things, the Permit Hold was lifted, the Partnership agreed to pay a $28.6 million civil penalty and fund a $2 million community environmental project, and all related appeals were withdrawn. On November 11, 2020, the PADEP issued an Order, which requires additional approvals and work prior to placing the Revolution Pipeline back in service. The Partnership filed an appeal of this Order with the Environmental Hearing Board on December 8, 2020. On February 26, 2021, the Partnership entered into a Consent Order and Agreement with the PADEP in which, among other things, the Partnership was allowed to place the Revolution pipeline back in service, the Partnership agreed to pay a $125,000 penalty, and all related appeals were withdrawn.

The Pennsylvania Office of Attorney General has commenced an investigation regarding the Incident, and the United States Attorney for the Western District of Pennsylvania has issued a federal grand jury subpoena for documents relevant to the Incident. The scope of these investigations is not further known at this time.

Other

Additionally, we have received notices of violations and potential fines under various federal, state and local provisions relating to the discharge of materials into the environment or protection of the environment. While we believe that even if any one or more of the environmental proceedings listed below were decided against us, it would not be material to our financial position, results of operations or cash flows, we are required to report governmental proceedings if we reasonably believe that such proceedings will result in monetary sanctions in excess of $300,000.

Pursuant to the instructions to Form 10-Q, matters disclosed in this Part II - Item 1 include any reportable legal proceeding (i) that has been terminated during the period covered by this report, (ii) that became a reportable event during the period covered by this report, or (iii) for which there has been a material development during the period covered by this report.

For a description of other legal proceedings, see Note 11 to our consolidated financial statements included in "Item 1. Financial Statements."

ITEM 1A. RISK FACTORS

There have been no material changes from the risk factors described in Part I, Item 1A in the Partnership's Annual Report on Form10-K for the year ended December 31, 2020 filed with the SEC on February 19, 2021.

ITEM 6. EXHIBITS

The exhibits listed below are filed or furnished, as indicated, as part of this report:

Exhibit Number	Description
2.1	Agreement and Plan of Merger, dated as of February 16, 2021, by and among Energy Transfer LP, Elk Merger Sub LLC, Elk GP Merger Sub LLC, Enable Midstream Partners, LP, Enable GP, LLC, solely for purposes of Section 2.1(a)(i) therein, LE GP, LLC, and, solely for purposes of Section 1.1(b)(i), CenterPoint Energy, Inc. (incorporated by reference to Exhibit 2.1 of Form 8-K (File No. 1-32740) filed February 16, 2021)
2.2	Agreement and Plan of Merger, dated as of March 5, 2021, by and among Energy Transfer LP, ETO Merger Sub LLC and Energy Transfer Operating, L.P. (incorporated by reference to Exhibit 2.1 of Form 8-K (File No. 1-32740) filed March 5, 2021)
2.3	Agreement and Plan of Merger, dated as of April 1, 2021, by and among Energy Transfer Operating, L.P., Sunoco Logistics Partners Operations L.P. and Sunoco Logistics Partners GP LLC. (incorporated by reference to Exhibit 2.1 of Form 8-K (File No. 1-32740) filed April 1, 2021)

By: /s/ A. Troy Sturrock
A. Troy Sturrock
Senior Vice President, Controller and Principal Accounting Officer (duly authorized to sign on behalf of the registrant)

Exhibit 22.1

Subsidiary guarantors and issuers of guaranteed securities and affiliates whose securities collateralize securities of the registrant

Sunoco LP Senior Notes [(1)]:
Parent guarantor - Energy Transfer LP
Subsidiary issuer - Sunoco LP

(1) Energy Transfer LP assumed the guarantee of certain Sunoco LP Senior Notes in connection with the merger of Energy Transfer Operating, L.P. with and into Energy Transfer LP effective April 1, 2021.

Exhibit 31.1

CERTIFICATION OF CO-CHIEF EXECUTIVE OFFICER
PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Marshall S. McCrea, III, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Energy Transfer LP;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

ENERGY TRANSFER LP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Tabular dollar and unit amounts, except per unit data, are in millions)
(unaudited)

1. ORGANIZATION AND BASIS OF PRESENTATION

Organization

The consolidated financial statements presented herein contain the results of Energy Transfer LP and its subsidiaries (the "Partnership," "we," "us," "our" or "ET"). References to the "Parent Company" mean Energy Transfer LP on a stand-alone basis.

In December 2019, we completed the acquisition of SemGroup. In connection with the transaction, a wholly owned subsidiary of ET merged with and into SemGroup, with SemGroup surviving the merger. During the first quarter of 2020, ET contributed certain former SemGroup subsidiaries to ETO through sale and contribution transactions (together, the "SemGroup Transaction").

Substantially all of the Partnership's cash flows are derived from distributions related to its investment in ETO, whose cash flows are derived from its subsidiaries, including ETO's investments in Sunoco LP and USAC. The Parent Company's primary cash requirements are for general and administrative expenses, debt service requirements and distributions to its partners. Parent Company-only assets are not available to satisfy the debts and other obligations of ET's subsidiaries.

Our financial statements reflect the following reportable segments:

- intrastate transportation and storage;
- interstate transportation and storage;
- midstream;
- NGL and refined products transportation and services;
- crude oil transportation and services;
- investment in Sunoco LP;
- investment in USAC; and
- corporate and other, including the following:
  - activities of the Parent Company; and
  - certain operations and investments that are not separately reflected as reportable segments.

Basis of Presentation

The unaudited financial information included in this Form 10-Q has been prepared on the same basis as the audited consolidated financial statements included in the Partnership's Annual Report on Form 10-K for the year ended December 31, 2019, filed with the SEC on February 21, 2020. In the opinion of the Partnership's management, such financial information reflects all adjustments necessary for a fair presentation of the financial position and the results of operations for such interim periods in accordance with GAAP. All intercompany items and transactions have been eliminated in consolidation. Certain information and footnote disclosures normally included in annual consolidated financial statements prepared in accordance with GAAP have been omitted pursuant to the rules and regulations of the SEC.

The consolidated financial statements of ET presented herein include the results of operations of:

- the Parent Company;
- our controlled subsidiary, ETO;
- ETP GP, the general partner of ETO, and Energy Transfer Partners, L.L.C. ("ETP LLC"), the general partner of ETP GP; and
- our subsidiary, SemCAMS.

Our subsidiaries also own varying undivided interests in certain pipelines. Ownership of these pipelines has been structured as an ownership of an undivided interest in assets, not as an ownership interest in a partnership, limited liability company,

joint venture or other forms of entities. Each owner controls marketing and invoices separately, and each owner is responsible for any loss, damage or injury that may occur to their own customers. As a result, we apply proportionate consolidation for our interests in these entities.

Certain prior period amounts have also been reclassified to conform to the current period presentation. These reclassifications had no impact on net income or total equity.

Change in Accounting Policy

Effective January 1, 2020, the Partnership elected to change its accounting policy related to certain barrels of crude oil that were previously accounted for as inventory. Under the revised accounting policy, certain amounts of crude oil that are not available for sale have been reclassified from inventory to non-current assets. These crude oil barrels, which are owned by the Partnership's crude oil acquisition and marketing business, include pipeline linefill and tank bottoms and are not considered to be available for sale because the volumes must be maintained in order to continue normal operation of the related pipelines or tanks and because there is no expectation of liquidation or sale of these volumes in the near term.

Under the previous accounting policy, all crude oil barrels were recorded as inventory under the weighted-average cost method. Under the revised accounting policy, barrels related to pipeline linefill and tank bottoms are accounted for as long-lived assets and reflected as non-current assets on the consolidated balance sheet. These crude oil barrels will be tested for impairment consistent with the Partnership's existing accounting policy for impairments of long-lived assets. The Partnership's management believes that the change in accounting policy is preferable as it more closely aligns the accounting policies across the consolidated entity, given that similar assets in the Partnership's natural gas, NGLs and refined products businesses are accounted for as non-current assets. In addition, management believes that reflecting these crude oil barrels as non-current assets better represents the economic results of the Partnership's crude oil acquisition and marketing business by reducing volatility resulting from market price adjustments to crude oil barrels that are not expected to be sold or liquidated in the near term.

The impact of this accounting policy change on the Partnership's net income for three months ended March 31, 2020, was approximately $265 million, or $0.10 per limited partner unit. As a result of this change in accounting policy, the Partnership's consolidated balance sheets for prior periods have been retrospectively adjusted as follows:

	December 31, 2019			December 31, 2018		
	As Originally Reported	Effect of Change	As Adjusted	As Originally Reported	Effect of Change	As Adjusted
Inventories	$ 1,935	$ (403)	$ 1,532	$ 1,677	$ (305)	$ 1,372
Total current assets	7,867	(403)	7,464	6,750	(305)	6,445
Other non-current assets, net	1,075	496	1,571	1,006	472	1,478
Total assets	98,880	93	98,973	88,246	167	88,413
Total partners' capital	21,827	93	21,920	20,559	167	20,726

In addition, the Partnership's consolidated statements of operations, comprehensive income and cash flows for prior periods have been retrospectively adjusted as follows:

	Year Ended December 31,		Three Months Ended March 31,
	2019	2018	2019
As originally reported:			
Consolidated Statements of Operations and Comprehensive Income			
Cost of products sold	$ 39,727	$ 41,658	$ 9,415

Consolidated Statements of Cash Flows			
Net income	4,825	3,420	1,118
Net change in operating assets and liabilities	(444)	234	(279)

Use of Estimates

The unaudited consolidated financial statements have been prepared in conformity with GAAP, which includes the use of estimates and assumptions made by management that affect the reported amounts of assets, liabilities, revenues, expenses

and disclosure of contingent assets and liabilities that exist at the date of the consolidated financial statements. Although these estimates are based on management's available knowledge of current and expected future events, actual results could be different from those estimates.

Recent Accounting Pronouncements

Effective January 1, 2020, the Partnership adopted Accounting Standards Update ("ASU") 2016-13 "Financial Instruments - Credit Losses (Topic 326) Measurement of Credit Losses on Financial Instruments." ASU 2016-13 requires an entity to utilize a new impairment model known as the current expected credit loss ("CECL") model to estimate its lifetime "expected credit loss" and record an allowance that, when deducted from the amortized cost basis of the financial asset, presents the net amount expected to be collected on the financial asset. The CECL model is expected to result in more timely recognition of credit losses. The impact of adoption was immaterial to the Partnership. However, due in large part to the global economic impacts of COVID-19, the Partnership and its subsidiaries recorded an aggregate $16 million of current expected credit losses for the three months ended March 31, 2020.

Goodwill

During the first quarter of 2020, due to the impacts of the COVID-19 pandemic, the decline in commodity prices and the decreases in the Partnership's market capitalization, we determined that interim impairment testing should be performed on certain reporting units. We performed the interim impairment tests consistent with our approach for annual impairment testing, including using similar models, inputs and assumptions. As a result of the interim impairment test, the Partnership recognized a goodwill impairment of $483 million related to our Arklatex and South Texas operations within the midstream segment, a goodwill impairment of $183 million related to our Lake Charles LNG regasification operations within the interstate transportation and storage segment due to a contractual reduction in payments for the remainder of the contract term, and a goodwill impairment of $40 million related to our all other operations primarily due to decreases in projected future revenues and cash flows as a result of the overall market demand decline. In addition, USAC recognized a goodwill impairment of $619 million during the three months ended March 31, 2020, which is included in the Partnership's consolidated results of operations. No other impairments of the Partnership's goodwill were identified.

In connection with aforementioned impairments, the Partnership determined the fair value of our reporting units using the income approach. The income approach is based on the present value of future cash flows, which are derived from our long-term financial forecasts, and requires significant assumptions including, among others, revenue growth rates, operating margins, weighted average costs of capital and future market conditions, among others. The Partnership believes the estimates and assumptions used in our impairment assessments are reasonable and based on available market information, but variations in any of the assumptions could result in materially different calculations of fair value and determinations of whether or not an impairment is indicated. Cash flow projections are derived from one-year budgeted amounts and three-year operating forecasts plus an estimate of later period cash flows, all of which are evaluated by management. Subsequent period cash flows are developed for each reporting unit using growth rates that management believes are reasonably likely to occur.

Of the $3.84 billion of goodwill on the Partnership's consolidated balance sheet as of March 31, 2020, approximately $1.2 billion is recorded in reporting units for which the estimated fair value exceeded the carrying value by less than 20% in the most recent quantitative test. Management believes that all of the $1.2 billion is at significant risk of impairment, if commodity prices and/or overall market demand remains low. In addition, as of March 31, 2020, the Partnership's goodwill balance includes approximately $265 million of goodwill related to the SemGroup assets that were acquired in December 2019; these goodwill balances are subject to change as the purchase price allocation has not been finalized. Any future adjustments to the SemGroup-related goodwill balances could also increase the likelihood of a future goodwill impairment.

Changes in the carrying amount of goodwill were as follows:

	Intrastate Transportation and Storage	Interstate Transportation and Storage	Midstream	NGL and Refined Products Transportation and Services	Crude Oil Transportation and Services	Investment in Sunoco LP	Investment in USAC	All Other	Total
Balance, December 31, 2019	$ 10	$ 226	$ 483	$ 693	$ 1,397	$ 1,555	$ 619	$ 184	$ 5,167
Impaired	—	(183)	(483)	—	—	—	(619)	(40)	(1,325)
Other	—	—	—	—	—	—	—	(7)	(7)
Balance, March 31, 2020	$ 10	$ 43	$ —	$ 693	$ 1,397	$ 1,555	$ —	$ 137	$ 3,835

2. CASH AND CASH EQUIVALENTS

Cash and cash equivalents include all cash on hand, demand deposits, and investments with original maturities of three months or less. We consider cash equivalents to include short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of changes in value. The Partnership's balance sheets did not include any material amounts of restricted cash as of March 31, 2020 or December 31, 2019.

We place our cash deposits and temporary cash investments with high credit quality financial institutions. At times, our cash and cash equivalents may be uninsured or in deposit accounts that exceed the Federal Deposit Insurance Corporation insurance limit.

The net change in operating assets and liabilities (net of effects of acquisitions) included in cash flows from operating activities is comprised as follows:

	Three Months Ended March 31,	
	2020	2019
Accounts receivable	$ 1,667	$ (302)
Accounts receivable from related companies	(20)	(38)
Inventories	281	135
Other current assets	110	99
Other non-current assets, net	(101)	(34)
Accounts payable	(1,704)	321
Accounts payable to related companies	(21)	(10)
Accrued and other current liabilities	(233)	(406)
Other non-current liabilities	25	(31)
Derivative assets and liabilities, net	160	(13)
Net change in operating assets and liabilities, net of effects of acquisitions	$ 164	$ (279)

Non-cash activities are as follows:

	Three Months Ended March 31,	
	2020	2019
NON-CASH INVESTING AND FINANCING ACTIVITIES:		
Accrued capital expenditures	$ 1,015	$ 630
Accrued distributions to partners	822	—
Lease assets obtained in exchange for new lease liabilities	17	8

3. INVENTORIES

As further discussed in Note 1, the Partnership elected to change its accounting policy related to certain barrels of crude oil that were previously accounted for as inventory. As a result of this change in accounting policy, the Partnership's inventory balance for the prior period has been retrospectively adjusted. Inventories consisted of the following:

	March 31, 2020	December 31, 2019
Natural gas, NGLs and refined products	$ 463	$ 833
Crude oil	105	251
Spare parts and other	456	448
Total inventories	$ 1,024	$ 1,532

We utilize commodity derivatives to manage price volatility associated with its natural gas inventories. Changes in fair value of designated hedged inventory are recorded in inventory on our consolidated balance sheets and cost of products sold in our consolidated statements of operations.

4. FAIR VALUE MEASURES

Based on the estimated borrowing rates currently available to us and our subsidiaries for loans with similar terms and average maturities, the aggregate fair value and carrying amount of our consolidated debt obligations as of March 31, 2020 were $43.92 billion and $50.33 billion, respectively. As of December 31, 2019, the aggregate fair value and carrying amount of our consolidated debt obligations were $54.79 billion and $51.05 billion, respectively. The fair value of our consolidated debt obligations is a Level 2 valuation based on the respective debt obligations' observable inputs used for similar liabilities.

We have commodity derivatives and interest rate derivatives that are accounted for as assets and liabilities at fair value in our consolidated balance sheets. We determine the fair value of our assets and liabilities subject to fair value measurement by using the highest possible "level" of inputs. Level 1 inputs are observable quotes in an active market for identical assets and liabilities. We consider the valuation of marketable securities and commodity derivatives transacted through a clearing broker with a published price from the appropriate exchange as a Level 1 valuation. Level 2 inputs are inputs observable for similar assets and liabilities. We consider OTC commodity derivatives entered into directly with third parties as a Level 2 valuation since the values of these derivatives are quoted on an exchange for similar transactions. Additionally, we consider our options transacted through our clearing broker as having Level 2 inputs due to the level of activity of these contracts on the exchange in which they trade. We consider the valuation of our interest rate derivatives as Level 2 as the primary input, the LIBOR curve, is based on quotes from an active exchange of Eurodollar futures for the same period as the future interest swap settlements. Level 3 inputs are unobservable. During the three months ended March 31, 2020, no transfers were made between any levels within the fair value hierarchy.

The following tables summarize the gross fair value of our financial assets and liabilities measured and recorded at fair value on a recurring basis as of March 31, 2020 and December 31, 2019 based on inputs used to derive their fair values:

		Fair Value Measurements at March 31, 2020

5. NET INCOME (LOSS) PER LIMITED PARTNER UNIT

A reconciliation of income and weighted average units used in computing basic and diluted income (loss) per unit is as follows:

	Three Months Ended March 31,	
	2020	2019
Net income (loss)	$ (964)	$ 1,118
Less: Net income attributable to noncontrolling interests	(121)	297
Less: Net income attributable to redeemable noncontrolling interests	12	13
Net income (loss), net of noncontrolling interests	(855)	808
Less: General Partner's interest in income (loss)	(1)	1
Income (loss) available to Limited Partners	$ (854)	$ 807
Basic Income (Loss) per Limited Partner Unit:		
Weighted average limited partner units	2,691.7	2,619.5
Basic income (loss) per Limited Partner unit	$ (0.32)	$ 0.31
Diluted Income (Loss) per Limited Partner Unit:		
Income (loss) available to Limited Partners	$ (854)	$ 807
Dilutive effect of equity-based compensation of subsidiaries [1]	—	—
Diluted income (loss) available to Limited Partners	$ (854)	$ 807
Weighted average limited partner units	2,691.7	2,619.5
Dilutive effect of unvested unit awards [1]	—	8.4
Weighted average limited partner units, assuming dilutive effect of unvested unit awards	2,691.7	2,627.9
Diluted income (loss) from per Limited Partner unit	$ (0.32)	$ 0.31

[1] Dilutive effects are excluded from the calculation for periods where the impact would have been antidilutive.

6. DEBT OBLIGATIONS

Parent Company Indebtedness

ET Term Loan Facility

On January 15, 2019, ET paid in full all outstanding borrowings under its senior secured term loan agreement and thereafter terminated the term loan agreement. In connection with the termination of the term loan agreement, the collateral securing certain series of the Partnership's outstanding senior notes was released in accordance with the terms of the applicable indentures governing such senior notes.

Subsidiary Indebtedness

ETO January 2020 Senior Notes Offering and Redemption

On January 22, 2020, ETO completed a registered offering (the "January 2020 Senior Notes Offering") of $1.00 billion aggregate principal amount of the Partnership's 2.900% Senior Notes due 2025, $1.50 billion aggregate principal amount of the Partnership's 3.750% Senior Notes due 2030 and $2.00 billion aggregate principal amount of the Partnership's 5.000% Senior Notes due 2050 (collectively, the "Notes"). The Notes are fully and unconditionally guaranteed by the Partnership's wholly-owned subsidiary, Sunoco Logistics Operations, on a senior unsecured basis.

Using proceeds from the January 2020 Senior Notes Offering, ETO redeemed its $400 million aggregate principal amount of 5.75% Senior Notes due September 1, 2020, its $1.05 billion aggregate principal amount of 4.15% Senior Notes due October 1, 2020, its $1.14 billion aggregate principal amount of 7.50% Senior Notes due October 15, 2020, its $250 million aggregate principal amount of 5.50% Senior Notes due February 15, 2020, ET's $52 million aggregate principal amount of 7.50% Senior Notes due October 15, 2020 and Transwestern's $175 million aggregate principal amount of 5.36% Senior Notes due December 9, 2020.

HFOTCO Long-Term Debt

In connection with the contribution transactions discussed in Note 2, HFOTCO became a wholly-owned subsidiary of ETO. As of March 31, 2020, HFOTCO had $225 million outstanding of tax exempt notes due 2050 (the "IKE Bonds"). The IKE Bonds are fully and unconditionally guaranteed by the Partnership, on a senior unsecured basis. The indentures under which the IKE Bonds were issued are subject to customary representations and warranties and affirmative and negative covenants, the majority of which are substantially similar to those found in ETO's revolving credit facility, as further discussed below.

Credit Facilities and Commercial Paper

ETO Term Loan

ETO's term loan credit agreement provides for a $2 billion three-year term loan credit facility (the "ETO Term Loan"). Borrowings under the term loan agreement mature on October 17, 2022 and are available for working capital purposes and for general partnership purposes. The term loan agreement is unsecured and is guaranteed by our subsidiary, Sunoco Logistics Operations.

As of March 31, 2020, the ETO Term Loan had $2 billion outstanding and was fully drawn. The weighted average interest rate on the total amount outstanding as of March 31, 2020 was 1.92%.

ETO Five-Year Credit Facility

ETO's revolving credit facility (the "ETO Five-Year Credit Facility") allows for unsecured borrowings up to $5.00 billion and matures on December 1, 2023. The ETO Five-Year Credit Facility contains an accordion feature, under which the total aggregate commitment may be increased up to $6.00 billion under certain conditions.

As of March 31, 2020, the ETO Five-Year Credit Facility had $1.96 billion of outstanding borrowings, $113 million of which was commercial paper. The amount available for future borrowings was $2.97 billion after taking into account letters of credit of $72 million. The weighted average interest rate on the total amount outstanding as of March 31, 2020 was 2.24%.

ETO 364-Day Facility

ETO's 364-day revolving credit facility (the "ETO 364-Day Facility") allows for unsecured borrowings up to $1.00 billion and matures on November 27, 2020. As of March 31, 2020, the ETO 364-Day Facility had no outstanding borrowings.

Sunoco LP Credit Facility

Sunoco LP maintains a $1.50 billion revolving credit facility (the "Sunoco LP Credit Facility"), which matures in July 2023. As of March 31, 2020, the Sunoco LP Credit Facility had $265 million of outstanding borrowings and $8 million in standby letters of credit. As of March 31, 2020, Sunoco LP had $1.23 billion of availability under the Sunoco LP Credit Facility. The weighted average interest rate on the total amount outstanding as of March 31, 2020 was 2.63%.

USAC Credit Facility

USAC maintains a $1.60 billion revolving credit facility (the "USAC Credit Facility"), with a further potential increase of $400 million, which matures in April 2023. As of March 31, 2020, the USAC Credit Facility had $459 million of outstanding borrowings and no outstanding letters of credit. As of March 31, 2020, USAC had $1.14 billion of borrowing base availability and, subject to compliance with the applicable financial covenants, available borrowing capacity of $186 million under the USAC Credit Facility. The weighted average interest rate on the total amount outstanding as of March 31, 2020 was 3.67%.

Compliance with Our Covenants

We and our subsidiaries were in compliance with all requirements, tests, limitations, and covenants related to our debt agreements as of March 31, 2020.

7. REDEEMABLE NONCONTROLLING INTERESTS

Certain redeemable noncontrolling interests in the Partnership's subsidiaries are reflected as mezzanine equity on the consolidated balance sheet. Redeemable noncontrolling interests as of March 31, 2020 included a balance of $477 million related to the USAC Preferred Units described below and a balance of $15 million related to noncontrolling interest holders in one of the Partnership's consolidated subsidiaries that have the option to sell their interests to the Partnership. In addition, redeemable noncontrolling interests includes a balance of $253 million in SemCAMS preferred shares acquired as part of the merger with SemGroup (see Note 1 above).

USAC Preferred Units

As of March 31, 2020, USAC had 500,000 USAC Preferred Units issued and outstanding, which are entitled to receive cumulative quarterly distributions equal to $24.375 per USAC Preferred Unit, subject to increase in certain limited circumstances. The USAC Preferred Units will have a perpetual term, unless converted or redeemed. Certain portions of the USAC Preferred Units will be convertible into USAC common units at the election of the holders beginning in 2021. To the extent the holders of the USAC Preferred Units have not elected to convert their preferred units by April 2, 2023, USAC will have the option to redeem all or any portion of the USAC Preferred Units for cash. In addition, at any time on or after the tenth anniversary of the issue date, the holders of the USAC Preferred Units will have the right to require USAC to redeem all or any portion of the USAC Preferred Units, and the Partnership may elect to pay up to 50% of such redemption amount in USAC common units.

SemCAMS Redeemable Preferred Stock

As of March 31, 2020, SemCAMS had 300,000 shares of cumulative preferred stock issued and outstanding. The preferred stock is redeemable at SemCAMS's option subsequent to January 3, 2021 at a redemption price of C$1,100 (US$775 at the March 31, 2020 exchange rate) per share. The preferred stock is redeemable by the holder contingent upon a change of control or liquidation of SemCAMS. The preferred stock is convertible to SemCAMS common shares in the event of an initial public offering by SemCAMS.

The preferred stock was recorded at fair value in connection with the SemGroup purchase accounting. Dividends on the preferred stock are payable in-kind through the quarter ending June 30, 2020. The dividends paid-in-kind increased the liquidation preference such that as of March 31, 2020, the preferred stock was convertible into 315,859 shares.

8. EQUITY

The change in ET Common Units during the three months ended March 31, 2020 was as follows:

	Three Months Ended March 31, 2020
Number of Common Units, beginning of period	2,689.6
Common Units issued in connection with the distribution reinvestment plan	4.1
Common Units vested under equity incentive plans and other	0.5
Number of Common Units, end of period	2,694.2

ET Equity Distribution Program

In March 2017, the Partnership entered into an equity distribution agreement relating to at-the-market offerings of its common units with an aggregate offering price up to $1 billion. As of March 31, 2020, there have been no sales of common units under the equity distribution agreement.

ET Repurchase Program

During the three months ended March 31, 2020, ET did not repurchase any ET common units under its current buyback program. As of March 31, 2020, $911 million remained available to repurchase under the current program.

ET Distribution Reinvestment Program

During the three months ended March 31, 2020, distributions of $53 million were reinvested under the distribution reinvestment program. As of March 31, 2020, a total of $25 million common units remain available to be issued under the existing registration statement in connection with the distribution reinvestment program.

Subsidiary Equity Transactions

ETO Preferred Units

As of March 31, 2020 and December 31, 2019, ETO's outstanding preferred units included 950,000 ETO Series A Preferred Units, 550,000 ETO Series B Preferred Units, 18,000,000 ETO Series C Preferred Units, 17,800,000 ETO Series D Preferred Units and 32,000,000 ETO Series E Preferred Units. As of March 31, 2020, ETO's outstanding preferred units also included 500,000 ETO Series F Preferred Units and 1,100,000 ETO Series G Preferred Units.

ETO Series F Preferred Units

On January 22, 2020, ETO issued 500,000 of its 6.750% Series F Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Units representing limited partner interest in ETO, at a price to the public of $1,000 per unit. Distributions on the ETO Series F Preferred Units are cumulative from and including the original issue date and will be payable semi-annually in arrears on the 15th day of May and November of each year, commencing on May 15, 2020 to, but excluding, May 15, 2025, at a rate equal to 6.750% per annum of the $1,000 liquidation preference. On and after May 15, 2025, the distribution rate on the ETO Series F Preferred Units will equal a percentage of the $1,000 liquidation preference equal to the five-year U.S. treasury rate plus a spread of 5.134% per annum. The ETO Series F Preferred Units are redeemable at ETO's option on or after May 15, 2025 at a redemption price of $1,000 per ETO Series F Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.

ETO Series G Preferred Units

On January 22, 2020, ETO issued 1,100,000 of its 7.125% Series G Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Units representing limited partner interest in ETO, at a price to the public of $1,000 per unit. Distributions on the ETO Series G Preferred Units are cumulative from and including the original issue date and will be payable semi-annually in arrears on the 15th day of May and November of each year, commencing on May 15, 2020 to, but excluding, May 15, 2030, at a rate equal to 7.125% per annum of the $1,000 liquidation preference. On and after May 15, 2030, the distribution rate on the ETO Series G Preferred Units will equal a percentage of the $1,000 liquidation preference equal to the five-year U.S. treasury rate plus a spread of 5.306% per annum. The ETO Series G Preferred Units are redeemable at ETO's option on or after May 15, 2030 at a redemption price of $1,000 per ETO Series G Preferred Unit, plus an amount equal to all accumulated and unpaid distributions thereon to, but excluding, the date of redemption.

Sunoco LP Equity Distribution Program

For the three months ended March 31, 2020, Sunoco LP issued no additional units under its at-the-market equity distribution program. As of March 31, 2020, $295 million of Sunoco LP common units remained available to be issued under the currently effective equity distribution agreement.

USAC Distribution Reinvestment Program

During the three months ended March 31, 2020, distributions of $0.3 million were reinvested under the USAC distribution reinvestment program resulting in the issuance of approximately 18,883 USAC common units.

Parent Company Cash Distributions

Distributions declared and/or paid subsequent to December 31, 2019 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2019	February 7, 2020	February 19, 2020	$ 0.3050
March 31, 2020	May 7, 2020	May 19, 2020	0.3050

ETO Cash Distributions

Distributions declared and/or paid by ETO to its preferred unitholders subsequent to December 31, 2019 were as follows:

Period Ended	Record Date	Payment Date	Series A [1]	Series B [1]	Series C	Series D	Series E	Series F [2]	Series G [2]
December 31, 2019	February 3, 2020	February 18, 2020	$ 31.25	$ 33.125	$ 0.4609	$ 0.4766	$ 0.4750	$ —	$ —
March 31, 2020	May 1, 2020	May 15, 2020	—	—	0.4609	0.4766	0.4750	21.19	22.36

[1] ETO Series A Preferred Unit and ETO Series B Preferred Unit distributions are paid on a semi-annual basis.

[2] ETO Series F and G Preferred Unit distributions related to the period ended March 31, 2020 represent a prorated initial distribution. Distributions are paid on a semi-annual basis.

Sunoco LP Cash Distributions

Distributions declared and/or paid by Sunoco LP subsequent to its common unitholders December 31, 2019 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2019	February 7, 2020	February 19, 2020	$ 0.8255
March 31, 2020	May 7, 2020	May 19, 2020	0.8255

USAC Cash Distributions

Distributions declared and/or paid by USAC to its common unitholders subsequent to December 31, 2019 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2019	January 27, 2020	February 7, 2020	$ 0.5250
March 31, 2020	April 27, 2020	May 8, 2020	0.5250

Accumulated Other Comprehensive Income (Loss)

The following table presents the components of AOCI, net of tax:

	March 31, 2020	December 31, 2019
Available-for-sale securities	$ 4	$ 13
Foreign currency translation adjustment	(62)	2
Actuarial loss related to pensions and other postretirement benefits	(22)	(25)
Investments in unconsolidated affiliates, net	(17)	(1)
Total AOCI, net of tax	$ (97)	$ (11)
Amounts attributable to noncontrolling interest	38	—
Total AOCI included in partners' capital, net of tax	$ (59)	$ (11)

9. INCOME TAXES

The Partnership's effective tax rate differs from the statutory rate primarily due to partnership earnings that are not subject to United States federal and most state income taxes at the partnership level.

10. REGULATORY MATTERS, COMMITMENTS, CONTINGENCIES AND ENVIRONMENTAL LIABILITIES

FERC Proceedings

By Order issued January 16, 2019, the FERC initiated a review of Panhandle's existing rates pursuant to Section 5 of the Natural Gas Act to determine whether the rates currently charged by Panhandle are just and reasonable and set the matter for hearing. On August 30, 2019, Panhandle filed a general rate proceeding under Section 4 of the Natural Gas Act. The Natural Gas Act Section 5 and Section 4 proceedings were consolidated by the Order dated October 1, 2019. A hearing in the combined proceedings is scheduled for August, 2020, with an initial decision expected in early 2021.

Commitments

In the normal course of business, ETO purchases, processes and sells natural gas pursuant to long-term contracts and enters into long-term transportation and storage agreements. Such contracts contain terms that are customary in the industry. ETO believes that the terms of these agreements are commercially reasonable and will not have a material adverse effect on its financial position or results of operations.

ETO's joint venture agreements require that they fund their proportionate share of capital contributions to their unconsolidated affiliates. Such contributions will depend upon their unconsolidated affiliates' capital requirements, such as for funding capital projects or repayment of long-term obligations.

We have certain non-cancelable rights-of-way (“ROW”) commitments, which require fixed payments and either expire upon our chosen abandonment or at various dates in the future. The table below reflects ROW expense included in operating expenses in the accompanying statements of operations:

	Three Months Ended March 31,	
	2020	2019
ROW expense	$ 10	$ 6

PES Refinery Fire and Bankruptcy

We own an approximately 7.4% non-operating interest in PES, which owns a refinery in Philadelphia. In addition, the Partnership provides logistics services to PES under commercial contracts and Sunoco LP has historically purchased refined products from PES. In June 2019, an explosion and fire occurred at the refinery complex.

On July 21, 2019, PES Holdings, LLC and seven of its subsidiaries (collectively, the "Debtors") filed voluntary petitions in the United States Bankruptcy Court for the District of Delaware seeking relief under the provisions of Chapter 11 of the United States Bankruptcy Code, as a result of the explosion and fire at the Philadelphia refinery complex. The Debtors have also defaulted on a $75 million note payable to a subsidiary of the Partnership. The Partnership has not recorded a valuation allowance related to the note receivable as of March 31, 2020, because management is not yet able to determine the collectability of the note in bankruptcy.

In addition, the Partnership’s subsidiaries retained certain environmental remediation liabilities when the refinery was sold to PES. As of March 31, 2020, the Partnership has funded these environmental remediation liabilities through its wholly-owned captive insurance company, based upon actuarially determined estimates for such costs, and these liabilities are included in the total environmental liabilities discussed below under “Environmental Remediation.” In the event that PES property is sold in connection with the bankruptcy proceeding, it may be necessary for the Partnership to record additional environmental remediation liabilities in the future depending upon the proposed use of such property by the buyer of the property; however, management is not currently able to estimate such additional liabilities.

PES has rejected certain of the Partnership’s commercial contracts pursuant to Section 365 of the Bankruptcy Code; however, the impact of the bankruptcy on the Partnership’s commercial contracts and related revenue loss (temporary or permanent) is unknown at this time. In addition, Sunoco LP has been successful at acquiring alternative supplies to replace fuel volume lost from PES and does not anticipate any material impact to its business going forward.

Litigation and Contingencies

We may, from time to time, be involved in litigation and claims arising out of our operations in the normal course of business. Natural gas and crude oil are flammable and combustible. Serious personal injury and significant property damage can arise in connection with their transportation, storage or use. In the ordinary course of business, we are sometimes threatened with or named as a defendant in various lawsuits seeking actual and punitive damages for product liability, personal injury and property damage. We maintain liability insurance with insurers in amounts and with coverage and deductibles management believes are reasonable and prudent, and which are generally accepted in the industry. However, there can be no assurance that the levels of insurance protection currently in effect will continue to be available at reasonable prices or that such levels will remain adequate to protect us from material expenses related to product liability, personal injury or property damage in the future.

Dakota Access Pipeline

On July 27, 2016, the Standing Rock Sioux Tribe (“SRST”) filed a lawsuit in the United States District Court for the District of Columbia challenging permits issued by the United States Army Corps of Engineers (“USACE”) permitting Dakota Access, LLC (“Dakota Access”) to cross the Missouri River at Lake Oahe in North Dakota. The case was subsequently amended to challenge an easement issued by the USACE allowing the pipeline to cross land owned by the USACE adjacent to the Missouri River. Dakota Access and the Cheyenne River Sioux Tribe (“CRST”) intervened. Separate lawsuits filed by the Oglala Sioux Tribe (“OST”) and the Yankton Sioux Tribe (“YST”) were consolidated with this action and several individual tribal members intervened (collectively with SRST and CRST, the “Tribes”). Plaintiffs and Defendants filed cross motions for summary judgment. On March 25, 2020, the Court remanded the case back to the USACE for preparation of an Environment Impact Statement. The Court has requested briefing on whether to suspend operation of the pipeline during the time the USACE conducts any additional environmental analysis. Briefing will conclude on May 27, 2020.

Energy Transfer cannot determine when or how these lawsuits will be resolved or the impact they may have on the Dakota Access project.

Mont Belvieu Incident

On June 26, 2016, a hydrocarbon storage well located on another operator's facility adjacent to Lone Star NGL Mont Belvieu's ("Lone Star") facilities in Mont Belvieu, Texas experienced an over-pressurization resulting in a subsurface release. The subsurface release caused a fire at Lone Star's South Terminal and damage to Lone Star's storage well operations at its South and North Terminals. Normal operations have resumed at the facilities with the exception of one of Lone Star's storage wells, however, Lone Star is still quantifying the extent of its incurred and ongoing damages and has obtained, and will continue to seek, reimbursement for these losses.

MTBE Litigation

ETC Sunoco Holdings LLC and Sunoco (R&M), LLC (collectively, "Sunoco") are defendants in lawsuits alleging MTBE contamination of groundwater. The plaintiffs, state-level governmental entities, assert product liability, nuisance, trespass, negligence, violation of environmental laws, and/or deceptive business practices claims. The plaintiffs seek to recover compensatory damages, and in some cases also seek natural resource damages, injunctive relief, punitive damages, and attorneys' fees.

As of March 31, 2020, Sunoco is a defendant in five cases, including one case each initiated by the States of Maryland and Rhode Island, one by the Commonwealth of Pennsylvania and two by the Commonwealth of Puerto Rico. The more recent Puerto Rico action is a companion case alleging damages for additional sites beyond those at issue in the initial Puerto Rico action. The actions brought by the State of Maryland and Commonwealth of Pennsylvania have also named as defendants ETO, ETP Holdco Corporation, and Sunoco Partners Marketing & Terminals L.P. ("SPMT").

It is reasonably possible that a loss may be realized in the remaining cases; however, we are unable to estimate the possible loss or range of loss in excess of amounts accrued. An adverse determination with respect to one or more of the MTBE cases could have a significant impact on results of operations during the period in which any such adverse determination occurs, but such an adverse determination likely would not have a material adverse effect on the Partnership's consolidated financial position.

Regency Merger Litigation

On June 10, 2015, Adrian Dieckman ("Dieckman"), a purported Regency unitholder, filed a class action complaint related to the Regency-ETO merger (the "Regency Merger") in the Court of Chancery of the State of Delaware (the "Regency Merger Litigation"), on behalf of Regency's common unitholders against Regency GP LP, Regency GP LLC, ET, ETO, ETP GP, and the members of Regency's board of directors.

The Regency Merger Litigation alleges that the Regency Merger breached the Regency partnership agreement. On March 29, 2016, the Delaware Court of Chancery granted the defendants' motion to dismiss the lawsuit in its entirety. Plaintiff appealed, and the Delaware Supreme Court reversed the judgment of the Court of Chancery. Plaintiff then filed an Amended Verified Class Action Complaint, which defendants moved to dismiss. The Court of Chancery granted in part and denied in part the motions to dismiss, dismissing the claims against all defendants other than Regency GP, LP and Regency GP LLC (the "Regency Defendants"). The Court of Chancery later granted Plaintiff's unopposed motion for class certification. Trial was held on December 10-16, 2019, and a post-trial hearing was held on May 6, 2020.

The Regency Defendants cannot predict the outcome of the Regency Merger Litigation or any lawsuits that might be filed subsequent to the date of this filing; nor can the Regency Defendants predict the amount of time and expense that will be required to resolve the Regency Merger Litigation. The Regency Defendants believe the Regency Merger Litigation is without merit and intend to vigorously defend against it.

Litigation Filed By or Against Williams

In April and May, 2016, the Williams Companies, Inc. ("Williams") filed two lawsuits (the "Williams Litigation") against ET, LE GP, and, in one of the lawsuits, Energy Transfer Corp LP, ETE Corp GP, LLC, and Energy Transfer Equity GP, LLC (collectively, "Defendants"), alleging that Defendants breached their obligations under the ET-Williams merger agreement (the "Merger Agreement"). In general, Williams alleges that Defendants breached the Merger Agreement by (a) failing to use commercially reasonable efforts to obtain from Latham & Watkins LLP ("Latham") the delivery of a tax opinion concerning Section 721 of the Internal Revenue Code ("721 Opinion"), (b) issuing the Partnership's Series A Convertible Preferred Units (the "Issuance"), and (c) making allegedly untrue representations and warranties in the Merger Agreement.

After a two-day trial on June 20 and 21, 2016, the Court ruled in favor of Defendants and issued a declaratory judgment that ET could terminate the merger after June 28, 2016 because of Latham's inability to provide the required 721 Opinion. The Court did not reach a decision regarding Williams' claims related to the Issuance nor the alleged untrue representations and warranties. On March 23, 2017, the Delaware Supreme Court affirmed the Court's ruling on the June 2016 trial.

In September 2016, the parties filed amended pleadings. Williams filed an amended complaint seeking a $410 million termination fee based on the alleged breaches of the Merger Agreement listed above. Defendants filed amended counterclaims and affirmative defenses, asserting that Williams materially breached the Merger Agreement by, among other things, (a) failing to use its reasonable best efforts to consummate the merger, (b) failing to provide material information to ET for inclusion in the Form S-4 related to the merger, (c) failing to facilitate the financing of the merger, and (d) breaching the Merger Agreement's forum-selection clause.

In March 2020, the Court held argument on Defendant's Motion for Summary Judgment and William's Motion for Partial Summary Judgment. Those motions remain pending before the Court. Trial is currently set for August 2020. Defendants cannot predict the outcome of the Williams Litigation or any lawsuits that might be filed subsequent to the date of this filing; nor can Defendants predict the amount of time and expense that will be required to resolve these lawsuits. Defendants believe that Williams' claims are without merit and intend to defend vigorously against them.

Rover

On November 3, 2017, the State of Ohio and the Ohio Environmental Protection Agency ("Ohio EPA") filed suit against Rover and other defendants (collectively, the Defendants") seeking to recover civil penalties allegedly owed and certain injunctive relief related to permit compliance. The Defendants filed several motions to dismiss, which were granted on all counts. The Ohio EPA appealed, and on December 9, 2019, the Fifth District Court of Appeals entered a unanimous judgment affirming the trial court. The Ohio EPA sought review from the Ohio Supreme Court, which Defendants opposed in briefs filed in February 2020. On April 22, 2020, the Ohio Supreme Court granted the Ohio EPA's request for review. The briefing schedule for the Ohio Supreme Court's review has not yet been set.

Bayou Bridge

On January 11, 2018, environmental groups and a trade association filed suit against the USACE in the United States District Court for the Middle District of Louisiana. Plaintiffs allege that the USACE's issuance of permits authorizing the construction of the Bayou Bridge Pipeline through the Atchafalaya Basin ("Basin") violated the National Environmental Policy Act, the Clean Water Act, and the Rivers and Harbors Act. They asked the district court to vacate these permits and to enjoin construction of the project through the Basin until the USACE corrects alleged deficiencies in its decision-making process. ETO, through its subsidiary Bayou Bridge Pipeline, LLC ("Bayou Bridge"), intervened on January 26, 2018.

In February 2018, the District Court initially granted Plaintiffs' motion for a preliminary injunction, but the Fifth Circuit Court of Appeals subsequently vacated that decision. The Fifth Circuit's ruling allowed construction to continue and be completed during the pendency of the case. Plaintiffs filed a second motion for preliminary injunction in January 2019, which was denied. Plaintiffs and Defendants filed cross motions for summary judgment. On March 25, 2020, the Court granted summary judgment in favor of the USACE. Plaintiffs have until May 26, 2020 to file a notice of appeal.

Revolution

On September 10, 2018, a pipeline release and fire (the "Incident") occurred on the Revolution pipeline, a natural gas gathering line located in Center Township, Beaver County, Pennsylvania. There were no injuries. On February 8, 2019, the Pennsylvania Department of Environmental Protection ("PADEP") issued a Permit Hold on any requests for approvals/permits or permit amendments for any project in Pennsylvania pursuant to the state's water laws. The Partnership filed an appeal of the Permit Hold with the Pennsylvania Environmental Hearing Board. On January 3, 2020, the Partnership entered into a Consent Order and Agreement with the Department in which, among other things, the Permit Hold was lifted, the Partnership agreed to pay a $28.6 million civil penalty and fund a $2 million community environmental project, and all related appeals were withdrawn.

The Pennsylvania Office of Attorney General has commenced an investigation regarding the Incident, and the United States Attorney for the Western District of Pennsylvania has issued a federal grand jury subpoena for documents relevant to the Incident. The scope of these investigations is not further known at this time.

Chester County, Pennsylvania Investigation

In December 2018, the former Chester County District Attorney ("DA") sent a letter to the Partnership stating that his office was investigating the Partnership and related entities for "potential crimes" related to the Mariner East pipelines.

Subsequently, the matter was submitted to an Investigating Grand Jury in Chester County, Pennsylvania, which has issued subpoenas seeking documents and testimony. On September 24, 2019, the former DA sent a Notice of Intent to the Partnership of its intent to pursue an abatement action if certain conditions were not remediated. The Partnership responded to the Notice of Intent within the proscribed time period. To date, the Partnership is not aware of any further action with regard to this Notice.

In December 2019, the former DA announced charges against a current employee related to the provision of security services. The Partnership has secured independent counsel for the employee. While the Partnership will continue to cooperate with the investigation, it intends to vigorously defend itself.

Delaware County, Pennsylvania Investigation

On March 11, 2019, the Delaware County District Attorney's Office ("DA") announced that the DA and the Pennsylvania Attorney General's Office, at the request of the DA, are conducting an investigation of alleged criminal misconduct involving the construction and related activities of the Mariner East pipelines in Delaware County. The Partnership has not been appraised of the specific conduct under investigation. While the Partnership will cooperate with the investigation, it intends to vigorously defend itself.

Recently Filed Litigation Involving Energy Transfer LP

Four purported unitholders of ET filed derivative actions against various past and current members of ET's Board of Directors, LE GP, and ET, as a nominal defendant that assert claims for breach of fiduciary duties, unjust enrichment, waste of corporate assets, breach of ET's LPA, tortious interference, abuse of control, and gross mismanagement related primarily to matters involving the construction of pipelines in Pennsylvania. They also seek damages and changes to ET's corporate governance structure. See Bettiol v. LP GP, Case No. 3:19-cv-02890-X (N.D. Tex.); Davidson v. Kelcy L. Warren, Cause No. DC-20-02322 (44th Judicial District of Dallas County, Texas); and Harris v. Kelcy L. Warren, Case No. 2:20-cv-00364-GAM (E.D. Pa.); King v. LE GP, Case No. 3:20-cv-00719-X (N.D. Tex.). Another purported unitholder of ET, Allegheny County Employees' Retirement System , individually and on behalf of all others similarly situated, filed a federal securities class action suit against ET and three of ET's directors Kelcy L. Warren, John W. McReynolds, and Thomas E. Long. See Allegheny County Emps.' Ret. Sys. v. Energy Transfer LP, Case No. 2:20-00200-GAM (E.D. Pa.). The complaint asserts claims for violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder related primarily to matters involving the construction of pipelines in Pennsylvania. The defendants cannot predict the outcome of these lawsuits or any lawsuits that might be filed subsequent to the date of this filing; nor can the defendants predict the amount of time and expense that will be required to resolve these lawsuits. However, the defendants believe that the claims are without merit and intend to vigorously contest them.

Other Litigation and Contingencies

We or our subsidiaries are a party to various legal proceedings and/or regulatory proceedings incidental to our businesses. For each of these matters, we evaluate the merits of the case, our exposure to the matter, possible legal or settlement strategies, the likelihood of an unfavorable outcome and the availability of insurance coverage. If we determine that an unfavorable outcome of a particular matter is probable and can be estimated, we accrue the contingent obligation, as well as any expected insurance recoverable amounts related to the contingency. As of March 31, 2020 and December 31, 2019, accruals of approximately $116 million and $120 million, respectively, were reflected on our consolidated balance sheets related to these contingent obligations. As new information becomes available, our estimates may change. The impact of these changes may have a significant effect on our results of operations in a single period.

The outcome of these matters cannot be predicted with certainty and there can be no assurance that the outcome of a particular matter will not result in the payment of amounts that have not been accrued for the matter. Furthermore, we may revise accrual amounts prior to resolution of a particular contingency based on changes in facts and circumstances or changes in the expected outcome. Currently, we are not able to estimate possible losses or a range of possible losses in excess of amounts accrued.

In addition, other legal proceedings exist that are considered reasonably possible to result in unfavorable outcomes. For those where possible losses can be estimated, the range of possible losses related to these contingent obligations is estimated to be up to $80 million; however, no accruals have been recorded as of March 31, 2020 or December 31, 2019.

Environmental Matters

Our operations are subject to extensive federal, tribal, state and local environmental and safety laws and regulations that require expenditures to ensure compliance, including related to air emissions and wastewater discharges, at operating facilities and for remediation at current and former facilities as well as waste disposal sites. Historically, our environmental compliance

costs have not had a material adverse effect on our results of operations but there can be no assurance that such costs will not be material in the future or that such future compliance with existing, amended or new legal requirements will not have a material adverse effect on our business and operating results. Costs of planning, designing, constructing and operating pipelines, plants and other facilities must incorporate compliance with environmental laws and regulations and safety standards. Failure to comply with these laws and regulations may result in the assessment of administrative, civil and criminal penalties, the imposition of investigatory, remedial and corrective action obligations, natural resource damages, the issuance of injunctions in affected areas and the filing of federally authorized citizen suits. Contingent losses related to all significant known environmental matters have been accrued and/or separately disclosed. However, we may revise accrual amounts prior to resolution of a particular contingency based on changes in facts and circumstances or changes in the expected outcome.

Environmental exposures and liabilities are difficult to assess and estimate due to unknown factors such as the magnitude of possible contamination, the timing and extent of remediation, the determination of our liability in proportion to other parties, improvements in cleanup technologies and the extent to which environmental laws and regulations may change in the future. Although environmental costs may have a significant impact on the results of operations for any single period, we believe that such costs will not have a material adverse effect on our financial position.

Based on information available at this time and reviews undertaken to identify potential exposure, we believe the amount reserved for environmental matters is adequate to cover the potential exposure for cleanup costs.

In February 2017, we received letters from the DOJ on behalf of EPA and Louisiana Department of Environmental Quality (“LDEQ”) notifying SPLP and Mid-Valley Pipeline Company (“Mid-Valley”) that enforcement actions were being pursued for three separate crude oil releases: (a) an estimated 550 barrels released from the Colmesneil-to-Chester pipeline in Tyler County, Texas (“Colmesneil”) which allegedly occurred in February 2013; (b) an estimated 4,509 barrels released from the Longview-to-Mayersville pipeline in Caddo Parish, Louisiana (a/k/a Milepost 51.5) which allegedly occurred in October 2014; and (c) an estimated 40 barrels released from the Wakita 4-inch gathering line in Oklahoma which allegedly occurred in January 2015. In January 2019, a Consent Decree approved by all parties as well as an accompanying Complaint was filed in the United States District Court for the Western District of Louisiana seeking public comment and final court approval to resolve all penalties with DOJ and LDEQ for the three releases. Subsequently, the court approved the Consent Decree and the penalty payment of $5.4 million was satisfied. The Consent Decree requires certain injunctive relief to be completed on the Longview-to-Mayersville pipeline within three years but the injunctive relief is not expected to have any material impact on operations. In addition to resolution of the civil penalty and injunctive relief, we continue to discuss natural resource damages with the Louisiana trustees related to the Caddo Parish, Louisiana release.

In October 2018, Pipeline Hazardous Materials Safety Administration (“PHMSA”) issued a notice of proposed safety order (the “Notice”) to SPMT, a wholly-owned subsidiary of ETO. The Notice alleged that conditions exist on certain pipeline facilities owned and operated by SPMT in Nederland, Texas that pose a pipeline integrity risk to public safety, property or the environment. The Notice also made preliminary findings of fact and proposed corrective measures. SPMT responded to the Notice by submitting a timely written response on November 2, 2018, attended an informal consultation held on January 30, 2019 and entered into a consent agreement with PHMSA resolving the issues in the Notice as of March 2019. SPMT is currently awaiting response from PHMSA regarding the approval status of the submitted Remedial Work Plan.

On June 4, 2019, the Oklahoma Corporation Commission’s (“OCC”) Transportation Division filed a complaint against SPLP seeking a penalty of up to $1 million related to a May 2018 rupture near Edmond, Oklahoma. The release occurred on the Noble to Douglas 8” pipeline in an area of external corrosion and caused the release of approximately fifteen barrels of crude oil. SPLP responded immediately to the release and remediated the surrounding environment and pipeline in cooperation with the OCC. The OCC filed the complaint alleging that SPLP failed to provide adequate cathodic protection to the pipeline causing the failure. SPLP is negotiating a settlement agreement with the OCC for a lesser penalty. The OCC has accepted our counter offer in conjunction with a proposed consent order. The Consent Order will be presented to the OCC at a final hearing, the date of which is to be determined.

Environmental Remediation

Our subsidiaries are responsible for environmental remediation at certain sites, including the following:

- certain of our interstate pipelines conduct soil and groundwater remediation related to contamination from past uses of polychlorinated biphenyls (“PCBs”). PCB assessments are ongoing and, in some cases, our subsidiaries could be contractually responsible for contamination caused by other parties.
- certain gathering and processing systems are responsible for soil and groundwater remediation related to releases of hydrocarbons.

- legacy sites related to Sunoco that are subject to environmental assessments, including formerly owned terminals and other logistics assets, retail sites that Sunoco no longer operates, closed and/or sold refineries and other formerly owned sites.
- Sunoco is potentially subject to joint and several liability for the costs of remediation at sites at which it has been identified as a potentially responsible party ("PRP"). As of March 31, 2020, Sunoco had been named as a PRP at approximately 29 identified or potentially identifiable "Superfund" sites under federal and/or comparable state law. Sunoco is usually one of a number of companies identified as a PRP at a site. Sunoco has reviewed the nature and extent of its involvement at each site and other relevant circumstances and, based upon Sunoco's purported nexus to the sites, believes that its potential liability associated with such sites will not be significant.

To the extent estimable, expected remediation costs are included in the amounts recorded for environmental matters in our consolidated balance sheets. In some circumstances, future costs cannot be reasonably estimated because remediation activities are undertaken as claims are made by customers and former customers. To the extent that an environmental remediation obligation is recorded by a subsidiary that applies regulatory accounting policies, amounts that are expected to be recoverable through tariffs or rates are recorded as regulatory assets on our consolidated balance sheets.

The table below reflects the amounts of accrued liabilities recorded in our consolidated balance sheets related to environmental matters that are considered to be probable and reasonably estimable. Currently, we are not able to estimate possible losses or a range of possible losses in excess of amounts accrued. Except for matters discussed above, we do not have any material environmental matters assessed as reasonably possible that would require disclosure in our consolidated financial statements.

	March 31, 2020	December 31, 2019
Current	$ 42	$ 46
Non-current	271	274
Total environmental liabilities	$ 313	$ 320

We have established a wholly-owned captive insurance company to bear certain risks associated with environmental obligations related to certain sites that are no longer operating. The premiums paid to the captive insurance company include estimates for environmental claims that have been incurred but not reported, based on an actuarially determined fully developed claims expense estimate. In such cases, we accrue losses attributable to unasserted claims based on the discounted estimates that are used to develop the premiums paid to the captive insurance company.

During the three months ended March 31, 2020 and 2019, the Partnership recorded $9 million and $6 million, respectively, of expenditures related to environmental cleanup programs.

Our pipeline operations are subject to regulation by the United States Department of Transportation under PHMSA, pursuant to which PHMSA has established requirements relating to the design, installation, testing, construction, operation, replacement and management of pipeline facilities. Moreover, PHMSA, through the Office of Pipeline Safety, has promulgated a rule requiring pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines, and take measures to protect pipeline segments located in what the rule refers to as "high consequence areas." Activities under these integrity management programs involve the performance of internal pipeline inspections, pressure testing or other effective means to assess the integrity of these regulated pipeline segments, and the regulations require prompt action to address integrity issues raised by the assessment and analysis. Integrity testing and assessment of all of these assets will continue, and the potential exists that results of such testing and assessment could cause us to incur future capital and operating expenditures for repairs or upgrades deemed necessary to ensure the continued safe and reliable operation of our pipelines; however, no estimate can be made at this time of the likely range of such expenditures.

Our operations are also subject to the requirements of OSHA, and comparable state laws that regulate the protection of the health and safety of employees. In addition, the Occupational Safety and Health Administration's hazardous communication standard requires that information be maintained about hazardous materials used or produced in our operations and that this information be provided to employees, state and local government authorities and citizens. We believe that our past costs for OSHA required activities, including general industry standards, record keeping requirements, and monitoring of occupational exposure to regulated substances have not had a material adverse effect on our results of operations but there is no assurance that such costs will not be material in the future.

11. REVENUE

Disaggregation of Revenue

The Partnership's consolidated financial statements reflect eight reportable segments, which also represent the level at which the Partnership aggregates revenue for disclosure purposes. Note 14 depicts the disaggregation of revenue by segment.

Contract Balances with Customers

The Partnership satisfies its obligations by transferring goods or services in exchange for consideration from customers. The timing of performance may differ from the timing the associated consideration is paid to or received from the customer, thus resulting in the recognition of a contract asset or a contract liability.

The Partnership recognizes a contract asset when making upfront consideration payments to certain customers or when providing services to customers prior to the time at which the Partnership is contractually allowed to bill for such services.

The Partnership recognizes a contract liability if the customer's payment of consideration precedes the Partnership's fulfillment of the performance obligations. Certain contracts contain provisions requiring customers to pay a fixed fee for a right to use our assets, but allows customers to apply such fees against services to be provided at a future point in time. These amounts are reflected as deferred revenue until the customer applies the deficiency fees to services provided or becomes unable to use the fees as payment for future services due to expiration of the contractual period the fees can be applied or physical inability of the customer to utilize the fees due to capacity constraints. Additionally, Sunoco LP maintains some franchise agreements requiring dealers to make one-time upfront payments for long term license agreements. Sunoco LP recognizes a contract liability when the upfront payment is received and recognizes revenue over the term of the license.

The following table summarizes the consolidated activity of our contract liabilities:

	Contract Liabilities
Balance, December 31, 2019	$ 377
Additions	182
Revenue recognized	(206)
Balance, March 31, 2020	$ 353

Balance, December 31, 2018	$ 394
Additions	148
Revenue recognized	(162)
Balance, March 31, 2019	$ 380

The balances of receivables from contracts with customers listed in the table below include both current trade receivables and long-term receivables, net of allowance for doubtful accounts. The allowance for receivables represents Sunoco LP's best estimate of the probable losses associated with potential customer defaults. Sunoco LP determines the allowance based on historical experience and on a specific identification basis.

The balances of Sunoco LP's contract assets as of March 31, 2020 and December 31, 2019 were as follows:

	March 31, 2020	December 31, 2019
Contract balances:		
Contract asset	$ 128	$ 117
Accounts receivable from contracts with customers	140	366

Costs to Obtain or Fulfill a Contract

Sunoco LP recognizes an asset from the costs incurred to obtain a contract (e.g. sales commissions) only if it expects to recover those costs. On the other hand, the costs to fulfill a contract are capitalized if the costs are specifically identifiable to a contract, would result in enhancing resources that will be used in satisfying performance obligations in the future, and are expected to

be recovered. These capitalized costs are recorded as a part of other current assets and other non-current assets and are amortized on a systematic basis consistent with the pattern of transfer of the goods or services to which such costs relate. The amount of amortization expense that Sunoco LP recognized for the three months ended March 31, 2020 and 2019 was $5 million and $4 million, respectively. Sunoco LP has also made a policy election of expensing the costs to obtain a contract, as and when they are incurred, in cases where the expected amortization period is one year or less.

12. DERIVATIVE ASSETS AND LIABILITIES

Commodity Price Risk

We are exposed to market risks related to the volatility of commodity prices. To manage the impact of volatility from these prices, we utilize various exchange-traded and OTC commodity financial instrument contracts. These contracts consist primarily of futures, swaps and options and are recorded at fair value in our consolidated balance sheets.

We use futures and basis swaps, designated as fair value hedges, to hedge our natural gas inventory stored in our Bammel storage facility. At hedge inception, we lock in a margin by purchasing gas in the spot market or off peak season and entering into a financial contract. Changes in the spreads between the forward natural gas prices and the physical inventory spot price result in unrealized gains or losses until the underlying physical gas is withdrawn and the related designated derivatives are settled. Once the gas is withdrawn and the designated derivatives are settled, the previously unrealized gains or losses associated with these positions are realized.

We use futures, swaps and options to hedge the sales price of natural gas we retain for fees in our intrastate transportation and storage segment and operational gas sales in our interstate transportation and storage segment. These contracts are not designated as hedges for accounting purposes.

We use NGL and crude derivative swap contracts to hedge forecasted sales of NGL and condensate equity volumes we retain for fees in our midstream segment whereby our subsidiaries generally gather and process natural gas on behalf of producers, sell the resulting residue gas and NGL volumes at market prices and remit to producers an agreed upon percentage of the proceeds based on an index price for the residue gas and NGL. These contracts are not designated as hedges for accounting purposes.

We utilize swaps, futures and other derivative instruments to mitigate the risk associated with market movements in the price of refined products and NGLs to manage our storage facilities and the purchase and sale of purity NGL. These contracts are not designated as hedges for accounting purposes.

We use futures and swaps to achieve ratable pricing of crude oil purchases, to convert certain expected refined product sales to fixed or floating prices, to lock in margins for certain refined products and to lock in the price of a portion of natural gas purchases or sales. These contracts are not designated as hedges for accounting purposes.

We use financial commodity derivatives to take advantage of market opportunities in our trading activities which complement our transportation and storage segment’s operations and are netted in cost of products sold in our consolidated statements of operations. We also have trading and marketing activities related to power and natural gas in our all other segment which are also netted in cost of products sold. As a result of our trading activities and the use of derivative financial instruments in our transportation and storage segment, the degree of earnings volatility that can occur may be significant, favorably or unfavorably, from period to period. We attempt to manage this volatility through the use of daily position and profit and loss reports provided to our risk oversight committee, which includes members of senior management, and the limits and authorizations set forth in our commodity risk management policy.

The following table details our outstanding commodity-related derivatives:

	March 31, 2020		December 31, 2019	
	Notional Volume	Maturity	Notional Volume	Maturity
Mark-to-Market Derivatives				
(Trading)				
Natural Gas (BBtu):				
Basis Swaps IFERC/NYMEX [(1)]	(19,673)	2020-2024	(35,208)	2020-2024

Refined Products (MBbls) – Futures	(1,779)	2020-2022	(2,473)	2020-2021
Crude (MBbls) – Forwards/Swaps	5,260	2020	4,465	2020
Corn (thousand bushels)	(140)	2020	(1,210)	2020
Fair Value Hedging Derivatives				
(Non-Trading)				
Natural Gas (BBtu):				
Basis Swaps IFERC/NYMEX	(32,695)	2020-2021	(31,780)	2020
Fixed Swaps/Futures	(32,695)	2020-2021	(31,780)	2020
Hedged Item – Inventory	32,695	2020-2021	31,780	2020

(1) Includes aggregate amounts for open positions related to Houston Ship Channel, Waha Hub, NGPL TexOk, West Louisiana Zone and Henry Hub locations.

Interest Rate Risk

We are exposed to market risk for changes in interest rates. To maintain a cost effective capital structure, we borrow funds using a mix of fixed rate debt and variable rate debt. We also manage our interest rate exposure by utilizing interest rate swaps to achieve a desired mix of fixed and variable rate debt. We also utilize forward starting interest rate swaps to lock in the rate on a portion of our anticipated debt issuances.

The following table summarizes our interest rate swaps outstanding, none of which were designated as hedges for accounting purposes:

		Notional Amount Outstanding	
Term	Type[1]	March 31, 2020	December 31, 2019
July 2020[2][3]	Forward-starting to pay a fixed rate of 3.52% and receive a floating rate	$ —	$ 400
July 2021[2]	Forward-starting to pay a fixed rate of 3.55% and receive a floating rate	400	400
July 2022[2]	Forward-starting to pay a fixed rate of 3.80% and receive a floating rate	400	400

[1] Floating rates are based on 3-month LIBOR.

[2] Represents the effective date. These forward-starting swaps have terms of 30 years with a mandatory termination date the same as the effective date.

[3] The July 2020 interest rate swaps were terminated in January 2020.

Credit Risk

Credit risk refers to the risk that a counterparty may default on its contractual obligations resulting in a loss to the Partnership. Credit policies have been approved and implemented to govern our portfolio of counterparties with the objective of mitigating credit losses. These policies establish guidelines, controls and limits to manage credit risk within approved tolerances by mandating an appropriate evaluation of the financial condition of existing and potential counterparties, monitoring agency credit ratings, and by implementing credit practices that limit exposure according to the risk profiles of the counterparties. Furthermore, we may at times require collateral under certain circumstances to mitigate credit risk as necessary. We also implements the use of industry standard commercial agreements which allow for the netting of positive and negative exposures associated with transactions executed under a single commercial agreement. Additionally, we utilize master netting agreements to offset credit exposure across multiple commercial agreements with a single counterparty or affiliated group of counterparties.

Our counterparties consist of a diverse portfolio of customers across the energy industry, including petrochemical companies, commercial and industrials, oil and gas producers, motor fuel distributors, municipalities, utilities and midstream companies. Our overall exposure may be affected positively or negatively by macroeconomic factors or regulatory changes that could impact its counterparties to one extent or another. Currently, management does not anticipate a material adverse effect in our financial position or results of operations as a consequence of counterparty non-performance.

We have maintenance margin deposits with certain counterparties in the OTC market, primarily independent system operators, and with clearing brokers. Payments on margin deposits are required when the value of a derivative exceeds our pre-established credit limit with the counterparty. Margin deposits are returned to us on or about the settlement date for non-exchange traded derivatives, and we exchange margin calls on a daily basis for exchange traded transactions. Since the margin calls are made daily with the exchange brokers, the fair value of the financial derivative instruments are deemed current and netted in deposits paid to vendors within other current assets in the consolidated balance sheets.

For financial instruments, failure of a counterparty to perform on a contract could result in our inability to realize amounts that have been recorded on our consolidated balance sheets and recognized in net income or other comprehensive income.

Derivative Summary

The following table provides a summary of our derivative assets and liabilities:

	Fair Value of Derivative Instruments			
	Asset Derivatives		Liability Derivatives	
	March 31, 2020	December 31, 2019	March 31, 2020	December 31, 2019
Derivatives designated as hedging instruments:				
Commodity derivatives (margin deposits)	$ 11	$ 24	$ (12)	$ —
Derivatives not designated as hedging instruments:				
Commodity derivatives (margin deposits)	615	319	(561)	(350)
Commodity derivatives	74	41	(58)	(39)
Interest rate derivatives	—	—	(573)	(399)
	689	360	(1,192)	(788)
Total derivatives	$ 700	$ 384	$ (1,204)	$ (788)

The following table presents the fair value of our recognized derivative assets and liabilities on a gross basis and amounts offset on the consolidated balance sheets that are subject to enforceable master netting arrangements or similar arrangements:

		Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	March 31, 2020	December 31, 2019	March 31, 2020	December 31, 2019
Derivatives without offsetting agreements	Derivative liabilities	$ —	$ —	$ (573)	$ (399)
Derivatives in offsetting agreements:					
OTC contracts	Derivative assets (liabilities)	74	41	(58)	(39)
Broker cleared derivative contracts	Other current assets (liabilities)	626	343	(573)	(350)
Total gross derivatives		700	384	(1,204)	(788)
Offsetting agreements:					
Counterparty netting	Derivative assets (liabilities)	(49)	(18)	49	18
Counterparty netting	Other current assets (liabilities)	(551)	(318)	551	318
Total net derivatives		$ 100	$ 48	$ (604)	$ (452)

We disclose the non-exchange traded financial derivative instruments as derivative assets and liabilities on our consolidated balance sheets at fair value with amounts classified as either current or non-current depending on the anticipated settlement date.

The following tables summarize the amounts recognized in income with respect to our derivative financial instruments:

	Location of Gain (Loss) Recognized in Income on Derivatives	Amount of Gain (Loss) Recognized in Income on Derivatives	
		Three Months Ended March 31,	
		2020	2019
Derivatives not designated as hedging instruments:			
Commodity derivatives – Trading	Cost of products sold	$ 5	$ 5
Commodity derivatives – Non-trading	Cost of products sold	112	(12)
Interest rate derivatives	Losses on interest rate derivatives	(329)	(74)
Total		$ (212)	$ (81)

13. RELATED PARTY TRANSACTIONS

The Partnership has related party transactions with several of its unconsolidated affiliates. In addition to commercial transactions, these transactions include the provision of certain management services and leases of certain assets.

The following table summarizes the revenues from related companies on our consolidated statements of operations:

	Three Months Ended March 31,	
	2020	2019
Revenues from related companies	$ 133	$ 109

The following table summarizes the accounts receivable from related companies on our consolidated balance sheets:

	March 31, 2020	December 31, 2019
Accounts receivable from related companies:		
FGT	$ 20	$ 50
Phillips 66	11	36
Traverse	54	42
Other	47	31
Total accounts receivable from related companies	$ 132	$ 159

As of March 31, 2020 and December 31, 2019, accounts payable with unconsolidated affiliates in the Partnership’s consolidated balance sheets totaled $9 million and $31 million, respectively.

14. REPORTABLE SEGMENTS

Our reportable segments were reevaluated and currently reflect the following segments, which conduct their business primarily in the United States:

- intrastate transportation and storage;
- interstate transportation and storage;
- midstream;
- NGL and refined products transportation and services;
- crude oil transportation and services;
- investment in Sunoco LP;

- investment in USAC; and
- all other.

Consolidated revenues and expenses reflect the elimination of all material intercompany transactions.

Revenues from our intrastate transportation and storage segment are primarily reflected in natural gas sales and gathering, transportation and other fees. Revenues from our interstate transportation and storage segment are primarily reflected in gathering, transportation and other fees. Revenues from our midstream segment are primarily reflected in natural gas sales, NGL sales and gathering, transportation and other fees. Revenues from our NGL and refined products transportation and services segment are primarily reflected in NGL sales and gathering, transportation and other fees. Revenues from our crude oil transportation and services segment are primarily reflected in crude sales. Revenues from our investment in Sunoco LP segment are primarily reflected in refined product sales. Revenues from our investment in USAC segment are primarily reflected in gathering, transportation and other fees. Revenues from our all other segment are primarily reflected in natural gas sales.

We report Segment Adjusted EBITDA and consolidated Adjusted EBITDA as measures of segment performance. We define Segment Adjusted EBITDA and consolidated Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Segment Adjusted EBITDA and consolidated Adjusted EBITDA reflect amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA and consolidated Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates. The use of Segment Adjusted EBITDA or Adjusted EBITDA related to unconsolidated affiliates as an analytical tool should be limited accordingly.

The following tables present financial information by segment:

	Three Months Ended March 31,	
	2020	2019
Revenues:		
Intrastate transportation and storage:		
Revenues from external customers	$ 536	$ 769
Intersegment revenues	57	87
	593	856
Interstate transportation and storage:		
Revenues from external customers	459	492
Intersegment revenues	5	6
	464	498
Midstream:		
Revenues from external customers	501	663
Intersegment revenues	669	1,055
	1,170	1,718
NGL and refined products transportation and services:		
Revenues from external customers	2,118	2,713
Intersegment revenues	597	318
	2,715	3,031
Crude oil transportation and services:		
Revenues from external customers	4,213	4,167
Intersegment revenues	—	19
	4,213	4,186
Investment in Sunoco LP:		
Revenues from external customers	3,260	3,692
Intersegment revenues	12	—
	3,272	3,692
Investment in USAC:		
Revenues from external customers	176	167
Intersegment revenues	3	4
	179	171
All other:		
Revenues from external customers	364	458
Intersegment revenues	149	39
	513	497
Eliminations	(1,492)	(1,528)
Total revenues	$ 11,627	$ 13,121

	Three Months Ended March 31,	
	2020	2019*
Segment Adjusted EBITDA:		
Intrastate transportation and storage	$ 240	$ 252

Midstream	383	382
NGL and refined products transportation and services	663	612
Crude oil transportation and services	591	744
Investment in Sunoco LP	209	153
Investment in USAC	106	101
All other	39	35
Adjusted EBITDA (consolidated)	2,635	2,735
Depreciation, depletion and amortization	(867)	(774)
Interest expense, net of interest capitalized	(602)	(590)
Impairment losses	(1,325)	(50)
Losses on interest rate derivatives	(329)	(74)
Non-cash compensation expense	(22)	(29)
Unrealized gains on commodity risk management activities	51	49
Losses on extinguishments of debt	(62)	(18)
Inventory valuation adjustments	(227)	93
Adjusted EBITDA related to unconsolidated affiliates	(154)	(146)
Equity in earnings (losses) of unconsolidated affiliates	(7)	65
Other, net	(27)	(17)
Income (loss) before income tax expense	(936)	1,244
Income tax expense	(28)	(126)
Net income (loss)	$ (964)	$ 1,118

	March 31, 2020	December 31, 2019*
Segment assets:		
Intrastate transportation and storage	$ 6,851	$ 6,648
Interstate transportation and storage	17,263	18,111
Midstream	18,969	20,332
NGL and refined products transportation and services	17,082	19,145
Crude oil transportation and services	24,832	22,933
Investment in Sunoco LP	4,895	5,438
Investment in USAC	3,103	3,730
All other	2,546	2,636
Total segment assets	$ 95,541	$ 98,973

*As adjusted. See Note 1.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Tabular dollar and unit amounts, except per unit data, are in millions)

The following is a discussion of our historical consolidated financial condition and results of operations, and should be read in conjunction with (i) our historical consolidated financial statements and accompanying notes thereto included elsewhere in this Quarterly Report on Form 10-Q; and (ii) the consolidated financial statements and management's discussion and analysis of financial condition and results of operations included in the Partnership's Annual Report on Form 10-K for the year ended December 31, 2019 filed with the SEC on February 21, 2020. This discussion includes forward-looking statements that are subject to risk and uncertainties. Actual results may differ substantially from the statements we make in this section due to a number of factors that are discussed in "Part I – Item 1A. Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2019 filed with the SEC on February 21, 2020 and "Part II – Item 1A. Risk Factors" in this Quarterly Report on Form 10-Q. Additional information on forward-looking statements is discussed below in "Forward-Looking Statements."

Unless the context requires otherwise, references to "we," "us," "our," the "Partnership" and "ET" mean Energy Transfer LP (formerly Energy Transfer Equity, L.P.) and its consolidated subsidiaries, which include ETO. References to the "Parent Company" mean Energy Transfer LP on a stand-alone basis.

RECENT DEVELOPMENTS

COVID-19

In the first quarter of 2020, the COVID-19 pandemic prompted several states and municipalities in which we operate to take extraordinary and wide-ranging actions to contain and combat the outbreak and spread of the virus, including mandates for many individuals to substantially restrict daily activities and for many businesses to curtail or cease normal operations. To the extent COVID-19 continues or worsens, governments may impose additional similar restrictions. As a provider of critical energy infrastructure, our business has been designated as a "critical infrastructure sector" and our employees as "essential critical infrastructure workers" pursuant to the Department of Homeland Security Guidance on Essential Critical Infrastructure Workforce(s). To date, our field operations have continued largely uninterrupted, and remote work and other COVID-19 related conditions have not significantly impacted our ability to maintain operations or caused us to incur significant additional expenses; however, we are unable to predict the magnitude or duration of current and potential future COVID-19 mitigation measures. As an essential business providing critical energy infrastructure, the safety of our employees and the continued operation of our assets are our top priorities and we will continue to operate in accordance with federal and state health guidelines and safety protocols. We have implemented several new policies and provided employee training to help maintain the health and safety of our workforce.

ET Contribution of SemGroup Assets to ETO

On December 5, 2019, ET completed the acquisition of SemGroup. During the first quarter of 2020, ET contributed certain SemGroup assets to ETO through sale and contribution transactions.

ETO Series F and Series G Preferred Units Issuance

On January 22, 2020, ETO issued 500,000 of its Series F Preferred Units at a price of $1,000 per unit and 1,100,000 of its Series G Preferred Units at a price of $1,000 per unit. The net proceeds were used to repay amounts outstanding under ETO's revolving credit facility and for general partnership purposes.

ETO January 2020 Senior Notes Offering and Redemption

On January 22, 2020, ETO completed a registered offering (the "January 2020 Senior Notes Offering") of $1.00 billion aggregate principal amount of the Partnership's 2.900% Senior Notes due 2025, $1.50 billion aggregate principal amount of the Partnership's 3.750% Senior Notes due 2030 and $2.00 billion aggregate principal amount of the Partnership's 5.000% Senior Notes due 2050 (collectively, the "Notes"). The Notes are fully and unconditionally guaranteed by the Partnership's wholly-owned subsidiary, Sunoco Logistics Operations, on a senior unsecured basis.

Using proceeds from the January 2020 Senior Notes Offering, ETO redeemed its $400 million aggregate principal amount of 5.75% Senior Notes due September 1, 2020, its $1.05 billion aggregate principal amount of 4.15% Senior Notes due October 1, 2020, its $1.14 billion aggregate principal amount of 7.50% Senior Notes due October 15, 2020, its $250 million aggregate principal amount of 5.50% Senior Notes due February 15, 2020, ET's $52 million aggregate principal amount of 7.50% Senior Notes due October 15, 2020 and Transwestern's $175 million aggregate principal amount of 5.36% Senior Notes due December 9, 2020.

Lake Charles LNG

On March 30, 2020, Shell Royal Dutch Plc announced that it would not proceed with a proposed equity interest in the Lake Charles LNG liquefaction project due to adverse market factors affecting Shell's business and its desire to preserve cash in light of the current environment. We intend to continue to develop the project, possibly in conjunction with one or more equity partners, and we plan to evaluate a variety of alternatives to advance the project, including the possibility of reducing the size of the project from three trains (16.45 million tonnes per annum of LNG capacity) to two trains (11.0 million tonnes per annum). The project is fully permitted by federal, state and local authorities, has all necessary export licenses and benefits from the infrastructure related to the existing regasification facility at the same site, including four LNG storage tanks, two deep water docks and other assets. In light of the existing brownfield infrastructure and the advanced state of the development of the project, we plan to continue to pursue the project on a disciplined, cost effective basis, and ultimately we will determine whether to make a final investment decision to proceed with the project based on market conditions, capital expenditure considerations and our success in securing equity participation by third parties as well as long-term LNG offtake commitments on satisfactory terms.

Quarterly Cash Distribution

In March 2020, ET announced its quarterly distribution of $0.3050 per unit ($1.22 annualized) on ET common units for the quarter ended March 31, 2020.

Regulatory Update

Interstate Natural Gas Transportation Regulation

Rate Regulation

Effective January 2018, the 2017 Tax and Jobs Act (the “Tax Act”) changed several provisions of the federal tax code, including a reduction in the maximum corporate tax rate. On March 15, 2018, in a set of related proposals, the FERC addressed treatment of federal income tax allowances in regulated entity rates. The FERC issued a Revised Policy Statement on Treatment of Income Taxes (“Revised Policy Statement”) stating that it will no longer permit master limited partnerships to recover an income tax allowance in their cost of service rates. The FERC issued the Revised Policy Statement in response to a remand from the United States Court of Appeals for the District of Columbia Circuit in United Airlines v. FERC, in which the court determined that the FERC had not justified its conclusion that a pipeline organized as a master limited partnership would not “double recover” its taxes under the current policy by both including an income-tax allowance in its cost of service and earning a return on equity calculated using the discounted cash flow methodology. On July 18, 2018, the FERC issued an order denying requests for rehearing and clarification of its Revised Policy Statement. In the rehearing order, the FERC clarified that a pipeline organized as a master limited partnership will not be not be precluded in a future proceeding from arguing and providing evidentiary support that it is entitled to an income tax allowance and demonstrating that its recovery of an income tax allowance does not result in a double-recovery of investors’ income tax costs. In light of the rehearing order, the impacts of the FERC’s policy on the treatment of income taxes may have on the rates ETO can charge for the FERC regulated transportation services are unknown at this time.

The FERC also issued a Notice of Inquiry (“2017 Tax Law NOI”) on March 15, 2018, requesting comments on the effect of the Tax Act on FERC jurisdictional rates. The 2017 Tax Law NOI states that of particular interest to the FERC is whether, and if so how, the FERC should address changes relating to accumulated deferred income taxes and bonus depreciation. Comments in response to the 2017 Tax Law NOI were due on or before May 21, 2018.

In March 2019, following the decision of the D.C. Circuit in Emera Maine v. Federal Energy Regulatory Commission, the FERC issued a Notice of Inquiry regarding its policy for determining return on equity (“ROE”). The FERC specifically sought information and stakeholder views to help the FERC explore whether, and if so how, it should modify its policies concerning the determination of ROE to be used in designing jurisdictional rates charged by public utilities. The FERC also expressly sought comment on whether any changes to its policies concerning public utility ROEs should be applied to interstate natural gas and oil pipelines. Initial comments were due in June 2019, and reply comments were due in July 2019. The FERC has not taken any further action with respect to the Notice of Inquiry as of this time, and therefore we cannot predict what effect, if any, such development could have on our cost-of-service rates in the future.

By order issued January 16, 2019, the FERC initiated a review of Panhandle’s existing rates pursuant to Section 5 of the Natural Gas Act to determine whether the rates currently charged by Panhandle are just and reasonable and set the matter for hearing. Panhandle filed a cost and revenue study on April 1, 2019. Panhandle filed a NGA Section 4 rate case on August 30, 2019.

Even without action on the 2017 Tax Law NOI or as contemplated in the Final Rule, the FERC or our shippers may challenge the cost of service rates we charge. The FERC’s establishment of a just and reasonable rate is based on many components, and tax-related changes will affect two such components, the allowance for income taxes and the amount for accumulated deferred income

taxes, while other pipeline costs also will continue to affect the FERC's determination of just and reasonable cost of service rates. Although changes in these two tax related components may decrease, other components in the cost of service rate calculation may increase and result in a newly calculated cost of service rate that is the same as or greater than the prior cost of service rate. Moreover, we receive revenues from our pipelines based on a variety of rate structures, including cost of service rates, negotiated rates, discounted rates and market-based rates. Many of our interstate pipelines, such as ETC Tiger Pipeline, LLC, MEP and FEP, have negotiated market rates that were agreed to by customers in connection with long-term contracts entered into to support the construction of the pipelines. Other systems, such as FGT, Transwestern and Panhandle, have a mix of tariff rate, discount rate, and negotiated rate agreements. We do not expect market-based rates, negotiated rates or discounted rates that are not tied to the cost of service rates to be affected by the Revised Policy Statement or any final regulations that may result from the March 15, 2018 proposals. The revenues we receive from natural gas transportation services we provide pursuant to cost of service based rates may decrease in the future as a result of the ultimate outcome of the NOI, the Final Rule, and the Revised Policy Statement, combined with the reduced corporate federal income tax rate established in the Tax Act. The extent of any revenue reduction related to our cost of service rates, if any, will depend on a detailed review of all of ETO's cost of service components and the outcomes of any challenges to our rates by the FERC or our shippers.

Pipeline Certification

The FERC issued a Notice of Inquiry on April 19, 2018 ("Pipeline Certification NOI"), thereby initiating a review of its policies on certification of natural gas pipelines, including an examination of its long-standing Policy Statement on Certification of New Interstate Natural Gas Pipeline Facilities, issued in 1999, that is used to determine whether to grant certificates for new pipeline projects. We are unable to predict what, if any, changes may be proposed as a result of the Pipeline Certification NOI that will affect our natural gas pipeline business or when such proposals, if any, might become effective. Comments in response to the Pipeline Certification NOI were due on or before July 25, 2018. We do not expect that any change in this policy would affect us in a materially different manner than any other natural gas pipeline company operating in the United States.

Interstate Common Carrier Regulation

The FERC utilizes an indexing rate methodology which, as currently in effect, allows common carriers to change their rates within prescribed ceiling levels that are tied to changes in the Producer Price Index, or PPI. The indexing methodology is applicable to existing rates, with the exclusion of market-based rates. The FERC's indexing methodology is subject to review every five years. During the five-year period commencing July 1, 2016 and ending June 30, 2021, common carriers charging indexed rates are permitted to adjust their indexed ceilings annually by PPI plus 1.23 percent. Many existing pipelines utilize the FERC liquids index to change transportation rates annually every July 1. With respect to liquids and refined products pipelines subject to FERC jurisdiction, the Revised Policy Statement requires the pipeline to reflect the impacts to its cost of service from the Revised Policy Statement and the Tax Act on Page 700 of FERC Form No. 6. This information will be used by the FERC in its next five year review of the liquids pipeline index to generate the index level to be effective July 1, 2021, thereby including the effect of the Revised Policy Statement and the Tax Act in the determination of indexed rates prospectively, effective July 1, 2021. The FERC's establishment of a just and reasonable rate, including the determination of the appropriate liquids pipeline index, is based on many components, and tax related changes will affect two such components, the allowance for income taxes and the amount for accumulated deferred income taxes, while other pipeline costs also will continue to affect the FERC's determination of the appropriate pipeline index. Accordingly, depending on the FERC's application of its indexing rate methodology for the next five year term of index rates, the Revised Policy Statement and tax effects related to the Tax Act may impact our revenues associated with any transportation services we may provide pursuant to cost of service based rates in the future, including indexed rates.

Trends and Outlook

Recent crude oil market disruptions involving foreign oil-producing nations and the COVID-19 pandemic may have a negative impact on our earnings and cash flows from operations. Reduced demand for natural gas, NGLs, refined products and/or crude oil caused by the COVID-19 pandemic and a continuation of low WTI crude oil prices caused by the actions of foreign oil-producing nations may result in the shut-in of production from U.S. oil and gas wells, which in turn may result in decreased volumes transported on our pipeline systems and decreased overall utilization of our midstream services.

With respect to commodity prices, natural gas prices have remained comparatively low in recent months as associated gas from shale oil resources has provided additional supply to the market. Meanwhile, crude oil prices have seen sharp declines as a result of actions by foreign oil-producing nations and a decrease in global demand as result of the COVID-19 pandemic. Global oil and natural gas demand growth is likely to remain flat or decline in the near term and will likely result in lower U.S. production levels.

The outlook for commodity prices is mixed and could have a varying impact on our business. Reduced demand and increased supply of crude oil has resulted in an increase in worldwide crude oil storage inventories, which is expected to keep crude oil prices suppressed for the foreseeable future. With respect to natural gas markets, a relatively more moderate decrease in demand, coupled with anticipated decreases in gas production associated with wells drilled to produce crude oil, have counterbalanced

softness in pricing. The overall outlook for our midstream services will depend, in part, on the timing and extent of recovery in the commodity markets.

While we anticipate that current and projected commodity prices and the related impact to activity levels in both the upstream and midstream sectors will impact our business, we cannot predict the ultimate magnitude of that impact and expect it to be varied across our operations, depending on the region, customer, type of service, contract term and other factors.

As a result of the current commodity price environment, a small number of counterparties to our commercial contracts have made force majeure claims in an effort to terminate or modify existing agreements with us, and in the future we expect more counterparties to do the same. To the extent our counterparties are successful in those claims, we may not receive the full payments or other benefits of those contracts during the pendency of the force majeure event. While the vast majority of our counterparties are investment grade rated companies, some of our counterparties may be forced to file for bankruptcy protection, in which case our existing contracts with those counterparties may be rejected by the bankruptcy court. In this case, we expect that we would attempt to negotiate replacement contracts with those counterparties and, depending on the availability of alternatives to our services, these contracts may have terms that are less favorable to us than the contracts rejected in bankruptcy court.

Ultimately, the extent to which our business will be impacted by recent market developments depends on the factors described above as well as future developments beyond our control, which are highly uncertain and cannot be predicted. In response to these market events and uncertainties, we have cut our already reduced 2020 growth capital spending budget by $400 million and reduced planned operating expenses by $200 million to $250 million; and we are prepared to cut spending further should the need arise. While current market volatility makes the near-term unpredictable, we believe that overall the long-term demand for our services will continue given the essential nature of the midstream natural gas, NGLs, refined products and crude oil business, although we cannot predict any possible changes in such demand with reasonable certainty.

We currently have ample liquidity to fund our business and we do not anticipate any liquidity concerns in the immediate future (see “Liquidity and Capital Resources” below). In addition, while the trading price of ET common units declined significantly during the first quarter of 2020, thereby making equity capital market transactions less attractive in the near term, we continue to have access to the debt capital markets on generally favorable terms. In the event we seek additional equity or debt capital, our blended cost of capital for equity and debt is expected to be modestly higher in the near term; however, we will continue to evaluate growth projects and acquisitions as such opportunities may be identified in the future in light of this higher cost of capital.

Results of Operations

We report Segment Adjusted EBITDA and consolidated Adjusted EBITDA as measures of segment performance. We define Segment Adjusted EBITDA and consolidated Adjusted EBITDA as total partnership earnings before interest, taxes, depreciation, depletion, amortization and other non-cash items, such as non-cash compensation expense, gains and losses on disposals of assets, the allowance for equity funds used during construction, unrealized gains and losses on commodity risk management activities, inventory valuation adjustments, non-cash impairment charges, losses on extinguishments of debt and other non-operating income or expense items. Segment Adjusted EBITDA and consolidated Adjusted EBITDA reflect amounts for unconsolidated affiliates based on the same recognition and measurement methods used to record equity in earnings of unconsolidated affiliates. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA and consolidated Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates. The use of Segment Adjusted EBITDA or Adjusted EBITDA related to unconsolidated affiliates as an analytical tool should be limited accordingly.

Segment Adjusted EBITDA, as reported for each segment in the table below, is analyzed for each segment in the section titled “Segment Operating Results.” Adjusted EBITDA is a non-GAAP measure used by industry analysts, investors, lenders and rating agencies to assess the financial performance and the operating results of the Partnership’s fundamental business activities and should not be considered in isolation or as a substitution for net income, income from operations, cash flows from operating activities or other GAAP measures.

As discussed in Note 1 of the Partnership’s consolidated financial statements included in “Item 1. Financial Statements,” during the first quarter of 2020, the Partnership elected to change its inventory accounting policy related to certain barrels of crude oil that were previously accounting for as inventory. These changes have been applied retrospectively to all prior periods, and the prior period amounts reflected below have been adjusted from those amounts previously reported.

Consolidated Results

	Three Months Ended March 31,		
	2020	2019*	Change
Segment Adjusted EBITDA:			
Intrastate transportation and storage	$ 240	$ 252	$ (12)
Interstate transportation and storage	404	456	(52)
Midstream	383	382	1
NGL and refined products transportation and services	663	612	51
Crude oil transportation and services	591	744	(153)
Investment in Sunoco LP	209	153	56
Investment in USAC	106	101	5
All other	39	35	4
Adjusted EBITDA (consolidated)	2,635	2,735	(100)
Depreciation, depletion and amortization	(867)	(774)	(93)
Interest expense, net of interest capitalized	(602)	(590)	(12)
Impairment losses	(1,325)	(50)	(1,275)
Losses on interest rate derivatives	(329)	(74)	(255)
Non-cash compensation expense	(22)	(29)	7
Unrealized gains on commodity risk management activities	51	49	2
Losses on extinguishments of debt	(62)	(18)	(44)
Inventory valuation adjustments	(227)	93	(320)
Adjusted EBITDA related to unconsolidated affiliates	(154)	(146)	(8)
Equity in earnings (losses) of unconsolidated affiliates	(7)	65	(72)
Other, net	(27)	(17)	(10)
Income (loss) before income tax expense	(936)	1,244	(2,180)
Income tax expense	(28)	(126)	98
Net income (loss)	$ (964)	$ 1,118	$ (2,082)

*As adjusted.

Adjusted EBITDA (consolidated). For the three months ended March 31, 2020 compared to the same period last year, Adjusted EBITDA decreased $100 million, or 4%. The decrease was primarily due to a net impact of $240 million from crude oil, NGL and refined products inventory valuation adjustments ($213 million of negative adjustments in the current period compared to $27 million of favorable adjustments in the prior period). This decrease was partially offset by a net increase of approximately $138 million in Adjusted EBITDA from recent acquisitions and assets placed in service.

Additional discussion of these and other factors affecting Adjusted EBITDA is included in the analysis of Segment Adjusted EBITDA in the “Segment Operating Results” section below.

Depreciation, Depletion and Amortization. Depreciation, depletion and amortization increased for the three months ended March 31, 2020 compared to the same period last year due to the acquisition of SemGroup on December 5, 2019, as well as incremental depreciation related to assets recently placed in service.

Interest Expense, Net of Interest Capitalized. Interest expense, net of interest capitalized, increased for the three months ended March 31, 2020 compared to the same period last year primarily due to the following:

- an increase of $7 million recognized by the Partnership primarily attributable to the higher consolidated debt balance following the SemGroup acquisition and related debt refinancing, the impact of which was partially offset by lower borrowing costs from floating rate debt;

- an increase of $4 million for USAC primarily attributable to a full quarter of interest expense incurred in the current period on its senior notes 2027 issued in March 2019, which were used to reduce borrowings under its credit agreement, partially offset by the reduced borrowings and lower weighted average interest rates under the credit agreement; and
- an increase of $2 million for Sunoco LP primarily related to an increase in Sunoco LP's total long-term debt.

Impairment Losses. During the three months ended March 31, 2020, the Partnership performed an interim impairment test on certain reporting units within midstream, interstate, crude, NGL and all other operations. As a result of the interim impairment test, the Partnership recognized a goodwill impairment of $483 million related to our Arklatex and South Texas operations within the midstream segment, a goodwill impairment of $183 million related to our Lake Charles LNG regasification operations with the interstate transportation and storage segment, and a goodwill impairment of $40 million related to our all other operations primarily due to decreases in projected future revenues and cash flows as a result of the overall market demand decline. In addition, USAC recognized a goodwill impairment of $619 million, during the three months ended March 31, 2020, which is included in the Partnership's consolidated results of operations. During the three months ended March 31, 2019, USAC recorded $3 million impairment of compression equipment as a result of its evaluations of the future deployment of USAC's idle fleet under then-current market conditions.

Gains (Losses) on Interest Rate Derivatives. Losses on interest rate derivatives during the three months ended March 31, 2020 resulted from decreases in forward interest rates, which caused our forward-starting swaps to decrease in value.

Unrealized Gains (Losses) on Commodity Risk Management Activities. See additional information on the unrealized gains (losses) on commodity risk management activities included in "Segment Operating Results" below.

Losses on Extinguishments of Debt. During the three months ended March 31, 2020, amounts were related to ETO senior notes redemption in January 2020.

Inventory Valuation Adjustments. Inventory valuation adjustments were recorded for the inventory associated with Sunoco LP due to changes in fuel prices between periods.

Adjusted EBITDA Related to Unconsolidated Affiliates and Equity in Earnings of Unconsolidated Affiliates. See additional information in "Supplemental Information on Unconsolidated Affiliates" and "Segment Operating Results" below.

Other, net. Other, net primarily includes the amortization of regulatory assets and other income and expense amounts.

Income Tax (Expense) Benefit. For the three months ended March 31, 2020 compared to the same period in the prior year, income tax expense decreased due to the recognition of a taxable gain on the sale of assets at our corporate subsidiaries in the prior period.

Supplemental Information on Unconsolidated Affiliates

The following table presents financial information related to unconsolidated affiliates:

	Three Months Ended March 31,		
	2020	2019	Change
Equity in earnings (losses) of unconsolidated affiliates:			
Citrus	$ 35	$ 32	$ 3
FEP	(70)	14	(84)
MEP	—	7	(7)
White Cliffs	8	—	8
Other	20	12	8
Total equity in earnings (losses) of unconsolidated affiliates	$ (7)	$ 65	$ (72)
Adjusted EBITDA related to unconsolidated affiliates[(1)]:			
Citrus	$ 79	$ 81	$ (2)
FEP	19	19	—
MEP	8	19	(11)
White Cliffs	14	—	14
Other	34	27	7
Total Adjusted EBITDA related to unconsolidated affiliates	$ 154	$ 146	$ 8
Distributions received from unconsolidated affiliates:			
Citrus	$ 49	$ 35	$ 14
FEP	18	17	1
MEP	11	11	—
White Cliffs	13	—	13
Other	19	16	3
Total distributions received from unconsolidated affiliates	$ 110	$ 79	$ 31

(1) These amounts represent our proportionate share of the Adjusted EBITDA of our unconsolidated affiliates and are based on our equity in earnings or losses of our unconsolidated affiliates adjusted for our proportionate share of the unconsolidated affiliates' interest, depreciation, depletion, amortization, non-cash items and taxes.

Segment Operating Results

We evaluate segment performance based on Segment Adjusted EBITDA, which we believe is an important performance measure of the core profitability of our operations. This measure represents the basis of our internal financial reporting and is one of the performance measures used by senior management in deciding how to allocate capital resources among business segments.

The tables below identify the components of Segment Adjusted EBITDA, which is calculated as follows:

- *Segment margin*, *operating expenses*, and *selling, general and administrative expenses*. These amounts represent the amounts included in our consolidated financial statements that are attributable to each segment.
- *Unrealized gains or losses on commodity risk management activities and inventory valuation adjustments*. These are the unrealized amounts that are included in cost of products sold to calculate segment margin. These amounts are not included in Segment Adjusted EBITDA; therefore, the unrealized losses are added back and the unrealized gains are subtracted to calculate the segment measure.
- *Non-cash compensation expense*. These amounts represent the total non-cash compensation recorded in operating expenses and selling, general and administrative expenses. This expense is not included in Segment Adjusted EBITDA and therefore is added back to calculate the segment measure.

- *Adjusted EBITDA related to unconsolidated affiliates*. Adjusted EBITDA related to unconsolidated affiliates excludes the same items with respect to the unconsolidated affiliate as those excluded from the calculation of Segment Adjusted EBITDA, such as interest, taxes, depreciation, depletion, amortization and other non-cash items. Although these amounts are excluded from Adjusted EBITDA related to unconsolidated affiliates, such exclusion should not be understood to imply that we have control over the operations and resulting revenues and expenses of such affiliates. We do not control our unconsolidated affiliates; therefore, we do not control the earnings or cash flows of such affiliates.

In the following analysis of segment operating results, a measure of segment margin is reported for segments with sales revenues. Segment margin is a non-GAAP financial measure and is presented herein to assist in the analysis of segment operating results and particularly to facilitate an understanding of the impacts that changes in sales revenues have on the segment performance measure of Segment Adjusted EBITDA. Segment margin is similar to the GAAP measure of gross margin, except that segment margin excludes charges for depreciation, depletion and amortization. Among the GAAP measures reported by the Partnership, the most directly comparable measure to segment margin is Segment Adjusted EBITDA; a reconciliation of segment margin to Segment Adjusted EBITDA is included in the following tables for each segment where segment margin is presented.

In addition, for certain segments, the sections below include information on the components of segment margin by sales type, which components are included in order to provide additional disaggregated information to facilitate the analysis of segment margin and Segment Adjusted EBITDA. For example, these components include transportation margin, storage margin and other margin. These components of segment margin are calculated consistent with the calculation of segment margin; therefore, these components also exclude charges for depreciation, depletion and amortization.

Intrastate Transportation and Storage

	Three Months Ended March 31,		
	2020	2019	Change
Natural gas transported (BBtu/d)	13,135	11,982	1,153
Withdrawals from storage natural gas inventory (BBtu)	6,975	—	6,975
Revenues	$ 593	$ 856	$ (263)
Cost of products sold	303	572	(269)
Segment margin	290	284	6
Unrealized (gains) losses on commodity risk management activities	(6)	10	(16)
Operating expenses, excluding non-cash compensation expense	(41)	(42)	1
Selling, general and administrative expenses, excluding non-cash compensation expense	(9)	(6)	(3)
Adjusted EBITDA related to unconsolidated affiliates	6	6	—
Segment Adjusted EBITDA	$ 240	$ 252	$ (12)

Volumes. For the three months ended March 31, 2020 compared to the same period last year, transported volumes increased primarily due to increased utilization of our Texas pipelines.

Segment Margin. The components of our intrastate transportation and storage segment margin were as follows:

	Three Months Ended March 31,		
	2020	2019	Change
Transportation fees	$ 161	$ 154	$ 7
Natural gas sales and other (excluding unrealized gains and losses)	88	120	(32)
Retained fuel revenues (excluding unrealized gains and losses)	9	11	(2)
Storage margin (excluding unrealized gains and losses)	26	9	17
Unrealized gains (losses) on commodity risk management activities	6	(10)	16
Total segment margin	$ 290	$ 284	$ 6

Segment Adjusted EBITDA. For the three months ended March 31, 2020 compared to the same period last year, Segment Adjusted EBITDA related to our intrastate transportation segment decreased due to the net effects of the following:

- a decrease of $32 million in realized natural gas sales and other primarily due to lower realized gains from pipeline optimization activity;
- a decrease of $4 million in retention revenue due to lower natural gas prices; and
- an increase of $3 million in selling, general and administrative expenses primarily due to higher allocated corporate costs; partially offset by
- an increase of $17 million in realized storage margin primarily due to higher storage optimization;
- an increase of $7 million in transportation fees primarily due to volume ramp-ups on the Red Bluff Express pipeline and new contracts; and
- a decrease of $1 million in operating expenses primarily related to lower cost of fuel consumption resulting from lower natural gas prices.

Interstate Transportation and Storage

	Three Months Ended March 31,		
	2020	2019	Change
Natural gas transported (BBtu/d)	10,630	11,532	(902)
Natural gas sold (BBtu/d)	15	19	(4)
Revenues	$ 464	$ 498	$ (34)
Operating expenses, excluding non-cash compensation, amortization and accretion expenses	(143)	(146)	3
Selling, general and administrative expenses, excluding non-cash compensation, amortization and accretion expenses	(21)	(14)	(7)
Adjusted EBITDA related to unconsolidated affiliates	106	119	(13)
Other	(2)	(1)	(1)
Segment Adjusted EBITDA	$ 404	$ 456	$ (52)

Volumes. For the three months ended March 31, 2020 compared to the same period last year, transported volumes decreased primarily due to lower utilization of contracted capacity on our Panhandle and Trunkline pipelines.

Segment Adjusted EBITDA. For the three months ended March 31, 2020 compared to the same period last year, Segment Adjusted EBITDA related to our interstate transportation and storage segment decreased due to the net impacts of the following:

- a decrease of $34 million in revenues primarily due to a $16 million decrease resulting from a contractual rate adjustment on commitments at our Lake Charles LNG facility and a $20 million decrease primarily due to lower rates and volumes as a result of less favorable market conditions on our Rover, Panhandle, Transwestern and Trunkline pipelines;
- an increase of $7 million in selling, general and administrative expenses primarily due to higher overhead costs; and
- a decrease of $13 million in Adjusted EBITDA related to unconsolidated affiliates primarily due to an $11 million net decrease from our Midcontinent Express Pipeline joint venture as a result of less capacity sold and lower rates received following the expiration of certain contracts and a $2 million net decrease from our Citrus joint venture resulting from higher allocated expenses; partially offset by
- a decrease of $3 million in operating expenses primarily due to lower ad valorem taxes.

Midstream

	Three Months Ended March 31,		
	2020	2019	Change
Gathered volumes (BBtu/d)	13,346	12,718	628
NGLs produced (MBbls/d)	610	563	47
Equity NGLs (MBbls/d)	36	35	1
Revenues	$ 1,170	$ 1,718	$ (548)
Cost of products sold	575	1,141	(566)
Segment margin	595	577	18
Operating expenses, excluding non-cash compensation expense	(193)	(183)	(10)
Selling, general and administrative expenses, excluding non-cash compensation expense	(26)	(19)	(7)
Adjusted EBITDA related to unconsolidated affiliates	7	6	1
Other	—	1	(1)
Segment Adjusted EBITDA	$ 383	$ 382	$ 1

Volumes. Gathered volumes increased during the three months ended March 31, 2020 compared to the same period last year primarily due to increases in the Mid-Continent/Panhandle, Ark-La-Tex, Permian, South Texas and Northeast regions. NGL production increased due to increases in the Permian and Mid-Continent/Panhandle region, partially offset by ethane rejection in the South Texas region.

Segment Margin. The table below presents the components of our midstream segment margin. For the prior period included in the table below, the amounts previously reported for fee-based and non-fee-based margin have been adjusted to reflect reclassification of certain contractual minimum fees in order to conform to the current period classification:

	Three Months Ended March 31,		
	2020	2019	Change
Gathering and processing fee-based revenues	$ 530	$ 502	$ 28
Non-fee-based contracts and processing	65	75	(10)
Total segment margin	$ 595	$ 577	$ 18

Segment Adjusted EBITDA. For the three months ended March 31, 2020 compared to the same period last year, Segment Adjusted EBITDA related to our midstream segment increased due to the net impacts of the following:

- an increase of $28 million in fee-based margin due to volume growth in the Permian, Mid-Continent/Panhandle and Northeast regions; and
- an increase of $13 million in non fee-based margin due to increased throughput volume in the Permian region; partially offset by
- a decrease of $22 million in non fee-based margin due to lower NGL prices of $17 million and lower natural gas prices of $5 million;
- an increase of $10 million in operating expenses due to an increase of $6 million in maintenance project costs and $4 million in employee costs; and
- an increase of $7 million in selling, general and administrative expenses due to an increase in overhead costs allocated to the segment.

NGL and Refined Products Transportation and Services

	Three Months Ended March 31,		
	2020	2019	Change
NGL transportation volumes (MBbls/d)	1,398	1,178	220
Refined products transportation volumes (MBbls/d)	533	617	(84)
NGL and refined products terminal volumes (MBbls/d)	847	777	70
NGL fractionation volumes (MBbls/d)	804	678	126
Revenues	$ 2,715	$ 3,031	$ (316)
Cost of products sold	1,836	2,326	(490)
Segment margin	879	705	174
Unrealized (gains) losses on commodity risk management activities	(55)	57	(112)
Operating expenses, excluding non-cash compensation expense	(159)	(149)	(10)
Selling, general and administrative expenses, excluding non-cash compensation expense	(25)	(19)	(6)
Adjusted EBITDA related to unconsolidated affiliates	23	18	5
Segment Adjusted EBITDA	$ 663	$ 612	$ 51

Volumes. For the three months ended March 31, 2020 compared to the same period last year, throughput barrels on our Texas NGL pipeline system increased due to higher receipt of liquids production from both wholly-owned and third-party gas plants primarily in the Permian and North Texas regions. In addition, NGL transportation volumes increased on our Mariner East pipeline system.

Refined products transportation volumes decreased for the three months ended March 31, 2020 compared to the same period last year due to the closure of a third-party refinery during the third quarter of 2019 and various turnarounds performed at third party refineries, which negatively impacted supply to our refined products transportation system. These decreases in volumes were partially offset by the initiation of service on our JC Nolan diesel fuel pipeline in the third quarter of 2019.

NGL and refined products terminal volumes increased for the three months ended March 31, 2020 compared to the same period last year primarily due to higher volumes from our Mariner East system, the initiation of service on our JC Nolan diesel fuel pipeline in the third quarter of 2019, additional cargoes shipped out of our Nederland terminal, and the initiation of natural gasoline exports in July of 2019. These increases were partially offset by the closure of a third-party refinery during the third quarter of 2019 and various turnarounds performed at third-party refineries. For the three months ended March 31, 2019, NGL and refined products terminal volumes have been adjusted from amounts previously reported to be consistent with the current period presentation; specifically, those volumes were adjusted to exclude terminal volumes for which fees are attributable to storage capacity rather than terminal throughput.

Average fractionated volumes at our Mont Belvieu, Texas fractionation facility increased 19% for the three months ended March 31, 2020 compared to the same period last year primarily due to the commissioning of our sixth and seventh fractionators in February 2019 and February 2020, respectively.

Segment Margin. The components of our NGL and refined products transportation and services segment margin were as follows:

	Three Months Ended March 31,		
	2020	2019	Change
Transportation margin	$ 476	$ 363	$ 113
Fractionators and refinery services margin	179	168	11
Terminal services margin	151	135	16
Storage margin	63	56	7
Marketing margin	(45)	40	(85)
Unrealized gains (losses) on commodity risk management activities	55	(57)	112
Total segment margin	$ 879	$ 705	$ 174

Segment Adjusted EBITDA. For the three months ended March 31, 2020 compared to the same period last year, Segment Adjusted EBITDA related to our NGL and refined products transportation and services segment increased due to the net impacts of the following:

- an increase of $113 million in transportation margin primarily due to a $74 million increase from higher throughput volumes on our Mariner East pipeline system, a $35 million increase from higher throughput volumes received from the Permian region on our Texas NGL pipelines, a $7 million increase due to the initiation of service on our JC Nolan diesel fuel pipeline in the third quarter of 2019, and a $5 million increase due to higher throughput volumes from the Barnett region. These increases were partially offset by a $6 million decrease resulting from the closure of a third-party refinery during the third quarter of 2019;
- an increase of $16 million in terminal services margin primarily due to an $18 million increase from higher throughput on our Mariner East system partially offset by a $2 million decrease due to the closure of a third-party refinery;
- an increase of $11 million in fractionators and refinery services margin primarily due to a $10 million increase from the commissioning of our sixth and seventh fractionators in February 2019 and February 2020, respectively, and higher NGL volumes from the Permian region feeding our Mont Belvieu fractionation facility; and
- an increase of $7 million in storage margin primarily due to a $3 million increase in fees generated from exported volumes and a $3 million increase from higher throughput; partially offset by
- a decrease of $85 million in marketing margin primarily due to a $50 million decrease from inventory valuation adjustments and a $34 million decrease from capacity lease fees incurred by our marketing affiliate on our Mariner East pipeline system;
- an increase of $10 million in operating expenses primarily due to increases totaling $16 million for costs associated with operating additional assets as well as an increase in throughput volumes, partially offset by a $6 million decrease in power costs; and
- an increase of $6 million in selling, general and administrative expenses primarily due to a $6 million increase in overhead costs allocated to the segment.

Crude Oil Transportation and Services

	Three Months Ended March 31,		
	2020	2019	Change
Crude transportation volumes (MBbls/d)	4,454	4,048	406
Crude terminals volumes (MBbls/d)	2,996	2,560	436
Revenues	$ 4,213	$ 4,186	$ 27
Cost of products sold	3,458	3,162	296
Segment margin	755	1,024	(269)
Unrealized (gains) losses on commodity risk management activities	10	(109)	119
Operating expenses, excluding non-cash compensation expense	(158)	(150)	(8)
Selling, general and administrative expenses, excluding non-cash compensation expense	(28)	(20)	(8)
Adjusted EBITDA related to unconsolidated affiliates	12	(2)	14
Other	—	1	(1)
Segment Adjusted EBITDA	$ 591	$ 744	$ (153)

Volumes. For the three and nine months ended March 31, 2020 compared to the same periods last year, crude transportation and terminal volumes benefited from an increase in barrels through our existing Texas pipelines, our Bakken pipeline, the initiation of service on phase 2 of our Bayou Bridge pipeline in the second quarter of 2019, as well as the acquisition of pipeline assets during the fourth quarter of 2019. For the three months ended March 31, 2019, certain volumes have been reclassified from crude transportation volumes to crude terminal volumes to be consistent with the current period presentation.

Segment Adjusted EBITDA. For the three months ended March 31, 2020 compared to the same period last year, Segment Adjusted EBITDA related to our crude oil transportation and services segment decreased due to the net impacts of the following:

- a decrease of $150 million in segment margin (excluding unrealized gains and losses on commodity risk management activities) primarily due to a $206 million decrease (excluding a net change of $119 million in unrealized gains and losses on commodity risk management activities) from our crude oil acquisition and marketing business that was primarily from inventory valuation adjustments (a loss of $154 million for the current period compared to a gain of $36 million for the prior period) and a $58 million decrease on our Texas crude pipeline system due to lower average rates realized, partially offset by a $73 million increase in margin from terminal operations primarily due to assets acquired in 2019, a $20 million increase due to higher volumes on our Bakken Pipeline, and an $18 million increase due to higher volumes on our Bayou Bridge Pipeline;
- an increase of $8 million in operating expenses primarily due to costs related to assets acquired in 2019, partly offset by lower crude trucking expenses; and
- an increase of $8 million in selling, general and administrative expenses primarily due to a $3 million increase in allocated overhead, a $4 million increase in costs related to assets acquired in 2019, and a $1 million increase in legal expenses; partially offset by
- an increase of $14 million in Adjusted EBITDA related to unconsolidated affiliates due to assets acquired in 2019 and improved jet fuels sales by our joint ventures.

Investment in Sunoco LP

	Three Months Ended March 31,		
	2020	2019	Change
Revenues	$ 3,272	$ 3,692	$ (420)
Cost of products sold	3,164	3,322	(158)
Segment margin	108	370	(262)
Unrealized (gains) losses on commodity risk management activities	6	(6)	12
Operating expenses, excluding non-cash compensation expense	(109)	(98)	(11)
Selling, general and administrative expenses, excluding non-cash compensation expense	(30)	(24)	(6)
Adjusted EBITDA related to unconsolidated affiliates	2	—	2
Inventory valuation adjustments	227	(93)	320
Other	5	4	1
Segment Adjusted EBITDA	$ 209	$ 153	$ 56

The Investment in Sunoco LP segment reflects the consolidated results of Sunoco LP.

Segment Adjusted EBITDA. For the three months ended March 31, 2020 compared to the same period last year, Segment Adjusted EBITDA related to our investment in Sunoco LP segment increased due to the net impacts of the following:

- an increase of $70 million in gross profit on motor fuel sales, primarily due to a 32.6% increase in gross profit per gallon sold and the receipt of a $13 million make-up payment under a fuel supply agreement; partially offset by a 2.2% decrease in gallons sold;
- an increase in non-motor fuel sales gross profit of $2 million; and
- an increase in unconsolidated affiliate adjusted EBITDA of $2 million; partially offset by
- an increase of $17 million in operating expenses and selling, general and administrative expenses, excluding non-cash compensation, primarily attributable to a $16 million charge for current expected credit losses of Sunoco LP's accounts receivable in connection with the financial impact from COVID-19.

Investment in USAC

	Three Months Ended March 31,		
	2020	2019	Change
Revenues	$ 179	$ 171	$ 8
Cost of products sold	24	22	2
Segment margin	155	149	6
Operating expenses, excluding non-cash compensation expense	(35)	(35)	—
Selling, general and administrative expenses, excluding non-cash compensation expense	(14)	(13)	(1)
Segment Adjusted EBITDA	$ 106	$ 101	$ 5

The Investment in USAC segment reflects the consolidated results of USAC.

Segment Adjusted EBITDA. For the three months ended March 31, 2020 compared to the same period last year, Segment Adjusted EBITDA related to our investment in USAC segment increased due to the net impacts of the following:

- an increase of $6 million in segment margin primarily due to an increase revenues as a result of the increase in average revenue generating horsepower; partially offset by
- an increase of $1 million in selling, general and administrative expenses primarily due to an increase in the provision for expected credit losses.

All Other

	Three Months Ended March 31,		
	2020	2019	Change
Revenues	$ 513	$ 497	$ 16
Cost of products sold	415	455	(40)
Segment margin	98	42	56
Unrealized gains on commodity risk management activities	(5)	(1)	(4)
Operating expenses, excluding non-cash compensation expense	(38)	(7)	(31)
Selling, general and administrative expenses, excluding non-cash compensation expense	(35)	(11)	(24)
Adjusted EBITDA related to unconsolidated affiliates	—	(1)	1
Other and eliminations	19	13	6
Segment Adjusted EBITDA	$ 39	$ 35	$ 4

Amounts reflected in our all other segment primarily include:

- our natural gas marketing operations;
- our wholly-owned natural gas compression operations;
- a noncontrolling interest in PES. Prior to PES's reorganization in August 2018, ETO's 33% interest in PES was reflected as an unconsolidated affiliate; subsequent to the August 2018 reorganization, ETO holds an approximately 7.4% interest in PES and no longer reflects PES as an affiliate; and
- our investment in coal handling facilities; and
- our Canadian operations, which were acquired in the SemGroup acquisition in December 2019 and include natural gas gathering and processing assets.

Segment Adjusted EBITDA. For the three months ended March 31, 2020 compared to the same period last year, Segment Adjusted EBITDA related to our all other segment increased due to the net impacts of the following:

- an increase of $25 million from the acquisition of SemCAMS;
- an increase of $16 million from settlement payments received from our ownership of PES; and
- an increase of $5 million due to storage gains; partially offset by
- a decrease of $2 million due to lower sales of residue gas;
- a decrease of $3 million due to lower gas prices and increased power costs at our compression services business;
- a decrease of $4 million due to lower revenues from our compression equipment business;
- a decrease of $3 million due to higher expenses in our compression business resulting from lower cost recoveries and higher allocated costs;
- a decrease of $2 million due to power trading activities;
- a decrease of $10 million due to changes in eliminations of intersegment amounts, the net impacts of which are reflected in the all other segment; and
- a decrease of $20 million due to higher merger and acquisition expense.

LIQUIDITY AND CAPITAL RESOURCES

Overview

The Parent Company's principal sources of cash flow are derived from distributions related to its investment in ETO, which derives its cash flows from its subsidiaries, including ETO's investments in Sunoco LP and USAC.

The Parent Company's primary cash requirements are for general and administrative expenses, debt service requirements and distributions to its partners. The Parent Company currently expects to fund its short-term needs for such items with cash flows

from its direct and indirect investments in ETO. The Parent Company distributes its available cash remaining after satisfaction of the aforementioned cash requirements to its Unitholders on a quarterly basis.

The Parent Company expects ETO and its respective subsidiaries and investments in Sunoco LP and USAC to utilize their resources, along with cash from their operations, to fund their announced growth capital expenditures and working capital needs; however, the Parent Company may issue debt or equity securities from time to time, as it deems prudent to provide liquidity for new capital projects of its subsidiaries or for other partnership purposes.

Our ability to satisfy obligations and pay distributions to unitholders will depend on our future performance, which will be subject to prevailing economic, financial, business and weather conditions, and other factors, many of which are beyond management's control.

We currently expect capital expenditures in 2020 to be within the following ranges (excluding capital expenditures related to our investments in Sunoco LP and USAC):

	Growth		Maintenance	
	Low	High	Low	High
Intrastate transportation and storage	$ 10	$ 20	$ 40	$ 45
Interstate transportation and storage [1]	75	100	125	130
Midstream	400	425	105	110
NGL and refined products transportation and services	2,550	2,700	85	95
Crude oil transportation and services [1]	275	300	140	150
All other (including eliminations)	75	100	55	60
Total capital expenditures	$ 3,385	$ 3,645	$ 550	$ 590

[1] Includes capital expenditures related to our proportionate ownership of the Bakken, Rover and Bayou Bridge pipeline projects.

The assets used in our natural gas and liquids operations, including pipelines, gathering systems and related facilities, are generally long-lived assets and do not require significant maintenance capital expenditures. Accordingly, we do not have any significant financial commitments for maintenance capital expenditures in our businesses. From time to time we experience increases in pipe costs due to a number of factors, including but not limited to, delays from steel mills, limited selection of mills capable of producing large diameter pipe timely, higher steel prices and other factors beyond our control; however, we have included these factors in our anticipated growth capital expenditures for each year.

We generally fund maintenance capital expenditures and distributions with cash flows from operating activities. We generally fund growth capital expenditures with borrowings under credit facilities, long-term debt, the issuance of additional preferred units or a combination thereof.

Sunoco LP

Sunoco LP currently expects to spend approximately $30 million on growth capital and $75 million on maintenance capital for the full year 2020.

USAC

USAC currently plans to spend approximately $30 million in maintenance capital expenditures during 2020, including parts consumed from inventory.

Without giving effect to any equipment USAC may acquire pursuant to any future acquisitions, it currently has budgeted between $80 million and $90 million in expansion capital expenditures during 2020. As of March 31, 2020, USAC has binding commitments to purchase $34 million of additional compression units and serialized parts, all of which USAC expects to be delivered throughout 2020.

Cash Flows

Our cash flows may change in the future due to a number of factors, some of which we cannot control. These factors include regulatory changes, the price of our subsidiaries' products and services, the demand for such products and services, margin requirements resulting from significant changes in commodity prices, operational risks, the successful integration of our acquisitions and other factors.

Operating Activities

Changes in cash flows from operating activities between periods primarily result from changes in earnings (as discussed in “Results of Operations” above), excluding the impacts of non-cash items and changes in operating assets and liabilities (net of effects of acquisitions). Non-cash items include recurring non-cash expenses, such as depreciation, depletion and amortization expense and non-cash compensation expense. The increase in depreciation, depletion and amortization expense during the periods presented primarily resulted from construction and acquisition of assets, while changes in non-cash compensation expense resulted from changes in the number of units granted and changes in the grant date fair value estimated for such grants. Cash flows from operating activities also differ from earnings as a result of non-cash charges that may not be recurring, such as impairment charges and allowance for equity funds used during construction. The allowance for equity funds used during construction increases in periods when ETO has a significant amount of interstate pipeline construction in progress. Changes in operating assets and liabilities between periods result from factors such as the changes in the value of price risk management assets and liabilities, timing of accounts receivable collection, the timing of payments on accounts payable, the timing of purchases and sales of inventories and the timing of advances and deposits received from customers.

Three months ended March 31, 2020 compared to three months ended March 31, 2019. Cash provided by operating activities during 2020 was $1.82 billion as compared to $1.82 billion for 2019, and net loss was $964 million for 2020 and net income was $1.12 billion for 2019. The difference between net loss and net cash provided by operating activities for the three months ended March 31, 2020 primarily consisted of net changes in operating assets and liabilities (net of effects of acquisitions) of $164 million and other non-cash items totaling $2.56 billion.

The non-cash activity in 2020 and 2019 consisted primarily of depreciation, depletion and amortization of $867 million and $774 million, respectively, non-cash compensation expense of $22 million and $29 million, respectively, inventory valuation adjustments of $227 million and $93 million, respectively, and deferred income taxes of $42 million and $98 million, respectively. Non-cash activity also included losses on extinguishments of debt in 2020 and 2019 of $62 million and $18 million, respectively, impairment losses of $1,325 million and $50 million in 2020 and 2019, respectively.

Unconsolidated affiliate activity in 2020 consisted of equity in losses of $7 million and equity in earnings of $65 million in 2019. Cash distributions were received in 2020 and 2019 of $58 million and $66 million, respectively.

Cash paid for interest, net of interest capitalized, was $535 million and $638 million for the three months ended March 31, 2020 and 2019, respectively. Interest capitalized was $38 million and $43 million for the three months ended March 31, 2020 and 2019, respectively.

Investing Activities

Cash flows from investing activities primarily consist of cash amounts paid for acquisitions, capital expenditures, cash contributions to our joint ventures, and cash proceeds from sales or contributions of assets or businesses. In addition, distributions from equity investees are included in cash flows from investing activities if the distributions are deemed to be a return of the Partnership’s investment. Changes in capital expenditures between periods primarily result from increases or decreases in our growth capital expenditures to fund our construction and expansion projects.

Three months ended March 31, 2020 compared to three months ended March 31, 2019. Cash used in investing activities during 2020 was $1.56 billion as compared to $1.10 billion for 2019. Total capital expenditures (excluding the allowance for equity funds used during construction and net of contributions in aid of construction costs) for 2020 were $1.60 billion compared to $1.14 billion for 2019. Additional detail related to our capital expenditures is provided in the table below. During 2019, we received $93 million of cash proceeds from the sale of a noncontrolling interest in a subsidiary and paid $5 million in cash for all other acquisitions.

The following is a summary of capital expenditures (including only our proportionate share of the Bakken, Rover and Bayou Bridge pipeline projects and net of contributions in aid of construction costs) for the three months ended March 31, 2020:

	Capital Expenditures Recorded During Period		
	Growth	Maintenance	Total
Intrastate transportation and storage	$ 2	$ 24	$ 26
Interstate transportation and storage	8	7	15
Midstream	128	23	151
NGL and refined products transportation and services	774	16	790
Crude oil transportation and services	83	12	95
Investment in Sunoco LP	36	5	41
Investment in USAC	47	9	56
All other (including eliminations)	24	7	31
Total capital expenditures	$ 1,102	$ 103	$ 1,205

Financing Activities

Changes in cash flows from financing activities between periods primarily result from changes in the levels of borrowings and equity issuances, which are primarily used to fund our acquisitions and growth capital expenditures. Distributions increase between the periods based on increases in the number of common units outstanding or increases in the distribution rate.

Three months ended March 31, 2020 compared to three months ended March 31, 2019. Cash used in financing activities during 2020 was $354 million as compared to $607 million for 2019. During 2020, our subsidiaries received $1.58 billion in net proceeds from offerings of preferred units. During 2020, we had a net decrease in our debt level of $764 million compared to a net increase of $562 million for 2019. In 2020 and 2019, we paid debt issuance costs of $51 million and $84 million, respectively.

In 2020 and 2019, we paid distributions of $770 million and $800 million, respectively, to our partners. In 2020 and 2019, we paid distributions of $444 million and $425 million, respectively, to noncontrolling interests. In addition, we received capital contributions of $95 million in cash from noncontrolling interests in 2020 compared to $140 million in cash from noncontrolling interests in 2019.

Description of Indebtedness

Our outstanding consolidated indebtedness was as follows:

	March 31, 2020	December 31, 2019
Parent Company Indebtedness:		
ET Senior Notes due October 2020	$ —	$ 52
ET Senior Notes due March 2023	5	5
ET Senior Notes due January 2024	23	23
ET Senior Notes due June 2027	44	44
Subsidiary Indebtedness:		
ETO Senior Notes	37,782	36,118
Transwestern Senior Notes	400	575
Panhandle Senior Notes	235	235
Bakken Senior Notes	2,500	2,500
Sunoco LP Senior Notes and lease-related obligations	2,932	2,935
USAC Senior Notes	1,475	1,475
Credit facilities and commercial paper:		
ETO $2.00 billion Term Loan facility due October 2022	2,000	2,000
ETO $5.00 billion Revolving Credit Facility due December 2023 [(1)]	1,955	4,214
Sunoco LP $1.50 billion Revolving Credit Facility due July 2023	265	162
USAC $1.60 billion Revolving Credit Facility due April 2023	459	403
HFOTCO Tax Exempt Notes due 2050	225	225
SemCAMS Revolver due February 2024	88	92
SemCAMS Term Loan A due February 2024	244	269
Other long-term debt	13	2
Net unamortized premiums, discounts, and fair value adjustments	(10)	4
Deferred debt issuance costs	(303)	(279)
Total debt	50,332	51,054
Less: current maturities of long-term debt	33	26
Long-term debt, less current maturities	$ 50,299	$ 51,028

[(1)] Includes $113 million and $1.64 billion of commercial paper outstanding at March 31, 2020 and December 31, 2019, respectively.

Recent Transactions

ETO January 2020 Senior Notes Offering and Redemption

On January 22, 2020, ETO completed a registered offering (the "January 2020 Senior Notes Offering") of $1.00 billion aggregate principal amount of the Partnership's 2.900% Senior Notes due 2025, $1.50 billion aggregate principal amount of the Partnership's 3.750% Senior Notes due 2030 and $2.00 billion aggregate principal amount of the Partnership's 5.000% Senior Notes due 2050 (collectively, the "Notes"). The Notes are fully and unconditionally guaranteed by the Partnership's wholly-owned subsidiary, Sunoco Logistics Partners Operations L.P., on a senior unsecured basis.

Utilizing proceeds from the January 2020 Senior Notes Offering, ETO redeemed its $400 million aggregate principal amount of 5.75% Senior Notes due September 1, 2020, its $1.05 billion aggregate principal amount of 4.15% Senior Notes due October 1, 2020, its $1.14 billion aggregate principal amount of 7.50% Senior Notes due October 15, 2020, its $250 million aggregate principal amount of 5.50% Senior Notes due February 15, 2020, ET's $52 million aggregate principal amount of 7.50% Senior Notes due October 15, 2020 and Transwestern's $175 million aggregate principal amount of 5.36% Senior Notes due December 9, 2020.

Credit Facilities and Commercial Paper

ETO Term Loan

ETO's term loan credit agreement provides for a $2 billion three-year term loan credit facility (the "ETO Term Loan"). Borrowings under the term loan agreement mature on October 17, 2022 and are available for working capital purposes and for general partnership purposes. The term loan agreement is unsecured and is guaranteed by our subsidiary, Sunoco Logistics Operations.

As of March 31, 2020, the ETO Term Loan had $2 billion outstanding and was fully drawn. The weighted average interest rate on the total amount outstanding as of March 31, 2020 was 1.92%.

ETO Five-Year Credit Facility

ETO's revolving credit facility (the "ETO Five-Year Credit Facility") allows for unsecured borrowings up to $5.00 billion and matures on December 1, 2023. The ETO Five-Year Credit Facility contains an accordion feature, under which the total aggregate commitment may be increased up to $6.00 billion under certain conditions.

As of March 31, 2020, the ETO Five-Year Credit Facility had $1.96 billion of outstanding borrowings, $113 million of which was commercial paper. The amount available for future borrowings was $2.97 billion after taking into account letters of credit of $72 million. The weighted average interest rate on the total amount outstanding as of March 31, 2020 was 2.24%.

ETO 364-Day Facility

ETO's 364-day revolving credit facility (the "ETO 364-Day Facility") allows for unsecured borrowings up to $1.00 billion and matures on November 27, 2020. As of March 31, 2020, the ETO 364-Day Facility had no outstanding borrowings.

Sunoco LP Credit Facility

Sunoco LP maintains a $1.50 billion revolving credit facility (the "Sunoco LP Credit Facility"), which matures in July 2023. As of March 31, 2020, the Sunoco LP Credit Facility had $265 million of outstanding borrowings and $8 million in standby letters of credit. As of March 31, 2020 Sunoco LP had $1.23 billion of availability under the Sunoco LP Credit Facility. The weighted average interest rate on the total amount outstanding as of March 31, 2020 was 2.63%.

USAC Credit Facility

USAC maintains a $1.60 billion revolving credit facility (the "USAC Credit Facility"), with a further potential increase of $400 million, which matures in April 2023. As of March 31, 2020, the USAC Credit Facility had $459 million of outstanding borrowings and no outstanding letters of credit. As of March 31, 2020, USAC had $1.14 billion of borrowing base availability and, subject to compliance with the applicable financial covenants, available borrowing capacity of $186 million under the USAC Credit Facility. The weighted average interest rate on the total amount outstanding as of March 31, 2020 was 3.67%.

Covenants Related to Our Credit Agreements

We and our subsidiaries were in compliance with all requirements, tests, limitations, and covenants related to our debt agreements as of March 31, 2020.

CASH DISTRIBUTIONS

Cash Distributions Paid by the Parent Company

Under the Parent Company partnership agreement, the Parent Company will distribute all of its Available Cash, as defined in the partnership agreement, within 50 days following the end of each fiscal quarter. Available Cash generally means, with respect to any quarter, all cash on hand at the end of such quarter less the amount of cash reserves that are necessary or appropriate in the reasonable discretion of our general partner that is necessary or appropriate to provide for future cash requirements.

Distributions declared and/or paid subsequent to December 31, 2019 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2019	February 7, 2020	February 19, 2020	$ 0.3050
March 31, 2020	May 7, 2020	May 19, 2020	0.3050

Cash Distributions Paid by Subsidiaries

ETO, Sunoco LP and USAC are required by their respective partnership agreements to distribute all cash on hand at the end of each quarter, less appropriate reserves determined by the board of directors of their respective general partners.

Cash Distributions Paid by ETO

Distributions on ETO preferred units declared and/or paid by ETO subsequent to December 31, 2019 were as follows:

Period Ended	Record Date	Payment Date	Series A [1]	Series B [1]	Series C	Series D	Series E	Series F [2]	Series G [2]
December 31, 2019	February 3, 2020	February 18, 2020	$ 31.25	$ 33.125	$ 0.4609	$ 0.4766	$ 0.4750	$ —	$ —
March 31, 2020	May 1, 2020	May 15, 2020	—	—	0.4609	0.4766	0.4750	21.19	22.36

(1) ETO Series A Preferred Unit and ETO Series B Preferred Unit distributions are paid on a semi-annual basis.

(2) ETO Series F and G Preferred Unit distributions related to the period ended March 31, 2020 represent a prorated initial distribution. Distributions are paid on a semi-annual basis.

Cash Distributions Paid by Sunoco LP

Distributions declared and/or paid by Sunoco LP subsequent to its common unitholders December 31, 2019 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2019	February 7, 2020	February 19, 2020	$ 0.8255
March 31, 2020	May 7, 2020	May 19, 2020	0.8255

Cash Distributions Paid by USAC

Distributions declared and/or paid by USAC to its common unitholders subsequent to December 31, 2019 were as follows:

Quarter Ended	Record Date	Payment Date	Rate
December 31, 2019	January 27, 2020	February 7, 2020	$ 0.5250
March 31, 2020	April 27, 2020	May 8, 2020	0.5250

ESTIMATES AND CRITICAL ACCOUNTING POLICIES

The selection and application of accounting policies is an important process that has developed as our business activities have evolved and as the accounting rules have developed. Accounting rules generally do not involve a selection among alternatives, but involve an implementation and interpretation of existing rules, and the use of judgment applied to the specific set of circumstances existing in our business. We make every effort to properly comply with all applicable rules, and we believe the proper implementation and consistent application of the accounting rules are critical. We describe our significant accounting policies in Note 2 to our consolidated financial statements in the Partnership's Annual Report on Form 10-K filed with the SEC on February 21, 2020. See Note 1 in "Item 1. Financial Statements" for information regarding recent changes to the Partnership's critical accounting policies related to inventory.

RECENT ACCOUNTING PRONOUNCEMENTS

Currently, there are no accounting pronouncements that have been issued, but not yet adopted, that are expected to have a material impact on the Partnership's financial position or results of operations.

FORWARD-LOOKING STATEMENTS

This quarterly report contains various forward-looking statements and information that are based on our beliefs and those of our General Partner, as well as assumptions made by and information currently available to us. These forward-looking statements are identified as any statement that does not relate strictly to historical or current facts. When used in this annual report, words such as "anticipate," "project," "expect," "plan," "goal," "forecast," "estimate," "intend," "could," "believe," "may," "will" and similar expressions and statements regarding our plans and objectives for future operations, are intended to identify forward-looking statements. Although we and our General Partner believe that the expectations on which such forward-looking statements are

based are reasonable, neither we nor our General Partner can give assurances that such expectations will prove to be correct. Forward-looking statements are subject to a variety of risks, uncertainties and assumptions. If one or more of these risks or uncertainties materialize, or if underlying assumptions prove incorrect, our actual results may vary materially from those anticipated, estimated, projected or expected. Among the key risk factors that may have a direct bearing on our results of operations and financial condition are:

- changes in the long-term supply of and demand for natural gas, NGLs, refined products and/or crude oil, including as a result of uncertainty regarding the length of time it will take for the United States and the rest of the world to slow the spread of the COVID-19 virus to the point where applicable authorities are comfortable easing current restrictions on various commercial and economic activities; such restrictions are designed to protect public health but also have the effect of reducing demand for natural gas, NGLs, refined products and crude oil;
- the severity and duration of world health events, including the recent COVID-19 pandemic, related economic repercussions, actions taken by governmental authorities and other third parties in response to the pandemic and the resulting severe disruption in the oil and gas industry and negative impact on demand for natural gas, NGLs, refined products and crude oil, which may negatively impact our business;
- changes in general economic conditions and changes in economic conditions of the crude oil and natural gas industries specifically, including the current significant surplus in the supply of oil and actions by foreign oil-producing nations with respect to oil production levels and announcements of potential changes in such levels, including the ability of those countries to agree on and comply with supply limitation;
- uncertainty regarding the timing, pace and extent of an economic recovery in the United States and elsewhere, which in turn will likely affect demand for natural gas, NGLs, refined products and crude oil and therefore the demand for midstream services we provide and the commercial opportunities available to us;
- the deterioration of the financial condition of our customers and the potential renegotiation or termination of customer contracts as a result of such deterioration;
- operational challenges relating to the COVID-19 pandemic and efforts to mitigate the spread of the virus, including logistical challenges, protecting the health and well-being of our employees, remote work arrangements, performance of contracts and supply chain disruptions;
- actions taken by federal, state or local governments to require producers of natural gas, NGL, refined products and crude oil to proration or cut their production levels as a way to address any excess market supply situations;
- the ability of our subsidiaries to make cash distributions to us, which is dependent on their results of operations, cash flows and financial condition;
- the actual amount of cash distributions by our subsidiaries to us;
- the volumes transported on our subsidiaries' pipelines and gathering systems;
- the level of throughput in our subsidiaries' processing and treating facilities;
- the fees our subsidiaries charge and the margins they realize for their gathering, treating, processing, storage and transportation services;
- the prices and market demand for, and the relationship between, natural gas and NGLs;
- energy prices generally;
- the prices of natural gas and NGLs compared to the price of alternative and competing fuels;
- the general level of petroleum product demand and the availability and price of NGL supplies;
- the level of domestic natural gas, NGL, refined products and crude oil production;
- the availability of imported natural gas, NGLs, refined products and crude oil;
- actions taken by foreign oil and gas producing nations;
- the political and economic stability of petroleum producing nations;
- the effect of weather conditions on demand for natural gas, NGLs, refined products and crude oil;
- availability of local, intrastate and interstate transportation systems;
- the continued ability to find and contract for new sources of natural gas supply;
- availability and marketing of competitive fuels;

- the impact of energy conservation efforts;
- energy efficiencies and technological trends;
- governmental regulation and taxation;
- changes to, and the application of, regulation of tariff rates and operational requirements related to our subsidiaries' interstate and intrastate pipelines;
- hazards or operating risks incidental to the gathering, treating, processing and transporting of natural gas and NGLs;
- competition from other midstream companies and interstate pipeline companies;
- loss of key personnel;
- loss of key natural gas producers or the providers of fractionation services;
- reductions in the capacity or allocations of third-party pipelines that connect with our subsidiaries pipelines and facilities;
- the effectiveness of risk-management policies and procedures and the ability of our subsidiaries liquids marketing counterparties to satisfy their financial commitments;
- the nonpayment or nonperformance by our subsidiaries' customers;
- regulatory, environmental, political and legal uncertainties that may affect the timing and cost of our subsidiaries' internal growth projects, such as our subsidiaries' construction of additional pipeline systems;
- risks associated with the construction of new pipelines and treating and processing facilities or additions to our subsidiaries' existing pipelines and facilities, including difficulties in obtaining permits and rights-of-way or other regulatory approvals and the performance by third-party contractors;
- the availability and cost of capital and our subsidiaries' ability to access certain capital sources;
- a deterioration of the credit and capital markets;
- risks associated with the assets and operations of entities in which our subsidiaries own less than a controlling interests, including risks related to management actions at such entities that our subsidiaries may not be able to control or exert influence;
- the ability to successfully identify and consummate strategic acquisitions at purchase prices that are accretive to our financial results and to successfully integrate acquired businesses;
- changes in laws and regulations to which we are subject, including tax, environmental, transportation and employment regulations or new interpretations by regulatory agencies concerning such laws and regulations; and
- the costs and effects of legal and administrative proceedings.

Many of the foregoing risks and uncertainties are, and will be, heightened by the COVID-19 pandemic and any further worsening of the global business and economic environment. New factors emerge from time to time, and it is not possible for us to predict all such factors. Should one or more of the risks or uncertainties described in this Quarterly Report on Form 10-Q or our Annual Report on Form 10-K occur, or should underlying assumptions prove incorrect, actual results and plans could differ materially from those expressed in any forward-looking statements.

You should not put undue reliance on any forward-looking statements. When considering forward-looking statements, please review the risks described under "Item 1A. Risk Factors" in our Annual Report on Form 10-K and "Part II, Item 1A. Risk Factors" in this Quarterly Report on Form 10-Q. Any forward-looking statement made by us in this Quarterly Report on Form 10-Q is based only on information currently available to us and speaks only as of the date on which it is made. We undertake no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information contained in Item 3 updates, and should be read in conjunction with, information set forth in Part II, Item 7A in the Partnership's Annual Report on Form 10-K for the year ended December 31, 2019 filed with the SEC on February 21, 2020, in addition to the accompanying notes and management's discussion and analysis of financial condition and results of operations presented in Items 1 and 2 of this Quarterly Report on Form 10-Q. Our quantitative and qualitative disclosures about market risk are consistent with those discussed in our Annual Report on Form 10-K for the year ended December 31, 2019. Since December 31, 2019, there have been no material changes to our primary market risk exposures or how those exposures are managed.

Commodity Price Risk

The table below summarizes our commodity-related financial derivative instruments and fair values, including derivatives related to our consolidated subsidiaries, as well as the effect of an assumed hypothetical 10% change in the underlying price of the commodity. Dollar amounts are presented in millions.

	March 31, 2020			December 31, 2019		
	Notional Volume	Fair Value Asset (Liability)	Effect of Hypothetical 10% Change	Notional Volume	Fair Value Asset (Liability)	Effect of Hypothetical 10% Change
Mark-to-Market Derivatives						
(Trading)						
Natural Gas (BBtu):						
Basis Swaps IFERC/NYMEX [1]	(19,673)	$ 14	$ 4	(35,208)	$ 2	$ 5
Fixed Swaps/Futures	1,688	—	—	1,483	—	—
Power (Megawatt):						
Forwards	2,125,200	6	5	3,213,450	6	8
Futures	329,896	—	1	(353,527)	1	2
Options – Puts	621,860	2	—	51,615	1	—
Options – Calls	4,035,972	1	—	(2,704,330)	1	—
(Non-Trading)						
Natural Gas (BBtu):						
Basis Swaps IFERC/NYMEX	(15,860)	10	9	(18,923)	(35)	15
Swing Swaps IFERC	31,505	—	2	(9,265)	—	4
Fixed Swaps/Futures	(1,425)	(2)	1	(3,085)	(1)	1
Forward Physical Contracts	(36,691)	5	8	(13,364)	3	3
NGLs (MBbls) – Forwards/Swaps	(2,235)	36	8	(1,300)	(18)	18
Refined Products (MBbls) – Futures	(1,779)	(7)	4	(2,473)	(2)	16
Crude (MBbls) – Forwards/Swaps	5,260	3	1	4,465	13	2
Corn (thousand bushels)	(140)	—	—	(1,210)	—	—
Fair Value Hedging Derivatives						
(Non-Trading)						
Natural Gas (BBtu):						
Basis Swaps IFERC/NYMEX	(32,695)	(1)	8	(31,780)	1	7
Fixed Swaps/Futures	(32,695)	—	9	(31,780)	23	7

[1] Includes aggregate amounts for open positions related to Houston Ship Channel, Waha Hub, NGPL TexOk, West Louisiana Zone and Henry Hub locations.

The fair values of the commodity-related financial positions have been determined using independent third-party prices, readily available market information and appropriate valuation techniques. Non-trading positions offset physical exposures to the cash market; none of these offsetting physical exposures are included in the above tables. Price-risk sensitivities were calculated by assuming a theoretical 10% change (increase or decrease) in price regardless of term or historical relationships between the contractual price of the instruments and the underlying commodity price. Results are presented in absolute terms and represent a potential gain or loss in net income or in other comprehensive income. In the event of an actual 10% change in prompt month natural gas prices, the fair value of our total derivative portfolio may not change by 10% due to factors such as when the financial instrument settles and the location to which the financial instrument is tied (i.e., basis swaps) and the relationship between prompt month and forward months.

Interest Rate Risk

As of March 31, 2020, we and our subsidiaries had $5.84 billion of floating rate debt outstanding. A hypothetical change of 100 basis points would result in a maximum potential change to interest expense of $58 million annually; however, our actual change in interest expense may be less in a given period due to interest rate floors included in our variable rate debt instruments. We

manage a portion of our interest rate exposure by utilizing interest rate swaps, including forward-starting interest rate swaps to lock-in the rate on a portion of anticipated debt issuances.

The following table summarizes our interest rate swaps outstanding (dollars in millions), none of which are designated as hedges for accounting purposes:

		Notional Amount Outstanding	
Term	Type[1]	March 31, 2020	December 31, 2019
July 2020[2][3]	Forward-starting to pay a fixed rate of 3.52% and receive a floating rate	$ —	$ 400
July 2021[2]	Forward-starting to pay a fixed rate of 3.55% and receive a floating rate	400	400
July 2022[2]	Forward-starting to pay a fixed rate of 3.80% and receive a floating rate	400	400

[1] Floating rates are based on 3-month LIBOR.

[2] Represents the effective date. These forward-starting swaps have terms of 30 years with a mandatory termination date the same as the effective date.

[3] The July 2020 interest rate swaps were terminated in January 2020.

A hypothetical change of 100 basis points in interest rates for these interest rate swaps would result in a net change in the fair value of interest rate derivatives and earnings (recognized in gains and losses on interest rate derivatives) of $312 million as of March 31, 2020. For the forward-starting interest rate swaps, a hypothetical change of 100 basis points in interest rates would not affect cash flows until the swaps are settled.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that information required to be disclosed by us, including our consolidated entities, in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Under the supervision and with the participation of senior management, including the Chief Executive Officer ("Principal Executive Officer") and the Chief Financial Officer ("Principal Financial Officer") of our General Partner, we evaluated our disclosure controls and procedures, as such term is defined under Rule 13a–15(e) promulgated under the Exchange Act. Based on this evaluation, the Principal Executive Officer and the Principal Financial Officer of our General Partner concluded that our disclosure controls and procedures were effective as of March 31, 2020 to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to management, including the Principal Executive Officer and Principal Financial Officer of our General Partner, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal controls over financial reporting (as defined in Rule 13(a)-15(f) or Rule 15d-15(f) of the Exchange Act) during the three months ended March 31, 2020 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For information regarding legal proceedings, see our Annual Report on Form 10-K filed with the SEC on February 21, 2020 and Note 10 – Regulatory Matters, Commitments, Contingencies and Environmental Liabilities of the Notes to Consolidated Financial Statements of Energy Transfer LP and Subsidiaries included in this Quarterly Report on Form 10-Q for the quarter ended March 31, 2020.

Additionally, we have received notices of violations and potential fines under various federal, state and local provisions relating to the discharge of materials into the environment or protection of the environment. While we believe that even if any one or more of the environmental proceedings listed below were decided against us, it would not be material to our financial position, results of operations or cash flows, we are required to report governmental proceedings if we reasonably believe that such proceedings will result in monetary sanctions in excess of $100,000.

Pursuant to the instructions to Form 10-Q, matters disclosed in this Part II, Item 1 include any reportable legal proceeding (i) that has been terminated during the period covered by this report, (ii) that became a reportable event during the period covered by this report, or (iii) for which there has been a material development during the period covered by this report.

On June 4, 2019, the Oklahoma Corporation Commission's ("OCC") Transportation Division filed a complaint against SPLP seeking a penalty of up to $1 million related to a May 2018 rupture near Edmond, Oklahoma. The rupture occurred on the Noble to Douglas 8" pipeline in an area of external corrosion and caused the release of approximately fifteen barrels of crude oil. SPLP responded immediately to the release and remediated the surrounding environment and pipeline in cooperation with the OCC. The OCC filed the complaint alleging that SPLP failed to provide adequate cathodic protection to the pipeline causing the failure. SPLP negotiated a settlement agreement with the OCC for $500,000 and agreed to perform close interval potential surveys on all SPLP intrastate hazardous liquid transmission pipeline segments in Oklahoma, which could affect high consequence areas. SPLP is awaiting signature by the OCC commissioners to finalize the settlement agreement.

For a description of other legal proceedings, see Note 10 to our consolidated financial statements included in "Item 1. Financial Statements."

ITEM 1A. RISK FACTORS

The following risk factors should be read in conjunction with our risk factors described in "Part I - Item 1A. Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2019 filed with the SEC on February 21, 2020.

The outbreak of COVID-19 and recent geopolitical developments in the crude oil market could adversely impact our business, financial condition and results of operations.

On January 30, 2020, the World Health Organization ("WHO") announced a global health emergency because of a new strain of coronavirus known as COVID-19 due to the risks it imposes on the international community as the virus spreads globally. In March 2020, the WHO classified the COVID-19 outbreak as a pandemic, based on the rapid increase in exposure globally. The global spread of COVID-19 caused a significant decline in economic activity and a reduced demand for goods and services, particularly in the energy industry, due to reduced operations and/or closures of businesses, "shelter in place" and other similar requirements imposed by government authorities, or other actions voluntarily undertaken by individuals and businesses concerned about exposure to COVID-19. The extent to which the COVID-19 pandemic continues to impact our business, operations and financial results depends on numerous evolving factors that we cannot accurately predict, including: the duration and scope of the pandemic; governmental, business and individuals' actions taken in response to the pandemic and the associated impact on economic activity; the effect on the level of demand for natural gas, NGLs, refined products and/or crude oil; our ability to procure materials and services from third parties that are necessary for the operation of our business; our ability to provide our services, including as a result of travel restrictions on our employees and employees of third parties that we utilize in connection with our services; the potential for key executives or employees to fall ill with COVID-19; and the ability of our customers to pay for our services if their businesses suffer as a result of the pandemic.

In addition, policy disputes between the Organization of Petroleum Exporting Countries ("OPEC") and Russia in the first quarter of 2020 resulted in Saudi Arabia significantly discounting the price of its crude oil, as well as Saudi Arabia and Russia significantly increasing the amount of crude oil they produce. These actions have led to significant declines in crude oil prices. More specifically, the spot price for West Texas Intermediate (WTI) crude oil, for physical delivery at Cushing, Oklahoma, decreased from $63.27 per barrel on January 6, 2020 to $-(36.98) per barrel on April 20, 2020.

Reduced demand for natural gas, NGLs, refined products and/or crude oil caused by the COVID-19 pandemic and a continuation of low WTI crude oil prices caused by the actions of foreign oil-producing nations may result in the shut-in of production from

U.S. oil and gas wells, which in turn may result in decreased utilization of our midstream services related to crude oil, NGLs, refined products and natural gas. In addition, reduced demand and increased supply of crude oil has resulted in an increase in worldwide crude oil storage inventories, which limits our options for end-markets for the products we transport.

The factors discussed above could have a material adverse effect on our business, results of operations and financial condition. In addition, significant price fluctuations for natural gas, NGLs, refined products and oil commodities could materially affect the value of our inventory, as well as the linefill and tank bottoms that we account for as non-current assets. We may be forced to delay some of our capital projects and our customers, who may be in financial distress, may slow down decision-making, delay planned projects or seek to renegotiate or terminate agreements with us. To the extent our counterparties are successful, we may not be able to obtain new contract terms that are favorable to us or to replace contracts that are terminated. Counterparties may also be forced to file for bankruptcy protection, in which case our existing contracts with those counterparties may be rejected by the bankruptcy court.

Further, the effects of the pandemic and geopolitical developments have caused a decline in the trading price of our common units, which increases our cost of capital. Additional capital may be more difficult for us to obtain or available only on terms less favorable to us. Our inability to fund capital expenditures could have a material impact on our results of operations.

At this time, we cannot estimate the magnitude and duration of potential social, economic and labor instability as a direct result of COVID-19, or of potential industry disruption as a direct result of geopolitical developments in the oil market. Should any of these potential impacts continue for an extended period of time, it will have a negative impact on the demand for our services and an adverse effect on our financial position and results of operations. To the extent these factors adversely affect our business and financial results, they may also have the effect of heightening many of the other risks described in this “Risk Factors” section and the “Risk Factors” section of our Annual Report on Form 10-K for the year ended December 31, 2019, such as those relating to our indebtedness, our need to generate sufficient cash flows to service our indebtedness and our ability to comply with the covenants contained in the agreements that govern our indebtedness.

Income from the Partnership’s midstream, transportation, terminalling and storage operations is exposed to risks due to fluctuations in the demand for and price of natural gas, NGLs, refined products and crude oil that are beyond our control.

The prices for natural gas, NGLs, crude oil and refined products reflect market demand that fluctuates with changes in global and United States economic conditions and other factors, including:

- the level of domestic natural gas, NGL, refined products and oil production;
- the level of natural gas, NGL, refined products and oil imports and exports, including liquefied natural gas;
- actions taken by natural gas and oil producing nations;
- instability or other events affecting natural gas and oil producing nations;
- the impact of weather, public health crises such as pandemics (including COVID-19), and other events of nature on the demand for natural gas, NGLs, refined products and oil;
- the availability of storage, terminal and transportation systems, and refining, processing and treating facilities;
- the price, availability and marketing of competitive fuels;
- the demand for electricity;
- activities by non-governmental organizations to limit certain sources of funding for the energy sector or restrict the exploration, development and production of oil and natural gas and related products;
- the cost of capital needed to maintain or increase production levels and to construct and expand facilities;
- the impact of energy conservation and fuel efficiency efforts; and
- the extent of governmental regulations, taxation, fees and duties.

In the past, the prices of natural gas, NGLs, refined products and oil have been extremely volatile, and we expect this volatility to continue.

Any loss of business from existing customers or our inability to attract new customers due to a decline in demand for natural gas, NGLs, refined products or oil could have a material adverse effect on our revenues and results of operations. In addition, significant price fluctuations for natural gas, NGL, refined products and oil commodities could materially affect our profitability.

ITEM 6. EXHIBITS

The exhibits listed below are filed or furnished, as indicated, as part of this report:

Exhibit Number	Description
3.1	Certificate of Limited Partnership of Energy Transfer Equity, L.P. (incorporated by reference to Exhibit 3.2 of Form S-1, File No. 333-128097, filed September 2, 2005)
3.2	Certificate of Amendment of Certificate of Limited Partnership of Energy Transfer Equity, L.P., dated as of October 19, 2018 (incorporated by reference to Exhibit 3.1 of Form 8-K, File No. 1-32740, filed October 19, 2018)
3.3	Third Amended Restated Agreement of Limited Partnership of Energy Transfer Equity, L.P., dated February 8, 2006 (incorporated by reference to Exhibit 3.1 of Form 8-K, File No. 1-32740, filed February 14, 2006)
3.4	Amendment No. 1 to Third Amended and Restated Agreement of Limited Partnership of Energy Transfer Equity, L.P. dated November 1, 2006 (incorporated by reference to Exhibit 3.3.1 of Form 10-K, File No. 1-32740, filed November 29, 2006)
3.5	Amendment No. 2 to Third Amended and Restated Agreement of Limited Partnership of Energy Transfer Equity, L.P., dated November 9, 2007 (incorporated by reference to Exhibit 3.3.2 of Form 8-K, File No. 1-32740, filed November 13, 2007)
3.6	Amendment No. 3 to Third Amended and Restated Agreement of Limited Partnership of Energy Transfer Equity, L.P., dated May 26, 2010 (incorporated by reference to Exhibit 3.1 of Form 8-K, File No. 1-32740, filed June 2, 2010)
3.7	Amendment No. 4 to Third Amended and Restated Agreement of Limited Partnership of Energy Transfer Equity, L.P., dated December 23, 2013 (incorporated by reference to Exhibit 3.1 of Form 8-K, File No. 1-32740, filed December 27, 2013)
3.8	Amendment No. 5 to Third Amended and Restated Agreement of Limited Partnership of Energy Transfer Equity, L.P., dated March 8, 2016 (incorporated by reference to Exhibit 3.1 of Form 8-K, File No. 1-32740, filed March 9, 2016)
3.9	Amendment No. 6 to Third Amended and Restated Agreement of Limited Partnership of Energy Transfer Equity, L.P., dated as of October 19, 2018 (incorporated by reference to Exhibit 3.9 of Form 10-Q, File No. 1-32740, filed November 8, 2018)
3.10	Amendment No. 7 to Third Amended and Restated Agreement of Limited Partnership of Energy Transfer LP dated as of August 6, 2019 (incorporated by reference to Exhibit 3.10 of Form 10-Q, File No. 1-32740, filed August 8, 2019)

ENERGY TRANSFER LP

By: LE GP, LLC, its general partner

Date: May 11, 2020

By: /s/ A. Troy Sturrock

A. Troy Sturrock

Senior Vice President, Controller and Principal Accounting Officer (duly authorized to sign on behalf of the registrant)

May 11, 2020

The Audit Committee of the Board of Directors
LE GP, LLC
8111 Westchester Drive, Suite 600
Dallas, Texas 75225

Dear Directors:

We are providing this letter solely for inclusion as an exhibit to Energy Transfer LP's (the "Partnership") Form 10-Q filing pursuant to Item 601 of Regulation S-K.

As stated in Note 1 to the unaudited condensed consolidated financial statements included in the Partnership's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2020, the Partnership changed its accounting for certain barrels of crude oil that were previously accounted for as inventory, which resulted in a reclassification of amounts attributable to certain pipeline linefill and tank bottoms inventory from inventory (included in current assets) to non-current assets. Note 1 also states management's belief that the newly adopted accounting principle is preferable in the circumstances because it more closely aligns the accounting policies across the consolidated entity and it better represents the economic results of the Partnership's crude oil acquisition and marketing business by reducing volatility resulting from market price adjustments to crude oil barrels that are not expected to be sold or liquidated in the near term.

With regard to the aforementioned accounting change, it should be understood that authoritative criteria have not been established for evaluating the preferability of one acceptable method of accounting over another acceptable method and, in expressing our concurrence below, we have relied on management's business planning and judgment and on management's determination that this change in accounting principle is preferable.

Based on our reading of management's stated reasons and justification for this change in accounting principle in the Form 10-Q, and our discussions with management as to their judgment about the relevant business planning factors relating to the change, we concur with management that the newly adopted method of accounting is preferable in the Partnership's circumstances.

We have not audited the application of the aforementioned accounting change to the financial statements included in Part I of the Partnership's Form 10-Q. We also have not audited any consolidated financial statements of the Partnership as of any date or for any period subsequent to December 31, 2019. Accordingly, we do not express an opinion on whether the accounting for the change in accounting principle has been properly applied or whether the aforementioned financial statements are fairly presented in conformity with accounting principles generally accepted in the United States of America.

Sincerely,

/s/ GRANT THORNTON LLP

Dallas, Texas

Exhibit 31.1

CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Kelcy L. Warren, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Energy Transfer LP;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Subject: Request for Adequate Assurance - CPS Energy to Houston Pipe Line Company LP/Oasis Pipeline, LP
Attachments: image00200002.png

Good Afternoon Ken,

Not sure if you are the correct contact I should be speaking with, but if not, could you please forward to the correct individual.

Due to the unprecedented weather event over the past 10 days, the price of natural gas rose dramatically. As a result, our credit exposure to CPS Energy has risen accordingly. Therefore, Houston Pipe Line Company LP (HPL) and Oasis Pipeline, LP (Oasis) is requesting Adequate Assurance in the form of an irrevocable standby letter of credit or cash to cover our unsecured credit exposure of approximately $317.5MM (HPL = 124.6MM; Oasis = $192.9MM). Please review and advise.

Thank You,

Subject: RE: Liquidity Filings

Cory/Orlando,

Has CPS made a decision to early pay the amount owed to Oasis Pipeline LP and Houston Pipe Line Company LP? The amount owed to these two companies is $316,618,904 and we would really like to see CPS pay down some amount as this amount exceeds the amount of open credit we extend to CPS by several orders of magnitude. Please let me know if you have any questions. Thanks, jc

Subject: RE: [InternetMail]FW: Request for Adequate Assurance - CPS Energy to Houston Pipe Line Company LP/Oasis Pipeline, LP
Attachments: image00800003.png

Hi JC and Al,

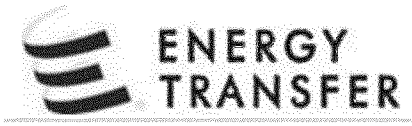
Can you please explain the reason for this request and identify the section in the NAESB that supports your position?

Based on our review of the NAESB, we don't see related wording nor a collateral threshold table by which an exposure calculation could be done.

For additional context, CPS Energy has not experienced any change in creditworthiness that would raise concerns over our ability to perform our contractual obligations successfully. Please note that CPS Energy received an AA rating from S&P, an AA1 rating from Moody's, and an AA+ rating from Fitch. Additionally, we have an excellent payment record, a solid balance sheet, and a long-time relationship with Energy Transfer.

Thank you in advance for your consideration in addressing this matter.

Regards,



Jimmy Kuo, CPA

Robert,

Please see our collateral call below. The weather event of last week caused nat gas prices to rise dramatically so our exposure to CPS has increased accordingly. If you need detail on the trades, we can send it. Just let us know but either way we need to hear from CPS on our collateral call. Thanks, jc

Subject: Request for Adequate Assurance - CPS Energy to Houston Pipe Line Company LP/Oasis Pipeline, LP
Importance: High

Good Afternoon Ken,

Not sure if you are the correct contact I should be speaking with, but if not, could you please forward to the correct individual.

Due to the unprecedented weather event over the past 10 days, the price of natural gas rose dramatically. As a result, our credit exposure to CPS Energy has risen accordingly. Therefore, Houston Pipe Line Company LP (HPL) and Oasis Pipeline, LP (Oasis) is requesting Adequate Assurance in the form of an irrevocable standby letter of credit or cash to cover our unsecured credit exposure of approximately $317.5MM (HPL = 124.6MM; Oasis = $192.9MM). Please review and advise.

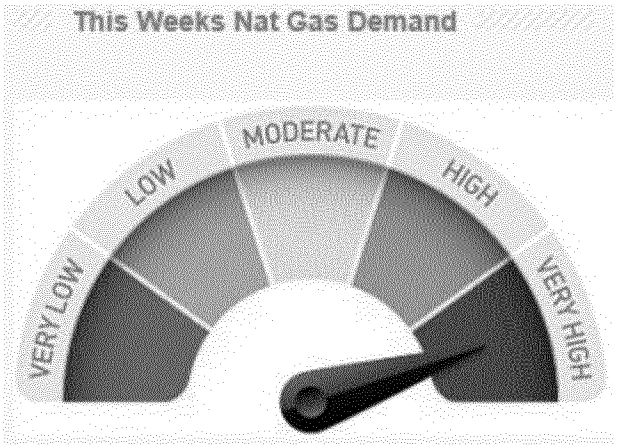
Subject: Weather

A couple of items to pass along:

PointLogic:
One of the biggest weather-related gas demand news items that has jumped into the spotlight in the last 24-hours is the potential for unusual cold in southern Plains as Texas is the largest consumer of natural gas in the US. If the current forecasts come to fruition over the course of the next week, the region is in for a major severe winter weather that hasn't been seen in Lone Star State in decades. Also, the wind models are of great concern as well for this coming weekend and early next week. The issue is



CPSE Response in Opp to ET MSJ
Exhibit A-87
MDL-2022-CI-02879
exhibitsticker.com

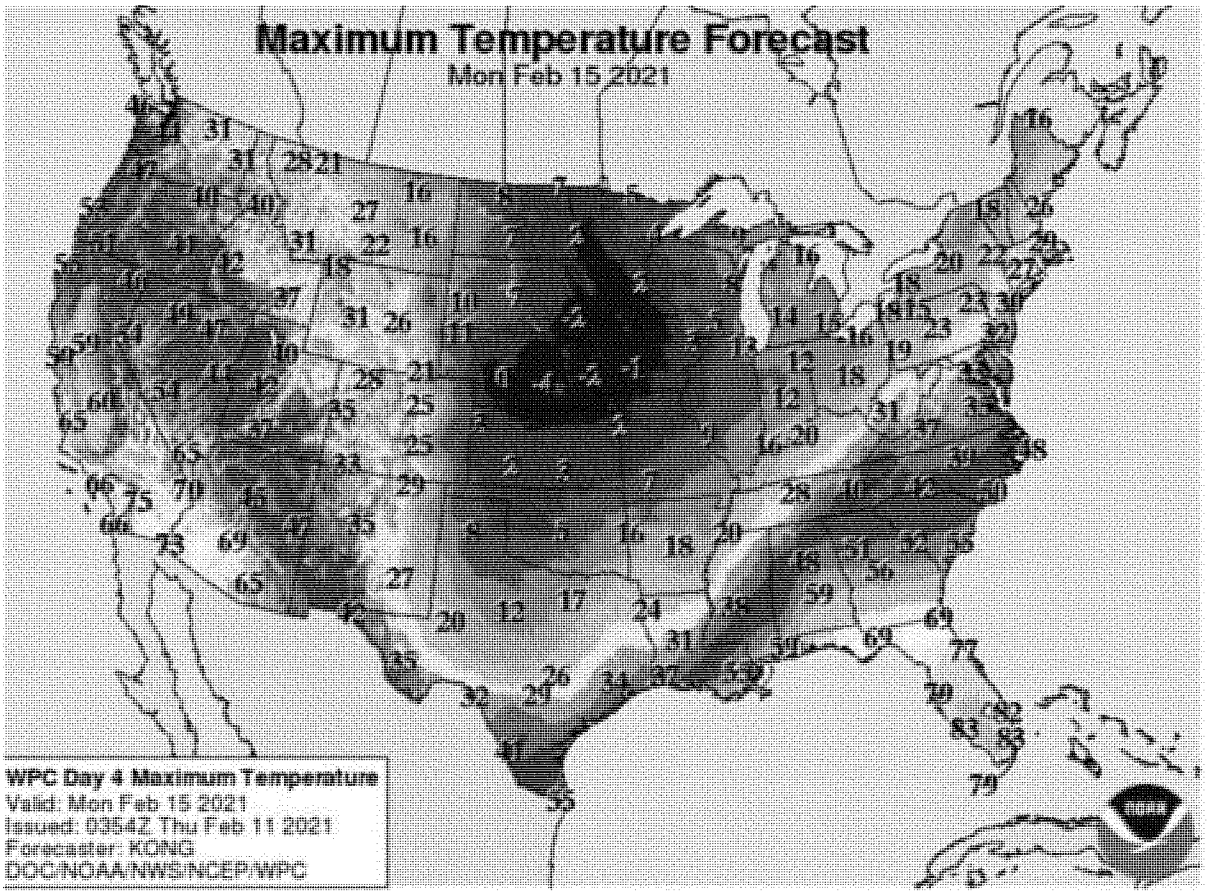
that there appears to be an alarming lack of wind in the giant wind turbine farm areas of western and northern Texas, while at the same time the core of the looming bitter record cold looks to invade the big eastern cities of the Lone Star State. This could be a set-up for a significant cause for concern for power considerations over the course of the next several days.

Presently, predicted windspeeds in the Texas Panhandle well into west Texas appear to be below operational levels for wind power production. This potential for notable reduction in wind power generation may happen in tandem with a monumental spike in power demand to meet heating loads all over the state, which could in turn create more need for natural gas fired power generation to meet the rocketing demand in the region. How cold will it get in some of the largest metropolitan areas of the state? As it stands now, temperatures in the Dallas, Texas area are slated to see temperatures in the single digits with wind chills well below zero. Further south, Houston, Texas is expected to see temperatures in the teens with windchills in the single digits. This whole situation is setting the stage for very bullish gas storage implications over the course of the next couple of weeks.

NatGas Weather:

I've been watching this graphic for the last couple of weeks and this is the first time it's been in the "Very High" category:

National Weather Service – highs for Monday:



Maximum Temperature Forecast
Mon Feb 15 2021
WPC Day 4 Maximum Temperature
Valid: Mon Feb 15 2021
Issued: 0354Z Thu Feb 11 2021
Forecaster: KONG

Re: *In re CPS Energy Gas Supplier Litigation*, MDL Master File No. 2022 CI 02879

Dear David and Lauren:

On behalf of Intercontinental Exchange, Inc. and its relevant affiliates ("ICE"), we are producing documents respectively Bates numbered ICE-ET-EP000001 - 000002 in response to the subpoena dated September 19, 2022 issued in connection with the above-referenced litigation (the "Subpoena").

As also agreed to with Mr. Shank, we are enclosing with this production the attached business records declaration from Erik Haas, which will excuse ICE's obligations to appear and respond to the deposition on written questions included with the Subpoena.

In accordance with the protective order entered in this case on February 9, 2022, we have designated all of the documents being included in this production as Attorneys Eyes Only and have stamped each PDF page in the production as "Attorneys Eyes Only" and included "Attorneys Eyes Only" in each Excel spreadsheet's file name.

CPSE Response in Opp to ET MSJ
Exhibit A-91D
MDL-2022-CI-02879
exhibitsticker.com

To the extent not otherwise addressed above, ICE does not waive, but, to the contrary, maintains and reserves all rights and objections to the Subpoena which it has not specifically asserted in light of the agreements we have reached with Mr. Shank to limit the scope of production. Please contact me at (212) 656-4420 if you have additional questions related to the information provided in this response.

Very truly yours,

Daniel Z. Mollin

Enclosures

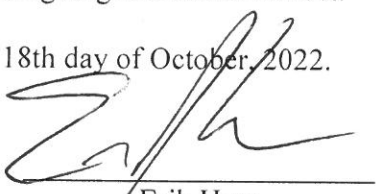
DECLARATION OF ERIK HAAS

I, Erik Haas, hereby declare and state as follows:

1. I am the Senior Director of Compliance and Chief Compliance Officer at ICE US OTC Commodity Markets and ICE Swap Trade. I am a custodian of records of the documents Bates numbered ICE-ET-EP000001 - 000002, being produced by Intercontinental Exchange, Inc. and its relevant affiliates ("ICE") in response to the subpoena dated September 19, 2022 issued in connection with the matter *In re CPS Energy Gas Supplier Litigation*, MDL Master File No. 2022 CI 02879 (the "Subpoena"). My business address is 353 North Clark Street, 31st Floor, Chicago, IL 60654. I am familiar with the manner in which the above-listed records are created and maintained by virtue of my duties and responsibilities.

2. The above-listed documents are duplicates of the original electronic records called for by the Subpoena.

3. The records were made at or near the time of each act or event.



4. The records were made by, or from information transmitted by, persons with knowledge of the matters set forth.

5. The records were kept in the course of regularly conducted business activity.

6. It is the regular practice of the business activity to make the records.

7. I declare under penalty of perjury that the foregoing is true and correct.

Executed in Cook County, State of Illinois, on the 18th day of October, 2022.

Erik Haas

Targa - Joe Brice	CPS - Ken Skaer	01/19/2021 08:02:55	Away
CPS - Ken Skaer	Targa - Joe Brice	01/19/2021 08:02:55	Good morning and Happy Tuesday. I'm back in the office after taking last week off. Hope you have been doing well.
Targa - Joe Brice	CPS - Ken Skaer	01/19/2021 08:11:43	hey gm
Targa - Joe Brice	CPS - Ken Skaer	01/19/2021 08:11:53	all good here
Targa - Joe Brice	CPS - Ken Skaer	01/19/2021 08:11:55	welcome back
CPS - Ken Skaer	Targa - Joe Brice	01/19/2021 08:12:02	thank you
CPS - Ken Skaer	Targa - Joe Brice	01/19/2021 08:12:13	nice 75 degree holiday yesterday
Targa - Joe Brice	CPS - Ken Skaer	01/19/2021 08:12:34	oh ya
Targa - Joe Brice	CPS - Ken Skaer	01/19/2021 08:32:09	you buying for tomorrow?
CPS - Ken Skaer	Targa - Joe Brice	01/19/2021 08:37:25	don't really need it but could squeeze some in if you need help and can sell it cheaply
Targa - Joe Brice	CPS - Ken Skaer	01/19/2021 08:40:32	no worries i caught some bids
Targa - Joe Brice	CPS - Ken Skaer	01/19/2021 08:40:37	just wanted to see if you needed it
CPS - Ken Skaer	Targa - Joe Brice	01/19/2021 08:40:47	nah, we are ok
CPS - Ken Skaer	Targa - Joe Brice	02/09/2021 15:53:25	Hi Joe.
Targa - Joe Brice	CPS - Ken Skaer	02/09/2021 15:53:34	hey man
CPS - Ken Skaer	Targa - Joe Brice	02/09/2021 15:53:38	Hope you enjoyed the Super Bowl!
Targa - Joe Brice	CPS - Ken Skaer	02/09/2021 15:53:43	eh boring
CPS - Ken Skaer	Targa - Joe Brice	02/09/2021 15:54:12	I cheer all the senior citizens of sport: Tiger, TB12, Lebron, etc
Targa - Joe Brice	CPS - Ken Skaer	02/09/2021 15:54:34	yeah agreed i dk about lebron though lol
CPS - Ken Skaer	Targa - Joe Brice	02/09/2021 15:55:55	Ah, other than him being a crybaby faker, i really like him. He is not into the same junk as some other guys who grew up in tough situations. I am in the market for some gas off Kinder into our Karnes point
Targa - Joe Brice	CPS - Ken Skaer	02/09/2021 15:56:30	so having a meeting about turning my plant into rejection....
Targa - Joe Brice	CPS - Ken Skaer	02/09/2021 15:56:40	that might get me a little bit of gas but that wont happen till tomorrow id imagine
CPS - Ken Skaer	Targa - Joe Brice	02/09/2021 15:57:08	i'd love to buy some tomorrow for thur-mon if you have any
CPS - Ken Skaer	Targa - Joe Brice	02/09/2021 15:57:19	or i could buy it each day if you prefer
Targa - Joe Brice	CPS - Ken Skaer	02/09/2021 15:57:22	this weekend i probably wont have squat tbh
CPS - Ken Skaer	Targa - Joe Brice	02/09/2021 15:57:36	ok, well, good to know
Targa - Joe Brice	CPS - Ken Skaer	02/09/2021 15:58:56	yeah this cold has us scared
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 08:38:17	hi joe
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 08:38:23	selling any gas for tomorrow?
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 08:38:28	kinder/karnes?
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 08:40:19	hey gm
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 08:41:15	probably nothing man
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 08:41:34	ok, cool
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 08:59:16	hey
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 08:59:20	think i might have a bit
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 08:59:31	good, bring it

Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 09:07:24	what price you think?
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 09:53:47	still looking?
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 09:53:55	yes, whatcha got?
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 09:55:08	6750 .10?
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 09:56:51	stx map is offered for half that now
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 10:01:05	ya i see that
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 10:01:18	but i can sell katy
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 10:01:49	ill do .07
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 10:01:55	the bid at katy o
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 10:02:24	one sec
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 10:04:03	so, i'm buying 6,750 kinder/karnes for GD HSC + .07 for thur ?
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 10:04:58	is that our deal?
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 10:07:24	yes
CPS - Ken Skaer	Targa - Joe Brice	02/10/2021 10:07:58	great , done
Targa - Joe Brice	CPS - Ken Skaer	02/10/2021 10:12:08	ty
CPS - Ken Skaer	Targa - Joe Brice	02/11/2021 08:11:38	can you sell me much gas?
CPS - Ken Skaer	Targa - Joe Brice	02/11/2021 08:11:47	i really want everythign you can sell me
Targa - Joe Brice	CPS - Ken Skaer	02/11/2021 08:12:00	i need to see where im at but not likely man
Targa - Joe Brice	CPS - Ken Skaer	02/11/2021 08:12:03	this is crazy
CPS - Ken Skaer	Targa - Joe Brice	02/11/2021 14:53:16	i would absolutely love to be your market for any gas you might sell tomorrow.
Targa - Joe Brice	CPS - Ken Skaer	02/11/2021 14:53:30	man i wish
Targa - Joe Brice	CPS - Ken Skaer	02/11/2021 14:53:48	im sure we'll be reducing like 40% of our gas
Targa - Joe Brice	CPS - Ken Skaer	02/11/2021 14:54:09	how are y'all holding up?
CPS - Ken Skaer	Targa - Joe Brice	02/11/2021 14:54:20	it's one of those weeks were my suppliers rip my face off and i say, thank you sir, my i have another
CPS - Ken Skaer	Targa - Joe Brice	02/11/2021 14:54:22	please
Targa - Joe Brice	CPS - Ken Skaer	02/11/2021 14:54:30	yeah for sure
Targa - Joe Brice	CPS - Ken Skaer	02/14/2021 10:40:39	yo
CPS - Ken Skaer	Targa - Joe Brice	02/14/2021 12:41:07	hi
CPS - Ken Skaer	Targa - Joe Brice	02/16/2021 08:13:24	Good morning!Good news: it's going to be 48 tomorrow!Bad news: I'm still without electricity Are you a seller?
Targa - Joe Brice	CPS - Ken Skaer	02/16/2021 08:29:53	hey gm
Targa - Joe Brice	CPS - Ken Skaer	02/16/2021 08:29:58	ya i just came into the office
CPS - Ken Skaer	Targa - Joe Brice	02/16/2021 08:36:01	I wish I was in a warm office with a computer
Targa - Joe Brice	CPS - Ken Skaer	02/16/2021 08:40:20	i mean....it is kinda nice
Targa - Joe Brice	CPS - Ken Skaer	02/16/2021 08:40:31	sucks you dont got power man sorry about that
Targa - Joe Brice	CPS - Ken Skaer	02/16/2021 08:40:38	wish i could offer up my place
CPS - Ken Skaer	Targa - Joe Brice	02/16/2021 08:41:00	I'm ok
CPS - Ken Skaer	Targa - Joe Brice	02/16/2021 08:41:51	My mom has power but I don't want to drive a half hour in case it's icy
Targa - Joe Brice	CPS - Ken Skaer	02/16/2021 08:45:17	yeah im like 5 min away
Targa - Joe Brice	CPS - Ken Skaer	02/16/2021 08:45:24	took the high roads too
CPS - Ken Skaer	Targa - Joe Brice	02/17/2021 09:59:07	Hi
CPS - Ken Skaer	Targa - Joe Brice	02/17/2021 09:59:19	Can you sell me any gas?
Targa - Joe Brice	CPS - Ken Skaer	02/17/2021 10:01:11	hey
Targa - Joe Brice	CPS - Ken Skaer	02/17/2021 10:01:17	nothing
CPS - Ken Skaer	Targa - Joe Brice	02/18/2021 11:51:22	hey joe
CPS - Ken Skaer	Targa - Joe Brice	02/18/2021 11:51:26	selling any gas?
Targa - Joe Brice	CPS - Ken Skaer	02/18/2021 11:51:33	hey dude

Targa - Joe Brice	CPS - Ken Skaer	02/18/2021 11:51:34	no sir
CPS - Ken Skaer	Targa - Joe Brice	02/18/2021 13:30:46	i heard that teak plant is coming back on tomorrow!
CPS - Ken Skaer	Targa - Joe Brice	02/19/2021 08:38:38	Good morning. TGIF.
Targa - Joe Brice	CPS - Ken Skaer	02/19/2021 08:38:46	hey dude gm
Targa - Joe Brice	CPS - Ken Skaer	02/21/2021 11:18:40	hey man
Targa - Joe Brice	CPS - Ken Skaer	02/21/2021 11:18:55	how you doing?
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 07:40:16	good morning
Targa - Joe Brice	CPS - Ken Skaer	02/22/2021 08:30:36	hey gm
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 08:32:51	howdy
Targa - Joe Brice	CPS - Ken Skaer	02/22/2021 08:33:24	does it feel like normalcy yet?
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 08:33:51	well, i only slept 3 hours so yes, it does feel like my new normal
Targa - Joe Brice	CPS - Ken Skaer	02/22/2021 08:34:04	lol
Targa - Joe Brice	CPS - Ken Skaer	02/22/2021 08:52:32	you buying for tomorrow?
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 08:53:12	i just bought some GD HSC - .07 at stx map
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 08:53:15	where are you selling?
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 08:53:31	seems pretty weak everywhere
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 08:53:59	77 tomorrow
Targa - Joe Brice	CPS - Ken Skaer	02/22/2021 08:54:12	ya AD bid -.04 and katy still pretty flat. Not sure i can get to -.07
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 08:55:03	Are you offering Kinder/Karnes or Teak or where are you selling?
Targa - Joe Brice	CPS - Ken Skaer	02/22/2021 08:55:25	id like to sell teak if i could but i could probably look at both
Targa - Joe Brice	CPS - Ken Skaer	02/22/2021 08:55:27	or either
CPS - Ken Skaer	Targa - Joe Brice	02/22/2021 16:15:55	Well, we almost survived Monday. Would you consider giving us a March baseload offer for our bid day tomorrow? Offers are due by 11am.
CPS - Ken Skaer	Targa - Joe Brice	02/23/2021 08:23:52	howdy
CPS - Ken Skaer	Targa - Joe Brice	02/23/2021 08:23:57	whatcha sellin?
Targa - Joe Brice	CPS - Ken Skaer	02/23/2021 08:24:20	waiting to see what i got
CPS - Ken Skaer	Targa - Joe Brice	02/23/2021 08:24:31	cool beans
Targa - Joe Brice	CPS - Ken Skaer	02/23/2021 09:07:18	bid for 7k?
CPS - Ken Skaer	Targa - Joe Brice	02/23/2021 09:11:55	whatcha think?
CPS - Ken Skaer	Targa - Joe Brice	02/23/2021 09:12:40	gd hsc - .01 work?
Targa - Joe Brice	CPS - Ken Skaer	02/23/2021 09:12:57	sure that works
CPS - Ken Skaer	Targa - Joe Brice	02/23/2021 09:13:09	ok, thnkas
CPS - Ken Skaer	Targa - Joe Brice	02/23/2021 09:13:13	7k
CPS - Ken Skaer	Targa - Joe Brice	02/23/2021 09:13:16	kinder karnes
Targa - Joe Brice	CPS - Ken Skaer	02/23/2021 09:13:24	tyty
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 08:42:42	hi mr. brice
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 08:42:50	how much gas are you selling at kinder manana?
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 08:44:57	hey man gm
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 08:45:04	hi
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 08:45:11	want to roll our dealio?
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 08:47:36	one sec
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 09:23:04	i can roll it
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 09:23:13	ok done
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 09:23:27	ty
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:08:26	Hi Joe.
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:10:13	According to our numbers, you guys can deliver us around 37k or so to get close to flat for the month. I talked to Mark Quinlan and he said to consult you about possibly making up 10k or so per day for the rest of the month so get back in line..or at least closer.

Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:12:11	so we would nom extra to you guys?
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:12:15	yes
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:12:31	does it have to be at karnes?
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:12:35	or does teak work
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:12:54	either one. it doesn't have to be done by the end of the month if you don't make us cash out
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:13:12	we just don't want to be penalized since you did not give us the gas
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:13:37	i dont think we would push anything to you guys the language is just written in an unfortunate way. it basically says, if you give us too little, we pay a penalty
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:14:35	and if you give us too much, we pay a penalty. lol
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:15:01	so we try to keep it as close to being right as possible
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:15:24	would that be with teak and cps?
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:16:25	well, it's with targa as the operator and cps
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:16:34	targa the pipeline
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:16:35	sorry i may have mispoke bc i dk what cashout language might be that oba
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:16:41	yeah ok
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:16:53	it's just something that tries to keep everythign in line
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:17:01	it's usually not a problem
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:17:06	yeah dealing with cashout stuff all over lol
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:17:53	we are receiving it at teh TPL delivery into karnes
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:17:54	so i would think i would flow more with less nom into you guys right?
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:18:00	oh
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:18:02	we already paid to transport it up T2
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:18:03	ugh
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:19:01	the cashout must be with km tej and you guys right? either way i can sell you extra if that fixes it
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:20:19	this has nothing to do with kinder or our trades
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:20:40	this is ken and mark , the guy who built the T2 pipeline for us
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:21:03	and just trying to work off the imbalance before month end
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:21:10	ok i get confused on the karnes piece i always think that is off of kinder...
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:21:11	no biggie
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:21:23	so our interconnect between t2 and cps
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:21:30	it's a t2 delivery into karnes
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:21:37	yes sir
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:21:40	you got it
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:21:45	ok so to fix this we just send more physical gas?
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:21:48	no nom right?
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:21:56	yes, exactly
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:22:21	we just want to be able to plan for it and tell our guys we will be getting 10k extra for a few days
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:22:45	but we can get it in march, no problem, if you guys will not ding us with imbalance cashouts
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:23:15	just trying to work with you to get it going sooner than later well i would have to run that through the plant guys would probably have to amend it to say it rolls thru
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:23:19	march right?
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:23:45	if you can just give it to us the next few days, that might work too
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:23:57	10k/day for 3 days or whatever
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:24:07	that would get us within our tolerance i imagine
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:24:28	but our volume estimates are not official so you guys may want to see if you agree
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:24:33	would a fom cashout be easier?
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:24:44	maybe we can amend to that?

CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:24:47	no cashouts
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:24:54	por favor
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:25:09	just make it easy; give us volume when you have it
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:25:11	ok bc we can work it off but i wouldn't want it flipping the other way either lol
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:25:26	oh, it flips back and forth constantly
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:25:31	nature of the beast
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:25:43	understand but price will be high
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:25:45	but there is a lot of wiggle room
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:25:54	so i dk if its easier to alleviate the price hike
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:26:07	i don't know if we are even talking about apples and oranges
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:26:26	can you ask quinlan his thoughts and maybe we can chat tomorrow?
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:26:39	let me call you just to be sure
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:26:47	either way we can do what we need to do
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:26:54	let me get bruce on too
CPS - Ken Skaer	Targa - Joe Brice	02/24/2021 16:27:09	one sec
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 16:27:14	k
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 19:23:47	hey my plant commercial guys just want to try and work it off
Targa - Joe Brice	CPS - Ken Skaer	02/24/2021 19:24:06	so i will flow you guys extra gas for gd26-28
Targa - Joe Brice	CPS - Ken Skaer	02/25/2021 08:25:29	hey gm
Targa - Joe Brice	CPS - Ken Skaer	02/25/2021 08:25:38	not sure if you saw my im last night
CPS - Ken Skaer	Targa - Joe Brice	02/25/2021 08:25:38	hi
CPS - Ken Skaer	Targa - Joe Brice	02/25/2021 08:25:54	you said you were going to do makeup the next few days
Targa - Joe Brice	CPS - Ken Skaer	02/25/2021 08:26:00	yessir
CPS - Ken Skaer	Targa - Joe Brice	02/25/2021 08:40:43	we may need to hold off on the makeup
CPS - Ken Skaer	Targa - Joe Brice	02/25/2021 08:50:06	i'm so sorry for the windup, joe.
CPS - Ken Skaer	Targa - Joe Brice	02/25/2021 08:51:17	my boss said he is not comfortable with scheduling makeup at this time for fear that some supplier may try to assign that expensive gas to us despite not showing up with the gas when we needed it.
CPS - Ken Skaer	Targa - Joe Brice	02/25/2021 08:51:56	we need to run official volumes before we can start doing makeup
Targa - Joe Brice	CPS - Ken Skaer	02/25/2021 11:48:15	ok
Targa - Joe Brice	CPS - Ken Skaer	02/25/2021 12:22:06	yeah may have to run that down bc i dont think that those noms were cut.
Targa - Joe Brice	CPS - Ken Skaer	02/25/2021 12:22:44	not sure how that gets handled
Targa - Joe Brice	CPS - Ken Skaer	02/25/2021 12:23:32	i would say get your guys to get with our plant commercial guys asap
Targa - Joe Brice	CPS - Ken Skaer	02/25/2021 14:22:56	did you see my IM just want to make sure you saw it
CPS - Ken Skaer	Targa - Joe Brice	02/25/2021 14:47:00	Hi Joe. Just got it. Thanks.
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:32:05	hi joe
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:32:08	selling much gas?
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:32:11	for 3/1
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:32:16	nothing
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:34:40	one sec
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:40:22	well i have some bc of a cell good
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:40:27	but i just had to buy hsc +.12
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:40:59	friggin sucks
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:41:03	what price do you need
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:46:51	do you have kinder/karnes or teak?
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:47:24	you can't complain to me about .12 as long as we are still in feb when i saw hsc go to $400
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:47:36	karnes
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:47:42	ok

Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:47:45	yeah i guess youre right	
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:49:22	how much do you have?	
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:49:31	13k	
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:49:48	GD HSC?	
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:50:11	seeing higher	
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:51:27	we bought GD HSC - .01 at t2	
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:51:39	that's the only deal we've done down there	
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:52:30	ya i think ppl are short bc of the gcx maintnance	
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:53:05	i probably need to be like +.05	
Targa - Joe Brice	CPS - Ken Skaer	02/26/2021 09:56:01	could you get to +.02?	
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:56:30	ok, that's fine	
CPS - Ken Skaer	Targa - Joe Brice	02/26/2021 09:56:31	thanks

CPS - Ken Skaer	Targa - Joe Brice	03/02/2021 08:52:26	still sitting out until gcx is back in biz/	
CPS - Ken Skaer	Targa - Joe Brice	03/02/2021 08:52:29	?	
Targa - Joe Brice	CPS - Ken Skaer	03/02/2021 08:52:37	yessir	
Targa - Joe Brice	CPS - Ken Skaer	03/03/2021 08:33:51	hey gm	
CPS - Ken Skaer	Targa - Joe Brice	03/03/2021 08:37:55	Hi JB.	
Targa - Joe Brice	CPS - Ken Skaer	03/03/2021 08:39:08	gcx maintenance over	
CPS - Ken Skaer	Targa - Joe Brice	03/03/2021 08:39:19	ah, gotcha	
Targa - Joe Brice	CPS - Ken Skaer	03/03/2021 08:39:29	can maybe sell some if youre buyin	
CPS - Ken Skaer	Targa - Joe Brice	03/03/2021 08:42:57	our load is low	
Targa - Joe Brice	CPS - Ken Skaer	03/03/2021 08:52:26	ah ok	
Targa - Joe Brice	CPS - Ken Skaer	03/10/2021 08:27:50	hey gm	
CPS - Ken Skaer	Targa - Joe Brice	03/10/2021 08:27:57	hi	
Targa - Joe Brice	CPS - Ken Skaer	03/10/2021 08:44:35	i can look at some karnes	
Targa - Joe Brice	CPS - Ken Skaer	03/10/2021 08:44:40	if you need	
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:18:33	Good morning, JOe.	
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:18:39	HOpe you had a good weekend	

Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:18:49	hey man
Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:18:50	i did
Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:18:53	you?
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:18:55	good deal
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:18:59	not too bad
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:19:08	still cleaning up the rubble from the storm
Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:19:29	ya that'll take a while..more and more things are popping up
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:19:38	Our management wants to talk to the management of our suppliers regarding the many issues of the winter storm. Who is the VP over at Targa that they can talk to?
Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:20:49	Hal Bourlon would be our VP but he is in and out on medical leave. Quinlan is also a VP maybe he would be the best person to contact
Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:20:58	Mark Quinlan
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:21:30	sounds good
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:21:32	thanks
Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:21:36	np
Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:21:50	is it bad news? lol
Targa - Joe Brice	CPS - Ken Skaer	03/15/2021 11:21:53	just curious
CPS - Ken Skaer	Targa - Joe Brice	03/15/2021 11:22:03	not sure exactly

Exhibit A-92E

In Re CPS Energy Gas Supplier Litigation	§	In the District Court of Bexar County, Texas 407th Judicial District

Cause No. 2021 CI 05138

CPS Energy, Plaintiff–Counter-defendant, v. **Houston Pipe Line Company, LP** and **Oasis Pipeline, LP**, Defendants–Counterclaimants.	§	In the District Court of Bexar County, Texas 407th Judicial District

Cause No. 2021-24173

Enterprise Products Operating, LLC, Plaintiff, v. **CPS Energy**, Defendant.	§	In the District Court of Harris County, Texas 334th Judicial District

THE STATE OF TEXAS

SUBPOENA FOR DEPOSITION ON WRITTEN QUESTIONS AND PRODUCTION OF DOCUMENTS

To: Any sheriff or constable of the State of Texas or other person authorized to serve and execute subpoenas as provided in Texas Rule of Civil Procedure 176.5.

You are commanded to summon Intercontinental Exchange Holdings, Inc. ("ICE"), which may be served through its agent, United Agent Group, at 5444 Westheimer #1000, Houston, Texas 77056, to appear at WARE, JACKSON, LEE, O'NEILL, SMITH & BARROW, LLP**,** 2929 Allen Parkway, 39th Floor, Houston, TX 77019, on **Monday, October 17, 2022**, to attend and give testimony at a deposition in this case, to produce documents or tangible things, and to remain in attendance from

CPSE Response in Opp to ET MSJ
Exhibit A-92E
MDL-2022-CI-02879
exhibitsticker.com

day to day until lawfully discharged, pursuant to the attached Notice of Deposition on Written Questions and Request for Production of Documents.

Duties of Person Served with Subpoena. You are advised that under Texas Rule of Civil Procedure 176, a person served with a subpoena has certain rights and obligations. Rule 176.6 provides the following:

> (a) *Compliance required.* Except as provided in this subdivision, a person served with a subpoena must comply with the command stated therein unless discharged by the court or by the party summoning such witness. A person commanded to appear and give testimony must remain at the place of deposition, hearing, or trial from day to day until discharged by the court or by the party summoning the witness.
>
> (b) *Organizations.* If a subpoena commanding testimony is directed to a corporation, partnership, association, governmental agency, or other organization, and the matters on which examination is requested are described with reasonable particularity, the organization must designate one or more persons to testify on its behalf as to matters known or reasonably available to the organization.
>
> (c) *Production of documents or tangible things.* A person commanded to produce documents or tangible things need not appear in person at the time and place of production unless the person is also commanded to attend and give testimony, either in the same subpoena or a separate one. A person must produce documents as they are kept in the usual course of business or must organize and label them to correspond with the categories in the demand. A person may withhold material or information claimed to be privileged but must comply with Rule 193.3. A nonparty's production of a document authenticates the document for use against the nonparty to the same extent as a party's production of a document is authenticated for use against the party under Rule 193.7.
>
> (d) *Objections.* A person commanded to produce and permit inspection or copying of designated documents and things may serve on the party requesting issuance of the subpoena—before the time specified for compliance—written objections to producing any or all of the designated materials. A person need not comply with the part of a subpoena to which objection is made as provided in this paragraph unless ordered to do so by the court. The party requesting the subpoena may move for such an order at any time after an objection is made.
>
> (e) *Protective orders.* A person commanded to appear at a deposition, hearing, or trial, or to produce and permit inspection and copying of designated documents and things, and any other person affected by the subpoena, may move for a protective order under Rule 192.6(b)—before the time specified for compliance—either in the court in which the action is pending or in a district court in the county where the subpoena was served. The person must serve the motion on all parties in accordance with Rule 21a. A person need not comply with the part of a subpoena from which protection is sought under this paragraph unless ordered to do so by the court. The party requesting the subpoena may seek such an order at any time after the motion for protection is filed.

(f) *Trial subpoenas.* A person commanded to attend and give testimony, or to produce documents or things, at a hearing or trial, may object or move for protective order before the court at the time and place specified for compliance, rather than under paragraphs (d) and (e).

Contempt. Failure by any person without adequate excuse to obey a subpoena served on that person may be deemed a contempt of the court from which the subpoena is issued or a district court in the county in which the subpoena is served, and may be punished by fine or confinement or both. Tex. R. Civ. P. 176.8(a).

DO NOT FAIL to return this writ to the District Court of Bexar County, Texas, 407th Judicial District, with either the attached officer's return showing the manner of execution or the witness's signed memorandum showing that the witness accepted the subpoena.

This subpoena was issued at the request of CPS Energy in the above-styled lawsuit, whose attorneys of record are David D. Shank, Santosh Aravind, Lauren Ditty, and Cheryl Joseph LaFond of SCOTT, DOUGLASS & MCCONNICO, L.L.P. You may contact David Shank to discuss the subpoena or make alternative arrangements.

NOTICE OF DEPOSITION ON WRITTEN QUESTIONS & REQUEST FOR PRODUCTION OF DOCUMENTS TO INTERCONTINENTAL EXCHANGE HOLDINGS, INC.

To: Intercontinental Exchange Holdings, Inc., through its registered agent, United Agent Group, 5444 Westheimer #1000, Houston, Texas 77056

1. Please take notice that, under Texas Rule of Civil Procedure 200.1, CPS Energy will take the deposition on written questions of Intercontinental Exchange Holdings, Inc. ("ICE") on **Monday, October 17, 2022**, at WARE, JACKSON, LEE, O'NEILL, SMITH & BARROW, LLP, 2929 Allen Parkway, 39th Floor, Houston, TX 77019-7101, at 10:00 a.m. The questions are attached as Ex-

hibit A. ICE is directed to designate a person or persons to testify on its behalf about (i) the documents requested in Exhibit B, including their creation, maintenance, preservation, retention and availability; and (ii) the subject matter or the questions listed on Exhibit A.

2. The deposition will continue from day to day until completed.

3. The deposition will be taken before a person authorized by law to take depositions on written questions.

4. Under Rules 176.2(b) and 200.1(b), ICE has been subpoenaed to produce at the deposition the documents listed on Exhibit B.

5. Attached as Exhibit C is the Agreed Confidentiality and Protective Order entered by the Court in this matter, which governs the standards and procedures for designating and protecting confidential information produced by parties and nonparties.

Exhibit A

EXHIBIT A – WRITTEN QUESTIONS

1. Please state your full name, occupation, official title, and business address.

2. Are you familiar with whether ICE maintains records of its business activities?

3. Was it in the regular course of business activity of ICE for employees with personal knowledge of the act, event, condition, opinion, or diagnosis identified in the records produced in response to Exhibit B to make such records or to transmit such information to be included in the records?

4. Were the documents produced in response to Exhibit B made at or near the time of the act, event, condition, opinion, or diagnosis identified in the records or within a reasonable time thereafter?

5. Were the documents produced in response to Exhibit B made and kept in the regular course of daily business activities by ICE?

6. Please hand the originals or exact duplicates of the documents requested in Exhibit B to the court reporter taking your deposition for photocopying and attachment to this deposition. Have you now given all documents requested in Exhibit B to the court reporter taking your deposition? If not, identify for the court reporter the records and documents you did not produce and explain why you did not produce them.

7. In the event you are unable to find any of the documents requested in Exhibit B, how long does ICE maintain those documents?

8. Are you aware of any other individual or entity that may have possession of records pertaining to the subject matter of this lawsuit? If so, please state the name and address of such entity or person, if known.

9. Have you been requested or directed by any person to withhold or protect, for any reason, the records identified in Exhibit B? Has any person suggested that you should withhold or protect the records identified in Exhibit B? If so, please state the name and address of the person who conveyed this information to you and when such event occurred.

10. Do you know or have reason to believe that the records identified in Exhibit B have in any manner been edited, purged, culled, or otherwise altered? If so, please identify the records and explain why and how they were altered or removed.

11. If any document responsive to this subpoena was, but is no longer, in ICE's possession, custody, or control, or no longer exists, state whether (1) it is missing or lost, (2) it was destroyed, (3) it was transferred to others, or (4) it was otherwise disposed of, and explain the circumstances surrounding its disposition, including the date of such disposition.

Exhibit B

EXHIBIT B – REQUEST FOR DOCUMENTS

DEFINITIONS

As used herein, the words and phrases set forth below have the following meaning or meanings:

1. **"ICE," "you," and "your"** refers to non-party Intercontinental Exchange Holdings, Inc., together with its clearing houses, affiliates, attorneys, employees, agents, servants, partners, subsidiaries, parent companies, members, representatives, consultants, managers, officers, or directors, past and present. The terms include but are not limited to ICE Data LP and ICE Data Management Group, LLC.

2. **"HPL"** refers to defendant Houston Pipe Line Company, LP, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

3. **"Oasis"** refers to defendant Oasis Pipeline LP, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

4. **"ET Fuels"** refers to Energy Transfer Fuel, LP, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

5. **"ETC Katy"** refers to ETC Katy Pipeline, LLC, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

6. **"ETC Texas"** refers to ETC Texas Pipeline, LTD, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

7. **"Comanche"** refers to Comanche Trail Pipeline, LLC, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

8. **"Red Bluff"** refers to Red Bluff Express Pipeline, LLC, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

9. **"ETC Marketing"** refers to ETC Marketing, Ltd., together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

10. **"Lobo"** means Lobo Pipeline Company LLC, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

11. **"Trans-Pecos"** means Trans-Pecos Pipeline, LLC, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

12. **"Energy Transfer"** means Energy Transfer, LP, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

13. **"Energy Transfer Entities"** means Oasis, HPL, ET Fuels, ETC Katy, ETC Texas, Comanche, Red Bluff, ETC Marketing, Lobo, Trans-Pecos, and Energy Transfer.

14. **"EPO"** refers to defendant Enterprise Products Operating, LLC, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

15. **"ETP"** refers to Enterprise Texas Pipeline LLC, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

16. **"EPP"** refers to Enterprise Products Partner L.P., together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

17. **"EPCO"** refers to Enterprise Products Company, together with its respective attorneys, employees, agents, servants, partners, subsidiaries, parent companies, affiliates, members, representatives, consultants, managers, officers, or directors, past and present.

18. **"Enterprise Entities"** means EPO, ETP, EPP, and EPCO.

19. **"CPS Energy"** refers to Plaintiff CPS Energy, together with its directors, officers, and employees.

20. **"Document(s)"** shall have the broadest meaning ascribed to it by the Texas Rules of Civil Procedure and applicable case law, including but not limited to electronically stored information.

21. **"Communication(s)"** means any contact between two or more persons by which any information or knowledge is transmitted or conveyed between two or more persons and shall include, without limitation, written contact by means such as letters, memoranda, telegrams, telecopiers, telexes, emails, text messages, instant messages, ICE chats, or any other document, and any oral contact, such as face-to-face meetings or telephone conversations and any writing, documents, or notes reflecting such communications.

22. **"Relevant Deals"** means all purchases or sales executed on your trading platforms for physical natural gas to be delivered on any day(s) during February 2021 at any delivery point in Texas.

INSTRUCTIONS

1. Pursuant to Tex. R. Civ. P. 196.4, you are requested to produce data or information that exists in electronic or magnetic form. All responsive electronic and magnetic data must be produced in a format that replicates the data to be produced. Please produce all electronically stored documents as electronically Bates-numbered single-page TIFF images with appropriate document

breaks, corresponding load file for the images, and a generic delimited data file for the corresponding metadata. The following metadata or fielded information, to the extent applicable to a produced electronic document, will be included in the generic delimited data file:

a. Beginning Production Number

b. Ending Production Number

c. Parent ID (if applicable)

d. Attachment ID (if applicable)

e. File Type (e.g., Word, Excel, email, etc.)

f. Last Modified Date (if collected from source system or custodian, rather than image)

g. Last Modified Time (if collected from source system or custodian, rather than image)

h. Sent Date

i. Sent Time

j. Document Author or From

k. To

l. CC

m. BCC

n. Subject Line (emails only)

o. Custodian or Source

p. Attachment Count

q. Native File Link

r. File Name

s. File path/folder

t. Received Date

u. Full text

v. De-duplicated instances (by full path)

w. Redacted flag

x. Embedded content flag

2. Documents that should not be rendered to TIFF images (i.e., Excel files, multimedia files, voice mail, sound files, databases, etc.) will be placed as native files in a separate folder. The files will be named by pre-pending a Bates number to the original file name. A confidentiality designation can also be inserted into the file name. A slip sheet will be provided containing the Bates number, the native file name, along with the note "Document Provided in Native Format." A link to the relative path of the natively produced document will be included in the metadata load file (Field no. 17 in list above). All embedded content shall be provided, including tracked changes, hidden comments, speaker notes, etc.

3. Emails and their attachments will be referenced to each other in the generic delimited data file, and will be numbered sequentially wherein the attachment Bates number follows the parent email Bates number. Emails and their attachments will be designated in the generic delimited data file by the beginning and ending Bates numbers of the email or individual attachments (Fields nos. 1 and 2 in list above), and those of the entire family (Fields nos. 3 and 4 in list above).

4. Multipage OCR or extracted text (i.e., TXT files) will be named to the corresponding TIFF images and placed in a separate folder named TEXT.

5. The searchable content of electronically-stored documents will be extracted from the source documents, e.g., emails and their attachments, and will not be generated through optical character recognition (OCR) of the corresponding TIFF images, with the exception of redacted documents, which may be OCR-ed. Redacted documents will contain the searchable endorsement "Redacted."

6. The Requests for Production shall be deemed to seek answers as of the date hereof, and shall be deemed to be continuing, so that any additional information relating in any way to the Requests for Production which you acquire or which becomes known to you, up to and including the time of trial, shall be furnished promptly after such information is acquired or becomes known, as required by TEX. R. CIV. P. 193.5.

7. If you maintain that any of the following requests are objectionable, you should produce all requested documents that fall outside the scope of your objection, and, in your written re-

sponse to the particular request, (i) explain why you believe the request is objectionable, and (ii) indicate whether there exist any responsive documents that you are not producing pursuant to your objection.

8. All duplicates or copies of documents are to be provided to the extent they have handwriting, additions, facsimile notations, deletions, or any kind of marking different from the original document being produced.

9. Unless otherwise expressly provided in this document, the past, present or future tense shall each include the other, the masculine, feminine or neutral gender shall each include the other, and the singular and plural number shall each include the other.

DOCUMENTS REQUESTED

1. For each Relevant Deal, documents sufficient to identify the following information:

   a. the Trade Date;

   b. the Trade Time;

MDL Master File No. 2022 CI 02879

In Re CPS Energy Gas Supplier Litigation	§	In the District Court of
	§	
	§	
	§	Bexar County, Texas
	§	
This Document Relates to All Cases	§	
	§	407th Judicial District

AGREED CONFIDENTIALITY AND PROTECTIVE ORDER

Before the Court is the joint motion of the parties for the entry of a confidentiality and protective order ("Protective Order"). After careful consideration, it is hereby ORDERED as follows:

1. Multidistrict Litigation ("MDL") Protective Order

This Protective Order replaces any orders from before each individual matter was consolidated into the MDL master file and will have continuing effect in the pre-trial courts upon completion of the MDL process unless further ordered by the pre-trial court.

2. Classified Information

"Classified Information" means any information of any type, kind, or character that is designated as "Confidential" or "Attorneys Eyes Only" by any of the supplying or receiving persons, whether it be a document, information contained in a document, information revealed during a deposition, information revealed in an interrogatory answer, or otherwise.

3. Qualified Persons

"Qualified Persons" means:

a. For Attorneys Eyes Only information:

   i. retained counsel for the parties in this litigation and their respective staff;

   ii. the parties' in-house counsel and legal staff (e.g., legal secretaries or paralegals) who are actively involved in the prosecution or defense of this case;

iii. actual or potential independent experts or consultants (and their administrative or clerical staff) engaged in connection with this litigation (which shall not include the current employees, officers, members, or agents of parties or affiliates of parties) who, prior to any disclosure of Classified Information to such person, have signed Exhibit A agreeing to be bound by the terms of this Protective Order (such signed document to be maintained by the attorney retaining such person);

iv. litigation vendors, court reporters, and other litigation support personnel, including but not limited to duplicating, document review, or document management services retained by a party for copying documents or preparing exhibits for document production, deposition, trial, or other court proceedings and non-technical jury or trial consulting services retained by a party;

v. any person who was an author, addressee, or intended or authorized recipient of the Classified Information and who agrees to keep the information confidential, provided that such persons may see and use the Classified Information but not retain a copy;

vi. this Court and its staff and any other tribunal or dispute resolution officer duly appointed or assigned in connection with this litigation.

b. For Confidential information:

i. the persons identified in subparagraph 3(a);

ii. the party, if a natural person;

iii. if the party is an entity, such current or former officers or employees of the party who are or were actively involved in the prosecution or defense of the member cases or related cases who, prior to any disclosure of Confidential information to such person, have signed Exhibit A agreeing to be bound by the terms of this Protective Order (such signed document to be maintained by the attorney representing such party).

c. Such other person who has signed Exhibit A agreeing to be bound by the terms of this Protective Order and only (1) upon written stipulation of the producing party or (2) as this Court may designate after notice and an opportunity to be heard.

4. Designation Criteria

a. *Classified Information.* A party shall designate as Classified Information only such information that the party in good faith believes is confidential. Information that is generally

available to the public, such as public filings, catalogues, advertising materials, and the like, shall not be designated as Classified.

Information and documents that may be designated as Classified Information include, but are not limited to, trade secrets, confidential or proprietary financial information, operational data, business plans, competitive analyses, personnel files, personal information that is protected by law, and other sensitive information that, if not restricted as set forth in this order, may subject the producing or disclosing person to competitive or financial injury or potential legal liability to third parties.

Notwithstanding subparagraph 4(a) above, correspondence and other communications and documents between the parties and/or with nonparties may be designated as Classified Information if the communication was made with the understanding or reasonable expectation that the information would not become generally available to the public.

b. *Attorneys Eyes Only.* The designation "Attorneys Eyes Only" shall be reserved for information that is believed to be unknown to any one of the other parties, or any of the employees of a corporate party. For purposes of this order, so-designated information includes, but is not limited to, product formula information, design information, non-public financial information, pricing information, customer identification data, and certain study methodologies.

5. Use of Classified Information

All Classified Information provided by any party or nonparty in the course of this litigation shall be used solely for the purpose of preparation, trial, and appeal of this litigation and for no other purpose and shall not be disclosed except in accordance with the terms hereof.

6. Marking of Documents

Documents provided in this litigation may be designated by the producing person or by any party as Classified Information by marking each page of the documents so designated with a stamp indicating that the information is "Confidential" or "Attorneys Eyes Only." In

lieu of marking the original of a document, if the original is not provided, the designating party may mark the copies that are provided. Originals shall be preserved for inspection.

All parties recognize that native format documents cannot be so marked. To the extent native files are produced, the producing party will include "Confidential" or "Highly Confidential" in the file name, on the storage media, on a slip sheet, or in any other reasonable way in connection with the transmission of those native files.

7. Disclosure at Depositions

Information disclosed at (a) the deposition of a party or one of its present or former officers, directors, employees, partners, members, stockholders, agents, consultants, representatives, or independent experts retained by counsel for the purpose of this litigation, or (b) the deposition of a nonparty, may be designated by any party as Classified Information by indicating on the record at the deposition that the testimony is "Confidential" or "Attorneys Eyes Only" and is subject to the provisions of this Order.

Any party may also designate information disclosed at a deposition as Classified Information by notifying all parties in writing not later than 30 days of receipt of the transcript of the specific pages and lines of the transcript that should be treated as Classified Information thereafter. Each party shall attach a copy of each such written notice to the face of the transcript and each copy thereof in that party's possession, custody, or control. All deposition transcripts shall be treated as Attorneys Eyes Only for 30 days after initial receipt of the transcript.

To the extent possible, the court reporter shall segregate into separate transcripts information designated as Classified Information with blank, consecutively numbered pages being provided in a nondesignated main transcript. The separate transcript containing Classified Information shall have page numbers that correspond to the blank pages in the main transcript.

Counsel for a party or a nonparty witness shall have the right to exclude from depositions any person who is not authorized to receive Classified Information pursuant to this

Protective Order, but such right of exclusion shall be applicable only during periods of examination or testimony during which Classified Information is being used or discussed.

8. Disclosure to Qualified Persons

a. *To Whom.* Classified Information shall not be disclosed or made available by the receiving party to persons other than Qualified Persons except as necessary to comply with applicable law or the valid order of a court of competent jurisdiction; provided, however, that in the event of a disclosure compelled by law or court order, the receiving party will so notify the producing party as promptly as practicable (if at all possible, prior to making such disclosure) and, if requested by the producing party, shall (or on its own accord, may) seek a protective order or confidential treatment of such information. Information designated as Attorneys Eyes Only shall be restricted in circulation to Qualified Persons described in subparagraph 3(a).

b. *Retention of Copies During this Litigation.* Copies of Attorney Eyes Only information shall be maintained only in the offices and/or on the devices of outside counsel or in-house counsel under subparagraph 3(a)(ii) for the receiving party and, to the extent supplied to persons described in subparagraphs 3(a)(iii)–(iv), in the offices and/or on the devices of those persons. Any documents produced in this litigation, regardless of classification, that are provided to Qualified Persons shall be maintained only at the office and/or on the devices of such Qualified Person, and only necessary working copies of any such documents shall be made. Copies of documents and exhibits containing Classified Information may be prepared by independent copy services, printers, or illustrators for the purpose of this litigation.

c. Each party's outside counsel shall maintain a log of all copies of Attorneys Eyes Only documents that are delivered to experts described in subparagraph 3(a)(iii).

9. Unintentional Disclosures

Documents unintentionally produced without designation as Classified Information later may be designated and shall be treated as Classified Information from the date written notice of the designation is provided to the receiving party.

If a receiving party learns of any unauthorized disclosure of Classified Information, the party shall immediately upon learning of such disclosure inform the producing party of all pertinent facts relating to such disclosure and shall make all reasonable efforts to prevent disclosure by each unauthorized person who received such information.

10. Documents Produced for Inspection Prior to Designation

In the event documents are produced for inspection prior to designation, the documents shall be treated as Attorneys Eyes Only during inspection. At the time of copying for the receiving parties, Classified Information shall be marked prominently "Confidential" or "Attorneys Eyes Only" by the producing party.

11. Consent to Disclosure and Use in Examination

Nothing in this order shall prevent disclosure beyond the terms of this order if each party designating the information as Classified Information consents to such disclosure or if the Court, after notice to all affected parties and nonparties, orders such disclosure. Nor shall anything in this order prevent any counsel of record from utilizing Classified Information in the examination or cross-examination of any person who is indicated on the document as being an author, source, or recipient of the Classified Information, irrespective of which party produced such information.

12. Challenging the Designation

a. *Classified Information.* A party shall not be obligated to challenge the propriety of a designation of Classified Information at the time such designation is made, and a failure to do so shall not preclude a subsequent challenge to the designation. In the event that any party to this litigation disagrees at any stage of these proceedings with the designation of any information as Classified Information, the parties shall first try to resolve the dispute in good faith on an informal basis, such as by production of redacted copies. If the dispute cannot be resolved, the objecting party may invoke this Protective Order by objecting in writing to the party who designated the document or information as Classified Information. The designating party shall then have 14 days to move the Court for an order preserving the designated status

of the disputed information. The disputed information shall remain Classified Information unless and until the Court orders otherwise. Failure to move for an order within 14 days of any written objection shall constitute a termination of the status of such item as Classified Information.

b. *Qualified Persons.* In the event that any party in good faith disagrees with the designation of a person as a Qualified Person or the disclosure of particular Classified Information to such person, the parties shall first try to resolve the dispute in good faith on an informal basis. If the dispute cannot be resolved, the objecting party shall have 14 days from the date of the designation or, in the event particular Classified Information is requested subsequent to the designation of the Qualified Person, 14 days from service of the request to move the Court for an order denying the disputed person (a) status as a Qualified Person, or (b) access to particular Classified Information. The objecting person shall have the burden of demonstrating that disclosure to the disputed person would expose the objecting party to the risk of serious harm. Upon the timely filing of such a motion, no disclosure of Classified Information shall be made to the disputed person unless and until the Court enters an order preserving the designation.

13. Manner of Use in Proceedings

If a party wishes to include a document, or portions of a document, marked as "Confidential" or "Attorney's Eyes Only" in a pleading or other paper to be filed with the Clerk, that party shall serve the pleading or other paper on opposing parties but shall not file it. Service alone shall constitute filing for the purpose of any deadline. The filing party shall also file a notice informing the Court that the filing has been served pursuant to this Order. For 14 days following service, no party shall file the pleading or other paper with the Clerk except pursuant to a ruling on a motion for a Temporary Sealing Order under Rule 76a(5). Immediately thereafter, if no motion for a Temporary Sealing Order has been granted, the party who served the pleading or other paper shall file it unsealed with the Clerk. If a motion for Temporary Sealing Order is timely filed, no party shall file the pleading or other paper with the Clerk until the Court rules on the motion

for temporary sealing order. The parties agree that they will not oppose any motion for Temporary Sealing Order filed pursuant to this paragraph, but the parties reserve all rights to oppose permanent sealing at the hearing under Rule 76a(4). If the Court denies the motion for temporary sealing order, the party who served the pleading or other paper may immediately file it unsealed with the Clerk.

14. Filing Under Seal

If a party wishes to offer a document, or portions of a document marked as "Confidential" or "Attorney's Eyes Only" in evidence, any party may, at the time the document is offered, move for a Temporary Sealing Order.

15. Return of Documents

Not later than 120 days after conclusion of a party's involvement in the litigation and any appeal related to it, any Classified Information, all reproductions of such information, and any notes, summaries, or descriptions of such information in the possession of any of the persons specified in paragraph 3 (except subparagraph 3(a)(iii)) shall be returned to the producing party or destroyed, and each such person shall certify to the producing party that this return or destruction is complete. If such return or destruction is not possible, the parties agree that the documents retained will remain subject to the terms of this Order in perpetuity, except as this Court may otherwise order or to the extent such information has been used as evidence at any trial or hearing. Notwithstanding this obligation to return or destroy information, counsel is entitled to retain pleadings (including exhibits) affidavits, motions, briefs, or other papers filed with the Court, and any memoranda, notes, or other work product, even if they contain Classified Information. Counsel is required to protect that information consistent with the terms of this Order.

16. Ongoing Obligations

Insofar as the provisions of this Protective Order, or any other protective orders entered in this litigation, restrict the communication and use of the information protected by it, such provisions shall continue to be binding after the conclusion of the MDL proceedings and

each individual case's completion of the litigation and all appeals, except that (a) there shall be no restriction on documents that are used as exhibits in open court unless such exhibits were filed under seal, and (b) a party may seek the written permission of the producing party or order of the Court with respect to dissolution or modification of this, or any other, protective order.

17. Advice to Clients

This order shall not bar any attorney in the course of rendering advice to such attorney's client with respect to this litigation from conveying to any party client the attorney's evaluation in a general way of Classified Information produced or exchanged under the terms of this order; provided, however, that in rendering such advice and otherwise communicating with the client, the attorney shall not disclose the specific contents of any Classified Information produced by another party if such disclosure would be contrary to the terms of this Protective Order.

18. Duty to Ensure Compliance

Any party designating any person as a Qualified Person shall have the duty to reasonably ensure that such person observes the terms of this Protective Order and shall be responsible upon breach of such duty for the failure of such person to observe the terms of this Protective Order.

19. Waiver

Pursuant to Texas Rule of Evidence 511(b) and Federal Rule of Evidence 502, neither the attorney-client privilege nor work product protection is waived by disclosure connected with this litigation.

20. Modification and Exceptions

The parties may, by stipulation, provide for exceptions to this order and any party may seek an order of this Court modifying this Protective Order.

SIGNED on February 9, 2022,

JUDGE JOHN SPECIA

ACKNOWLEDGEMENT OF PROTECTIVE ORDER

I, _____, hereby (i) acknowledge that I have received and read a copy of the attached Protective Order; (ii) certify that I am a Qualified Person as defined in Paragraph 2 of the Protective Order; and (iii) agree to be bound by the terms of the Protective Order.

I acknowledge that I cannot use any of the Classified Information that is the subject of this Protective Order for any purpose other than the trial in this action and the preparation thereof. I will employ reasonable measures to control duplication of, access to, and distribution of Classified Information and I will not make Classified Information available to or discuss it with any person(s) not entitled to receive such material under this Protective Order.

I further agree to be subject to the jurisdiction of this Court and consent to the personal jurisdiction of this Court in an action to enforce the terms of the Protective Order.

QUESTIONS CERTIFIED

Page 25 Line 11

Q. BY MR. DOBROWSKI: You had no indirect knowledge of how it was -- how that amount of gas was determined for February of 2021; true?

SAN ANTONIO, TEXAS, WEDNESDAY, AUGUST 17, 2022

9:38 A.M.

THE VIDEOGRAPHER: Okay. Today's date is August 17th, 2022, and the time is 9:38 a.m. Central time.

We are beginning the deposition of Kevin Pollo.

Will all counsel please identify themselves for the record.

MR. DOBROWSKI: Paul Dobrowski for plaintiff, Enterprise.

MR. WOODS: Robert Woods for Houston Pipeline and Oasis. And my colleague Ali Shan Ali Bhai is here as well.

MS. VALKENAAR: Lauren Valkenaar, CPS Energy.

MS. LAFOND: Cheryl LaFond from Scott, Douglas and McConnico for CPS Energy.

MS. STURM: Megan Sturm, Chasnoff Stribling for CPS Energy.

MR. FEDDERMAN: Dylan Fedderman, Chasnoff Stribling for CPS Energy.

KEVIN POLLO,

having been first duly sworn, testified as follows:

EXAMINATION

BY MR. DOBROWSKI:

Q. Please state your full name for the record.

A. Kevin Pollo.

Q. Mr. Pollo, have you ever had your deposition taken before?

A. I have not.

Q. Okay. Couple of ground rules.

Number one, if you don't understand something I say, please stop me, have me repeat it or rephrase it; okay?

A. Okay.

Q. And then number two, if you'd be kind enough to verbalize your answers. That makes -- or that will make it easy for the court reporter to take down a clear record as opposed to a wave of the hand or a nod of the head; is that all right?

A. Yes, sir.

Q. If you don't understand something I say, please stop me, have me repeat it or rephrase it; is that all right?

A. Yes, sir.

Q. And you're doing a great job thus far in terms of waiting till I finish my question before you start your answer. If you would continue to do that I'll try and wait till you finish your answer before I start my next question; is that all right?

A. Yes, sir.

Q. Okay. You understand you've been sworn in under oath today just as if you were before a judge or a jury, do you not?

A. I do.

Q. Okay. For whom do you work?

A. I work for CPS Energy.

Q. How long have you worked for CPS Energy?

A. Trying to do the math in my head.

Nearly 16 years.

Q. Okay. What's your current position?

A. Vice president energy supply and market operations.

Q. How long have you been in that position?

A. As vice president, about a year.

Q. All right. So what was your job during Winter Storm Uri?

A. Interim vice president energy supply and market operations.

Q. Okay. When were you made the permanent VP?

A. As I said, about a year ago I believe.
Q. Okay. Couple of other ground rules.
If I refer to CPSE or CPS Energy, you'll understand who I'm referring to, will you not?
A. Yes.
Q. Okay. I represent Enterprise Products Operations. If I refer to them as Enterprise or EPO, will you understand that to mean Enterprise Products?
A. Yes.
Q. Okay. And you're familiar with Enterprise Products?
A. Yes.
Q. Okay. If I refer to Energy Transfer as ET or Energy Transfer, you'll know what that is; right?
A. Sure, yes, sir.
Q. Okay. And when I say Winter Storm Uri, specifically I'm referring to the time frame February 12 of 2021 to February 19 of 2021; is that consistent with your recollection?
MS. VALKENAAR: Objection; form.
THE WITNESS: I think there have been several dates depending on -- for the start and stop of Uri depending on...
Q. BY MR. DOBROWSKI: What dates would you like to use, sir?

A. My recollection is probably February 12th to around -- I don't have a calendar in front of me. I would say around the 20th, 19th, 20th, in that range.

Q. Of February?

A. Yes, sir.

Q. 2021?

A. Yes, sir.

Q. Okay. And what were your duties and responsibilities during that period when you were interim vice president of energy supply and market operations?

A. My team included our day-ahead and real-time operations which dispatches our power generating.

Q. I'm sorry, could you speak up?

A. Sorry. I have --

Q. It's all right. I'll turn up my hearing aids.

A. Day-ahead and real-time team. They operate our control room, dispatch our generating units into the ERCOT market, handle our power trading.

I have a team, our fuels team that procures the fuel that we use in our power plants. So that would be coal, natural gas, fuel oil. They do some

natural gas trading, natural gas hedging.

I have a team that -- IT team that supports our primary systems and applications that we use for those functions.

And then I have a long-range analytics team that provides support for anywhere from day-ahead and real-time operations to our long-range 25-year generation planning and load forecasting efforts.

Q. Okay. I'd like to focus on the fuels team in terms of purchasing natural gas during Winter Storm Uri -- I'm sorry.

I'd like to focus on the fuel team actually at CPSE from the time period January 1 until February 28, 2021; okay?

A. Okay.

Q. And who was on that fuel team for CPSE?

A. My recollection of the fuel team at that time included Paul Vinson, Bruce Bordovsky, Ken Skaer, Amber Irving. And also on the fuels team, Albert Serna.

Q. I'm sorry, who?

A. Albert Serna.

Q. Thank you.

A. Sharon Pogey, Candy Horner.

That's the names off the top of my head. I

believe that's complete list but I'm not entirely sure.

Q. Okay. Are all of them still with CPSE except Mr. Skaer?

A. No.

Q. Who else is no longer with CPSE?

A. Mr. Vinson.

Q. Do you know where he is currently working?

A. When he left CPS Energy he retired. So I do not know if he's working anywhere else at this point.

Q. Okay. When did he retire?

A. After Winter Storm Uri.

Q. After Winter Storm Uri?

A. Yes, sir.

Q. Okay. And what was the role of Miss Irving, Mr. Serna, Pogey, and the last -- Harvey or Harver?

A. Horner.

Q. Horner, I'm sorry. Can't read my own writing.

A. Let me start with the last name since that's the one that I recall the most.

Candy is -- I don't remember her exact title, but she -- I think she's a data clerk. She

handles a lot of our records and other administrative functions.

Q. Okay.

A. If I leave off any names, just remind me of who I --

Q. Sure.

A. -- skipped.

Miss Pogey is an analyst that supports our coal operations. Mr. Serna is our coal and rail manager so he handles our procurement of coal and transportation, rail transportation. And Miss Irving essentially -- I forget her exact title, but she essentially is our pipeline scheduler.

Q. Mr. Skaer and Mr. Bordovsky were your gas traders; is that right?

A. Yes, sir.

Q. Okay. And they purchased nat gas for CPSE during winter -- prior to and during Winter Storm Uri; is that right?

A. Yes.

Q. Okay. Did -- were they involved in the sale of nat gas?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: By CPSE?

A. I don't believe we sold natural gas at that

time.

Q. I'm sorry?

A. I don't recall that we sold any natural gas during that time.

Q. Okay. And, I'm sorry, what was Mr. Vinson's role?

A. Mr. Vinson was director of our fuels team.

Q. Okay. And what were his duties and responsibilities, if you recall?

A. He provided direction to our -- well, essentially or fuels team, our fuel procurement activities.

Q. Okay. So he was your direct report?

A. Yes, sir.

Q. Did Bordovsky and Skaer report to Vinson and Vinson report to you?

A. That's correct.

Q. Okay. How -- or what was your understanding of how Skaer and Bordovsky knew the amount of gas to purchase for a given month -- let me back up.

As I understand it, from the testimony of Mr. Skaer and Mr. Bordovsky, CPSE would make purchases at various times, sometimes on a daily basis, sometimes on a weekly basis, sometimes on a

monthly basis. I want to focus on monthly just for a second.

And if you can tell me your understanding of how they executed purchases of gas for -- for any particular month and for our purposes let's use February of 2021 as that month.

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you clarify your question on --

Q. BY MR. DOBROWSKI: Sure?

A. You said how do they execute...

Q. What I'm asking is if they are -- well, let me back up even further.

It's my understanding that the fuels team would determine that CPSE had a need for nat gas for a particular month approximately a week before the month began.

In this instance, if we're using February of 2021 as the example, the amount would have been determined sometime in the week before February 1.

My question is: Number one is, how is that amount determined? And number two, how is that executed in terms of purchases for that particular month?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: If you know.
A. I did not have direct involvement in that process.
Q. Just asking for your understanding.
MS. VALKENAAR: Same objection.
Q. BY MR. DOBROWSKI: You can answer.
A. My understanding of what part of the process?
Q. How it was determined a particular amount of nat gas would be purchased for the month. That's question one. What was your understanding of that?
MS. VALKENAAR: Objection; form.
THE WITNESS: Again, I wasn't part of that direct analysis that they did to determine that quantity.
Q. BY MR. DOBROWSKI: I know. I'm just asking you your general understanding, sir. Certainly, as the head of the energy supply and markets, you were -- understood how they came about a particular amount of gas to purchase for a particular month, did you not?
MS. VALKENAAR: Objection; form.
THE WITNESS: I think without having been part of that direct process I don't have direct knowledge of -- to speak for them on how they

determined that quantity.

Q. BY MR. DOBROWSKI: I'm not asking for their direct knowledge. I'm asking for your knowledge.

What was your understanding?

MS. VALKENAAR: Objection; form.

THE WITNESS: As I said, I wasn't part of that direct process.

Q. BY MR. DOBROWSKI: I'm not asking whether you were part of the direct process.

Are you telling me you had no understanding as the head of -- I'm sorry.

As the vice president of energy supply and market operations, you had no understanding how CPSE personnel who worked underneath you made a determination for the purchase of natural gas on a monthly basis; is that right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I'm telling you I was not part of that process so I don't have direct knowledge of the decision they made on the time frame in question.

Q. BY MR. DOBROWSKI: And I am not asking you whether you have direct knowledge so I'll object as nonresponsive.

I'm just asking if you have a general

understanding of how that amount of gas was determined and what was the process they went through?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I thought I've answered your question. Is there a way you could rephrase it to give me a different --

Q. So you don't have any knowledge whatsoever, general or specific, as to how your team determined what amount of gas to purchase prior to a given month; is that what -- your testimony?

MS. VALKENAAR: Paul, he's answered six or seven times.

MR. DOBROWSKI: Excuse me, he hasn't answered this question. Please answer my question.

Please read it back to him so it's clear.

(The record was read.)

MS. VALKENAAR: Objection; form.

THE WITNESS: As I said, I don't -- you're asking did I have knowledge of how they purchased gas or what they -- how they determined the quantity. I'm telling you I did not have a direct involvement in that process.

Q. BY MR. DOBROWSKI: I understand --

A. At that time.

Q. And I understand that. And I just want to make clear that whether you were involved in it directly or knew about it indirectly as the head of this team you don't know at all how they would come up with an amount of natural gas to be purchased for a given month; is that accurate?

MS. VALKENAAR: Objection; form.

THE WITNESS: I'm saying since I was not part of that direct process, any answer I give you would be speculating on what they were talking about and what they did.

Q. BY MR. DOBROWSKI: I'm not asking you to speculate. I'm asking about your knowledge, sir. I just want to make sure that the jury understands that the interim vice president of energy supply and market ops prior to February of 2021 had absolutely no knowledge of how an amount of gas was to be purchased for that month.

And you're telling me you had no knowledge; right, sir?

MS. VALKENAAR: Objection; form. Paul, he's answered several times.

THE WITNESS: I'm telling you I did not have direct involvement.

Q. BY MR. DOBROWSKI: I'm not asking whether you -- I've got that part. I've got the direct involvement.

I just want to know, did you have an understanding of how the -- your team determined how much gas to purchase for February of 2021? If you have no knowledge, then say you don't. If you do, tell me.

MS. VALKENAAR: Objection; form.

THE WITNESS: I believe I've said I had no knowledge.

Q. BY MR. DOBROWSKI: Okay. Great. I got it.

So just so the ladies and gentlemen of the jury understand, CPS Energy's vice president of energy supply and market operations didn't have a clue how his team was determining the amount of gas to be purchased for February of 2021 ahead of Winter Storm Uri; is that right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I had no direct knowledge of -- was not -- did not have no direct involvement in the process that they followed leading up to Winter Storm Uri to determine the amount of gas that they bought.

Q. And you had no indirect knowledge, too;

right? That's what you're telling me?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I believe I'll give you the same answer.

I had no direct involvement in that process.

Q. *And I got the direct.

Now I'm asking, did you have any indirect knowledge or understanding? And you're telling me you didn't; correct?

MS. VALKENAAR: Objection; form. Paul, he's answered about ten times.

MR. DOBROWSKI: Excuse me.

MR. WOODS: All right. All right. Just object to the form. Stop jumping in with the coaching.

Q. BY MR. DOBROWSKI: You can answer. Just so it's clear, I understand you --

MS. VALKENAAR: He answered. I'm going to instruct him not to answer at this point.

MR. DOBROWSKI: Excuse me. He hadn't answered the indirect question, Lauren.

MS. VALKENAAR: I'm not -- I'm going -- you keep badgering and badgering --

MR. DOBROWSKI: Lauren, stop interrupting

and coaching the witness. Obviously, you did it before and --

THE REPORTER: Okay, okay, okay. I can't get you talking at the same time.

MR. DOBROWSKI: Just stop it; okay? Get off my record, number one, and because your man who was the head of this team didn't have any knowledge just shows how lax and poorly run CPSE is. So I want to hear it out of this man's mouth. He not only had -- I got the direct.

Q. *BY MR. DOBROWSKI: You had no indirect knowledge of how it was -- how that amount of gas was determined for February of 2021; true?

MS. VALKENAAR: So I'm going to object to the sidebar. Object to form. And I'm going to instruct you not to answer.

MR. DOBROWSKI: Certify the question.

MS. VALKENAAR: He already answered.

MR. DOBROWSKI: Certify the question.

Tell me what his answer was for indirect.

MS. VALKENAAR: He's answered it. She read it back.

MR. DOBROWSKI: Tell me what the indirect -- no, excuse me.

Q. BY MR. DOBROWSKI: I'm asking you. Tell

me --

MS. VALKENAAR: He's answered it.

Q. BY MR. DOBROWSKI: Tell me --

MS. VALKENAAR: I'm not testifying.

Q. BY MR. DOBROWSKI: Tell me --

MR. DOBROWSKI: Yes, you are. You're on the record trying to testify and coach your witness.

MS. VALKENAAR: Paul --

MR. DOBROWSKI: You're supposed to do that beforehand.

MS. VALKENAAR: I am -- Paul --

MR. DOBROWSKI: So I just want to be clear on this.

MS. VALKENAAR: I object to the sidebar.

MR. DOBROWSKI: Excuse me. Pardon me.

MS. VALKENAAR: And I instruct him not to answer.

MR. DOBROWSKI: Excuse me.

MS. VALKENAAR: I've instructed him not to answer.

Q. BY MR. DOBROWSKI: And you're going to follow that instruction; right, sir?

A. I'm going to follow my attorney's advice.

Q. Okay. So in terms of preparation for February of 2021 and the amount of natural gas that

CPSE would have available to it, you, as the vice president of energy supply and market operations, knew nothing about how much gas CPSE was going to purchase for February of 2021; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I did not have direct knowledge of the specific quantity of gas that we purchased.

Q. *Okay. And you had no indirect knowledge as well; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

MS. VALKENAAR: I will instruct him not to answer. You asked --

MR. DOBROWSKI: Excuse me? Instruct him? Where are -- what -- let's go off the record for just a second. Lauren, if you --

THE REPORTER: Wait, wait, wait.

MR. DOBROWSKI: Okay. Go ahead.

THE REPORTER: Just a second.

THE VIDEOGRAPHER: Off the record. Time is 9:57.

MS. VALKENAAR: Actually, actually, I don't agree to go off the record.

MR. DOBROWSKI: Excuse me.

MS. VALKENAAR: I'm not agreeing to go off the record.

MR. DOBROWSKI: If you need to go on and coach him and get an answer to this, I just want the answer. Or if you can tell me, I'll take that. But this is obstructionist, and because you haven't prepared your witness for it and you're obviously scared of the answer and he's scared of the answer, I have got to object to your -- and frankly, I'm going to ask the judge that you reimburse me for interrupting my deposition.

And we're going to come back and depose you, sir. So as long as you understand that, we'll continue to go.

So you're going to instruct him not to answer; right, Lauren?

MS. VALKENAAR: Paul, I've made my position clear. If you want to waste your time asking the same question --

MR. DOBROWSKI: No, I just want to make sure that I've got it. Okay.

MS. VALKENAAR: -- it's something you're welcome to do.

MR. DOBROWSKI: You know, when we get to trial, you're not going to be allowed to do this.

Q. BY MR. DOBROWSKI: So let me ask this question of you: Sir, you're going to follow your lawyer's instruction; right?

A. Yes, sir.

Q. Okay. And prior to February of 2021, in your role as vice president of energy supply and marketing operations, did you undertake to determine and learn how your fuels team went about purchasing gas, natural gas for a particular month?

A. I did work with my team to understand the processes that we followed to purchase natural gas.

Q. Tell me what you learned.

A. Is there a specific question?

Q. That's the question. Tell me what you learned.

A. I guess my question is: On a specific topic?

Q. As to the purchase of natural gas in a particular month, what did you learn? You just told me that you undertook to determine and learn how that process went. Tell me what you learned about the process.

A. As I said, I took time to learn how we purchased natural gas.

Q. Okay. Why did you do that?

A. I wanted to understand what they were doing on a daily basis.

Q. Why did you want to know that?

A. Purchasing natural gas is something we do every day to serve our customers.

Q. Okay. And what did you learn about how your traders purchase natural gas on a daily basis?

A. Based on -- based on the temperature we're expecting for the next day, the power plants that we expect to run the next day, we generate -- our team has a forecast of gas that we're going to use on the following day.

Once we've determined that, I learned, you know, how we -- how they communicate directly with the other gas suppliers to purchase the quantity of gas that we determined we were going to use.

Q. Did you learn anything else?

A. I don't recall specifically. I probably did. May not have. In general that's the process that we follow. That's what I learned.

Q. Okay. Were you involved in decision making for daily gas purchases prior to February of 2021?

A. Was I involved in decision making?

Q. Yep.

A. Could you clarify what types of decisions you're asking about?

Q. Purchase of natural gas.

A. Was I involved in daily decision making?

Q. Yes.

A. No, sir.

Q. No, were you involved in decision making for the purchase of gas on a daily basis?

A. No, sir.

Q. Okay. Were you ever involved in -- I'm sorry.

Did you ever learn how your gas fuel team, natural gas fuels team purchased natural gas on a monthly basis?

A. They have -- I mean, the process to buy gas is very similar as far as -- obviously terms of the deal that are agreed to are different. Instead of a single day purchase, it would be for the ensuing month.

Q. Okay.

A. But the general process is the same as far as contacting traders, receiving quotes and selecting -- selecting a counterparty to execute with.

Q. And then also would you determine what the temperatures were predicted to be for the month

following?

A. I think when you look at forecasting temperatures for the next day is very different process from trying to forecast a daily temperature for an entire month that hasn't happened yet.

Q. What's the difference?

A. I'm not aware that there's a daily forecast of temperatures for an entire 30-day period.

Q. Okay. So your gas team, as far as you understood it, when it undertook to predict how much gas it needed for a particular month would not look at temperatures; is that what you're telling me?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: Or projected temperatures. Sorry.

A. As I said, I'm not aware of the forecast for daily temperatures for an entire month.

Q. Okay.

A. A 30-day period. So I -- so as I said, I think that's the process we use to forecast temperature for next-day use and purchase is different from -- we wouldn't use that same process on a monthly basis.

Q. Got it. Okay.

And again, I just want to confirm, the two

primary, if not exclusive, purchasers of natural gas for CPSE during January and February of 2021 were Mr. Skaer and Mr. Bordovsky; is that right?

A. Mr. Skaer and Mr. Bordovsky were our two primary gas traders during January and February of 2021.

Q. Okay. And I should make specific. Natural gas purchasers. They were the specific traders; right?

A. Mr. Vinson and -- sorry.

Mr. Bordovsky and Mr. Skaer were our principal natural gas traders and purchasers during that time frame.

Q. Okay. And is it true, sir, that during Winter Storm Uri you and your -- I'm sorry.

To whom did you report during Winter Storm Uri?

A. During Winter Storm Uri I reported to Chris Eugster, our chief operating officer.

Q. E-U-S-T-E-R?

A. Mr. Eugster's name is spelled E-U-G-S-T-E-R.

Q. Thank you for that clarification.

Who did he report to?

A. Mr. Eugster reported to Paula

Gold-Williams, our chief -- president and chief executive officer.

Q. Is she related to Gary Gold?

A. To my knowledge, no.

(Exhibit 73 was marked.)

Q. BY MR. DOBROWSKI: Okay. I just wondered. I saw the name and just wondered. Okay.

Can you look at Exhibit -- sorry -- 73, please, sir. This is a -- wait, did I...

If you would, sir, this is a March 31, 2021 letter from Paul Barham.

Are you familiar with Mr. Barham?

A. Yes, sir, I knew Mr. Barham.

Q. Okay. And if you could now just turn to -- okay. Can I borrow that, please.

A. Yes, sir.

Q. Sorry, sir. Okay.

I may not have given you because I don't have the correct copy but the one that I've marked is the correct copy. Yeah, that's not it.

So on page Bates stamp 8661, sir, there is a chart of the chief -- I'm sorry.

It shows a chart of reports to Mr. Eugster.

Do you see that?

MS. VALKENAAR: Hold on, Paul, real quick.

Is the exhibit you're showing the witness not the same that I have?

MR. DOBROWSKI: No, it's not. It's the only one I have.

MS. VALKENAAR: Can I look at it before you ask him?

MR. DOBROWSKI: Yeah, go ahead. Sorry. I'm only -- I just want him to look at that page. No, that's not it.

MR. WOODS: Here, I've got it.

MR. DOBROWSKI: If you'd give him that one.

MS. VALKENAAR: (Complies.)

MR. DOBROWSKI: Thanks.

Q. BY MR. DOBROWSKI: Yeah. Sorry, sir. If you would look at page -- this is not -- okay.

You're -- are you at page Bates-stamped -- yeah, you are. And do you see that you're listed as being a report to Mr. Eugster; right?

A. So on the document that you've put in front of me?

Q. Right.

A. So I guess I see the 8661 in the bottom right-hand corner, page 5 of the -- it's labeled as page 5 of this --

Q. Yes.

A. -- attachment?
Q. Yep.
A. So yes, it looks like a listing of Cris Eugster's direct reports at that time.
Q. Okay. And you're listed as one of them; right, sir?
A. Yes, sir.
Q. And you're listed as vice president, energy supply and market operations; right?
A. Yes, sir.
Q. And your -- I'm sorry?
A. Oh, I'm sorry, I didn't mean to interrupt.
Q. No, go ahead.
A. I said that is what the page shows, yes, sir.
Q. Right.
And then it says some of your duties and responsibilities; right?
A. It lists my name, my title, and three bullets that have listing of responsibilities.
Q. Right.
And one of those responsibilities is the acquisition of fuels to support power plant and natural gas distribution system operations; right?
A. I read that, the words that you said, yes,

as the second bullet on the list.

Q. Now, you told me earlier that you did not involve yourself in decision making for purchase of daily gas, natural gas; is that right, sir?

MS. VALKENAAR: Objection; form.

THE WITNESS: I did not have a -- do not typically make daily or decision making in purchase of daily natural gas.

Q. BY MR. DOBROWSKI: Okay. And I assume if you didn't, Mr. Eugster didn't either; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think it would be speculation on my part.

Q. BY MR. DOBROWSKI: Well, to your knowledge, did Mr. Eugster involve himself in daily decisions --

A. To my knowledge, Mr. Eugster did not involve himself in daily decision making for the purchase of natural gas.

Q. Exactly.

But during Winter Storm Uri he did; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: He did, didn't he?

MS. VALKENAAR: Same objection.

THE WITNESS: I recall communications with Mr. Eugster on prices that were being quoted to us to

purchase natural gas. And I recall communicating with him on certain quantities of gas that we were looking to purchase as certain prices, yes, sir.

Q. BY MR. DOBROWSKI: Okay. So the answer to my question is yes; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: Go ahead, sir.

A. As I said, I communicated with Mr. Eugster to inform him of prices that we were seeing and quantities of gas that we were looking to buy.

Q. During Winter Storm Uri?

A. During Winter Storm Uri, yes.

Q. On a daily basis?

A. I don't recall talking to him on a daily basis. I don't remember how often I talked to him about that.

Q. Okay. But you do remember talking to him during the days of Winter Storm Uri about the price and amounts of natural gas to be purchased; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall specific details of how many times I communicated with him. But I do recall communicating with him on prices and quantities of natural gas during Winter Storm Uri.

Q. BY MR. DOBROWSKI: Okay. And you needed

his approval before you permitted the purchase of natural gas by your traders during Winter Storm Uri; right, sir?

MS. VALKENAAR: Objection; form.

THE WITNESS: I recall that he wanted to be aware of purchases or purchased -- planned purchased quantities and prices at certain points during the storm.

(Exhibit 74 marked.)

Q. BY MR. DOBROWSKI: Okay. Let me hand you Exhibit 74, sir, and you'll see that this is a text string between you, Mr. Eugster, and Mr. Gold; right?

A. The document that you handed to me does appear to be a text between myself, Cris Eugster, and Gary Gold.

Q. And it's dated February 14, 2021; right?

A. I would agree the date on the page is February 14th, 2021.

Q. And the top text is from Mr. Eugster at 9:12 a.m.; right?

A. The first text on the sheet is listed as 9:12 a.m., yes, sir.

Q. And he writes to you and says, "Kevin, Again, I want to reiterate that you review any significant purchases with Gary and I before

executing."

That's what he wrote; right?

A. I agree that's the words that are on the page, yes, sir.

Q. Okay. So he was telling you, look, you can't have any purchases on or after February 14 without his approval and review with Mr. Gold; true?

A. I recall making him aware of purchases, and I think that's what the text says he wanted to be, he wanted to review those purchases.

Q. And the reason for why he wanted to be -- have the review of those purchases before they were made, what was your understanding of that?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. Could you restate the question?

Q. Sure.

What was your understanding of why he wanted to be -- to review the potential purchase of natural gas during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. My understanding is he wanted to be aware of the prices that were being quoted in the market. I don't know that I can speak for him as to why he

wanted or what he planned to do with that information.

Q. Well, what was your understanding of why he wanted that information?

A. I don't recall him communicating to me a reason why he wanted the information. He asked me to provide it so we did -- or I did.

Q. Well, he was your supervisor; right?

A. At the time he was my supervisor, yes, sir.

Q. Okay. And you made him aware of all information that he requested during Winter Storm Uri; right?

A. I don't recall all the specific communications I had with Mr. Eugster. To the extent he requested information, I tried to provide that.

Q. Okay.

A. I don't remember, as I said, exactly all the different communications between us.

Q. And what he asked for you was to provide him with the opportunity to review any significant purchases before executing; right?

A. I would agree that this text message refers to reviewing significant purchases before executing. I don't think it -- my opinion, it's not specific as to what purchases he was referring to.

Q. Come on now. You understood he was talking about natural gas, didn't you?

MS. VALKENAAR: Objection; form.

THE WITNESS: I would say this text is unclear. I don't recall the specifics of this particular text message. The other individual referenced in the text message and reference to day-ahead purchases is electricity, not natural gas.

(Exhibit 75 was marked.)

Q. BY MR. DOBROWSKI: Okay. Well, let's -- let's see if we can help you with that, Mr. Pollo.

Take a look at Exhibit 75. This is a February 13, 2021 e-mail -- or -- excuse me -- text message between you, Mr. Pollo, and Mr. Gold; right?

A. If you can give me just a second to review it.

Q. Sure.

A. So this does appear to be a series of texts between myself, Cris Eugster, and Gary Gold.

Q. On February 13, 2021; right?

A. Yes, sir, February 13th, 2021, is the date listed.

Q. The day before the Exhibit 74 that we just looked at; right?

A. I would agree that February 13th is the

date on the second Exhibit 75. And February 14th, the day after, is the date on Exhibit 74.

Q. Okay. So in this you're sharing with Mr. Eugster that you had received an offer from one of our primary suppliers for today, only gas -- today only gas at $75; right?

A. The text on the piece of paper does refer to an offer from a primary supplier for today only gas at $75, yes.

Q. Okay. So you were telling Mr. Eugster what the price of natural gas was for today only gas; right? As of February 13, 2021; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: So I don't recall the specifics around why that text was requested or sent. I would agree that based on what you handed me that, yes, I was communicating the price of gas to Cris Eugster.

Q. BY MR. DOBROWSKI: And that was -- $75 was higher than the $38.83 which you and CPSE now claim is the appropriate price for natural gas during Winter Storm Uri; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I would agree that $75 is higher than 38.83. I disagree with your class --

your classification of 38.83. 38.83 was the basis of the conceded amount that we issued payment to your client.

Q. BY MR. DOBROWSKI: And the reason it was issued as a conceded amount is because CPSE and you claimed that that was the correct and appropriate price to pay; right?

MS. VALKENAAR: Objection form.

THE WITNESS: As I said, 38.83 was the price that was formed -- was used to calculate the conceded amount that we issued payment.

MR. DOBROWSKI: Object as nonresponsive.

Read him back the question.

(The record was read.)

THE WITNESS: My recollection is we communicated that 38.83 was the basis of the conceded amount.

Q. BY MR. DOBROWSKI: I'm not asking that question. Well, do you believe that 38.83 is the correct and appropriate amount that should be paid for gas purchased during Winter Storm Uri or not?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't have an opinion on whether that's the right price to pay or not.

Q. BY MR. DOBROWSKI: You don't? Did you ever

engage in any discussions about the $38.83 per MMBtu for the purchase of natural gas during Winter Storm Uri with anyone at CPSE?

MS. VALKENAAR: I'm going to object as to form and instruct you not to answer to the extent that discussions involved counsel or work product related to anticipated litigation.

THE WITNESS: Could you repeat your question.

MR. DOBROWSKI: Sure.

Read it back to him.

(The record was read.)

MS. VALKENAAR: Same objection. Same instruction. You can answer to the extent that it would not disclose attorney-client communications or communications involving work product.

Q. BY MR. DOBROWSKI: I'm not asking that question. I'm asking did you. Yes or no. I'm not asking you to disclose to me the substance of the communications.

Did you have those discussions, period? Say nothing more other than yes or no, please.

A. Could you repeat the -- your question, please?

Q. Sure.

MR. DOBROWSKI: Could you read it back to him.

(The record was read.)

MS. VALKENAAR: Same objection. Same instruction.

THE WITNESS: To my recollection, any conversation I had would have been with -- as part of discussions with our legal team.

Q. BY MR. DOBROWSKI: Okay. So you had no discussions without a lawyer present about the appropriateness of the $38.83 figure per MMBtu for the purchase of natural gas during Winter Storm Uri; right?

MS. VALKENAAR: Objection; form. I'm going to object as to privileged.

Only answer to the extent you can answer without disclosing attorney-client work product.

MR. DOBROWSKI: All I'm asking is if he had any discussions without counsel. That's all I'm asking regarding the $38 and -- I'm sorry.

Q. BY MR. DOBROWSKI: I'm only asking you, sir, did you have any discussions without counsel regarding the appropriateness of the $38.83 per MMBtu prior -- or for the purchase of natural gas during Winter Storm Uri? Just say yes or no.

A. I don't have specific knowledge of a conversation around 38.83 that was not outside of either communication with an attorney or at the direction of an attorney.

Q. Okay. And did you have any -- so you had no discussions with Ken Skaer outside -- no discussions at all with Ken Skaer about the appropriateness of the $38.83 per MMBtu figure for the purchase of natural gas during Winter Storm Uri; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall having a specific conversation with Ken Skaer about 38.83.

Q. BY MR. DOBROWSKI: Same question about Mr. Bordovsky; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall having a specific conversation with Mr. Bordovsky about that number.

Q. BY MR. DOBROWSKI: Okay. What is your understanding about how the $38.83 figure was arrived at?

MS. VALKENAAR: Object as to form.

And I'll instruct you not to answer to the extent that any discussion would disclose

attorney-client communications or attorney work product.

Q. BY MR. DOBROWSKI: I'm not asking you about attorney-client communications. I'm asking you what your understanding is of how the $38.83 figure was arrived at.

A. I do not have specific knowledge or involvement in the process that was used to calculate that number.

Q. Okay. Okay.

Let's go back to Exhibit 74 and 75.

If we could, going to 75, sir, this e-mail exchange -- excuse me -- text message exchange between you and Mr. Eugster and Mr. Gold, okay, on the February 13, 2021. Do you have that in front of you?

A. I have the exhibit labeled 75 in front of me, yes, sir.

Q. Okay. And you've informed Mr. Eugster and Mr. Gold that the purchase price for today only gas was $75 per MMBtu; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: The first text that's listed on the exhibit, in that text it appears that I did inform Mr. Eugster that the -- we received an offer

for today only gas at $75.

Q. BY MR. DOBROWSKI: And you write, "Wanted to keep you in the loop before we were to make a purchase."

Do you see that?

A. I see those words, "Wanted to keep you in the loop before we were to make a purchase."

Q. And that's what you were telling Mr. Eugster and Mr. Gold, right, on the 13th of February; right?

A. I would say based on the text that -- and the exhibits that you have handed me, I would say that on February 13th I communicated to Mr. Eugster and Mr. Gold that we received an offer for 75-dollar gas.

Q. And you wrote to them and said you wanted to keep them in the loop before you made the purchase; right?

A. I agree that is in the -- in the text message, yes.

Q. Why did you want to keep them in the loop before CPS Energy made the purchase?

A. As I said earlier, Mr. Eugster had asked to be made aware of significant quantities and the purchase prices that were being offered or quoted to

us.

Q. Why?

MS. VALKENAAR: Objection; form.

THE WITNESS: I -- as I said, I cannot speak for Mr. Eugster as to why he wanted that information and what he would do with it. He made the request of me to provide him the information so I tried to keep him informed.

Q. BY MR. DOBROWSKI: What was your understanding of why he wanted to be informed?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall that he communicated a specific reason.

Q. BY MR. DOBROWSKI: I'm not asking you whether he communicated a specific reason. I'm asking you for your understanding of why he wanted the information.

What was your understanding?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: That's -- you know, when she says that, that's kind of your red flag, you realize, so you got to be care- -- she's scared of this -- the question. So if you could just kind of listen to the question and I know she keeps interrupting because she's afraid of the answer.

Go ahead and answer.

MS. VALKENAAR: I'll object to the sidebar. It could be that you're asking a bad question.

MR. DOBROWSKI: Not possible.

Q. BY MR. DOBROWSKI: Go ahead, sir.

A. My understanding is he made a request for information and as my -- as since he was my supervisor, I attempted to provide him with the information he requested.

Q. So other than he just made the request you had no understanding for why your supervisor wanted the information regarding the purchase price of natural gas; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: Or did you have an understanding?

A. I'm sorry, could you repeat the question.

Q. Sure I'm just asking you Mr. -- well, let me ask this: Was it unusual for Mr. Eugster to ask you for information on the purchase price of natural gas for a particular day?

A. I would say it was uncommon. I don't know that that was the first time it had ever happened. I mean, prices move up and down in the market. Depending on what may have caused prices to move up

or down, we -- I would imagine we communicated with him from time to time.

Q. Right. But this was uncommon; right?

A. It was not a -- yes, it was not a frequent or daily occurrence for us to communicate prices to him every day.

Q. And the reason you understood he was asking for that -- this information was because of Winter Storm Uri was upon you; right?

A. I think at that time with Winter Storm Uri there was a lot of activity going on across the company. There was a lot of -- I'd say there was more -- more information that was being transferred than maybe would be typical on a normal day, if you will.

Q. Well, but the fact is February 13, as we've talked about, is within the time period for Winter Storm Uri; right, sir?

A. Yes, February 13th is within the date range we talked about earlier.

Q. Right. And this is a Saturday; right?

A. I don't have a calendar in front of me.

Q. I'll represent to you February 13th was a Saturday. So that would make it even more uncommon to be communicating with Mr. Eugster about the price

of natural gas on a today only basis; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think -- I would say on, you know, communicating information with Mr. Eugster on a Saturday was not, again, a common occurrence that happened every Saturday.

I would say with Winter Storm Uri there was a lot of activity that happened 24 hours a day since the seven days a week from the start of the storm to the end.

Q. BY MR. DOBROWSKI: Because it was essentially a crisis of cold weather that you weren't expecting; right?

A. It was a declared disaster within the state by the governor.

Q. Right. And the fact of the matter was is that you and CPSE were concerned about the supply of natural gas you had; right?

A. I think my recollection is we were concerned about a number of things in terms of trying to continue to serve our customers during that week.

Q. Including the supply and availability of natural gas; true, sir?

A. The supply, availability of natural gas was certainly one of the things we were looking at, yes,

sir.

Q. Was $75 per MMBtu a typical or atypical price for natural gas per MMBtu?

A. In my opinion it is atypical. We prior to Winter Storm Uri had never paid a price anywhere close to $75.

Q. And what you mean by "atypical" you mean atypically high; right?

A. I mean, atypical as in not the normal.

Q. As in it was much higher than what you had previously experienced; is that fair? It's not low atypically. It's high atypically for a price.

A. The $75 price as well as the other prices that occurred during Winter Storm Uri were -- say saw an extreme, extreme increase compared to prestorm.

Q. Okay. And when you wrote this e-mail to Mr. Eugster did he inform you that you were not to purchase any natural gas above $38.83?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you repeat your question.

MR. DOBROWSKI: Sure.

Could you read it back to him.

(The record was read.)

Q. BY MR. DOBROWSKI: Per MMBtu?

MS. VALKENAAR: Same objection.

THE WITNESS: My recollection is at the time our primary concern was being able to procure the physical natural gas that we needed to serve our customers' homes and to run the power plants that were desperately needed at that time.

Q. BY MR. DOBROWSKI: So you didn't -- you weren't concerned about price; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think we were concerned about a lot of things. I think our over -- I think our primary focus was assuring that we could supply natural gas that -- to provide to customers for their homes and to provide gas to run power plants that were needed to provide electricity to keep the heat on in people's homes during a governor's -- a gubernatorially declared disaster that was literally a matter of life and death for folks.

Q. BY MR. DOBROWSKI: Okay. So you didn't -- so Mr. Eugster did not tell you to limit purchases to $38.83 per MMBtu during Winter Storm Uri; correct?

A. I do not recall Mr. Eugster telling us or -- telling us not to buy gas above 38.83. I remember Mr. Eugster being concerned that -- that we would have the amount of gas that we needed to run

the power plants and supply the -- our distribution company to get gas into people's homes.

Q. What did he say that led you to believe that, sir? Do you recall?

A. I don't recall specific words, no, sir.

Q. Generally what did he tell you?

A. Generally my recollection is that we were discussing quantities of gas that we believed we needed to use that week or on a particular day. And he was asking were we able to get that gas and -- and ensuring that we were able to -- ensuring or keeping track of how we were -- how successful we were in being able to procure the gas we needed to run the power plants and supply homes.

I recall discussions around quantity and meeting that need is where his focus was.

Q. And during those discussions of quantity and meeting that need did you have discussions about the purchase price of the gas? And we're talking about Winter Storm Uri, the time frame; right?

A. So during times of Winter Storm Uri?

Q. Yes, sir.

A. Yes. You know, I think the communication with Mr. Eugster was different, you know, compared to, again, we said Winter Storm Uri defined that as

February 12th. And again, I think the communication that I had with Mr. Eugster was different, you know, if you went February 12th throughout the storm.

I don't recall communicating specific purchases and prices to him, you know, early or the first day of that storm.

But throughout the storm I think, as we discussed, we communicated quantities as well as the purchase price. I mean, as you said -- as you showed on Exhibit 75, there's a purchase price or offer price in that text.

Q. Okay. And during those conversations with Mr. Eugster he indicated to you that while price is important, volume to meet the need was the most important goal; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: My recollection is that our primary concern, including from discussions with Mr. Eugster, that procuring the physical gas that we needed to supply customers' homes and run our power plants was our -- was our main focus.

Q. BY MR. DOBROWSKI: Okay. And indeed, as of February 13, this $75 per MMBtu was a reasonable price, wasn't it?

MS. VALKENAAR: Objection; form.

THE WITNESS: What I would say is $75 price that we are discussing in the text on February 13th is a different price than what was quoted on February 12th for that weekend.

Q. BY MR. DOBROWSKI: Well, I know. But if you look at Mr. Gold's text back to you at 4:17 p.m., Mr. Gold write -- Gold writes, "If gas burns have been bigger as we discussed, it seems like this is a reasonable price"; right?

A. I disagree. That's not what the text says. The text, as I read it on the exhibit, says if gas burns have been bigger as we discussed it seems like this is a reasonable purchase. It does not reference price.

Q. Okay. And then you -- the next line, you say, "Gas burns very high yesterday."

What did you mean by that?

A. I don't have the specific figures in front of me as we sit here. But as far as "yesterday," I think, you know, what I believe I was referring to would have been the amount of gas that we consumed on the day prior, which would have been February 12th.

Q. Okay. And then if you go back up, sir, in the middle of the page about, at 12:02 p.m. Mr. Eugster writes to us, that, "Yes, please keep us

in the loop before making any purchases."

Who was he referring to when he said keeping us in the loop, as you understood it?

A. I don't recall the specifics of -- of Cris's request. I would say from the -- the text message that you presented here, I would say the "us," based on who's copied on these texts, would refer to Cris Eugster and Gary Gold.

Q. Who was Mr. Gold and what was his position at CPSE?

A. At the time of Winter Storm Uri, Mr. Gold was our chief financial officer.

Q. Okay. So the chief financial officer for CPSE and Mr. Eugster, the chief operation officer, wanted to be informed of -- wanted to be informed before your group made any gas purchases, according to his text message of February 13; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I would agree that the text labeled as 12:02 p.m. from Mr. Eugster says, "Please keep us in the loop before making any purchases." I don't recall -- well, again, that would have been, as you represented, the 13th was a Saturday, so we would have already bought the gas that we had forecasted to

use for the weekend.

The way the weekend traded everything was bought the day before on the 12th. So there wasn't -- you know, if there were any purchases to have been made on that day, my recollection is it would have been a same day type of purchase of gas, which is not -- it's not something that we frequently do, make same day gas purchases.

MR. DOBROWSKI: Okay. Object as nonresponsive.

Q. BY MR. DOBROWSKI: He does instruct you as your boss to keep him and Mr. Gold in the loop before making any purchases; true, sir?

A. I agree that is what is represented in that text, yes.

Q. And did you follow your boss's instruction after February -- on and after February 13th?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You may answer.

A. So my recollection is that this text message wasn't the only and final communication between Mr. Eugster and Mr. Gold and myself throughout the week, so --

Q. I didn't ask that. Do you remember my question?

A. No. Could you repeat it?
Q. Sure. No problem.
(The record was read.)
MS. VALKENAAR: Same objection.
THE WITNESS: So my recollection is that, as requested, I provided Mr. Eugster and Mr. Gold with information on purchase price and quant- -- offer price and quantity before we executed purchases.
My point -- or my earlier answer was there were other conversations with Mr. Eugster and Mr. Gold after this text message, as I recall. So I don't believe that this text message was the final direction that I was given from Mr. Eugster.
Q. BY MR. DOBROWSKI: And I'm not saying it was.
But is it fair to say, sir, that after February 13 for all purchases that CPSE made during Winter Storm Uri those purchases were approved by Mr. Gold and Mr. Eugster?
MS. VALKENAAR: Objection; form.
Q. BY MR. DOBROWSKI: You can -- purchase of natural gas.
MS. VALKENAAR: Same objection.
Q. BY MR. DOBROWSKI: You can answer.

A. I would say no, I don't think that Mr. Eugster and Mr. Gold approved every purchase of natural gas that was made.

Q. Did they approve the majority of those purchases?

A. I don't recall specific if they approved a majority. We had -- we -- there were specific transactions or proposed transactions that I didn't communicate with Mr. Eugster and Mr. Gold before our team executed on those -- on those deals.

Q. I'm not asking whether you communicated with them before. But had they approved the transactions?

MS. VALKENAAR: Objection; form.

THE WITNESS: I remember communications to make them aware. I don't recall specifically whether they provided direct approval or once they were made aware that we then moved forward with the transaction.

Q. BY MR. DOBROWSKI: In any transaction that you made them aware of prior -- or -- I'm sorry -- during Winter Storm Uri, can you recall a single transaction where either Mr. Gold or Mr. Eugster objected to the purchase but you went forward with the purchase for CPSE?

A. There were a lot of transactions for natural gas that were done that week. I don't recall a specific one where they -- I don't recall a specific one that meets your criteria, that they objected and we purchased anyway.

Q. Okay. So for -- so as you sit here today, your best recollection is that for every single natural gas purchase by CPSE during Winter Storm Uri Mr. Gold and Mr. Eugster were on board with the transaction; true?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I don't recall Mr. Eugster and Mr. Gold approving every single transaction that we made. I recall that we discussed an approach or a strategy that they were aware of. We executed according to that strategy.

And then there were additional transactions that I recall or remember communicating with them again the circumstances or specifics around price and quantity.

Q. Okay. And for those additional transactions, did they approve them?

MS. VALKENAAR: Objection form.

Q. BY MR. DOBROWSKI: As best you recall?

MS. VALKENAAR: Same objection.

THE WITNESS: As best I recall, I don't remember if the word "approval" was used or not.

Q. BY MR. DOBROWSKI: Whether it was -- the word "approval" was used or not, was it your understanding that you could go forward with the transaction because they had either approved implicitly or you were following their general guidelines?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. My recollection is on those communications with Mr. Eugster and Mr. Gold, the primary concern and focus was on ensuring we had the quantity of gas that we needed. I do not recall a specific transaction that -- where they said no or wanted us to not move forward.

Q. Okay. And just to close the loop on this and we'll take a break.

Just as you sit here today, you can't think of a single purchase of natural gas, can you, during Winter Storm Uri whereby you ignored the instructions or guidelines of Mr. Eugster or Mr. Gold regarding the purchase of natural gas, can you?

MS. VALKENAAR: Objection; form.

THE WITNESS: To my knowledge, we -- I don't know the exact quantity of transactions that were -- a number of transactions that were done during that week, I don't recall the specific details of an individual transaction.

Q. BY MR. DOBROWSKI: No, what I'm asking you, sir, is, as you sit here today, do you recall a single transaction that whereby CPSE purchased natural gas that Mr. Eugster and Mr. Gold did not approve of? That's all I'm asking.

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you repeat your question.

MR. DOBROWSKI: Read it back to him.

(The record was read.)

Q. BY MR. DOBROWSKI: During Winter Storm Uri?

MS. VALKENAAR: Object as to form.

A. I would say the initial transactions that were done on February 12th occurred before Mr. Eugster issued his request to be made aware of transactions, quantity and price.

Q. Okay. Other than those transactions, is it fair to say that you can think of no transactions whereby Mr. -- excuse me. Let me rephrase.

Other than the transactions engaged in

prior -- on or prior to February 12, you can't think of any purchases of natural gas by CPSE during Winter Storm Uri that Mr. Eugster and Mr. Gold didn't approve of, can you?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

MS. VALKENAAR: He's answered that.

THE WITNESS: I think Mr. -- my recollection is Mr. Eugster and Mr. Gold were aware after they -- Cris issued the request to be made aware, that they were aware of either the transaction or the strategy that we were going to use to -- to, you know, procure multiple transactions. So I don't recall a specific transaction -- I don't recall a specific transaction that was done that either wasn't, you know, per the strategy that we had discussed with Mr. Gold and Mr. Eugster or that was one that we had specifically communicated to them about.

MR. DOBROWSKI: Okay. Let's take a break. 10 minutes. Is that okay?

MS. VALKENAAR: Sure.

THE WITNESS: Sure.

THE VIDEOGRAPHER: Off the record at 10:51.

(A brief recess was taken.)

THE VIDEOGRAPHER: Okay. We're back on the record time is 11:04.

(Exhibit 76 was marked.)

Q. BY MR. DOBROWSKI: Mr. Pol- -- sorry.

Mr. Pollo, let me hand you Exhibit 76, sir. This is an e-mail -- I'm sorry -- a text message string between you, Miss Paula Gold-Williams, Cory Kuchinsky, Frank Almaraz, Gary Gold, Fred Bonewell, Paul Vinson, amongst others; right?

A. Yes, sir. I'd agree that it looks to be a text message between myself, Carolyn Shellman, Paula Gold-Williams, Cory Kuchinsky, Frank Almaraz, Paul Vinson, Fred Bonewell and Gary Gold.

Q. And it's dated February 15, 2021, at 10:11 p.m.; right, sir?

A. Yes, that is the date on the -- on the exhibit.

Q. So this is Monday night during Winter Storm Uri; right?

A. To my recollection, it sounds correct to your earlier representation of the 13th as Saturday, that would make the 15th Monday, yes, sir.

Q. Do you remember that was a holiday, Washington's birthday or something like that? Do you recall that?

A. It was a -- yeah, a federal holiday, as I recall.

Q. And, Mr. Pollo, can you tell me, Miss Shellman, what was her position in CPSE in February of 2021?

A. Miss Shellman, I don't recall her exact title, but in February of 2021 Miss Shellman essentially was our chief legal officer.

Q. And what about Paula Gold-Williams?

A. As I mentioned earlier, Paula Gold-Williams in February of 2021 was our president and chief executive officer.

Q. And what about Cory Kuchinsky?

A. In February 2021 Mr. Kuchinsky, I don't remember his exact title, but part of his responsibility was our enterprise risk department.

Q. And the position of Mr. Almaraz?

A. In February 2021 Mr. Almaraz was our -- I believe our chief administrative officer by title.

Q. And Mr. Bonewell?

A. Mr. Bonewell in February of 2021, I believe his title was our chief safety officer. And I believe at that time he was also our chief -- again, I apologize, I don't remember his title. But I believe he ran our -- our natural gas distribution

company.

Q. Okay.

A. It was in his chain of command.

Q. And here you write Paula, Paul Vinson and I met with Cris -- and who is Cris?

A. Cris would be Mr. Eugster.

Q. And Frank. Who's Frank?

A. Frank is referring to Mr. Almaraz.

Q. Fred. Who's Fred?

A. Mr. Bonewell.

Q. Gary is Mr. Gold?

A. Yes, sir.

Q. Carolyn and Cory to review our gas purchase strategy for tomorrow's activity in buying for gas day Wednesday; right?

Did I read that right?

A. Yes, I agree that's what the text says.

Q. So this appears to be a meeting of, frankly, the executive team at CPSE; is that a fair comment?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: Or at least of the majority of the executive team.

A. It included several members of our executive team. I don't remember exactly how many

were on the team at the time to be able to categorize it as a majority.

Q. Well, Mr. Bordovsky referred to this group as the head honchos; is this a fair characterization?

MS. VALKENAAR: Objection; form.

THE WITNESS: Obviously Miss Gold-Williams is our president and CEO so she was at the top of the organization chart.

I would agree that Miss Shellman, Mr. Almaraz, Mr. Bonewell and Mr. Gold were part of our -- our chief team, which was Paula's direct reports.

Q. BY MR. DOBROWSKI: What was the meeting about?

A. As I recall, we -- as the sentence you read in the text message referred to, that we were discussing our gas purchase strategy for the morning of Tuesday, which would have been to buy gas for, as the text says, gas day Wednesday.

Q. Why were you having a meeting with top executives at CPSE regarding gas purchasing for gas day Wednesday?

A. My recollection is that the trading day of Tuesday for gas day Wednesday would have been the first -- the first set of daily purchases following

the long weekend and the purchases we made on February 12th.

Q. Yeah. But why were you -- why was this group of people meeting about purchasing gas at that time?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I believe one of the primary concerns we had was availability of gas and how much gas we were going to need to meet customers' needs. I think there was, you know, an awareness of what prices had done for the weekend. I think that team was interested in understanding, you know, what -- what we might see in the market on Tuesday for both prices and -- and available quantity.

Q. What had the prices done over the weekend?

A. I don't recall specific index prices or transactions. But as I recall, in general for the gas that was purchased or that we committed to purchase for the weekend, that the prices were generally between a hundred and fifty and $200 per MMBtu. That was for gas purchased for Saturday, Sunday, Monday, gas day Saturday, Sunday, Monday, and Tuesday.

Q. Were those purchases approved by Mr. Gold

or Mr. Eugster?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. Are you referring to the purchase on February 12th?

Q. I'm referring to the purchases you said during the weekend.

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: Beginning on the 13th.

A. The purchases that we committed to on the morning of February 12th would have occurred before Mr. Eugster made his request to -- to be kept in the loop based on the earlier text message regarding other transactions.

Q. Did you approve the purchases on the morning of the 12th for a hundred fifty, $200 per MMBtu?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

THE WITNESS: I did not directly authorize those transactions.

Q. BY MR. DOBROWSKI: Did you indirectly authorize them?

A. Not that I recall.

Q. Did you object to them?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think my recollection is that there was a concern from all involved with CPS Energy around the prices on those transactions.

I think we also had a need at the time to procure natural gas to be able to run power plants and serve our customers' homes.

Q. BY MR. DOBROWSKI: Well, who made the purchases, as best you recall?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. As we discussed earlier, at the time of the winter storm, Mr. Bordovsky and Mr. Skaer were our primary traders.

Q. Who authorized the purchases?

MS. VALKENAAR: Objection; form.

MR. DOBROWSKI: Strike it. Let me withdraw.

Q. BY MR. DOBROWSKI: Did they have authority to make purchases of natural gas at the -- these prices?

MS. VALKENAAR: Objection; form.

MR. DOBROWSKI: Did they have authority? That's simply a yes or no. How can there be an objection to form on that? You got to be kidding me.

Q. BY MR. DOBROWSKI: So just to tell me, sir, did they or did they not have authority to make those purchases on behalf of CPSE at those prices?

MS. VALKENAAR: Objection; form.

MR. DOBROWSKI: I can't wait till we get to trial. I cannot wait.

THE WITNESS: I'd say Mr. Skaer and Mr. Bordovsky were authorized to make trades to purchase natural gas.

Q. BY MR. DOBROWSKI: For those prices, that is, between a hundred fifty to $200 per MMBtu, were they authorized?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer. And I'll remind you you're under oath.

A. As I said, they were authorized to make trades. They did execute trades for CPS Energy.

Q. And were they authorized to make these purchases, yes or no? If they weren't, tell me.

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. They -- they were authorized to make the trades -- or they were authorized to trade on behalf of CPS Energy.

Q. So they were authorized to make these

purchases at these levels of a hundred fifty to $200 per MMBtu; true?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer. She makes that objection because she hates this. You can answer.

MS. VALKENAAR: No, you have poor questions.

Q. BY MR. DOBROWSKI: Okay.

A. I don't recall for specific transactions, you know, which ones were done where there was a fixed price presented or whether how many of those transactions were quoted at an index price.

Q. What's an index price?

A. It's a price that is set by or published by I think Platts is the one that generally publishes the index prices.

Q. Why does CPSE utilize an index such as Platts for determining purchase price?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer, sir. I'm not -- believe me, I'm not laughing at you. Please.

A. I don't -- I don't think that CPS Energy is the only one that uses index prices. I think certain

transactions -- to my knowledge, certain transactions are quoted to us at that index price.

Q. No, no. And I -- I'm sure that CPSE is not the only one that utilizes the index price to determine purchase price.

I'm just asking, why does CPSE use it, so far as you know?

A. To my knowledge, if -- that's -- if that's the -- if our -- if the quantity of gas or purchase of gas that we're looking to execute is -- is quoted at an index price or quoted using index, it's one of the ways that we purchase gas.

Q. And why do you use that?

A. To my knowledge, that's one way that natural gas transactions are priced.

Q. In the industry?

A. I don't know that I'm the expert to speak for the industry. I would say that as we -- of the purchases that we make, an index-based price is one of the -- one way that those transactions are priced.

Fixed price is another way. Generally, it's one of those two approaches.

Q. And what I'm trying to get to is, why do you at CPSE utilize that index? What's the reason?

Let me revise -- let me ask it this way:

Is one of the reasons why you utilize the index price because you find it reliable?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I would say we use -- one of the reasons that we are -- transacted natural gas purchases using an index price is that's a common way that it's quoted.

Q. It's a common way in the industry to quote gas utilizing an index price; is that what you're telling me?

A. I -- yes, I think -- I don't know exact statistics but a number of our natural gas transactions are based on an index price.

Q. Okay. And have you over the years found index prices such as Platts to be reliable?

A. I would say I don't really have an opinion on that.

Q. Okay. Have you found them to be accurate?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I don't have firsthand, direct knowledge as a -- as a natural gas trader to understand -- or to make a qualified statement on whether those index prices are accurate or reliable.

Q. Okay. But you know that your gas traders have utilized the index price in making purchases on behalf of CPSE; correct?

A. As I said, our natural gas traders have made purchases of natural gas, you know, using an index price.

Q. Okay. Going back to Exhibit Number 76, sir, in the middle of it you wrote, after discussing your meeting, "We agree to the following procurement strategy"; right? And that's what it says.

Do you see that?

A. Right. I agree that those words are about midway throughout text. "We agree to the following procurement strategy."

Q. And that's -- procurement strategy is for the purpose of buying for gas day Wednesday; right?

A. To my recollection, I think we -- we used it for gas day Wednesday, as the text said, yes.

Q. Okay. And the procurement strategy was prices below $50 purchase total volume, which is about $31 million if prices are $50; right? That's part of the procurement strategy; right?

A. Agree that the text message says if it was -- if prices were less than or equal to $50 we would purchase our total volume.

Q. Okay. And -- and your total volume was how much -- oh, the 614,000 MMBtu?

A. My recollection is that the purchase -- the total volume that you -- I referred to in that text would be the 614,000 referenced earlier as our current forecast for Wednesday.

Q. That was 614,000 MMBtu; right?

A. The text message does say the current forecast for Wednesday was 614,000 MMBtu, yes.

Q. Okay. And so you're talking about the strategy for making the purchase of gas up to 614,000 MMBtu; is that correct?

A. That would be my understanding of rereading this text message, yes, sir.

Q. Okay. And you're saying -- then you go on to say, look, for gas price near a hundred dollars per MMBtu, you write, "Purchase 564,000 MMBtu and withdraw the other 50,000 from storage"; right?

A. I agree that what is written on the text is for prices near a hundred dollars purchase 564,000 MMBtu, withdraw the other 50,000 from storage.

Q. Okay. And you then go on and say hundred-dollar prices leveraging storage in this way yields about five-million-dollar cost avoidance.

What does that mean?

A. I presume that that would be the difference between -- or the difference, if you will, between -- the 5 million I believe would be the difference -- excuse me -- between -- or would be calculated as the hundred-dollar price that's mentioned in the text times the 50,000 MMBtu of natural gas.

Q. Okay. And then prices equal to or greater than a hundred fifty dollars, the strategy is to purchase 514,000 MMBtu and withdraw 100,000 from storage; right?

A. Agree that the text message says prices greater than a hundred or equal to a hundred fifty dollars, purchase the 514,000 MMBtu, withdraw 100,000 from storage.

Q. So this is information you're providing -- or you've agreed to -- strike that.

This is the strategy that the executives from CPSE had decided upon and were going to transmit this information to your traders; is that your understanding?

A. Could you repeat your question.

Q. Sure.

This procurement strategy was what was agreed upon between your group of executives at CPSE and was to be shared with your traders who were

supposed to follow these procurement strategy; is that correct?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I don't specifically recall agreement and approval, so to speak. I recall that we met. We reviewed this strategy. I communicated, as this text indicates, to Miss Gold-Williams and the others that were copied, many of whom were in that meeting.

And then my recollection is that that strategy -- I don't recall. My belief is I probably would have passed that to Mr. Vinson.

Q. Well, what was the purpose of putting this strategy together, was to give direction to your gas purchasers; right? Your traders, Mr. Skaer and Mr. Bordovsky; right?

A. I think the purpose of this strategy was -- was to give a -- provide to Mr. Vinson, Mr. Bordovsky and Mr. Skaer guidance around how we were looking to execute purchases and utilize natural gas that we had in storage for gas day Wednesday.

Q. And part of that strategy was you authorized them, that is, you being the executives, the senior executives at CPSE, to make purchases above $38.83 per MMBtu; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: I would say that as the strategy was laid out in this text we provided them guidance on how to plan to withdraw from storage to reduce the -- or offset, so to speak, the total quantity of gas that we were looking to buy.

Q. BY MR. DOBROWSKI: In addition to that, it wasn't just to advise them on what to withdraw from storage, this guidance, this policy specifically provides them with guidance to make purchases of gas at or above $38.83 per MMBtu; true, sir?

A. I think this -- and I think the primary focus of this strategy, again, was on how we wanted to introduce or use our storage, the quantity of gas we had in storage, in addition to making additional purchases that we'd have to make on Tuesday for gas day Wednesday to meet the needs of our customers.

Q. And those guidance, that policy that you set forth in here for those additional purchases authorized your traders to make purchases at or above $38.83 per MMBtu; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think our traders were being asked to make -- to purchase the quantity of natural gas that we needed during a gubernatorially

declared disaster to meet our customers' needs.

Q. BY MR. DOBROWSKI: Is that what I asked you?

MR. DOBROWSKI: Object; nonresponsive.

Read him back the question.

Try answering the question, sir, so we can stop wasting time.

(The record was read.)

THE WITNESS: As I said, my recollection is the primary focus of the strategy was around leveraging storage.

Q. BY MR. DOBROWSKI: I'm not asking you that question, sir. Can you listen to my --

MR. DOBROWSKI: Object as nonresponsive.

Read him the question.

Please answer the question that I'm asking.

(The record was read.)

THE WITNESS: As I said, I think we were directing our -- what we -- what our traders needed to do was buy the amount of gas that we needed.

MR. DOBROWSKI: Can you -- object as nonresponsive.

Please answer my question. If you cannot answer it, tell me you cannot answer it. But I would like an answer to my question, yes or no.

Please read him back the question.

(The record was read.)

THE WITNESS: I think this strategy that's laid out in the text message contemplated prices that could be anywhere from less than $50 to over $200.

Q. BY MR. DOBROWSKI: Okay. So in other words, under this policy, your traders were authorized to make purchases of natural gas on Tuesday for next day gas on Wednesday at or above $38.83 per MMBtu; is that correct, sir?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I would say our traders were authorized to buy the amount of gas that we needed to power our power plants and provide gas to our customers' homes.

Q. Including purchasing natural gas at prices above a hundred dollars; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. I think our -- my recollection is our focus, again, was on buying the physical gas that we needed. That was the primary concern.

Q. I didn't ask that question, did I, sir? I didn't ask you what your primary concern was, did I? Did I?

MS. VALKENAAR: Paul --

Q. BY MR. DOBROWSKI: You can answer the question.

MS. VALKENAAR: -- you asked a direct question.

MR. DOBROWSKI: Object as nonresponsive.

MS. VALKENAAR: Don't be harassing to the witness.

MR. DOBROWSKI: Please read him back the question. We can get through this all -- we're going to do this all day, sir. And we're going to -- I'm going to ask the judge to give me more time with you if you keep this up.

Please just try and answer my questions and we'll be done a lot faster.

Please read him back the question.

(The record was read.)

THE WITNESS: As I said, we were looking to buy the amount of gas that we needed. The strategy contemplated that prices could go up to above $200.

Q. BY MR. DOBROWSKI: So the answer to my question is yes?

A. It does say greater than or equal to $200.

Q. So the answer to my question is yes; right, sir?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. Again, I don't think the strategy specifically says -- certainly doesn't reference the price that you're mentioning. We were giving direction to our traders to buy gas from the market in conjunction with withdrawing from storage based on what the market prices were.

Q. Okay. So let's try some of the prices you do mention.

You -- this strategy, which was approved by the senior executives of CPSE on February 15, 2021, provided guidance to your gas purchasers to make purchases of natural gas above $200; right, sir?

MS. VALKENAAR: Objection; form.

THE WITNESS: My recollection is the direction that was given to our traders during the winter storm was to procure the amount of gas that we needed to run our power plants and supply our customers.

Q. BY MR. DOBROWSKI: Did I ask that question? Did I ask that question?

MS. VALKENAAR: Objection; form.

MR. DOBROWSKI: Stop.

MS. VALKENAAR: If you want to ask a

question, ask a question.

MR. DOBROWSKI: What I want him to do is answer the question --

MS. VALKENAAR: You don't need to be harassing.

MR. DOBROWSKI: -- and stop trying to deflect. I know these answers are painful.

MS. VALKENAAR: He's answering the question.

MR. DOBROWSKI: No, he's not.

MS. VALKENAAR: Yes, he is.

MR. DOBROWSKI: So let's go back to it again.

Read it back to him.

(The record was read.)

THE WITNESS: You know, as I said, the direction we had to our trader was to buy the gas that we needed. The different market prices that are mentioned were based on how much we were planning to withdraw from storage based on where market prices were.

MR. DOBROWSKI: Object as nonresponsive.

Read him back the question.

(The record was read.)

MS. VALKENAAR: Same objection.

Q. BY MR. DOBROWSKI: You can answer. Is it right or wrong? Am I right or wrong? Is my question correct or not?

A. I don't know how to categorize your question as right or wrong.

Q. Well, here's the question, just so it's clear: This policy that you and the senior executives at CPSE agreed to on the evening of February 15, 2021, authorized your gas traders to make purchases of natural gas at prices -- I'm sorry -- at or above prices equal to $200 per MMBtu; is that correct or not, sir?

A. I think that this policy directed our traders to withdraw quantities of gas from storage based on where market prices were -- were trading on Tuesday morning. I think the direction to our traders as far as -- was to buy the gas that we needed.

Q. At prices at or above $200 per MMBtu; true?

A. I don't think there was a specific direction on a price. Our direction was to buy gas that we needed to run our power plants and serve our customers' homes.

Q. But this specifically, this e-mail, directs them about what purchase to make at or above $200 per

MMBtu; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think what that text message or this policy says if prices are above to use the $200, if they're greater or equal to $200, I would say this text message and this -- or this policy says buy gas up to 425,000 MMBtu and withdraw the rest from storage.

Q. BY MR. DOBROWSKI: So it authorized the traders to make purchases at or above $200 per MMBtu up to 425,000 MMBtu; is that correct, sir?

A. My recollection is our traders were authorized to buy the amount of gas that we needed to run our power plants and serve our customers' homes during a gubernatorially declared disaster. That gas and that electricity was needed literally to -- matter of life or death for folks.

Q. Did I ask that question? Did I ask you that question?

MR. DOBROWSKI: Object; nonresponsive.

MS. VALKENAAR: Object as sidebar.

MR. DOBROWSKI: Read the question back.

We are wasting so much time. If you would listen to my question, please, sir, answer my question. Not the one you want to answer or you've

been coached to answer.

Please read -- or please answer my question. If you don't understand my question, let me know. But it seems to me you're a fairly intelligent fellow, certainly intelligent enough to answer the question. You wrote this e-mail and so I need the answers to my question.

So please repeat the question.

And I'm going to ask for more time and get my fees paid for this because this is ludicrous.

Go ahead.

MS. VALKENAAR: Paul, he's answered the question.

MR. DOBROWSKI: No, he's not. He hasn't answered it once. Come on, Lauren. Stop it. Please. You should -- go on, let's...

MS. VALKENAAR: But he has answered the question.

MR. DOBROWSKI: No, he hasn't.

Let's go ahead and read it back.

Because the judge is going to see this, and I guarantee you he is not going to be happy.

(The record was read.)

THE WITNESS: I think my answer is the same. This policy directs our traders to buy the gas

that we needed at -- based on different market prices or thresholds placed on prices that are in that text, we intended to buy less gas from the market and utilize the gas that we had in storage.

MR. DOBROWSKI: Object; nonresponsive.

Q. BY MR. DOBROWSKI: I'm asking about a particular portion of this policy that you put in an e-mail on the 15th.

And my question to you, sir, is: Isn't it true that this policy gives guidance to your traders at CPSE that they are authorized to make purchases at or above $200 per MMBtu for up to 425,000 MMBtu; true?

A. Again, as I reread the text, it looks to me that it tells our traders to buy gas. The amount of gas that we forecast, which was the 614,000 MMBtu, and then based on market prices we would buy less gas and supplement with storage.

MR. DOBROWSKI: Object as nonresponsive.

Q. BY MR. DOBROWSKI: Do you not understand my question? Are you having trouble understanding my question, sir?

MS. VALKENAAR: Paul, move on.

MR. DOBROWSKI: No, I'm not moving on. We're going to get this right because this man

refuses to answer it and --

MS. VALKENAAR: The document speaks for itself.

MR. DOBROWSKI: No, we're going to get this on the record, and you're going to answer the question. And if you can't answer the question, say you can't answer the question.

But are you having some cognitive issue, sir, that you can't understand my question?

MS. VALKENAAR: Paul, stop with the harassing comment.

MR. DOBROWSKI: I'm not, but I'm sick and tired of him playing games.

So please just try to answer my question; all right?

Read it back.

Q. BY MR. DOBROWSKI: Let me know if you don't understand it. I'm asking you specifically about the provision in your e-mail that you wrote where it begins prices at or equal -- at or greater to $200; okay?

Do you understand that? That's where we're focused.

A. Okay.

Q. Okay. And after that it says, "Begin

purchasing activity but stop at 425,000 MMBtu," open paren, "85 million which equates to our target minimum quantity minus the maximum 189,000-dollar storage withdrawal."

Do you see that?

A. Yes.

Q. And for the benefit of the ladies and gentlemen of the jury, what that instruction and policy guidance provides is to authorize your traders at CPSE to make purchases of natural gas at or above $200 per MMBtu up to 425,000 MMBtu; true, sir?

MS. VALKENAAR: Objection; form.

THE WITNESS: My answer really is the same. It says to buy gas if prices are above or equal to $200. We're not going to buy the full 614,000 at that price. We're going to buy -- we're going to withdraw it from storage for the balance.

Q. BY MR. DOBROWSKI: Okay. And so what that means for the benefit of the ladies and gentlemen of the jury is that the traders were authorized to make purchases of natural gas at or above $200 per MMBtu for that amount of gas; true, sir?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

MS. VALKENAAR: Paul, he's answered that

that's not what this policy was.

THE WITNESS: The traders are authorized --

Q. BY MR. DOBROWSKI: You can answer it.

MS. VALKENAAR: It's not what the text message says.

MR. DOBROWSKI: Stop. You know what the form objection is. Say either "objection; form" or don't say anything.

Please answer my question.

And stop coaching him.

THE WITNESS: Our traders were authorized to buy the amount of gas that we forecasted we would need.

Q. BY MR. DOBROWSKI: As set forth in this e-mail with respect to in accordance with the policy approved by CPSE executives; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. This text message, as I recall and reread it, is dictating primarily or -- what we are planning to withdraw from storage.

Q. I'm not talking about the storage portion. I'm talking about the purchase portion of this e-mail. And this e-mail provides policy guidance by the senior executives of CPSE authorizing the traders

to make purchases of natural gas at or above $200 per MMBtu; correct, sir?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. Again, my recollection --

Q. Is that correct or not? Is that correct or not? Just answer yes or no, please. If it's incorrect, say it's incorrect. If it's correct, say it's correct.

A. My recollection is the direction we provided our gas traders was to buy the gas we needed.

Q. Did -- is my --

MR. DOBROWSKI: Object; nonresponsive.

Read him back the question.

MR. WOODS: I just to want to put on the record that Energy Transfer is going to join in Enterprise's request for more time and/or a repeat of the deposition.

MS. VALKENAAR: Let's take a break.

(The record was read.)

THE WITNESS: My recollection is that the direction we gave our traders was to buy gas at prices where at certain thresholds we were going to buy less gas and withdraw from storage.

Q. BY MR. DOBROWSKI: And one of those thresholds that you authorized your traders to purchase gas at was a price of $200 per MMBtu or above; true or not?

MS. VALKENAAR: Paul, he has answered the question.

MR. DOBROWSKI: No, he has not. No, he has not.

MS. VALKENAAR: He's talked about the prices.

MR. DOBROWSKI: No, he has not. Stop interrupting. Please, you've got an objection, make the objection; otherwise, he needs to answer my question.

MS. VALKENAAR: You guys are saying you're going to ask for more time.

MR. DOBROWSKI: You're doggone right I am. I'm going to -- listen --

MS. VALKENAAR: I don't think you have the basis to do that. He's answered the question the best he can --

MR. DOBROWSKI: No, he has not answered the question.

MS. VALKENAAR: -- over and over and over again. In fact, if you don't want --

MR. DOBROWSKI: No, he's not. Lauren, you're wrong.

THE REPORTER: Okay. I can't really get all of this at the same time.

MR. DOBROWSKI: Stop. Stop, Lauren. You're interrupting the deposition. You know what the rules are.

Q. BY MR. DOBROWSKI: Please answer the question, sir.

MR. DOBROWSKI: And you can have your break as soon as he answers this question.

MS. VALKENAAR: He's answered it.

MR. DOBROWSKI: No, he hasn't. No, he hasn't. And he knows it.

MS. VALKENAAR: And for the record, CPS Energy objects to any additional time requests. You've had the opportunity to move on. The fact you're not doing it is on your --

MR. DOBROWSKI: No, I'm not moving on, because your -- the man wants to -- doesn't want to answer questions that are harmful to your case.

Q. BY MR. DOBROWSKI: So, please, sir, were -- was one of the thresholds that they were authorized to make purchases at of natural gas at a price equal to or above 200 MMBtu -- $200 per MMBtu?

A. Based on this text message, the $200 MMBtu threshold dictated how much gas we withdrew from storage.

Q. Okay. And they were allowed to make purchases at or above $200 per MMBtu per that message; right?

A. As I read this message, above -- at or above $200, it gives them direction on how much gas to withdraw from storage.

Q. And how much gas -- go ahead. I'm sorry.

A. As I said earlier, they were authorized to buy the amount of gas that we need to run our power plants and to serve our customers' home.

Q. And how much natural gas were they authorized to purchase if the price was at or above $200 per MMBtu?

A. As this text message says, if the gas prices were above or equal to $200 per MMBtu, we're planning to buy up to 425,000 MMBtu.

Q. And did your gas purchasers after this memo purchase gas at a price of $200 or more, to your knowledge, per MMBtu?

A. To my knowledge, our gas traders executed several trades on Saturday morning. I don't remember the exact prices. I do know that I recall that at

different parts in the storm, again, not sure if it was Tuesday or later in the week, but prices exceeded $200.

Q. Okay. And when was it decided by -- at CPSE that it would not pay the prices it had agreed to?

MS. VALKENAAR: Objection; form.

And I'll instruct you not to answer to the extent --

MR. DOBROWSKI: I just want when.

MS. VALKENAAR: -- that that covers any conversations with attorneys or work product related to the litigation.

Q. BY MR. DOBROWSKI: No, I'm asking for a date. I'm not asking for the content of your discussions with your attorneys. I just want to know, what was the date that you found out CPSE was not going to pay the price of $200 or above per MMBtu?

A. I don't recall a specific date. My recollection is that the earliest discussions on disputing invoices occurred before the winter storm.

MR. DOBROWSKI: Okay. We'll take a break.

MS. VALKENAAR: Do you all want to break for lunch?

MR. DOBROWSKI: No, I want to go to 12:30, if that's okay with you?

THE VIDEOGRAPHER: Off the record. 11:51.

(A brief recess was taken.)

THE VIDEOGRAPHER: We're back on the record. Time is 12:03.

(Exhibit 77 was marked.)

Q. BY MR. DOBROWSKI: Okay. Let me hand you Exhibit 77, sir.

This is a February 16, 2021 text message between you -- or from you to Miss Paula Gold-Williams, Miss Shellman, Mr. Kuchinsky, Mr. Almaraz, Mr. Vinson, Mr. Bonewell and Mr. Gold.

Do you see that?

A. Yes, sir. I see a text message dated February 16th, as you said, my name, Miss Shellman, Miss Gold-Williams, Mr. Kuchinsky, Mr. Almaraz, Mr. Vinson, Mr. Bonewell, Mr. Gold were all included.

Q. And did you ever refer to them as the chiefs, that group of people?

A. This group of people specifically, no.

Q. Who did you refer to as the chiefs?

A. The chiefs, we refer to the chiefs, it was Paula's direct reports team.

Q. Who are they or were they? When you say,

"Paula," you mean Miss Gold-Williams?

A. Miss Gold-Williams yes, sir.

Q. Yeah.

A. To the best of my recollection, at the time her direct reports of chiefs would have been Mr. Eugster, chief operating officer; Mr. Almaraz, chief administrative officer; Mr. Gold as chief financial officer; Miss Shellman as chief legal officer. I don't know if that was her exact title. Mr. Bonewell who was the -- as I said earlier, I don't recall his exact title, but it was chief safety officer and gas solutions officer, I believe.

Q. Uh-huh.

A. That's what I recall off the top of my head.

Q. Okay. Yeah.

A. I don't know that this is an accurate list.

Q. No problem.

And on this e-mail you sent on February 16 at 9:20 a.m., you write, "Quick update on the gas market for tomorrow. Prices were in the 300 to 350 range on a very limited trading. It looks like a $400 trade just occurred. So far we have purchased" -- well, let me just stop there.

Do you have any evidence that the gas

prices were manipulated by any of the gas suppliers?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You can answer.

A. Could you repeat your question, please?

Q. Sure.

Do you have any evidence that indicates that the gas suppliers manipulated the price of natural gas during Winter Storm Uri to increase it?

A. To my knowledge, I don't have personal evidence.

Q. Okay. And when you say here that prices are in the 300- to 350-dollar range on very limited trading, how did you know that? Were you looking at a screen or something or was that something you got from your traders?

A. I don't recall the specifics of -- for this particular text message. It could have come from the traders, Mr. Bordovsky and Mr. Skaer. It could have come from Mr. Vinson. I know they have -- were in communication with different suppliers through ICE Chat or text message or phone calls.

I don't know if they were looking at a screen at that point in time or know given -- I know at different times of the storm folks were displaced, you know, unable to travel to and from the office

because of the ice. So they -- I don't know the specific sources of that.

Q. Actually, what I'm asking is you. Did you have a screen that showed the prices at various delivery points or anything like that?

A. I don't recall having a screen in my -- on my particular computer at the time that was displaying that information, no.

Q. Okay. Whether it was on your computer or some other device, did you have access to the prices that you're referencing here other than through conversations with your subordinates?

A. I do not recall specific displays at the time. I recall conversations with primarily Mr. Vinson, you know, where the pricing information was being relayed back and forth. But I don't recall specifically looking at a screen myself, no.

Q. In addition, you go on and write, "So far we have purchased a 50,000 and 7,000 MMBtu block at an index plus a dollar twenty-five price."

Do you see that?

A. Yes, sir, I do see that.

Q. What index are you referencing?

A. I'd say the text is not specific. My recollection would be it was depending on that

specific block and I don't recall the details of that 50,000 or that 7,000 block. But I would say it would either be Waha index or Houston Ship Channel index, most likely.

Q. Why -- why were you utilizing index plus a dollar twenty-five price?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't have direct knowledge of the communication between our gas traders and the trader on the other side that arrived at that -- at that particular detailed price.

Q. BY MR. DOBROWSKI: Okay. You then talk about a call at 9:30.

Do you recall what was discussed during that call with the people on this e-mail?

A. Based on this text message, no, I do not recall what was discussed at the 9:30 call.

(Exhibit 78 was marked.)

Q. BY MR. DOBROWSKI: Okay. Let me hand you Exhibit 78.

A. Thank you.

Q. Exhibit 78 appears to be a series of text messages between you, Mr. Pollo; Mr. Eugster and Mr. Gold and Mr. Kuchinsky.

Do you see that, sir?

A. I do see the four individuals you mentioned: myself, Mr. Eugster, Mr. Gold, Mr. Kuchinsky.

Q. Okay. I'd like you to look at the text message you wrote at -- on February 17 at 11:40 a.m. Just read that to yourself and I'll have a question for you.

A. (Witness complies.)

Okay.

Q. Okay. And -- I'm sorry. And then the next one -- I'm sorry, let me -- and then the next one at 3:28 p.m.

A. (Witness complies.)

Okay.

Q. Based on those two e-mails -- sorry -- text messages, based on those two text messages, did CPSE purchase gas on February 17, 2021, for $500 per MMBtu for 80,000 MMBtu?

A. Based on these text messages alone, I would say I don't -- there's not enough information to confirm whether we made that transaction or not. I don't recall specifics. We -- again, I don't -- I know that was, as the text message says, that was the quantity of gas, 80,000 MMBtu, mentioned in the first one at $500.

There's not enough information in this text to confirm your statement that we made a transaction at that -- at that price and that quantity.

Q. How about the 50,000 MMBtu transaction listed at 3:28 p.m. text message, did you -- do you recall whether that --

A. Again, based solely on this text message, no, I do not recall whether that transaction was executed or not.

Q. Okay. And then if you look at the e-mail -- text message after that from Mr. Kuchinsky, he asks about a running tally of gas costs and says his last number he has is $507 million.

Does that -- and actually, if you read that e-mail and go down and over to the next page.

A. (Witness complies.)

Q. And let me know if that confirms that you purchased, not you, but CPS purchased gas at $500 per MMBtu?

A. I would say again, based on this series of text messages alone, I don't think there's enough information to confirm whether that transaction occurred. We need to look at our detailed transaction logs.

(Exhibit 79 was marked.)

Q. BY MR. DOBROWSKI: Okay. Let me hand you Exhibit 79, which appears to be a text message string between you and Mr. Vinson, Mr. Bordovsky and Mr. Skaer beginning February 18, 2021.

And I'd just like you to read the first two texts.

A. (Witness complies.)

Okay.

Q. And here you're authorizing the purchase of 3400 MMBtu of same day gas at $44; right?

A. Yes. This question from Mr. Vinson about buying 3400 MMBtus of gas, same day gas of $44, and I responded yes, I was okay with that.

Q. So when did you determine the $44 was not an appropriate price per MMBtu?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think I answered a similar question before the break.

As I recall, we did not have any -- there was no discussion about disputing invoices or prices until after the storm.

Q. BY MR. DOBROWSKI: Why was it disputed after the storm?

MS. VALKENAAR: Objection; form.

And I instruct you not to answer to the

extent that calls for any privileged communications with counsel or discussions related to anticipation of litigation work product.

THE WITNESS: I don't think I can answer that question without providing all those communications, as I recall, were done either with an attorney or at the direction of an attorney.

Q. BY MR. DOBROWSKI: Can you look at the second text message on Exhibit 79, sir.

You responded to Mr. Vinson's question about making the purchase at $44 per MMBtu. You say, "Yes, if it will help to prevent an overdraw of our storage."

What were you referencing there?

A. Well, I don't recall specifics of that conversation. I would say the -- what it appears to be -- our concern or one of the things we were looking at was how much gas we were withdrawing from storage and if our gas consumption or our storage withdrawal looked to be larger than we had expected. Looks like this transaction was around buying some same day gas to help to prevent us or allow us to stay within -- in what our storage withdrawal limits were, you know, by augmenting that with some additional same day gas that we would buy.

Q. And if you go down to the e-mail from Mr. Bordovsky at February 18, 2021, at 5:36 p.m., he wrote, "We executed the second 250,000 inground storage purchase with Enterprise this afternoon."

Can you explain what that -- what that means to the ladies and gentlemen of the jury, as you understood it?

A. As I understood it, referring to that 250,000 inground purchase with Enterprise, as I understood it, we had heavy withdrawals on our storage. So to restore our storage balance, in talking with Enterprise Pipeline, they directed us to Enterprise Products to look at buying a large quantity of gas that Enterprise Products had in storage so that we could -- we were able to execute on that transaction.

My recollection is we were essentially going to do a -- what I would call a book transfer. They were going to credit our storage account immediately with the amount of gas that we bought from Enterprise Products to add to our CPS storage balance that -- at the -- I think it's the Wilson County facility that Enterprise Pipeline runs.

Q. Well, what I'm confused about is, it ended -- he writes, "It ended up being at a price of

$20 per MMBtu instead of the earlier $31 per MMBtu."

So if you can explain to me why there was a difference between the purchase of that gas at $21 per MMBtu and the other natural gas you purchased from Enterprise and others at much higher rates at or around February 18?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: What's the distinction?

A. Could you repeat that?

Q. Sure. I'm sorry.

I'm just trying to figure out why this gas is so cheap comparably to the other gas that we were talking about before the break where you were quoting prices at 300 and 400 and $500 her MMBtu. Can you explain it to me as a non-gas person?

MS. VALKENAAR: Objection; form.

THE WITNESS: So that specific price of $20, I was not directly involved in that negotiation or discussion between our traders and Enterprise Products.

My recollection is -- you know, is that gas prices moved throughout the week. You know, it wasn't $20 throughout the week. Obviously it wasn't $400, you know, every day of the week either. So prices moved up. It started high. With the weekend,

moved higher. And then the very tail end of the storm or as we came out of storm, my recollection is that prices were starting -- you know, started to move down.

Timing on the text message you referred to on February 18th at 5:00 p.m. or 5:30 p.m. is near the end of the window that we discussed earlier as the winter storm window.

Q. BY MR. DOBROWSKI: Yeah, but I mean, it's still within that window.

So my question is: Why didn't you pay them $38.83 instead of $20 per MMBtu since CPSE says the appropriate price is $38.83?

MS. VALKENAAR: Objection; form.

THE WITNESS: As I answered before, I wasn't involved in the specific negotiation of this transaction. So I don't know what price was offered to us by Enterprise Products versus what we accepted.

Q. BY MR. DOBROWSKI: But you ultimately wrote Enterprise a letter saying that you weren't going -- CPS wasn't going to pay them more than $38.83; do you recall that, per MMBtu?

A. I recall that we sent a letter to Enterprise Products to inform them that we were disputing the invoice and along with that dispute, we

issued a payment of a conceded amount.

Q. And so my question to you is, so in other words, you did not pay the price that was higher, but you were glad to take advantage of Enterprise when it was less than $38.83; right, sir?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: At least that's what this e-mail indicates; right?

A. The text message you referred me to, I would say it states that we did buy 250,000 MMBtus from Enterprise as a price of $20 per MMBtu.

Q. Which we can agree is less than $38.83 per MMBtu; right?

A. Yes, I would agree $20 is less than 38.83.

Q. Okay. Glad that we can agree on that.

(Exhibit 80 was marked.)

Q. BY MR. DOBROWSKI: Let me hand you Exhibit 80, sir. And this is a text message or a text message string between you and Mr. Bordovsky.

Do you see that?

A. I see myself, Mr. Bordovsky, Mr. Skaer, Mr. Vinson.

Q. Yeah. And if you go at the bottom, he writes, Mr. Skaer says, on February 19, "All we can do is try our best to minimize costs on every single

transaction. I think we did our best."

Do you see that?

A. I see a text message from Mr. Skaer at 3:30 p.m. that says, "All we can do is try our best to minimize costs on every single transaction. I think we did our best."

Q. You can just answer yes or no, sir.

A. I'm sorry.

Q. In any event, did you agree with him? Did you believe your -- that your traders had done their best to minimize cost on every transaction during Winter Storm Uri?

A. I would say I don't have direct knowledge of every single transaction they did. I think, you know, they did -- I think they did as good a job as they could under the circumstances in buying and procuring the gas we needed.

You know, we were trying to -- as I said earlier, our primary concern was buying the gas that we needed. To the extent, you know, we could minimize cost on individual transactions, I believe that's what they tried to do.

I don't believe that, you know, the market at that time or the ability to procure gas was -- was a very liquid market at that time.

Q. Let's --

MR. DOBROWSKI: Object as nonresponsive.

Q. BY MR. DOBROWSKI: All I'm asking is, do you believe, as you sit here, that your traders, Mr. Skaer and Mr. Bordovsky and Mr. Vinson, tried their best to minimize costs on every transaction during Winter Storm Uri?

Strike that. Let me rephrase.

Did you -- do you -- as you sit here today, do you believe that Mr. Skaer, Mr. Bordovsky and Mr. Vinson did their best to minimize costs on every single transaction for the purchase of natural gas during Winter Storm Uri?

A. Based on my recollection, I think they did their best to procure the gas we needed at the best price we could get under the circumstances.

Q. So how -- so another way that CPS is trying to minimize its costs is by unilaterally declaring that it's not going to pay the bills it agreed to; right?

MS. VALKENAAR: Objection; form.

BY MR. DOBROWSKI: I mean, that's another way of minimizing costs is by telling people you're going to buy something at a certain price and then not paying it; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: You would agree with that, wouldn't you, sir?

A. I would not agree with that.

Q. Well, that's what you're doing; right? You're re- -- CPS is refusing to pay the amounts it agreed to during Winter Storm Uri. We can agree on that; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: It's my understanding CPS Energy is following the process that's in the NAESB to dispute an invoice, which I believe is the action we took.

MR. DOBROWSKI: Objection; nonresponsive.

Read him back the question.

(The record was read.)

Q. BY MR. DOBROWSKI: CPS is refusing to pay the amount it agreed to pay for natural gas acquired during Winter Storm Uri from clients such as mine, Enterprise Products?

A. I think we are disputing the invoice that we received. We issued payment. So to the extent that a dispute would be considered a refusal to pay, I guess you could look at it that way. I think our view is different.

Q. Well, you and I can agree that Enterprise didn't cause Winter Storm Uri. Please tell me we can agree on that.

A. I would agree, yes.

(Exhibit 81 was marked.)

Q. BY MR. DOBROWSKI: Okay. And let me hand you this document, sir, and we'll take a break for lunch.

This is Exhibit 81; right?

A. Thank you.

Q. And can you -- it's titled "Cold weather natural gas impacts presented by Kevin Pollo, interim VP energy supply and market operations, February 22, 2021 informational update."

Do you see that?

A. Yes, sir.

Q. And did you create this on -- on or about February 22, 2021?

A. Yeah, my recollection is -- I don't have specific dates -- but on or about February 22nd.

Q. Shortly after Winter Storm Uri; right?

A. Yes, sir. If we agree the 19th was the end of the winter storm, yes, February 22nd is shortly thereafter.

Q. And what was the purpose of this PowerPoint

presentation, sir?

A. I believe this was compiled to provide our board of trustees with some information on the winter storm.

Q. Board?

A. Yes, sir.

Q. Keep going. I interrupted.

A. But I don't recall presenting that to the board on February 22nd.

Q. Okay. But the purpose of this was to provide the board of trustees for CPSE with information regarding Winter Storm Uri?

A. To the best of my knowledge, yes.

Q. And did anybody else assist you with this PowerPoint, Exhibit 81?

A. I'm sure there were others on my team that helped pull some of this information together, yes.

Q. And because this was -- the purpose of this was to provide information to the board of trustees you made sure that everything in here that was stated was accurate; right?

A. To the -- I would say to the best of our knowledge, yes, the information we presented was accurate.

Q. Okay. And if you could look at Bates

stamp 8489. It's actually page Arabic 4.

A. Okay.

Q. It's titled "February 2021 cold weather event."

Do you see that?

A. Yes, sir.

Q. And at the bottom, "Extreme cold weather across the U.S. and into south Texas drove strikingly high demand for energy and natural gas."

Was that true?

A. Yes, sir.

Q. Okay. And we can agree that the gas suppliers Enterprise and Energy Transfer didn't cause that to occur; right?

A. The extreme cold weather?

Q. That, and the strikingly high demand for energy and natural gas.

A. Yes, I would agree that they didn't cause that.

Q. Okay. And if you go to the next page.

"Natural gas demands our community needs."

At the bottom you wrote, "Our peak gas demand during this event was more than 30 percent higher than previous cold weather events."

Was that accurate?

A. Yes. Yes, sir.

Q. And we can agree that neither Energy Transfer nor Enterprise caused that to occur; right? That is, the gas demand being 30 percent higher than previous cold weather events; right?

A. Yes, I would agree Enterprise and Energy Transfer did not cause our demand to be 30 percent higher than previous.

Q. Right. Right.

And then if you go to the next page, page 6, Bates stamp 8491, titled "Natural gas supply impacts," you write, "Supply challenges. Frozen wellheads."

What did that refer to?

A. Frozen wellheads I believe would have referred to instances where production at certain -- or certain wells were unable to produce gas due to the ambient temperature conditions. I couldn't describe for you exactly, you know, the mechanics of what that means in terms of the frozen wellhead, but...

Q. Well, you're giving even more detail than I wanted.

All I'm asking you, sir, is, that you're writing here, you're saying supply challenges, and

what you're informing the board of trustees is that, look, the availability of natural gas supply was diminished due to frozen wellheads for one reason; right?

A. Yes.

Q. Okay. And another reason that supply of natural gas was reduced was due to loss of power to processing, slash, transport facilities.

Do you see that?

A. I do see that.

Q. Is that right? Is that another one of the reasons for the diminution in supply of natural gas during Winter Storm Uri?

A. Yes, that -- that's my recollection that was one of the causes --

Q. And then --

A. -- or contributors.

Q. I'm sorry.

And then another cause, as you write, was various mechanical equipment failures.

Do you see that?

A. Yes, sir, I do.

Q. Okay. Can you explain what you're talking about about various mechanical equipment failures? Do you have any examples?

A. I don't have specific examples. My recollection is at various points during the -- during Winter Storm Uri we may have received communication from a supplier or -- mentioning that -- I don't know what it was, if it was some piece of their facility had failed for whatever reason. It took them period of time to restore that, you know, before they could resume production.

Q. And that was as a result of the cold weather; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall specific reasons for all of the different failures that may have occurred.

Q. BY MR. DOBROWSKI: Okay. But what happened is is that -- if you go to the graph on the left, is that production of natural gas plunged; right?

A. This chart does show a reduction in natural gas production, yes.

Q. Okay. And at the bottom you write, "U.S. natural gas production fell to a four-year low" -- I'm sorry, let me repeat.

At the bottom you write, "U.S. natural gas production fell to a four-year low during this winter event which led natural gas prices to soar."

Do you see that?

A. I see that, yes.

Q. And that was a true statement?

A. I think the increased demand we talked about earlier and the reduction in supply was a factor in prices.

Q. Okay. But specifically on this page you say, "U.S. natural gas production fell to a four-year low during the Winter Storm Uri."

And that led natural gas prices to soar; right?

A. I agree that's what that slide shows. I think the story is broader than just --

Q. Go ahead.

A. -- supply.

Q. It's broader than just that one slide is what you're saying?

A. I think, again, as we talked about, the presentation starts out talking about demand and moves into supply.

Q. Right. And so both of those items, supply and demand, cause the prices to spike is what you're saying; right?

A. I think those were contributors, yes.

Q. Okay. And Winter Storm Uri caused the

spike in demand. We've already talked about that; right?

A. Yes.

Q. And Winter Storm Uri caused the production to decrease as well; right? All of these three items were Winter Storm Uri related; true?

A. I -- I don't think all of those items are solely due to Winter Storm Uri, no.

Q. Okay. But by and large, frozen wellheads were due to Winter Storm Uri; right?

A. I think Winter Storm Uri is a contributor. I can't speak, again, how much of that may have also been due to different weatherization efforts that may or may not have happened before the storm.

Q. Well, a weatherization effort doesn't matter unless you have a Winter Storm Uri; right?

A. I mean, I didn't disagree that Winter Storm Uri was a contributor. I said I didn't know that it was the sole reason that all three of those bullets happened.

Q. Okay. But it was a contributor to each of these three bases on which you wrote causing supply challenges; right?

A. To my knowledge, in one way or another I think Winter Storm Uri, to my knowledge, was a

contributor to those issues.

Q. It impacted those issues?

A. I think it was -- yeah. I don't know that it was the sole driver. But it impacted.

Q. And then if you go to the next page you see on the right it's titled "Natural Gas Prices"; right?

A. Yes, I see that title.

Q. Okay. And spot natural gas prices surged to $600 as deep freeze cuts production and fuels record demand.

Do you see that?

A. I do.

Q. Was that something you wrote or did you -- did that come from a -- from a different publication?

A. I'd say from the slide it looks like that was taken from a different publication.

Q. Okay. But you put it on there because you felt that helped explain why there was such a large increase in natural gas prices; right?

A. My -- my recollection and belief is we showed that just to provide awareness as to what prices did. I don't know that we were -- I think it was more awareness is why that particular statement was included on that slide.

Q. But you put -- sorry, were you finished?

A. Yeah, I am, sir.

Q. But you put it there because it accurately encapsulated the reasons for why spot natural gas prices surged; right? I mean, you weren't misleading the board of trustees of CPSE, were you?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think we put it there to show a representation of where prices went.

Q. BY MR. DOBROWSKI: Okay. And then you put the NGI's daily Houston Ship Channel prices.

What is the NGI -- what does NGI mean? Natural gas index?

A. I don't recall that full acronym. I think it was the source that we -- that provided the chart.

Q. Right. And it shows Houston Ship Channel daily natural gas price snapshot.

Do you see that?

A. Yes.

Q. And why was that relevant to this presentation?

A. My recollection is the relevancy of that to the presentation is what information that's circled in red with the bold red arrow that shows we experienced a 16,000 percent increase in gas prices during the storm compared to what they were just a

day -- days before the storm occurred.

Q. Right. And what you used was this index known as the Houston Ship Channel price index; right? Natural gas price index; right?

A. To my recollection that's -- yeah, I think that's the number that was used to show the -- or calculate the 16,000 percent increase.

Q. Okay. And you write, "Natural gas prices experience staggering price spikes across the state"; right?

A. Yes, that is on the page.

Q. So it wasn't just CPSE who had to bear the brunt of the these increased prices, it was utilities around the state; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't know what all entities experienced it but -- or experienced the -- I would agree that CPS Energy was likely not the only one paying these or exposed to those gas prices.

MR. DOBROWSKI: Okay. Can we go ahead and take a lunch break, please?

MS. VALKENAAR: Sure.

THE VIDEOGRAPHER: Okay. Off the record. Time is 12:41.

(At 12:41 p.m., a luncheon recess was

taken, the deposition to be resumed at 1:30 p.m.)

AFTERNOON SESSION

(At 1:20 p.m., the deposition was resumed, the same parties being present.)

THE VIDEOGRAPHER: Okay. We are on the record. Time is 1:20.

(Exhibit 82 was marked.)

Q. BY MR. DOBROWSKI: Mr. Pollo, let me hand you Exhibit 82. And if you could turn -- well, this is a text message string amongst you, Mr. Vinson, Mr. Skaer, Mr. Bordovsky. And the first one starts at February 17, 2021, at 7:00 a.m.

Do you see that?

A. Yes, sir.

Q. Okay. If you turn to page Bates-stamped 10261.

A. (Witness complies.)

Q. And if you would just read to yourself that -- those text message, those text messages down to 4:18 p.m. on that page, I'd appreciate it. I got a question for you.

A. (Witness complies.)

Okay.

Q. Okay. So my question to you is first, at 3:58 p.m. Mr. Skaer writes, "Stanton just offered 15,000 same day STX map for $400 slash" -- what does GD represent or mean, HSC flat?

A. I'm not sure why Mr. Skaer used that acronym, or two letters.

Q. Okay. And in any event, Mr. Vinson writes in reply, "Kevin, we need to talk about this one."

Do you see that?

A. I do.

Q. Did you -- do you recall talking to Mr. Vinson about this potential purchase?

A. I don't recall specifically that purchase, no.

Q. Okay. And Mr. Skaer writes at 4:05 p.m., "Now offering 20,000."

Did you understand that to mean Enterprise was offering 20,000 MMBtu for $400 per MMBtu?

A. Yeah, reading the text I would make the assumption that the 20,000 was referring to the -- or an increase of the 15,000 that Mr. Skaer referred to in the earlier text.

Q. Okay. And that they were offering -- excuse me.

Enterprise was offering 20,000 MMBtu for $300 per MMBtu; is that right?

A. I'm sorry, could you say that again?

Q. Sure.

At least if you read the text messages from Mr. Skaer at 4:05 p.m. and 4:18 p.m., it appears -- is it fair to say that EPO ended up selling to -- and CPSE ended up purchasing 20,000 MMBtu for $300 per MMBtu?

A. From reading Mr. Skaer's text at 4:18, that's the conclusion I would draw, is that we -- we did purchase with Enterprise Products 20,000 for $300.

Q. Okay. And that was consistent with the policy that the executives at CPSE had issued to the traders, was it not?

MS. VALKENAAR: Objection; form.

THE WITNESS: I would say no.

Q. BY MR. DOBROWSKI: It's not consistent? Why?

A. I think, as we talked about, the text message that we were referring to earlier discussed storage withdrawal. It was not -- we talked about at certain prices where that text message was informing us of what we were going to withdraw from storage,

so...

Q. But it had to do with the purchase price for natural gas, was it not? Did it not?

A. Are you referring to the text from the earlier exhibit?

Q. Yeah, the one with the executives.

You know what, let me try and make it easier. I'm sorry, I thought it would be unforgettable, but let me see if I can borrow this real quick.

Yeah. 76. That's the one I'm referencing.

And all I'm asking you is, isn't the purchase of 20,000 MMBtu at $300 per MMBtu consistent with directives and guidance that is set forth in Exhibit 76? That's all I'm asking.

A. So, yeah, it was a text message informing our president and CEO of a strategy or a plan for buying gas on Tuesday morning for gas day Wednesday.

I think -- as we talked about earlier, I think the large focus of that was at different price thresholds how much we were going to plan to withdraw from storage.

MR. DOBROWSKI: Object as nonresponsive. That's not my question.

Do you need it read back, sir?

THE WITNESS: Yes, please.

MR. DOBROWSKI: Please read it back to him.

(The record was read.)

MR. DOBROWSKI: Strike it.

Q. BY MR. DOBROWSKI: Let me ask it this way: Was Mr. Skaer authorized to make that purchase of 20,000 MMBtu for $300 per MMBtu on the 17th?

A. I would say yes.

Q. Thank you.

(Exhibit 83 was marked.)

Q. BY MR. DOBROWSKI: Let me hand you Exhibit 83.

Do you know who Orlando Flores is?

A. He's a CPS Energy employee.

Q. Did he report to you or was he part of your team?

A. No, he was not.

Q. Okay. Just quick question, though.

This is an e-mail from him and you're not on it, but my question, if you just read the paragraph in it.

A. (Witness complies.)

Q. And this is an e-mail from Mr. Flores dated February 25, 2021, to Josie Castrejana at Energy Transfer, amongst others.

A. Okay.

Q. And do you see that Mr. Flores writes, "We continue to pay all obligations in full and intend to continue to pay invoices when due."

Do you see that?

A. I do see that.

Q. Okay. Does that refresh your recollection that the decision to not pay invoices over $38.83 per MMBtu was made after February 25, 2021?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't know the exact date. My recollection is, I think we discussed earlier, is that any discussion -- my knowledge of discussions around disputing invoices occurred after the storm.

Q. BY MR. DOBROWSKI: I know, and that's why I'm trying to use this to narrow it down.

Do you believe that the decision was made not to pay more than $38.83 occurred before the 25th?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: If you know?

A. I -- I don't know.

Q. Okay. Did you ever have any discussions with anybody from Enterprise or Energy Transfer about CPSE's decision to only pay $38.83 per MMBtu during Winter Storm Uri?

A. Not to my recollection.

(Exhibit 84 was marked.)

Q. BY MR. DOBROWSKI: Okay. Let me hand you Exhibit 84.

This is a letter that you wrote, Mr. Pollo, to Enterprise Products on March 22, 2021.

Do you see that?

A. Yes.

Q. Okay. And in there you provide -- or -- yeah, you provide on behalf of CPS Energy that you were disputing the charged amount of approximately $144 million; right, sir?

A. Yes, we --

MS. VALKENAAR: Objection; form.

THE WITNESS: We disputed the invoice that we received.

Q. BY MR. DOBROWSKI: Okay. And the second paragraph, second-to-last sentence, you write, "CPS Energy hereby submits payment of $36,488,218.94, hereinafter the," open quotation mark, "conceded amount," closed quotation mark.

Do you see that?

A. Yes, sir.

Q. And you write, "The conceded amount is supported by the attached documentation."

And if you look at the attachment all it shows is the -- well, explain to me what the attachment shows. How's that?

A. When you refer to attachment, I -- I'm looking at page 1 of 2 and 2 of 2, which --

Q. Yeah. EPO 1693 and 1694; right, sir?

A. Yes, that's what I'm looking at. Thank you.

Q. Okay.

A. So this -- the attachment is a listing of different transactions, to my knowledge, of what occurred during February 2021.

It lists the receipt point, the delivery date of the gas, the conceded price that we paid, the pipeline contract it was transported under, the volume of gas and then what the sum of the conceded amount, which it should equate to the conceded price multiplied by volume.

Q. Okay. But there is no explanation of why the conceded price is appropriate, is there?

MS. VALKENAAR: Objection; form.

THE WITNESS: I believe the attachment provides the details on how we calculated conceded amount.

Q. BY MR. DOBROWSKI: I know how you

calculated the conceded amount. But there is no explanation for -- in there about why the $38.83 price is appropriate, is there?

MS. VALKENAAR: Objection; form.

Q. BY MR. DOBROWSKI: Well, if there is, show it to me.

A. The 38.83 as he listed in the attachment is the conceded price for certain transactions.

Q. Right. But there's no explanation for why -- in that attachment for why that amount is appropriate.

A. I would say there's -- there's no additional documentation for any of the prices beyond what's listed in the conceded price.

Q. Okay. Fair enough.

(Exhibit 85 was marked.)

Q. BY MR. DOBROWSKI: And then if you would look -- even though I know this was a prior exhibit. Let me hand you Exhibit 85 -- actually, it may not have been.

This is a preliminary official statement of CPSE. And if you look on the second page, sir, and you go to the last full paragraph that begins, "To determine the lawful price," if you would just read that to yourself, I got a question or two.

A. (Witness complies.)

Okay.

Q. And my first question is: It talks about a comprehensive analysis that CPS Energy had conducted.

Do you see that?

A. Yes, I see those -- that statement.

Q. Were you a participant in this comprehensive analysis?

MS. VALKENAAR: Objection; form.

And I instruct you not to answer to the extent it reveals attorney-client --

Q. BY MR. DOBROWSKI: All I'm asking is, did you participate? You don't have to tell me -- I don't want to know any of the substance. Just yes or no. Prior to March 23, 2021.

A. I was not a direct participant in the -- in that process or that analysis.

Q. How about an indirect participant?

A. I don't recall specifics, but I may have responded to questions from counsel or that were directed by counsel to provide requested information.

Q. Okay. Did you ever see the comprehens- -- the results of the comprehensive analysis? Just answer yes or no.

A. No.

Q. Okay. To this day, have you ever seen the results of the comprehensive analysis? Yes or no only.

A. No.

Q. So you wouldn't know the results of the analysis other than what's set forth in this document; fair?

A. Yes.

(Exhibit 86 was marked.)

Q. BY MR. DOBROWSKI: Okay. Let me hand you Exhibit 86.

And this is --

A. Thank you.

Q. -- an e-mail from Mr. Jimmy -- Kuo? Kuo?

A. Kuo I believe is how you pronounce it.

Q. Okay. And it talks about the EPRM hedge activity report for the month ended February 28, 2021.

What -- what is the EPRM hedge activity report?

Wait. Did I give you the wrong one? Did I give you the wrong one? Sorry.

A. So the EPRM refers to our -- or this report is a report that's done on a monthly basis that provides information on the financial natural gas

hedging activities for CPS Energy.

Q. And did CPS Energy engage in financial hedging activities for natural gas prior to or during hurr- -- hurricane -- prior to or during Winter Storm Uri?

A. Yes.

Q. Okay. And if you look at the last page. Is that hedging activity located in this document?

A. I mean, I think this is a -- a summary report, if you will, of the results of our hedging activity, yes.

Q. Okay. And if you look in the middle of the document there's a section titled "Estimated hedge impact on natural gas costs includes the disputed amount for February of 2021"; right?

A. Yes.

Q. Okay. Can you explain what these bar charts mean?

A. My understanding of what the bar charts are showing is if you just take the distribution, the two top bars, showing what are natural gas costs would have been -- looks like dollars per MMBtu to the -- to the right of the chart.

Q. Yeah.

A. But what it was with the results of our

hedging activity and what the cost would have been without any hedging activity.

Q. Okay. So because of the hedging activity -- the hedges -- I see. They decreased the actual spend by 5.2 percent. If you look to the right? For February of 2021? At least that's what it says; right?

A. That is what it says, yes.

Q. Okay. I get it now. Okay.

Did CPS modify the -- its hedging strategy before or during the storm because of the storm in February of '21, if you know?

A. I don't recall we made any adjustments or channels to our program during February 2021.

Q. Could you have, if you know?

A. I'd say yes, we could have with the proper approvals through our governance processes.

Q. Okay. Okay.

MR. DOBROWSKI: You know, why don't we take a break, if that would be all right for -- give me 10 minutes. I want to go through this and see if I can't chop out a bunch of it.

MS. VALKENAAR: Sure.

MR. DOBROWSKI: If that's okay with you all.

THE VIDEOGRAPHER: Off the record. Time is 1:43.

(A brief recess was taken.)

THE VIDEOGRAPHER: Okay. We're back on the record. Time is 1:56.

Q. BY MR. DOBROWSKI: Mr. Pollo -- sorry.

Mr. Pollo, attached -- this is Exhibit 59.

My question for you is --

MS. VALKENAAR: Do you have a copy, Mr. Dobrowski, or not?

MR. DOBROWSKI: No, because I assumed you'd bring your own exhibits.

MS. VALKENAAR: Oh, is this from a prior deposition?

MR. DOBROWSKI: Yes, ma'am.

MS. VALKENAAR: Was this from --

MR. DOBROWSKI: Guinn.

MS. VALKENAAR: Oh, let me see if -- if I have a copy of it here.

MR. DOBROWSKI: It's 59.

MS. VALKENAAR: Okay. I'm good. Sorry.

Q. BY MR. DOBROWSKI: Okay. 59. My only question is: It talks about -- and I'm sorry, this is an e-mail from Mr. Guinn to you dated February 11, 2021; right?

A. Yes.

Q. Okay. And this talks about storage physical. At the end it says, "Savings versus market substantial."

What does that mean to you?

A. I don't recall specifics. I don't know offhand what the cost of gas was, you know, that was purchased that was in storage was -- would have been bought before the storm, in all likelihood, at a price that was much less than a hundred and fifty dollars and above.

(Exhibit 87 was marked.)

Q. BY MR. DOBROWSKI: Okay. Let me hand you Exhibit 87, sir.

This is a text from you to Mr. Eugster and Mr. Gold dated February 12, 2021; right?

A. Yes.

Q. At 9:25 in the morning; right?

A. Correct.

Q. And you write, "Gas prices have jumped. Currently trading a hundred to a hundred fifty dollars."

Do you see that?

A. Yes, sir.

Q. And is that per MMBtu?

A. Yes.

Q. And so on the 12th, in the morning, which was a Friday, you're letting Mr. Eugster and Gold know that gas prices had -- were trading above a hundred dollars per MMBtu; right?

A. Yes.

Q. And then you say, "We are assessing total costs for the weekend but we are looking at potentially 300 million or maybe greater at those prices."

Do you -- why -- can you explain that math to me? Why was -- are you talking just for that weekend? It's going to cost $300 million based on the hundred to hundred fifty per -- per MMBtu purchase price?

A. My recollection of the circumstances described by this text is this was Friday morning.

Q. Right.

A. As you said. So we were buying gas for the four-day weekend. So gas day Saturday, Sunday, Monday, Tuesday.

So the math, if you will, that resulted in the 300-million-dollar figure in the text would have been the total volume of gas that we had forecasted to consume and therefore purchase for all four days

at prices in that range of a hundred, hundred fifty dollars. I don't -- I don't remember the exact math or who made that calculation. But that was the initial estimate based on volume and those prices.

Q. So you're letting Mr. Eugster and Mr. Gold know, hey, these gas prices are -- have really gone up and as of February 12th my estimate is that it's going to cost us potentially $300 million if these prices persist; right?

A. I think -- or my recollection is based on trades that we had that had been made at those prices and the volume that we committed to purchase, that that's -- would have been around the $300 million of total cost, if you will.

Q. Okay. So you're -- by -- by the morning of the 12th, which is at the beginning of the winter storm, you were putting Eugster, your boss, and Mr. Gold, the CFO, on notice that these funds are going to be expended; right?

A. I was letting him know that the -- well, one, where the gas market had moved and the scale of -- of the dollars involved.

Q. Right.

A. Yes.

Q. Okay. And that this is what we've

committed to, $300 million in purchases as of February 12th?

A. Yes.

(Exhibit 88 was marked.)

Q. BY MR. DOBROWSKI: Let me hand you Exhibit 88.

This is an e-mail string involving you, Mr. Eugster and Mr. Gold. You know what, I'm wrong. It's only you and Mr. Eugster. And -- but that is dated the next day, the 13th of February, at 10:52 a.m.; right, sir?

A. Yes, February 13th, 10:52.

Q. Okay.

A. A.m.

Q. Okay. And you've advised them that you had an offer at a hundred forty dollars per MMBtu and that this is the cheapest offer that we have seen; right?

A. That is what is described in the text, yes.

Q. And then you say "others," and I assume you mean other offers are the in hundred and seventy-five to 225-dollar range; right?

A. Yes, that's what's in the text.

Q. And you write, "I recommend we purchase."

Are you talking about the 10,000 MMBtu at a

hundred forty dollars per MMBtu; is that what you're recommending be purchased?

A. That is my take or understanding from reading the text, yes.

Q. Okay. And do you know if that transaction was entered into by CPSE?

A. I don't have specific knowledge of whether that exact transaction was executed or not.

Q. Did -- did Mr. Eugster object to you -- to going forward with that transaction, if you recall?

A. I do not specifically recall.

Q. Okay. Can you look at Exhibit 89 and just explain -- oh, no, actually it's Exhibit 16. Already marked. Let me hand it to you.

Can you just explain that document. It's from Mr. Bordovsky dated February -- you know what, I just realized something. You're not even on this. Scratch that. I don't see your name. Nope.

Do you understand these numbers that are on this page, Exhibit 16, in terms of the February 13 to 16 projected gas purchase plan? That's the only one I care about.

A. Not directly familiar with how Mr. Bordovsky generated those numbers, but it looks to me like a forecast of consumption by day -- or the

daily consumption we were forecasting for that weekend period.

(Exhibit 89 was marked.)

Q. BY MR. DOBROWSKI: Okay. Let me have you look at Exhibit 89.

Exhibit 89 is an e-mail from Paul Vinson to you attaching the -- a document titled "February 2021 cold weather event"; right?

A. Yes.

Q. And this was prepared by the people on your team; right?

A. If you could give me a minute to look at it.

Q. Yeah. Sure. If you see right there.

A. Yes, this document should have been prepared by my team.

Q. And it's as of February 12, 2021, if you look at the second page at the top; right?

A. Yeah, the date on the second page of the document, I guess the one labeled 2150.

Q. Okay.

A. Yeah, it's February 12th, is the date.

Q. Okay. If you go to the last page, it says, "Prepay and monthly base load storage are acquired before first of the month and are based on a monthly

index price."

Okay. Monthly index price. What index, if you know?

A. I would say it depends on the specific transaction. It could be either the Waha index or Houston Ship Channel.

Q. And then it goes on to say, "The balance of the need gas is purchased on a daily basis at either a fixed price or a daily index price."

Do you see that?

A. Yes.

Q. So just so that I understand this.

The way CPSE operated its business, although it did a prepurchase of monthly gas needs, it specifically chose to purchase some amount on a daily basis; is that right?

A. Yes.

Q. Okay. And that was on an as-needed basis; in other words, you would buy as much as you needed on the daily basis?

A. Typically that's what we do, yes.

Q. Okay.

A. As you said -- or as we talked about, in the winter storm that's what we were doing, is buying the amount of gas that we needed.

Q. Right. But I'm just saying in general this wasn't an unusual situation of you buying gas on a daily basis. This was something that you actually planned to do before February 1; right? You -- you purchase -- you didn't intend to purchase all of your gas needed for the month prior to the month; right?

A. Yes, we did not purchase prior to the month all of the gas that we were likely to use throughout the course of the month.

Q. Right. And that was a business decision that CPSE made; right?

A. Yes.

Q. Why -- why was that? I mean, what I'm really trying to understand, sir, is, why did CPSE -- or -- strike that.

Was that your team the one that was involved in that decision making about how much to purchase for the month and then on the daily basis? I think -- I assume it was; right?

A. Yes, my team would have done that.

Q. Okay. And so -- but why did your -- did you do it that way as opposed to why not buy all of the gas you needed for the month?

A. I would say, for one, the total amount of gas that we will need for the month obviously isn't

known until -- until you consume it. You know, we look at -- our business is heavily dependent on which of our power plants are running drives our need or our consumption of gas to supply to the power plants.

And then, you know, our distribution company that, you know, provides gas service to homes or businesses will vary quite a bit from day to day as well. So we have -- we do see variability in the daily usage where some days maybe relatively less gas burned and other days maybe a different amount, a higher amount.

Q. But if -- CPSE could have chosen to purchase all the gas it wanted to prior to the month of February 2021; right? Theoretically?

A. Could you repeat that?

Q. Well, could you have entered contracts to -- before the beginning of February 2021 to purchase more gas than you actually purchased before the month began?

A. Yes.

Q. Okay. Do you know how much more?

A. How much more?

Q. Gas you could have purchased?

A. No, I don't.

Q. Okay. Okay.

And then we're at the last page of Exhibit 89.

And it says here, "Storage and fuel capacity will be used to cover colder than expected temperatures, loss of any gas supply through well freeze-offs, et cetera."

Do you see that?

A. Yes, sir.

Q. What does that mean, "Storage and fuel capacity will be used to cover colder than extended" -- "expected temperatures, loss of gas supply through well freeze-offs, et cetera"?

A. One of -- one of the uses of, you know, our storage is to provide some gas that we can pull out of storage to cover certain operational needs, as this has talked about, you know, colder than expected, you know, maybe consuming a little bit more than we forecasted. So we can use storage to help offset that.

When you look with this paper in conjunction with our -- or in consideration of the winter storm, I think both of those items need to be taken together, which is storage and fuel capacity.

We also have certain of our combustion turbines generating resources that can run on either

natural gas as our typical fuel, or fuel oil. So our -- that statement is referring to us converting those generators to run on fuel oil which obviously would have reduced our need to fuel those from natural gas.

Q. Couldn't you do that -- or couldn't you do that during the winter storm?

A. We absolutely did.

Q. And you did?

A. Yes, sir. Generators that were able to run on fuel oil, I don't remember exactly when in the storm we converted them to fuel oil, but once we converted them, we, I believe, kept them on -- my recollection is we kept them on fuel oil through the duration of the storm 24 hours a day.

Q. Okay. Can you look at Exhibit 47.

A. (Witness complies.)

Q. And look at page -- you'll see at the first page, it's an e-mail string between you, Mr. Skaer, Mr. Bordovsky and Mr. Vinson.

Do you see that?

A. Yes, it looks like a text string, yes, sir.

Q. I'm sorry. Text messages as of February 13, 2021; right?

A. Yes.

Q. And if you look at page Bates stamp 10239, sir.

A. Okay. Hold on.

Q. Sure. Let me know when you get there.

A. Okay.

Q. You'll see at the top the text message string is February -- dated February 13, 2021, at 2:22 p.m.; right?

A. 2:22 p.m., yes, sir.

Q. Yes.

A. I see that.

Q. Okay. And in there Mr. Bordovsky writes that Stanton -- did you understand who Stanton was, that he was from Enterprise?

A. I do recognize the name as one of Enterprise Products traders.

Q. Okay. And Mr. Stanton Brown, Mr. Brown is offering to -- 40,000 MMBtu at an offer of, first, a hundred and fifty dollars per MMBtu and then drop to a hundred and thirty-five dollars per MMBtu.

And this is on Saturday the 13th; right?

A. Yes, sir, Saturday the 13th.

Q. Okay. And then do you see your response at 3:36 p.m.?

A. Yes.

Q. Okay. And why did you -- here it says, "I've spoken with Cris and Gary."

Is that Mr. Gold and Mr. -- how do you pronounce his last name again?

A. Eugster.

Q. Eugster.

A. To my knowledge, yes, that should be Mr. Eugster and Mr. Gold.

Q. Okay.

"And at this point I think we would like to see if we can get some additional data on managing the generation burns before we commit to additional purchases."

Do you see that?

A. Yes, sir.

Q. Okay. Did you have a discussion with Mr. Eugster and Mr. Gold about that decision?

A. Which decision?

Q. The decision to wait to get additional data before making additional purchases from Enterprise on February 13?

A. From the context of the text message, I don't recall specifically what I spoke to Cris and Gary about. I don't remember if it was on the generation side or -- or the gas purchase transaction

or -- mentioned in the earlier text.

Q. Okay. But at least here did you pass on the Enterprise offer?

A. From this set of texts, I don't know if we ultimately transacted with Mr. Brown or not. It would appear as of 3:36 p.m. we did not.

(Exhibit 90 was marked.)

Q. BY MR. DOBROWSKI: Okay. Could you look at Exhibit 90 and this is a series of -- oh, Christ, it's out of order. I apologize.

This is actually February 11, sir.

A. Okay.

Q. Sorry about that.

With -- this is a series of e-mails -- text messages between you, Mr. Eugster and Mr. Gold. And, Mr. Pollo, if you could look at the first page and through the middle where you have your text at 1:33 p.m. And then I've just got a couple questions.

A. (Witness complies.)

Just the top part of the page?

Q. Through here (indicating).

A. Okay. Yeah.

Q. Just let me know when you're ready.

A. Okay.

Q. And my question to you is, does that relate

to the purchase of gas or is this relating to the purchase of something else?

A. Due to the reference to go ahead and market in 100 megawatt on-peak strip.

Q. It's electricity?

A. Right. Yes, this should be referencing an electricity purchase.

(Exhibit 91 was marked.)

Q. BY MR. DOBROWSKI: Never mind. Put it aside.

Let me have you look at Exhibit 91.

And, here, Mr. Pollo, if you would, the e-mail that I really need you to look at, and you'll see it, is at the bottom of the page from Mr. Gold on Saturday, February 13, 2021, at 4:27 p.m. And then it carries over to the second page and you'll see that you're copied on that e-mail.

A. Okay.

Q. Right?

And it's subject is titled "Gas Purchase and Liquidity." Do you see that?

A. Yes, sir.

Q. All right. And if you would read that e-mail to yourself.

A. (Witness complies.)

Okay.

Q. Okay. And then go to the next e-mail immediately below that from you dated February 12, Friday, February 12, at 4:27 p.m.

Do you see that?

A. Yes, sir.

Q. And you're sending it to Paula Gold-Williams, amongst others; right?

A. Yeah, there's several folks copied in the e-mail itself. Looks like it was addressed to Paula, from the citation.

Q. Right.

Specifically you say, "Paula, attached is the summary information that you requested during our morning meeting on today's gas purchases."

Do you recall that meeting?

A. I don't recall specifics, no, sir.

Q. Okay. Well, in any event, attached to this document at Bates stamp 27149 is the memo we looked at earlier -- excuse me, sir -- earlier today, which is found in -- there it is. I'm sorry. Oh, here it is. No, that's not it.

Can I have those, please. I thought I had it here real quick. Bear with me.

Yeah, which is found in Exhibit 89 that we

talked about earlier; right?

A. Okay.

Q. And you sent this to Miss Gold-Williams on February 12th; right, sir? That is, Exhibit Number 91; right?

A. It looks like a version of that memo was sent to Miss Gold-Williams, yes.

Q. Right. And if you go to the memo at page 27151 you'll see there's -- I'm sorry. 27150. You'll see there's a section titled "Gas Supply Outlook"; right?

A. Yes, sir.

Q. And then if you turn to the next page there's a list of pricing; right?

A. Yes.

Q. And what you're showing there is the price -- or the gas purchase cost for the prepaid gas, the monthly base load gas and daily purchases; right?

A. The table is -- yeah, shows those three categories.

Q. Okay. And how much were the purchase -- daily purchases? Sir, what was the price for daily purchases?

A. Based on the table on this page, it's

listed as a hundred sixty-nine dollars and six cents.

Q. Okay. And did Miss Gold-Williams write back to you when she got this document and say, wait, we can't be paying that, we should only be paying $38.83?

A. No.

Q. Okay. So as of at least -- or -- strike that.

So as early as Friday, February 12th, 2021, Miss Gold-Williams was on notice that the price of daily purchases for gas was a hundred sixty-nine dollars per MMBtu; right, sir?

A. Based on this -- the e-mail that was sent to her, yes.

Q. And then if you go to the next page, what is -- that page represent, sir?

A. This is the one that's not labeled?

Q. Yeah, it's the one that doesn't have a Bates stamp or a label.

A. Looks to me to be a calculation on cost to run our generators at a hundred and sixty-dollar gas price, an estimated sales price and then, you know, based on that product cost and sales price, looks to calculate a -- a loss on that sale.

Q. How much of a loss?

A. This is showing $1,530 loss per megawatt hour.

Q. Right. Which resulted in an estimated loss of approximately $58,752,000; right?

A. Based on the numbers that are provided here, yeah, the 400 megawatts running 24 hours a day in four days.

Q. Okay. And then if you could turn to the next page, sir, there's a document that, on the left-hand side, lists the four-day incremental cost as $470,692,640.

Do you see that, in yellow?

A. I do see the four-day incremental cost numbers.

Q. What does that reference, if you know?

A. I don't. I did not prepare this spreadsheet.

Q. That's fine. Okay.

If you now go back to page Bates stamp 27146.

A. (Witness complies.)

Q. I'd like you to look at page 2 -- yeah, it's the second page of Exhibit Number 91. It's the e-mail that Mr. Gold wrote.

A. Okay.

Q. To -- to several people, including you, copying you; right?

A. Yes, sir, I'm copied on that e-mail.

Q. Yeah. And who are the other people -- well, I won't waste your time.

In any event, he writes, "Team," this is on February 13th, at 4:27, Mr. Gold writes, "Team, see the memo to Paula"; right?

A. Yes, sir.

Q. And in the first paragraph, if you would just read that to yourself, let me know when you're done.

A. (Witness complies.)

Okay.

Q. What is the reference to 60, 70-ish million, if you know?

A. I don't recall for certain. I would say, reading the e-mail, I think it would refer to the gas costs that Gary mentions in the sentence before that.

Q. Okay. And then if you go to the second paragraph, he writes that as long as -- "assuming the average gas price of a hundred sixty-ish" -- "a hundred and sixty-dollars-ish and assuming a 10 heat rate for the plants at the top of the stack making these sales, as long as power prices are above

1600-ish, we should be making money."

So is he saying that in the midst of this crisis CPSE should actually be making money, not losing it, as you understood it?

A. As I read the text -- or -- I'm sorry, the e-mail, I think what Mr. Gold is referring to is just based on that gas price of a hundred sixty-dollar-ish and the heat rate of our plants, you know, the production costs for us would have been 1600-dollar-ish, so if we had excess generation to sell, ERCOT prices were above that, then we should -- the revenue would be greater than the cost.

Q. Okay. And then in the next paragraph, he says, "From a distribution's perspective, I think the incremental cost allocated to the gas customers is significant relative to the normal gas distribution budget."

What did you understand that to be?

A. We have our generating units that use natural gas and we have our distribution company that gas customers, or retail gas customers, if you will. So when we references a distribution perspective, my understanding is he's talking about our gas customers that we use our gas -- or retail customers of ours for homes and businesses.

Q. Okay. Is this hundred and sixty to a hundred seventy-ish million dollars referencing a revenue figure or a cost figure?

A. Based on Mr. Gold's statement in paragraph 3, second line down, it looks like he's referring to -- he says, "A portion of this incremental gas cost that goes to the distribution book could be hundred sixty to hundred seventy-ish million."

So my understanding, it would be cost.

Q. Okay. And he further writes at the bottom of his e-mail that, "It is likely we have not seen the last of the big dollars. Today ESMO" -- that's your team; right?

A. Yes, sir.

Q. -- "had to buy more gas at a hundred and forty dollars per MMBtu because the gas burns have been even bigger than they estimated."

Are the gas burns the amount of gas that is burned by CPSE to run its plants, or what is it? What's the gas burns?

A. I believe when he's referring to gas burns he's referring to the total amount of gas that we use which would include power plants and the distribution.

Q. Direct distribution? Okay. I got it.
A. Yes, sir.
Q. Okay. He say -- he writes, "The weather is also getting colder than the previous forecast. It now appears it could stretch" -- "it could stretch" -- "could last" -- "the cold stretch could last until Friday. It is not out of the question that we could see a couple more days of large gas purchase dollars"; right? And that's what happened; true?
A. I would say what -- what happened is, yes, gas prices remained extremely high for gas day Wednesday, Thursday. I don't remember offhand what prices were for Friday, but they were still above normal, or prestorm levels.
Q. Okay. So -- but at least based on Gold's memo that wasn't unexpected?
MS. VALKENAAR: Objection; form.
MR. DOBROWSKI: Strike it.
Q. BY MR. DOBROWSKI: Based on Gold's memo, that was what he predicted?
A. I -- I don't -- didn't read his e-mail to be a prediction.
Q. Well, he's letting you know that there -- that it is likely that there are going to be big

dollar purchases; right?

A. He said it's likely we have not seen the last of the big dollars.

Q. And then the last sentence is, "It is likely we're going to see large gas purchases"; right?

A. He said it's not out of the question that we can see couple more days of large gas purchase dollars.

Q. Okay. If you look in the e-mail of his, in the part this is highlighted, why did he -- or what did you understand he was recommending with respect to the -- strike that all.

Who's the settlements team and what does it do?

A. The settlements team is part of the financial services organization and they -- they handle our settlements with the ERCOT wholesale market. So as we -- all the cost and revenues that flow back and forth between us and ERCOT for energy sales go through the settlements team.

The settlements team is also involved in working with my team, the ESMO team, to process our natural gas invoices.

Q. The invoices?

A. Yes, sir.

Q. And then if you look at the highlighted provision, he said, "There needs to be daily visibility on the ERCOT settlements for the rest of this month. I believe these settlements are going to be significant in helping us determine the liquidity that we will need to take care of collateral calls on the gas payments or the final gas purchase payments that will occur in March."

Do you see that?

A. I do see that.

Q. Is -- is one of the reasons, one of the main reasons why CPSE took the position in March not to pay the full amount due because they did not have the liquidity to make the purchase -- to pay for the gas it had contractually agreed to purchase?

MS. VALKENAAR: I'm going to object as to form.

And instruct you not to answer to the extent that your response would include attorney-client communications or information related to attorney-client work product.

THE WITNESS: Could you repeat your question.

Q. BY MR. DOBROWSKI: Yeah.

Did -- is one of the reasons that CPSE refused to pay the full amount agreed upon for the gas purchases in -- during Winter Storm Uri due to liquidity issues?

MS. VALKENAAR: Same objection and instruction.

THE WITNESS: I think you need conversations -- or my recollection is -- recollection is any conversations I had on that topic of our disputed invoices is either with counsel directly or at the direction of counsel, so I don't believe I can answer your question.

Q. BY MR. DOBROWSKI: Well, did you have any discussions with anyone in CPSE without attorneys about the topic of nonpayment to the gas suppliers because CPSE did not have the liquidity to pay them?

MS. VALKENAAR: I object as to form and same instruction.

To the extent that you can answer without having a disclosure of privileged information either attorney-client or work product, I would instruct you not to answer on those bases.

Q. BY MR. DOBROWSKI: And just to be clear, I'm not asking about communications with your lawyers or in front of your lawyers or where your lawyers

were in attendance; okay? Just talking about CPSE personnel.

A. Rephrase your -- or not rephrase. Could you restate your question, please?

Q. Sure.

And all I'm asking about is, in any conversation with CPS employees without counsel, inside or outside, did you discuss that one of the reasons why CPSE was refusing to pay the full amount of the gas purchase price that had been agreed to during Winter Storm Uri was due to CPSE's liquidity or lack thereof?

MS. VALKENAAR: I'm going to object as to form and same instruction.

To the extent that you can discuss any positions that CPS Energy has taken related to disputing invoices without disclosing privileged information, you may do so. But do not disclose information --

MR. DOBROWSKI: Well, wait a second. I'm not talking about facts -- I mean, excuse me. I'm not talking about legal advice. I'm talking about a fact.

Q. BY MR. DOBROWSKI: So just so we're clear, I don't want to hear about legal advice; okay?

Subject to her objection, please answer.

A. I do not recall having any conversations with personnel within CPS Energy about liquidity -- being -- about liquidity being an issue as far as a basis for our dispute.

Q. Okay. Could you look at Exhibit 39. And look at page Bates stamp 10246.

A. (Witness complies.)

Okay.

Q. If you look at the top, just read that to yourself and read through the rest of the page.

A. (Witness complies.)

Q. Tell me when you're done.

A. Okay.

Q. In your e-mail on February 14, 2021, at 11:31 a.m., you essentially write that, "In general my opinion is we likely will be hesitant to buy more gas."

Why did you tell Mr. Bordovsky, Mr. Skaer and Mr. Vinson that?

MS. VALKENAAR: Sorry, Paul, what page number are you on?

MR. DOBROWSKI: It's -- sorry. Here, just take mine. It's Exhibit 39.

MS. VALKENAAR: I have 246 was all I need.

Thank you.

THE WITNESS: I don't recall the specific circumstances of -- at 11:31 a.m. on February 14th when that text was sent.

(Exhibit 92 was marked.)

Q. BY MR. DOBROWSKI: Okay. Let me show you Exhibit 92.

And this is an e-mail from Mr. Vinson to you. And my only question is, Mr. Pollo: Do you see in here Mr. Vinson is writing you and telling you about gas well freeze-offs?

Do you see that?

A. Yes. Gas well freeze-offs are mentioned in the e-mail.

Q. Okay. And do you remember, we looked at that presentation you made on February 22 mentioning gas well freeze-offs?

A. Yes.

Q. Okay. And does this refresh your recollection that you received that kind of information from Mr. Vinson?

A. Yes.

Q. And did that impact supply of natural gas, that is, the gas well freeze-offs?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you be more specific in your question about supply?

Q. BY MR. DOBROWSKI: No, I can't.

A. Could you restate or repeat?

MS. VALKENAAR: Just read it back to him.

(The record was read.)

Q. BY MR. DOBROWSKI: Did gas well freeze-offs impact the supply of natural gas?

A. I think as we discussed earlier in the day, gas well freeze-offs or wellhead freeze-offs were one of the factors of supply, yes.

Q. Could you look at Exhibit 29 and go to page 10829.

A. (Witness complies.)

Okay.

Q. And if you tell me when you get there.

A. I'm there.

Q. And if you would look at about halfway down the page at two -- on February 16, 2021, 4:13 p.m., you'll see a text message from Paul Vinson saying, "Just talked to Enterprise. They have storage back on and a Yoakum plant is partly up. Pressure should start improving."

Do you see that?

A. Yes, sir, I do.

Q. And what did you understand that to mean?

A. From reading the text, as we sit here today, my understanding would be that since there's reference to storage, that the Enterprise that's being referred to is the pipeline. We're talking about Pipeline pressures.

Q. Okay. Who is Keith Albers or what was his role in February of 2021?

A. Keith Albers' role during February 2021 was a real-time manager.

Q. What did he do?

A. Mr. Albers runs our team of real-time energy controllers that mans our 24/7 control room that monitors --

Q. Go ahead.

A. -- our -- monitors the dispatch of our generating units as well as our -- CPS Energy's natural gas transportation and distribution system.

Q. And on February 16, 2021, at 6:15 p.m., Mr. Albers writes, "What fuel SWAG for tomorrow to use?"

Do you see that?

A. Yes, sir.

Q. And SWAG means scientific wild-ass guess; right?

A. I wouldn't have direct knowledge of what Mr. Albers was saying, yes, sir.

Q. Well, are you familiar with that term, "SWAG"?

A. I have heard that term used for SWAG before, yes.

Q. Okay. And what did you understand he was asking?

And if you read, Mr. Vinson replies, "Hundred sixty-five million for four fourteen if we're under MMBtu."

And then if turn the page, Mr. Bordovsky said he gave $400 dispatch price to Pete this afternoon.

A. Based on this particular context, I'm not sure exactly what Mr. Albers was referring to.

Q. Okay. Well, if you go down, keep going down on this next -- on the page 10830.

A. Okay.

Q. You'll see, Mr. Pollo, you write, "We need to discuss what dispatch price to use."

Mr. Albers writes, "Call me with price. We are bidding tomorrow shortly. $400 is in there."

And you write back, "Please leave the current WACOG for now."

WACOG, is that weighted average cost of gas?

A. Yes, sir.

Q. Okay. What did you mean by that?

A. From reading this, the text string, I believe what the particular last three -- I guess the ones dated 6/17, 641, 642.

Q. Right.

A. I believe that discussion was around dispatch price, which is the gas price that we use as the -- to form the energy offer curves to dispatch our generating needs, gas-fired generating needs.

Q. Okay. All right. Sorry. I misunderstood. My fault. Okay. Okay.

MR. DOBROWSKI: Here's what I'm going to do, if it's all right with you, Lauren, I'm going to pass the witness and while Enterprise is asking questions, I'm going to go through whatever else I have there to see if I have anything left. If I do, I'll pick it up after he's done. Hopefully he'll cover everything. Okay.

MR. WOODS: Let's take a break.

MR. DOBROWSKI: Sure.

MR. WOODS: So I can switch.

MR. DOBROWSKI: I'll get out of the way.

THE VIDEOGRAPHER: Okay. Off the record. The time is 2:45.

(A brief recess was taken.)

THE VIDEOGRAPHER: Okay. We're back on the record. Time is 2:55.

EXAMINATION

BY MR. WOODS:

Q. Good afternoon, Mr. Pollo.

A. Good afternoon.

Q. You understand -- or my name's Robert Woods, and I represent Energy Transfer.

Do you understand that?

A. Yes, sir.

Q. And when I say "Energy Transfer," I could be referring to Houston Pipeline or Oasis, the two defendants in this lawsuit?

A. Yes, sir.

Q. And if I refer to them collectively as Energy Transfer, you'll know what I'm saying?

A. I assume it'll be one or either.

Q. Now, could you state your title at CPS again for the record?

A. Vice president of energy supply and market operations.

Q. And is part of your role as vice president of energy supply and market operations, is part of that involve -- does part of that role -- does part of that role involve reviewing weather forecasts?

A. I would say I don't review weather forecasts every day. But I do see them frequently.

Q. Is that the responsibility of members of your team?

A. Yes.

Q. And whose responsibility primarily is it to review weather forecasts with respect to natural gas?

A. With respect to natural gas, I would say primarily our gas traders, Mr. Bordovsky and Mr. Skaer, at the time of February 2021 would have been reviewing daily weather forecasts.

Q. And what weather forecasting information did CPS have available to it prior to enduring Winter Storm Uri?

A. Utilized a contractual third-party contract. Contract that provides us with various types of weather forecasts. We utilize available public information, National Weather Service, local news broadcasts, other publicly available information. It could be as various Internet weather providers. We look at several different forecasts

and pieces of information about weather.

Q. Okay. When you say "several different forecasts," can you be specific about which ones that you or your team would rely on for forecasting the weather prior to and during Winter Storm Uri?

A. I don't have specific knowledge of what individuals were looking at on specific days. I would say our typical process would be our third-party contractor services is one of the primary ones, along with National Weather Service.

Q. And what is the name of the third party contractor?

A. DTN. I don't know their full -- full name or exactly the -- the proper business name. DTN is how we refer to them or how I'm familiar with them.

Q. And what do -- what documents or information do they supply to CPS that you're aware of?

A. To my knowledge, I don't know that they provide specific documents. We have access to their service which provides daily weather forecasts, I believe for period of time that covers hourly forecasts. They have -- a part of that I think is also their 15-day weather view.

(Exhibit 93 was marked.)

Q. BY MR. WOODS: Okay. I'm going to hand you what I've marked as Exhibit 93.

A. Thank you.

Q. And is Exhibit 93 an e-mail dated February 10th, 2021?

A. Yes, it is.

Q. So this is before Winter Storm Uri had arrived in Texas?

A. Yes, based on the February 12th start date that I think we identified earlier.

Q. Okay. And who is David Detelich or however you pronounce that last name?

A. Mr. Detelich is a member of my team. I don't remember his exact title at the time. I think it was principal -- I think it's principal QSE operations support. So David is one of our analysts.

Q. Okay. What is his primary job responsibility?

A. His primary job responsibility is to work with my team, really with -- his focus is on the ERCOT wholesale energy market.

Q. Okay. And this e-mail is titled "Short-term cold weather outlook gas supply planning"; true?

A. Yes, that -- that is the subject that's

listed.

Q. And you received this e-mail?

A. My name is on the address list, yes.

Q. And if you read Mr. Detelich's e-mail, second sentence says, "Our forecast shows temperatures below freezing," continues on from there.

When he says "our forecast," what did you understand he was referring to?

A. I don't really have -- I don't have specific knowledge of what he was exactly referring to.

Q. But whatever it was, that was forecast that CPS was relying on for its gas supply planning; fair?

A. I believe it would be certainly one of the -- it would be a forecast that we were using for planning, yes, is my belief.

Q. And he states that it looks like it could get as cold as February 2011.

Do you see that?

A. I do.

Q. And, in fact, Winter Storm Uri was significantly worse than February 2011; true?

A. I -- I don't recall the temperature statistics from February 2011 to be able to make that

comparison, as we sit here today.

Q. Okay. And he states, "In 2011, temperatures stayed below freezing for around 55 hours."

Do you see that?

A. Yes.

(Exhibit 94 was marked.)

Q. BY MR. WOODS: Hand you what I've marked as Exhibit 94.

A. Thank you.

Q. And do you see that Exhibit 94 is an article from KSAT in San Antonio?

A. Yes, that's what it appears to be.

Q. That's a journalism outlet that you are familiar with?

A. It's one of our local TV stations.

Q. Okay. Now, if you turn to page 6 of this document.

A. (Witness complies.)

Okay.

Q. And in looking at the entry titled February, Friday, February 19th.

A. Yes.

Q. Underneath there you see that KSAT reports that San Antonio spent 107.5 hours under freezing

temperatures.

You see that?

A. Yes, I see that.

Q. Okay. Any reason to doubt that that's true?

A. I don't know the -- recall the exact number. I think it was in that range, around a hundred and seven hours. I don't know that to be exactly correct.

Q. Okay. But any reason to doubt that KSAT's misreporting that?

A. I don't have any reason to doubt that.

Q. Okay. So let's go back to Exhibit 93, the e-mail from Mr. Detelich.

And you see that he states that, "In 2011, temperatures stayed below freezing for around 55 hours"; true?

A. I see that, yeah, it's in Mr. Detelich's e-mail.

Q. His prediction is it could get as cold as 2011 but maybe a little shorter in duration; fair?

A. Mr. Detelich made that statement at the beginning of his e-mail, yes.

Q. Okay. But as we just saw from the KSAT article, Winter Storm Uri was actually significantly

longer in duration than the winter weather in February 2011; true?

A. That's my understanding.

Q. So would you agree as of February 10th, 2021, that CPS Energy's prediction for the duration of Winter Storm Uri was an underestimate?

MS. VALKENAAR: Objection; form.

THE WITNESS: I -- you know, I -- I would say that the information that you're asking me about is Mr. -- from Mr. Detelich's e-mail.

Q. BY MR. WOODS: Okay. He works for you; right?

A. He does.

Q. He works at CPS?

A. He does.

Q. And he refers to it as "our forecast"; true?

A. That is how he referred to it, yes.

Q. Okay. So would you agree that CPS's forecast of the duration of Winter Storm Uri was an underestimate?

A. Based on the information that we're talking about, I would say that Mr. Detelich's statement was different from what actually happened.

Q. Yeah. And it was an underestimate of how

long temperatures would remain below freezing; true?

A. Mr. Detelich's -- the information in Mr. Detelich's e-mail was -- yeah, did not show the number of hours below freezing that actually happened.

(Exhibit 95 was marked.)

Q. BY MR. WOODS: Now I'm going to hand you what I've marked as -- where's my exhibit stickers?

I'm going to hand you what I've marked as Exhibit 95.

And on this one, even after we finish looking at it, set it to the side because we may come back to this one. Exhibit 95.

And I'll represent to you that Exhibit 95 is a chart of natural gas transactions produced by CPS in this case and it's organized by date. So it starts on February 10th and then it goes day-by-day at each page.

Do you see that?

A. Yes, I see the different dates.

Q. Okay. And then you see on February 10th the first page of 2021?

A. Okay.

Q. Do you see that CPS Energy purchased natural gas for rates that were below $4 per MMBtu?

A. Assume you're referring to the column that looks to be labeled as DLVD, which I presume is delivered, but I can't speak to that for sure, that -- that column?

Q. Yeah.

A. "DLVD rate"?

Q. Yeah. Is it your understanding that that's the price that CPS Energy paid for the natural gas on each one of these line items?

A. Look at this real quick.

So I certainly did not prepare this document. My understanding would be that that column labeled as DLVD rate would be the purchase price.

Q. Okay. And they are all for February 10th of 2021 below $4 per MMBtu; true?

A. Yes.

Q. Okay. And do you -- did CPS Energy go and purchase any natural gas on February 10th of 2021 that would be delivered during the course of Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: So February 10th I believe would have been Wednesday. I -- I don't have direct recollection of the specific transactions that we made on that date. It may have been or may not have

been for delivery during the winter storm.

Q. BY MR. WOODS: Okay. And you understand that it's possible on a Wednesday to buy gas that would be delivered, say, the next Monday; is that fair?

A. Not being a direct gas trader, I would assume it's possible, but I'm not aware of that. I don't believe we -- my recollection is we've not done that frequently. But I don't know that it's -- or unable to do that.

Q. All right. I -- like I said, set that chart to the side because we'll come back to it. I'm going to show you another exhibit.

A. Okay.

(Exhibit 96 was marked.)

Q. BY MR. WOODS: I'm going to hand you what's been marked as Exhibit 96.

And you see that this is a series of text messages that begin on February 10th of 2021 at 9:14 in the evening?

A. Yes.

Q. Okay. So this is the same day that we just looked at from Mr. Detelich's e-mail in the afternoon; true?

A. Yes, both are February 10th.

Q. Okay. And you sent the first text message; fair?

A. Based on the exhibit that you've handed me, I would agree with that. I don't know if there are other text messages before or after.

Q. Okay. But you sent the first one that's here on the page?

A. On this page, yes.

Q. Okay. And one of the recipients is the CEO of CPS, Paula Gold-Williams?

A. Miss Gold-Williams is listed, yes.

Q. And so is the COO of CPS Cris Eugster?

A. Yes.

Q. And you also see Frank Almaraz listed there?

A. Yes.

Q. And I believe there's also just a reference where it just says general counsel is referenced?

A. Yeah, I see the -- that reference. I'm not sure why it's there.

Q. Okay. But fair to say that some of the most senior members of CPS Energy are on this text message?

A. Yes.

Q. Okay. And you state, "Good evening, I

apologize for the late text but wanted to update you on the cold weather outlook for early next week."

That's how you start your text message?

A. I apologize, I was reading it.

Q. That's how you start your text; right? You say, "Good evening, I want to apologize for the late text but I want to update you on the cold weather outlook for early next week."

A. Yes, that is how it started.

Q. And that cold weather being referred to is Winter Storm Uri; true?

A. The -- yeah, early -- the early next week that's referenced would have been a portion of Winter Storm Uri.

Q. And as we established earlier in your deposition, it would not have been your common practice to be texting the senior leadership of CPS Energy at 9:14 in the evening; fair?

A. I would agree it's not common.

Q. Okay. Now, you state in this text message that, "Monday and Tuesday are the primary concerns"; right?

A. That statement is included in the text, yes.

Q. Okay. And what were you basing that on?

A. I don't have specific recollection of the basis for that. I would presume it was the -- our weather -- combination of forecasts, our weather forecasts, our energy usage forecast and -- and the ERCOT outlook.

Q. Okay. And is it fair to say that you were trying to give the senior leadership of CPS a heads-up that the weather forecast is looking worse than was predicted earlier by CPS?

MS. VALKENAAR: Objection; form.

THE WITNESS: From reading the -- rereading the text, I would say I was communicating what the current outlook was. There's a statement that it was different from what we -- what had been communicated earlier.

Q. BY MR. WOODS: And specifically that the temperature outlook had been moved down, meaning that it was going to be colder than expected; fair?

A. I would agree that that statement about temperature outlook moving down would refer to colder weather.

Q. And you state here that ERCOT has a load forecast above prior winter record; true?

A. Yes, that statement is in the text.

Q. Okay. So is it fair to say that you were

trying to alert the senior management of CPS that the weather during Winter Storm Uri is going to be colder than expected and that the demand for power is going to be higher than it's ever been before; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: Can you restate your question?

MR. WOODS: Could you read it back to him.

(The record was read.)

THE WITNESS: From reading the text, it looks like the focus of the information was Monday and Tuesday, not the entirety of Winter Storm Uri. The energy demand that's mentioned in the e-mail is higher than what had been previously seen, yes.

Q. BY MR. WOODS: Okay. Let's look back at the chart of price. It's Exhibit 95.

So the text message that we just looked at was in the evening on the 10th; right?

A. Yes, the timestamp is 9:14 p.m.

Q. And it was predicting that the weather would be colder than expected. We already discussed that; right?

A. Again, as I said, the focus of that text appears to be on Monday and Tuesday.

Q. Okay. And can you identify for me on

Exhibit 95, on February 11th, the next day, since this text message was sent at 9:14 in the evening, any actions listed there that CPS took to purchase natural gas or additional natural gas for Monday or Tuesday of the following week when according to you those days would be the primary concerns?

MS. VALKENAAR: Objection; form.

THE WITNESS: My -- my understanding of this spreadsheet is the layout is based on the gas day and when gas flowed, not the day it was purchased.

Q. BY MR. WOODS: Let me ask the question differently, then.

What actions did CPS Energy take the next day, on February 11th, 2021, after your text message exchange with the senior leadership to address the gas supply needs for Monday and Tuesday, the days that you predicted to be the, quote, primary concerns?

A. I don't recall specifically what we did.

Q. Did you make any purchases of additional natural gas for delivery on those days?

A. I don't recall specific transactions.

Q. So as the manager of energy supply and market operations you don't know?

MS. VALKENAAR: Objection; form.

THE WITNESS: I would say there were a lot of transactions that occur on a daily basis, particularly with Winter Storm Uri, and I don't recall and know the details of every transaction that we do.

Q. BY MR. WOODS: As the manager of energy supply and market operations, you didn't take the information that you had sent to the senior management of CPS Energy and go and order your team to take precautions for the weather that was coming on the following Monday and Tuesday?

MS. VALKENAAR: Objection; form.

THE WITNESS: My answer was I didn't recall the specific actions that we took.

Q. BY MR. WOODS: Did you take any specific actions?

A. To my recollection, yes, we took precautions, took steps to prepare for Winter Storm Uri, but I don't recall the exact actions, activities that we undertook, you know, on the night of February 10th or specifically on the morning of February l1th.

Q. So you didn't go to Bruce Bordovsky or Ken Skaer, the traders, and say, "Hey, just in case

we need extra gas on Monday and Tuesday be sure to buy some extra"? You didn't do that, did you?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall specific conversation between myself and Mr. Bordovsky or Mr. Skaer.

Q. BY MR. WOODS: Did you do -- did you or your team do any sensitivity analysis to determine what could happen if the weather was worse than you had forecasted?

MS. VALKENAAR: Objection; form.

THE WITNESS: I -- I don't have specific knowledge of what every member of my team may have looked at in terms of different analyses.

Q. BY MR. WOODS: So sitting here today, you can't identify any sensitivity analysis you did to see what would happen if the weather was worse than expected?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall specifics, no.

(Exhibit 97 was marked.)

Q. BY MR. WOODS: Hand you what I've marked as Exhibit 97.

A. Thank you.

Q. And you see that Exhibit 97 is a series of

text messages involving you beginning on the morning of February 10th, 2021?

A. Yes.

Q. Okay. And if you look down below, the fourth text message down, at 7:56 a.m., you see the text message written by Benny Ethridge?

A. At 7:56?

Q. Yes, sir.

A. Yes.

Q. And who's Benny Ethridge?

A. In February 2021, Benny Ethridge, Mr. Ethridge was our senior vice president for power generation.

Q. And he is telling you and others, including the COO of CPS Energy, Cris Eugster, that it looks like cold weather starts Saturday with worst by Monday.

Do you see that?

A. I do.

Q. Okay. And, in fact, Winter Storm Uri lasted all the way till the following Friday; true?

A. That's what we talked about earlier, is Winter Storm Uri ended roughly around February 19th.

Q. Okay. Now, look two text messages down below that, Mr. Ethridge sends another text and he

gives some predictions of the high and low temperatures for the day; true?

A. It's what it appears to be, yes.

(Exhibit 98 was marked.)

Q. BY MR. WOODS: Okay. Keep that in front of you. But I'm going to hand you what's marked as Exhibit 98.

And I'll represent to you, Mr. Pollo, that Exhibit 98 are the actual observed temperatures by the National Weather Service for San Antonio.

So if you pull up Exhibit 98 and Exhibit 97 kind of side by side here and let's go through them day by day.

Do you see that Mr. Ethridge predicts that the high on Saturday would be 40 and the low 25?

A. Those are the numbers in Mr. Ethridge's text.

Q. Yeah.

MS. VALKENAAR: I'm sorry, Robert, where did Exhibit 98 come from?

MR. WOODS: It's just the National Weather Service.

MS. VALKENAAR: And this is what the actual reported temperatures were?

MR. WOODS: Yes.

MS. VALKENAAR: When was this pulled?

MR. WOODS: These temperatures are from February 2021.

MS. VALKENAAR: No, I know. When was the Exhibit 98 -- since it hasn't been produced, I'm just not familiar with how that data -- if you're going to ask him questions --

MR. WOODS: Sure.

MS. VALKENAAR: -- I'm trying to understand.

MR. WOODS: I mean, you can look it up on the Internet.

MS. VALKENAAR: When was this pulled up?

MR. WOODS: Last couple of days.

Q. BY MR. WOODS: All right. So let's look at Saturday, which Saturday would have been the 13th of February; right?

A. I believe that's what we agreed to earlier.

Q. All right. And Mr. Ethridge is predicting a high of 40 and a low of 25?

MS. VALKENAAR: Objection; form.

THE WITNESS: Those are the numbers in Mr. Ethridge's text. I wouldn't say that that -- I couldn't agree that that's a classification or classify that as Mr. Ethridge's forecast. I would

agree those are the numbers he's put in his text.

Q. BY MR. WOODS: Sure. Well -- and you see that the actual temperatures on Saturday was a high of 32 and a low of 29; right?

A. Based on the information you handed me on Exhibit 98, I -- that's the numbers that are on the page.

Q. Okay. Any reason to doubt the National Weather Service's records of temperatures for San Antonio?

A. I don't doubt the National Weather Service's records. My concern with the information that you handed me is the only indication that it's National Weather Service's data was your statement. There's nothing on the exhibit labeled as National Weather Service.

Q. Sure. Well, I'll represent to you it's from the National Weather Service and we'll just -- subject to that representation, we can keep going.

So let's look at, then, on Sunday, Mr. Ethridge texts out to senior leaders at CPS that Sunday is a high of 35 and a low of 25; right?

A. Those are the numbers in Mr. Ethridge's text.

Q. Okay. But the real low on Sunday was

actually 13 degrees; right?

A. Based on the represented National Weather Service data, yes.

Q. So he's off by more than 10 degrees?

MS. VALKENAAR: Objection; form.

THE WITNESS: I'd say the numbers in Mr. Ethridge's text are different.

I also observe that the time line of the text messages that -- that you -- are in Exhibit 97 is earlier than the other text stream that we said the temperatures were moving downward. So this was -- would be information that I believe we updated and superseded later on in the day.

Q. BY MR. WOODS: All right. Agree or disagree that he says on Sunday the low will be 25, but according to the National Weather Service the actual low is 13 degrees?

MS. VALKENAAR: Objection; form.

THE WITNESS: I thought I said it earlier, but I agree that Mr. Ethridge's text says 25 for Sunday and the National Weather Service database on the exhibit you handed me said 13.

Q. BY MR. WOODS: Okay. So it's different by more than 10?

A. Yes. 13 and 25.

Q. Okay. Now, let's look at the 15th, which is Monday. Mr. Ethridge's text says 20 degrees, but the actual observed temperature, low temperature was 9 degrees; right?

A. Agree Mr. Ethridge's text said 20 and the National Weather Service represented data says 9.

Q. Okay. And then finally, let's look at Tuesday. Mr. Ethridge's text says a low of 33, but the actual low was 12, according to the National Weather Service?

A. Similar answer, I agree Mr. Ethridge's text says 33 and the represented National Weather Service data says 12.

Q. And that's a difference of more than 20 degrees; fair?

A. 12 and 33, yeah, it's more than 20, difference between those two numbers.

Q. Okay. So the difference between Mr. Ethridge's numbers and the National Weather Service numbers on Sunday for the low is greater than 10, for Monday is greater than 10 and for Tuesday is more than 20 degrees; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you restate the question?

Q. BY MR. WOODS: Yeah, I'm just adding up the differences between the lows between Mr. Ethridge's texts and the National Weather Service data. And on Monday the difference is greater than 10 -- well, let me restate that. Sorry.

On Sunday the difference is greater than 10, Monday it's greater than 10 and on Tuesday the difference is greater than 20; fair?

MS. VALKENAAR: Objection; form.

THE WITNESS: There's certainly a difference in numbers between Mr. Ethridge's text and the National Weather Service data.

Q. BY MR. WOODS: Okay. And we can just do the math; right?

A. Yeah.

(Exhibit 99 was marked.)

Q. BY MR. WOODS: All right. I'll hand you what has been marked as Exhibit 99.

A. Thank you.

Q. All right. You see that Exhibit 99 is a text message stream starting on February 11th of 2021 at 8:57 in the morning?

A. No.

Q. You know what, I turned to the wrong page. Sorry.

It's a text message stream beginning at 8:08 in the morning?

A. Yes.

Q. And it's involving Mike Hale and Kyle Sanchez and you?

A. Yes.

Q. Who is Mike Hale?

A. Mike Hale, I believe in February 2021 his position was day-ahead manager.

Q. Okay. And then who's Kyle Sanchez?

A. Kyle Sanchez is a contractor that works for us. His position is a meteorological data coordinator.

Q. All right. And if you turn to the next page and you look at the text message starting at 8:59 a.m.

A. Okay.

Q. It's written by Kyle Sanchez. You see that he states that, "AccuWeather does post hourly forecasts."

Now, is that -- is he referring to just like the app or the website AccuWeather that you or I could access on our phone or our computer?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't know specifically

what Mr. Sanchez was referring to.

Q. BY MR. WOODS: But -- so as one of the three people in this text message, you don't know what he was referring to when he said, "AccuWeather does post hourly forecasts"?

A. He made a reference to AccuWeather. I don't know that I can answer the question you asked as to what specific information that he may access or that you or I could access, which I thought was your question.

Q. All right. Well, let's turn back to the previous page and look at the text message at 8:56 in the morning that you sent.

You asked Mr. Hale and Mr. Sanchez, "Does AccuWeather post hourly forecasts that we can use to show how their forecasts correlate to what is displayed with the iPhone?"

What did you mean by that?

A. So from looking at the context of the text messages, my understanding is AccuWeather is the provider of the weather data that you can access on just the general weather app that's on your iPhone.

iPhones are standard issue at CPS Energy. So I think that's a quick source of data for folks to just hit the weather app.

So looks like my question was referring to AccuWeather posting hourly forecasts. In rereading the text, I would assume that I was asking about the AccuWeather website and how does that correlate to the information that Apple is showing on the iPhone.

Q. Okay. And that's like a website anybody can access, you or me or just anybody you may have mentioned?

A. Yes, we do not have a paid subscription with AccuWeather, so it would have been their public website.

Q. Okay. So you think it's fair to say that as manager -- or -- sorry -- as vice president of energy supply and market operations, that one of the sources of data you were looking to for the weather forecast for Winter Storm Uri was the AccuWeather website or app on an iPhone?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you restate the question?

Q. BY MR. WOODS: Yeah.

Well, in your role as VP energy supply and market operations, was one of the sources of data that you were using to predict the weather during Winter Storm Uri the AccuWeather website or the

AccuWeather app on an iPhone?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't specifically recall looking at the AccuWeather website personally. My recollection is DTN and National Weather Service were the sources of data that I typically use.

Q. BY MR. WOODS: Okay. But in this text message stream you're specifically asking to know more about the AccuWeather hourly forecasts; true?

A. As I reread the text string, it appears to me that I was asking can we correlate from the AccuWeather website to the information that is on the iPhone weather app.

Q. Now, for Mr. Sanchez, was he the only employee or direct contractor of CPS with a meteorological background?

MS. VALKENAAR: Objection; form.

Q. BY MR. WOODS: -- at the time of Winter Storm Uri?

A. At the time of Winter Storm Uri, Mr. Sanchez wasn't a direct employee of ours. He was, as I said, served in a contractor role.

Q. Okay. Was he the only contractor for CPS with a meteorological background at the time of Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: As I said, DTN is the third party service that we use. We have access to contact and discuss with their meteorologists on staff as well.

Q. BY MR. WOODS: Okay. Did you have any conversations with those meteorologists about Winter Storm Uri?

A. I don't recall personal conversation between myself and -- and DTN's meteorologist, no.

Q. Okay. But you did have conversations about the weather during Winter Storm Uri with Mr. Sanchez; true?

A. I had conversations I'm sure with Mr. Sanchez and several others throughout the company.

Q. But to be clear -- okay.

Well -- let's -- and you're -- you're aware that at the time of Winter Storm Uri Mr. Sanchez did not have a college degree; fair?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't remember his specific graduation date.

Q. BY MR. WOODS: Okay. Are you -- sitting here today, you're telling me that you don't know one

way or the other whether Mr. Sanchez had a college degree at the time of Winter Storm Uri; you haven't read any of the articles about that?

MS. VALKENAAR: Objection; form.

THE WITNESS: I'm saying, as I sit here today, I don't recall. And since I don't recall specifically, I don't feel appropriate to make a guess as to the accuracy of the information.

Q. BY MR. WOODS: Okay. So just to be clear, you didn't have any conversations with any of the meteorologists at DTN, you did have conversations with Mr. Sanchez but you don't know whether he had a college degree during Winter Storm Uri; true?

A. There was a lot in that statement. Could you repeat it or go through it more slowly?

Q. Yeah. Let's take it one by one.

You didn't have any conversations with the meteorologists at DTN about the weather during Winter Storm Uri; true?

A. I personally do not recall having a conversation. I can't speak for the other members of my team as we sit here.

Q. Okay. So the answer is no?

A. Me personally, no.

Q. And then for Kyle Sanchez, you did have

conversations with him about the weather during Winter Storm Uri; true, like we just looked at one?

A. Certainly there's at least this text stream, yes.

Q. And you are -- your testimony, sitting here today, is you don't know whether he had a college degree at the time of Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall the date of his graduation.

(Exhibit 100 was marked.)

Q. BY MR. WOODS: All right. I'm going to hand you what's been marked as Exhibit 100.

A. Thank you.

Q. And Exhibit 100 is a PDF that was e-mailed out to certain personnel at CPS Energy, including you, on February 14th, 2021; right?

A. Yes.

Q. And it looks like it was a document that someone maybe scanned on a printer and then e-mailed out to the folks on the recipient list?

A. Yes, I would agree with that.

Q. Okay. And the document is titled D-A-P for Monday, 2/15/2021.

What does D-A-P stand for?

A. D-A-P, in this instance, stands for day-ahead plan.

Q. Okay. Fair to say that this document is used for trying to plan CPS Energy's operation through the upcoming day?

A. The day-ahead plan is used to plan our -- our energy position in the ERCOT wholesale market.

Q. Okay. Let's see.

Now, if you'd look with me at the document Bates-labeled 11741 down in the corner, so it's the second-to-last page with the chart on it.

A. Okay.

Q. And you see there in the bottom for San Antonio there's a weather forecast; right?

A. Yes.

Q. Okay. Now, if you have Exhibit 98 handy, which is data from the National Weather Service, can you pull that back up for me, please.

A. Okay.

Q. So this D-A-P that we are looking at that's Exhibit 100 is in the midst of Winter Storm Uri; true? It's on the 15th?

A. It was e-mailed out on the morning of February 14th, 7:03 a.m.

Q. Sorry. 14th.

You would agree with me that that's during the course of Winter Storm Uri?

A. Yes.

Q. And it's planning for CPS Energy's operations on the 15th, which is also during Winter Storm Uri?

A. As I said, it's planning for the ERCOT -- our position in the ERCOT wholesale energy market.

Q. Now, if you look with me at the data on the daily planning chart forecast for Tuesday, February 16th, you see that the predicted high is 37 degrees?

A. I do.

Q. And you see that the actual observed temperature according to the National Weather Service for the same days of 26 degrees; right?

A. On Exhibit 98, yeah, it does show the maximum temperature on the 16th to be 26.

Q. Yeah. So that's a difference of more than 10; right? 37 and 26?

A. I would agree, yes.

Q. Okay. Let's look at Wednesday.

You see that the high is predicted to be 43 on the CPS document, but the National Weather Service notes that the actual observed high was only -- let

me see. Strike that for one second.

All right. Sorry. Go to Thursday.

You see that on Thursday CPS Energy predicts a high of 43 but the actual observed temperature on Thursday, the high was actually 32; right?

A. No, I would not agree that that's CPS Energy's forecast. I believe that is a forecast from DTN.

Q. Does CPS Energy have any other forecasts other than the one from DTN?

A. As I said, we use DTN's forecast. You categorize it as CPS Energy's. I just wanted to point out on this chart that this is, I think, taken directly from DTN's information or website.

Q. And the high of 43 on Thursday is what's appearing in CPS Energy's daily planning document; right?

A. 43 on Thursday, yes, sir.

Q. And the actual observed temperature was 32; fair?

A. I would agree that, again, Exhibit 98 shows 32 as the maximum temperature of the 18th.

Q. Okay. So like the forecast that we looked at before from CPS, this forecast on the daily

planning document has more than one day where CPS Energy's temperature prediction is off by more than 10 degrees; fair?

MS. VALKENAAR: Objection; form.

Hey, Robert, I'm unable to replicate Exhibit 98 online. Do you have the URL link?

MR. ALI BHAI: Right here.

MS. VALKENAAR: I'll circulate it.

THE WITNESS: I'm sorry, could you repeat the question?

Q. BY MR. WOODS: So like the weather forecasting predictions that we looked at earlier from Mr. Ethridge that were off more than 10 degrees on multiple days, you would agree with me that the chart looked at here, the daily planning document for February 15th, 2021, also has multiple days where CPS Energy's predicted temperatures are off by more than 10 degrees; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: This day-ahead plan from February 14th is a snapshot in time so that forecast from DTN is refreshed every day. So we look at an updated forecast every morning.

So, you know, if you look at the next day from when this plan was created on Monday, the high

was 26, the low of 11, which is -- looks to be within two degrees of what was in the National Weather Service actual data.

Q. BY MR. WOODS: But you would agree with me that the prediction on this daily planning chart for CPS on Thursday was off from the National Weather Service's observed temperature by more than 10 degrees; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I would say the information presented on the morning of February 14th for a forecast on February 18th, that number was -- or differed by more than 10 degrees between what's on Exhibit 100 and the information on Exhibit 98.

MS. VALKENAAR: Ali, just real quick. Thank you so much for sending the link, but it doesn't have -- it's not a populated chart that we see in Exhibit 98.

MR. ALI BHAI: Sure.

MS. VALKENAAR: Can you send what you put into the qualifier to make Exhibit 98, is what I'm trying to understand.

MR. ALI BHAI: Okay. Okay. Sure.

MS. VALKENAAR: Thank you.

Q. BY MR. WOODS: All right. Mr. Pollo, could

you pull back up Exhibit 95, the big chart of transactions.

A. Okay.

Q. And as we looked at before, it started on February 10th and it goes through -- the printout that I gave you goes through the 19th.

A. Okay.

Q. Okay. For all of these natural gas transactions that are in Exhibit 95, when CPS agreed to these natural gas transactions, was it intending to pay in full?

MS. VALKENAAR: Objection; form.

THE WITNESS: As I mentioned earlier, my recollection is we did not -- there was never -- it was not discussion on disputing invoices until after the winter storm.

Q. BY MR. WOODS: Okay. So at the time that CPS entered into these transactions it was intending to pay in full; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't know that I can speak on behalf of CPS Energy as an entity.

Q. BY MR. WOODS: So as the vice president of energy supply you can't say one way or the other?

A. Well, as I said, I don't recall discussion

of potential disputes of invoices until after the winter storm ended.

Q. Well, that wasn't my question.

My question was: At the time that CPS entered into these transactions, was it intending to pay in full?

A. I may not be understanding your question, but I believe you're asking me to speculate on what others in the company may or may not have done and I don't think I can do that.

Q. Okay. So there may have been other people at CPS who at the time these transactions were entered into who were not intending to pay the counterparty in full; is that fair?

MS. VALKENAAR: Objection; form.

THE WITNESS: Not to my knowledge.

Q. BY MR. WOODS: Okay. So you're not aware of anyone at CPS who had the intent not to pay for any of those transactions in full at the time that they were entered into?

A. Could you restate that? Just want to make sure I'm answering the right question.

Q. Sure.

MR. WOODS: Do you mind reading that back to him.

(The record was read.)

THE WITNESS: I'm not aware that anyone at CPS Energy was contemplating not paying the invoices in full at the time of the winter storm.

Q. BY MR. WOODS: And are you aware of anyone at CPS Energy who believed that the prices that CPS agreed to in these transactions were anything but fair and reasonable at the time they were entered into?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you repeat that.

MR. WOODS: Do you mind reading it back?

(The record was read.)

THE WITNESS: I think I can only speak for myself and I would say that at the time my recollection is that I thought the prices were excessive and unprecedented when you look at the history of the gas prices.

Q. BY MR. WOODS: Okay. So at the time you entered into these transactions, you believed that the prices were excessive?

A. I wasn't the direct trader so my knowledge of -- of prices, certainly at the beginning of the winter storm, occurred after our traders had made or committed to many of the purchases.

Q. Wasn't my question, though, sir.

My question was: Did you believe at the time these transactions were entered into that the prices were excessive?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think my answer's the same. At the time of the winter storm, I thought the prices were, as I said, excessive and unprecedented compared to what we had seen.

Q. BY MR. WOODS: That's what you were thinking at the time you entered -- that CPS entered into these transactions?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think I've already answered your question, but...

Q. Respectfully, I don't think so. So I can ask it again.

Your testimony is that the prices -- that you believed at the time that these transactions were entered into that the prices were unprecedented and excessive; right? That's what you said?

A. I believe that's what I said.

Q. Okay. And was that your belief at the time CPS entered into these transactions?

MS. VALKENAAR: Objection; form.

THE WITNESS: I'm not really sure how else to answer your question, but...

Q. BY MR. WOODS: Mr. Pollo, my question is -- well, let's -- let's get a couple of things straight.

So you already told me that you think these prices are unprecedented and excessive. We're in agreement that that's what you think; right?

A. Yes.

Q. Okay. Now I want to know, did you think that at the time that CPS entered into these transactions? So, you know, right as they're agreeing to one of these prices, were you privately thinking, I believe that that price is excessive?

MS. VALKENAAR: Objection; form.

THE WITNESS: Since I wasn't directly trading, I don't know that there's -- I don't know that I can correlate my personal thoughts to the timing of any of the individual transactions.

Q. BY MR. WOODS: So you don't know, sitting here, one way of the other whether you thought at the time that these trades were entered into that the prices were excessive or not?

MS. VALKENAAR: Objection; form. He's answered that several times.

THE WITNESS: I believe I've answered the

question.

Q. *BY MR. WOODS: At the time that CPS Energy agreed to pay, for example, $140 per MMBtu for natural gas, did you believe that that price was excessive at the time CPS entered into that transaction?

MS. VALKENAAR: I'm going to object as to form. He's answered that.

I'm going to instruct you not to answer.

He's answered this line of questioning fully.

THE WITNESS: Can we take a break?

MS. VALKENAAR: Sure. Do you mind? He just asked if we can take a break. I think we've been going over an hour.

MR. WOODS: Okay. Well, I need to ask him about the -- the follow up to the last question about the $140, which is this one. And then I'm happy to take a break.

(Discussion off the record.)

(Exhibit 101 was marked.)

Q. BY MR. WOODS: All right. Mr. Pollo, I'm going to hand you what's been marked as Exhibit 101.

A. Thank you.

MR. WOODS: I feel like there's some risk

at some point that one of us is going to mark an exhibit for the second time but I just think we're going to have to do that.

MS. VALKENAAR: High risk. We'll all try our best.

MR. WOODS: Some of these text message strings, they start to run together.

Q. BY MR. WOODS: All right. Mr. Pollo, you see that Exhibit 101 is a series of text messages on February 13th of 2021 involving you, Bruce Bordovsky, Ken Skaer and Paul Vinson; true?

A. Yes.

Q. Okay. And Bruce and Ken are natural gas traders that work for Mr. Vinson; correct?

A. At the time of Winter Storm Uri, yes, Mr. Bordovsky and Mr. Skaer were our gas traders that reported to Mr. Vinson.

Q. And then Mr. Vinson reported to you; right?

A. Yes.

Q. Now, if you turn to me -- or turn with me to the second page Bates-labeled 10232.

A. (Witness complies.)

Q. And I'm specifically looking at the text that you sent on the 13th at 10:57 a.m., third one from the bottom.

A. Okay.

Q. Okay. And you state here, "Let's purchase the 20,000 at $140."

And are you saying let's purchase 20,000 MMBtus of natural gas at $140 per MMBtu in that text?

A. I would presume that that's what I was referring to, yes.

Q. Okay. And on February 13, 2021, at 10:57 a.m. when you said let's purchase the 20,000 MMBtus at $140 per MMBtu, did you believe that $140 per MMBtu was an excessive price for natural gas?

A. I -- I don't believe I can recall the exact timing of that -- those thoughts in my head versus, you know, this particular timing of this text.

Q. Okay. And when you stated let's purchase the 20,000 MMBtus at $140 per MMBtu the intention was that CPS Energy would, in fact, pay $140 per MMBtu for 20,000 MMBtus of gas; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: As I said, my recollection is that there was no discussion on potential disputing of invoices until after the storm was over.

Q. BY MR. WOODS: So the answer to my question is yes?

A. Could you repeat your question.

(The record was read.)

MS. VALKENAAR: Objection; form.

THE WITNESS: I think -- I know we were primarily focused on purchasing the gas that we needed. I don't recall that my -- certainly my team and I were not discussing whether we were going to dispute the invoice or not, no.

Q. BY MR. WOODS: Okay. And just to be clear, and, you know, you weren't planning to agree to pay a hundred and forty dollars per MMBtu but actually only pay a lesser amount; right? That wasn't something that you were contemplating at the time?

MS. VALKENAAR: Objection; form.

THE WITNESS: At the time we were not. My -- my recollection is there were no conversations, certainly with -- with my team about potentially disputing invoices.

MR. WOODS: All right. We can take a break.

MS. VALKENAAR: Okay.

THE VIDEOGRAPHER: Okay. Off the record. Time is 4:05.

(A brief recess was taken.)

THE VIDEOGRAPHER: Okay. Going back on the

record. Time is 4:19.

Q. BY MR. WOODS: Mr. Pollo, what did you do to prepare for your deposition today?

A. I met with my legal team.

Q. For how long?

A. I had I think three or four meetings that were generally about two hours long.

Q. Okay. On different days?

A. Yes, sir.

Q. Did you review any documents in preparation for your deposition?

A. I was shown a couple of documents during the meeting with the legal team.

Q. Okay. Did you review any documents on any of the breaks today during your deposition?

A. No.

Q. If you don't mind pulling up Exhibit 91 in front of you.

A. Okay.

Q. And Enterprise's counsel, Mr. Dobrowski, he asked you about this document earlier. If you look at the second page, which starts on the first page, it's an e-mail from Gary Gold where he says, "See memo to Paula."

A. Okay.

Q. And in there, in the second kind of whole paragraph, we looked at a statement earlier in your testimony that Mr. Gold is stating that, "Assuming gas prices of $160-ish and assuming a 10 heat rate for the plants at the top of the stack making these sales, as long as power prices are above 1600-ish, we should be making money."

Do you recall being asked about that statement earlier?

A. Yes, we discussed that paragraph, I recall.

Q. Okay. Okay.

And during the course of Winter Storm Uri power prices were often well in excess of $1600 per megawatt hour; true?

A. Yes.

Q. And so that means that at least if gas prices were in that one hundred and sixty dollar range, according to Mr. Gold, his prediction was that CPS would be making money; fair?

MS. VALKENAAR: Objection; form.

THE WITNESS: No.

Q. BY MR. WOODS: Okay. What -- why do you disagree with that?

A. The first thing, our first obligation with our power plants is to serve our electricity

customers. So Mr. Gold's reference to "at the top of the stack" means, you know, we have any generation left over after serving our own customers' needs.

So if we're producing power that is -- can be sold to ERCOT at $9,000, whatever the price was, but we're also buying load from ERCOT at $9,000, that same price, we're not making any money. We're still running our gas units at the cost of $1600.

Q. Understood.

And one of the reasons why CPS Energy had to buy load from ERCOT is that some of its power plants went offline during the storm; true?

MS. VALKENAAR: Objection; form.

THE WITNESS: We did have some power plants that had issues during the storm. Some -- some were -- had to -- were offline. Others that were producing but at reduced load.

Q. BY MR. WOODS: And what were the causes of why those were offline or producing at a reduced load?

A. I couldn't give you the specifics plant by plant. We had a variety of reasons why -- why the power plants weren't producing at full load.

Q. Okay. Well, just to best of your understanding, what were those reasons?

A. Some were mechanical failures. Some were identified as weather-related. Some of the issues were due to insufficient gas pressure.

Q. Okay. So just to focus on three of them that you identified there. You said mechanical issues was one, weather was two, and then three was gas pressure. There might be more but those are three that you listed.

A. Those are three, yeah. Again, I don't think that's an exhaustive list.

Q. Okay. And as VP of energy supply and market operations, is it your understanding that Energy Transfer delivered all the gas that CPS purchased from it?

A. Without seeing our detailed delivery records, I couldn't attest whether that's a true statement or a false statement. I know we had large varie- -- or quantity of volume of gas that was not delivered to us. I don't remember the specific suppliers that were involved.

Q. Okay. Well, let's go back to those three reasons that you identified for reasons why CPS Energy's power plants were either not functioning or not functioning at a full capacity during Winter Storm Uri.

So the first one, mechanical issues. Did Energy Transfer cause any of those mechanical issues?

A. No.

Q. And the second one you identified was the weather. Obviously Energy Transfer didn't cause the power plants to trip off -- that tripped off because of the weather; right?

A. I would agree Energy Transfer did not have a role in that.

Q. Okay. And then assuming that Energy Transfer really did deliver all the gas that CPS purchased from it, so there wasn't anything that Energy Transfer promised to deliver that didn't make it to CPS, assume with me that that's true, then Energy Transfer also didn't cause any of CPS's power plants to stop functioning or not function at full capacity due to gas pressure; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: As I said, I don't recall whether Energy Transfer successfully delivered or did not all the quantity of gas that was -- that we committed to buy or that they promised to deliver.

Q. BY MR. WOODS: Okay. But assuming they did, then they didn't have any responsibility for CPS's power plants not functioning due to gas

pressure; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. WOODS: That would have been a different pipeline company or different gas supplier's fault, potentially?

MS. VALKENAAR: Objection; form.

THE WITNESS: Yeah. I don't recall. I recall specific issues on different pipeline. I don't recall positively or negatively whether we saw pressure issues that related to Energy Transfer. I can -- I know some of the issues we saw were on a different pipe.

Q. BY MR. WOODS: Okay. But assuming that Energy Transfer -- let's just imagine a world where Energy Transfer would promise to deliver to CPS 400 units of gas -- I'm just making this up -- but let's just imagine this is the case.

They, in fact, deliver 400 units of gas, that's no shortfall in the amount, that will mean Energy Transfer wasn't responsible for the lack of gas pressure at any of those power plants; right?

MS. VALKENAAR: Objection; form.

Q. BY MR. WOODS: I know -- I know -- I know you've stated, and I hear you, that you don't know -- you haven't gone to look to see if Energy Transfer

has actually, you know, really did that.

But I'm just telling you, assume with me that that's true, that would mean that Energy Transfer is not responsible for CPS's energy -- CPS Energy's power plants not functioning because of the lack of gas pressure; right?

A. I don't directly agree with that statement, no. I think delivery of gas does not equate to necessarily ensuring or -- adequate pressure in a pipeline. I mean, I think there's more to it than just these 400 units were delivered so therefore we can assume there wasn't a pressure problem. I don't think you can draw that direct correlation.

Q. You would agree with me that if CPS Energy's power plants were fully functioning, they were all fully functioning, that CPS Energy would have had more capacity to sell power back to the ERCOT grid at the very elevated electricity prices available during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't have specific numbers off the top of my head of what our position was hour by hour, day by day. We would not have had some of the issues we would have had I think additional generation certainly that would have been available

to serve our load. I don't know that that would have created enough generation throughout the event to have excess power to sell.

Q. BY MR. WOODS: You're aware that during Winter Storm Uri CPS Energy did sell power at highly elevated electricity prices to the ERCOT grid; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: At times during the winter storm, my recollection is we -- we had what I would call a net long position where we had excess generation that was sold to -- to ERCOT.

Q. BY MR. WOODS: And to be clear, some of that electricity that at times CPS Energy sold to ERCOT was generated using natural gas; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: Yeah, we were generating off of a variety of fuel sources during the winter storm. Essentially all of the fuel sources that we had available. So nuclear, coal, natural gas. As I mentioned earlier, fuel oil.

Q. BY MR. WOODS: Okay.

A. Wind, solar.

Q. Well, you mentioned natural gas. Just to be clear, the answer to my question is, yes, during the times that CPS Energy was selling excessive

generation to ERCOT, some of that excessive generation had been generated using natural gas; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I would say some of our total generation was produced with natural gas. I can't tell you I recall specifically which fuel type or which generator was allocated, if you will, to ERCOT sales.

MR. WOODS: Lauren, I was going to show him an exhibit and I'm pretty sure it was used with Ken or Bruce but I'll confess to you, I don't have the number. So I can either remark it or I can show it to you and you can flip through the binder and find it. It's your call.

MS. VALKENAAR: Let's see if I recognize the document for efficiency's sake.

MR. WOODS: Sure. Maybe -- no, I just handed you the wrong one. Sorry.

MS. VALKENAAR: That one I don't recognize as being previously marked.

MR. WOODS: Yeah. Sorry. There we go. That's the one I was looking for. This one. So it would have been I think at Ken's.

MS. VALKENAAR: I don't think so. I could

be wrong, so let's mark it.

(Exhibit 102 was marked.)

Q. BY MR. WOODS: Okay. Mr. Pollo, I'm going to hand you what's marked as Exhibit 102.

A. Okay. Thank you.

Q. And you see that this is a text message from Ken Skaer to you on February 16th of 2021, which is during Winter Storm Uri?

A. Okay.

Q. Okay. After you received this text message, did you have any conversations with any of your superiors about what Mr. Skaer had said in this text message?

A. I don't recall any specific conversations on this, the contents of this text message, no.

Q. Okay. Do you recall any further discussions with Mr. Skaer about this text message?

A. I don't recall specific conversations, no.

Q. Okay. Did you take any actions or make any decisions based on the information or opinions expressed by Mr. Skaer in this text message?

A. My -- you know, my recollection is that at the time of the winter storm our focus was trying to buy the physical gas that we needed. Energy Transfer was able to supply gas to Rio Nogales, one of our

combined cycle, natural gas-fired power plants, and also had served a delivery point on the north side of our city which we needed to deliver gas to during the extreme cold weather. So I think in many cases we had to buy gas from Energy Transfer.

Q. Understood. Appreciate that.

Just to get back to my question, though. My question was: Did you take any actions or make any decisions based on the facts or opinions that Mr. Skaer expressed in this text message during Winter Storm Uri?

A. I don't recall specific decisions or actions that came out of that text message, no.

Q. Okay. And I'm going to preface this by saying I'm not asking you to disclose any -- the substance of any communication that you had with counsel or at the direction of counsel that would disclose attorney-client information or work product.

My question is only, do you know whose idea it was to dispute natural gas prices above $38.83 per MMBtu?

MS. VALKENAAR: I'm going to object.

And instruct you not to answer to the extent -- because I don't think you can disclose that without getting into privileged information, assuming

you know.

THE WITNESS: I -- I don't -- I don't know whose decision it was.

Q. BY MR. WOODS: Let me ask it another way. See if it draws a similar objection.

Do you know whether it was anyone who is an employee of CPS Energy that decided to dispute natural gas prices above $38.83 per MMBtu that were incurred during Winter Storm Uri?

MS. VALKENAAR: I have to assert the same objection and instruct you not to answer.

MR. WOODS: I think he can answer does he know. I think he can -- I think he can probably hold who.

THE WITNESS: Could you repeat your question.

Q. BY MR. WOODS: Do you know?

MS. VALKENAAR: Do you know -- what is the...

Q. BY MR. WOODS: Do you know whose idea it was to dispute prices above 38.83 per MMBtu; yes or no? Do you know who it was?

A. No.

Q. All right. Just a few more questions, Mr. Pollo.

Has anyone at CPS Energy, to your knowledge, taken responsibility for underestimating the severity of Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you repeat that, please.

Q. BY MR. STAFFORD: Sure.

Has anyone at CPS Energy, to your knowledge, taken responsibility for underestimating the severity of Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: To my knowledge, I would say that individuals at CPS Energy have identified ways to do things differently in the future.

Q. BY MR. WOODS: Has anyone, to your knowledge, stood up and taken responsibility for underestimating the severity of Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: To my knowledge, I think Miss Gold-Williams, for one, I think has made, in different forums, public apologies to the community. That's about all I can attest to.

Q. BY MR. WOODS: Okay. Similar question.

Has anybody at CPS Energy, to your knowledge, taken responsibility for underestimating

the amount of natural gas needed to run CPS Energy's power plants or distribute natural gas to its natural gas customers?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you repeat your question, please?

Q. BY MR. WOODS: Yeah.

Has anyone at CPS Energy, to your knowledge, taken responsibility for underestimating the amount of natural gas needed to run CPS Energy's power plants or distribute gas to its natural gas customers during Winter Storm Uri?

MS. VALKENAAR: Same objection.

THE WITNESS: I don't believe I can point to a specific individual.

Q. BY MR. WOODS: Okay. So you don't recall anyone saying, you know what, I made a mistake, I contributed to that, I'll do better next time?

MS. VALKENAAR: Same objection. I think he's answered. I also think the premise of your question --

MR. WOODS: Just objecting to form.

THE WITNESS: I don't have specific knowledge of that conversation or any conversation of that type.

Q. BY MR. WOODS: Has anyone at CPS Energy, to your knowledge, taken responsibility for the failure to purchase sufficient volumes of natural gas before the market prices for natural gas rose dramatically during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: I guess I don't know that I agree with the premise of your question that we failed to buy quantities of natural gas.

Q. BY MR. WOODS: Well, you certainly failed to buy the quantities of natural gas before the market prices rose dramatically during the storm; right? If you had bought all the gas earlier, the prices were lower; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: I would say I think before the winter storm we purchased the quantities of gas that we consumed.

Q. BY MR. WOODS: Respectfully, Mr. Pollo, I believe that CPS Energy clearly purchased natural gas during Winter Storm Uri after prices had already risen dramatically; right? I don't think that's disputed.

A. I think the statement that we purchased natural gas during the winter storm at very high

prices is not disputed.

Q. Okay. With that in mind, if you could, for the ladies and gentlemen of the jury, can you answer the question, has anyone at CPS Energy, to your knowledge, taken responsibility for failing to purchase sufficient quantities of natural gas for delivery during Winter Storm Uri before the market price for natural gas rose dramatically during the storm?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think by stating or asking the question regarding a failure implies that we did something outside of our process and I don't believe that was the case.

Q. BY MR. WOODS: Do you think your process, as you describe it, was a successful strategy during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could you repeat that? I want to make sure I heard it right.

Q. Yeah.

Well, when I asked you whether or not anyone at CPS Energy had taken responsibility to -- for the failure to purchase sufficient volumes of natural gas in advance of Winter Storm Uri, so before

the market prices rose dramatically, and you said -- your answer said, you referred to your process. So you basically said that wasn't our process.

And I'm asking you, do you believe that the process that you were referring to was a successful strategy during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

Q. BY MR. WOODS: I mean, you guys had to go out and buy next day gas at extremely high prices; right?

A. As I said earlier, we bought gas, daily gas, at I think what was viewed to be excessive prices, you know, given the winter storm and the disaster that befell the state. I don't think we had a choice but to buy that gas.

Q. Do you agree that there were ways to prevent having to do that if you had just taken different actions earlier on?

MS. VALKENAAR: Objection; form.

THE WITNESS: Could we have done something different? Potentially. But I think -- I think there's a range of -- you know, it's information leading into the storm wasn't perfect foresight, either as far as looking at what happened after the fact, could we have done something different?

I think in many cases most -- I think you can look back and say many people could have done things differently. But I think part of that also assumes that everyone would have had perfect knowledge of -- of exactly how the event would unfold. And I would say I don't think that perfect knowledge existed.

We didn't know going into the storm, for example, that gas that we expected to buy, whether it was gas we bought before the storm or during the storm wouldn't get delivered during the storm. So that was something I don't -- you know, that we didn't foresee, you know, that gas that we bought wouldn't show up.

Q. BY MR. WOODS: Has anyone at CPS Energy, to your knowledge, taken responsibility for the gas power plants going offline or not functioning at full capacity during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: To my direct knowledge, no.

Q. BY MR. WOODS: Are there things that you wish you had done differently during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think -- again, I think

regardless of Winter Storm Uri or any other significant event, I think you always look at what happened and could there be things you could do differently the next time around. Yeah, I think that's a natural reaction.

Q. BY MR. WOODS: Yeah. Obviously, you know, hindsight is 20/20, but some mistakes were made; right?

MS. VALKENAAR: Objection; form.

THE WITNESS: Yeah, I don't agree with the premise that mistakes were made.

Q. BY MR. WOODS: You don't think CPS Energy made any mistakes during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: I think that's an extremely broad question and I don't believe that I have the knowledge to speak for everything that happened within the entire company to agree or disagree with your statement.

Q. BY MR. WOODS: Well, did you and your team make any mistakes during Winter Storm Uri?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't recall to point to a specific mistake. You know, again, I think are there things that we would do differently? You know, I

think there are -- there are things that we have, you know, looked at that we think we would do differently, you know, going forward or for winter preparation, but I don't think that was in response to an identified mistake.

Q. Okay. What are the things that you're going to do differently the next time a winter storm comes?

A. I mean, one of the things that we did after Winter Storm Uri involved additional storage. We had contracts expiring so we went out looking for additional storage capacity.

Q. Anything else?

A. I -- I -- there's things I think that -- we've made some changes I think in our hedging program. I don't know if that was specifically in response to Winter Storm Uri, but we have looked at -- looked at that and made some adjustments to our, you know, going forward hedge position is another example.

Q. If you could go back and do it again, would you and your team have purchased natural gas in larger quantities earlier?

MS. VALKENAAR: Objection; form.

THE WITNESS: I don't know that I can

directly answer that. I think there -- it depends -- certainly part of that depends on operational considerations, and I don't know that we can go -- have all the knowledge to go through today.

And I think, as I said, a couple of things that would have affect -- that did affect the outcome compared to what we planned for was gas that we assumed we bought, had bought and committed to buy that wasn't delivered, you know, I think -- I think that's one of the main things.

MR. WOODS: All right. We'll pass the witness.

MS. VALKENAAR: We'll reserve our questions for trial.

THE VIDEOGRAPHER: Off the record. Time is 4:52.

(Whereupon, the proceedings were concluded at 4:52 p.m.)

REPORTER'S CERTIFICATE

ORAL AND VIDEOTAPED DEPOSITION OF

KEVIN POLLO

AUGUST 17, 2022

****

I, PAMELA SUE PETERSON, Certified Shorthand Reporter in and for the State of Texas, hereby certify to the following:

That the witness, KEVIN POLLO, was duly sworn by the officer and that the transcript of the

deposition is a true record of the testimony given by the witness;

That the deposition transcript was submitted on September 6, 2022 to the witness or to the attorney for the witness for examination, signature and return to Hanna & Hanna, Inc. by September 26, 2022;

That the amount used by each party at the deposition is as follows:

PAUL J. DOBROWSKI (03h50m)
Attorney for Enterprise Products Operating, LLC
ROBERT WOODS (01h57m)
Attorney for Energy Transfer
ALI SHAN ALI BHAI (00h00m)
Attorney for Energy Transfer
CHERYL LAFOND (00h00m)
Attorney for CPS Energy
LAUREN A. VALKENAAR (00h00m)
Attorney for CPS Energy
DYLAN FEDDERMAN (00h00m)
Attorney for CPS Energy
MEGAN STURM (00h00m)
Attorney for CPS Energy

That pursuant to information given to the deposition officer at the time said testimony was taken, the following includes counsel for all parties of record:

MR. PAUL J. DOBROWSKI, Attorney for Enterprise Products Operating, LLC;
MR. ROBERT WOODS, Attorney for Energy Transfer;
MR. ALI SHAN ALI BHAI, Attorney for Energy Transfer;
MS. CHERYL LAFOND, Attorney for CPS Energy;
MS. LAUREN A. VALKENAAR, Attorney for CPS Energy;
MR. DYLAN FEDDERMAN, Attorney for CPS Energy;

I further certify that I am neither counsel for, related to, nor employed by any of the parties or attorneys to the action in which this proceeding was taken, and further that I am not financially or otherwise interested in the outcome of this action.

Further certification requirements pursuant to Rule 203 of TRCP will be certified to after they have occurred.

Certified to by me on this 6th day of September, 2022.

FURTHER CERTIFICATION UNDER RULE 203 TRCP

The original deposition was [redacted] returned to the deposition officer on September 26, 2022;

If returned, the attached Changes and Signature page contains any changes and the reasons therefore;

If returned, the original deposition was delivered to PAUL J. DOBROWSKI, Custodial Attorney;

That $3,924.90 is the deposition officer's charges to ENTERPRISE PRODUCTS OPERATING, LLC, for preparing the original deposition transcript and any copies of exhibits.

That the deposition transcript was delivered in accordance with Rule 203.3, and that a copy of this certificate was served on all parties shown herein on September 26, 2022 and filed with the Clerk.

Certified to by me this 26th day of September, 2022.

San Antonio, Texas 78296

Re: Storage Confirmation "103180303"

Dear Mr. Vinson:

Reference is herein made to that certain Master Intrastate Gas Storage Agreement dated effective as of April 1, 2012 (the "Contract"), Houston Contract No. 103180300, between HOUSTON PIPE LINE COMPANY LP, as Operator, and CITY OF SAN ANTONIO acting by and through the CITY PUBLIC SERVICE BOARD, as Customer, covering certain intrastate natural gas storage services by Operator for Customer at Operator's Storage Facility.

In accordance with the provisions of the Contract, the parties hereby confirm the following volume(s), Receipt Point(s) and Delivery Point(s), price(s) and term to be applicable under this Confirmation:

Type of Service:	Firm Intrastate Storage Service
Term:	July 1, 2018 – June 30, 2021
Maximum Storage Quantity (MSQ):	2,000,000 MMBTU
Maximum Daily Injection Quantity (MDIQ):	30,000 MMBtu per day
Maximum Daily Withdrawal Quantity ("MDWQ"):	April – October: 55,000 MMBtu per day November through March: 40,000MMBtu/d: (MSQ greater than or equal to 1,350,000 MMBtu) 30,000 MMBtu/d: (MSQ less than 1,350,000 and greater than or equal to 650,000 MMBtu) 20,000 MMBtu per day: (MSQ less than 650,000 MMBtu)

CPSE Response in Opp to ET MSJ
Exhibit A-139
MDL-2022-CI-02879
exhibitsticker.com

Firm Service Rates:

A. Capacity Reservation Fee:	$130,000.00 per Month.
B. Injection Commodity Fee:	$0.0 per MMBtu for Intraday injections.
C. Injection Fuel Fee:	1.75% of the volumes injected.
D. Storage Fee	$0.0
E. Withdrawal Commodity Fee:	$0.0 per MMBtu for Intraday withdrawals.
F. Withdrawal Fuel Fee:	N/A.

Delivery Point(s): HPL Meter # 098-7367 located at the interconnect of Operator's pipeline with Operator's Storage Facility.

Note: The Delivery Point is subject to Customer's MDWQ.

Withdrawals and Injections: Withdrawals and injections shall be scheduled from/to Customers Firm Intrastate Transportation Agreement dated July 1, 2007.

Receipt Point(s): HPL Meter # 098-7367 located at the interconnect of Operator's pipeline with Operator's Storage Facility

Nominations: Customer must provide Operator daily nominations no later than 1:30 p.m. CST the day prior to gas Deliveries/Receipts. Flow days Saturday thru Monday shall be nominated on the preceding Friday. Flow dates that occur on NYMEX recognized holidays shall be nominated on the preceding business day. Any intraday nomination change shall be made as soon as practicable if, at Operator's sole discretion, such changes can be made without detriment. Physical deliveries shall commence within 1 hour of receipt of nomination and shall be on an "as available" basis only. Section 9.5 of the Contract regarding scheduling penalties shall not be applicable with the no notice service being provided to Customer.

No Notice Balancing: Operator shall automatically, without notice from Customer, schedule Hourly and or Daily withdrawals and or injections (up to the limits of the MDIQ and MDWQ) to balance Customer's Firm Intrastate Gas Transportation Agreement to maintain such imbalance within the specified tolerances. Customer shall only pay the applicable injection or withdrawal fees on the net

daily quantities after application of the no notice balancing provisions.

Taxes: Customer to pay all applicable taxes (i.e. Ad Valorem) assessed on Customer's working gas. Customer to reimburse Operator for or pay directly to the taxing authority all street rental, gross receipts, gross income, ad valorem and other taxes or charges (except franchise and excess profits taxes and taxes measured by net income which may be levied on Operator) applicable to the gas volumes, revenue or service provided by Operator hereunder.

If the foregoing represents your understanding of our agreement, please so indicate in the space provided below and return two (2) fully executed copies for our records.

Very truly yours,

Kevin M Pollo <+12102132865> : Do you think we will need to buy intraday gas today? If so, how much?

2/15/2021 7:06 AM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : For gas day Monday

2/15/2021 7:07 AM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Paul Vinson <+12108271542> : Waiting for Enterprise assessment of their system

---

2/15/2021 7:09 AM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Ok, thanks.

2/15/2021 7:22 AM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Sorry, I could not hear Brice's update.

2/15/2021 7:22 AM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : *Bruce's update

2/15/2021 7:24 AM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Enterprise did indicate this morning that they â€œmightâ€be able to still get Tres Palacios storage gas to us...if we could buy some there

---

2/15/2021 7:25 AM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Ok, thanks. Any indications on price?

2/15/2021 7:25 AM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : They were still waiting to get their own numbers together by their own 7am mtg

---

2/15/2021 7:26 AM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Weâ€™d have to find some players that might have or be willing to sell there...no pricing info.

2/15/2021 7:26 AM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Also, what did we pay for the DCP and Targa gas that we are likely to not receive (or at least not the full amount)?

2/15/2021 7:28 AM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : DCP price was $155...Targa gas avg was $184

2/15/2021 8:03 AM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Latest update that I have from Jose: On Sommers2 we have electricians and welders working to get the lines thawed and heat trace installed. Plan is to get Sommers2 into startup by noon. Startup time will be 4-5 hours.

2/15/2021 8:05 AM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Liked â€œLatest update that I have from Jose: On Sommers2 we have electricians and welders working to get the lines thawed and heat trace installed. Plan is to get Sommers2 into startup by noon. Startup time will be 4-5 hours.â€

2/15/2021 11:59 AM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Fires put in on AVR CT2

2/15/2021 12:00 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Paul Vinson <+12108271542> : Enterprise may not be able to handle it

Kevin M Pollo <+12102132865> : Shall we have a quick huddle for status?

2/15/2021 12:02 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Paul Vinson <+12108271542> : Yes

2/15/2021 12:03 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Paul Vinson <+12108271542> : Want me to send a webex?

2/15/2021 12:03 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Yes, please

2/15/2021 12:05 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Paul Vinson <+12108271542> : Sent the meeting invitation

2/15/2021 12:58 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : JKS2 looking at prepping boiler for trying to get on gas. About 60 mw. No timeframe just yet

---

2/15/2021 12:59 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Sorry, JKS1

2/15/2021 12:59 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Ok 30 minutes or so on ct6 manpower focus on avr

---

2/15/2021 1:38 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Might need to huddle again. OWS just called RT and said they made significant progress and are putting fires in.

2/15/2021 1:38 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : OWS2

2/15/2021 3:00 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Invite was sent

2/15/2021 4:28 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Either derate Rio for gas or move responsive to Rio! Decided responsive

---

2/15/2021 4:29 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Paul Vinson <+12108271542> : Was that sufficient?

2/15/2021 4:30 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : I like the responsive solution over the derate. Thanks.

2/15/2021 4:32 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Not sure of enough volume the remainder of the the may need to point alittle more Iâ€™ve to Rio from SG. If like last night it will generate into that capacity. Need to know quickly doing trades.

2/15/2021 4:33 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Don't understand. Move the responsive that you think you need. We need to watch and if we are still over-burning, then we may need to adjust EOCs later in the night to address potential penalties.

2/15/2021 4:37 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Is CT6 running on fuel oil?

2/15/2021 4:37 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Yes

2/15/2021 4:37 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Even if I adjust curve the unit probably will dispatch into the generation based off price whatever I put in there for multiple hours! Move responsive it will back down that amount the remainder of the day and ERCOT could deploy responsive for some likely duration.

2/15/2021 4:38 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Only one ct7 having issues tried 4 or 5 times told them stop bring back on gas

---

2/15/2021 4:54 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Sorry I do not know the gas volume for RIO at 740 mw. Current HSL is 840

2/15/2021 4:55 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : About 5200 an hour

2/15/2021 4:57 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Bruce came up with 4000 an hour remainder of day to meet the daily limit. Looks like we still need a de-rate?

2/15/2021 4:57 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : FYI...Dan burns from Enterprise called. They have lost power at their Wilson storage facility

---

2/15/2021 4:58 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Unknown duration or severity.

2/15/2021 4:59 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : He says that they can free flow about 70k possibly for a while. They are used to doing somewhere like 400k there.

2/15/2021 4:59 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Not good news

2/15/2021 4:59 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Ken Skaer <+12105694059> : Emphasized â€œNot good newsâ€

2/15/2021 5:29 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Jennifer Merritt from HPL/Oasis is texting me again.

2/15/2021 5:30 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : They donâ€™t see the volumes coming down...and think that the number has actually gone up.

2/15/2021 5:31 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Her comment: â€œwe need that back on rate now!â€

2/15/2021 5:31 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : 4000/hr is about 570 MW on Rio

2/15/2021 5:32 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Can you verify that Bruce?

2/15/2021 5:34 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : I donâ€™t have a std conversion for that. That would probably be an average burn on 2x1 or a low 3x1 burn

---

2/15/2021 5:35 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : RRS does not go in until 1800. Derate gas restrictions now?

2/15/2021 5:36 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Not something that I can answer...but she sounds serious, anyway.

2/15/2021 5:36 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : The RRS will only get it down to about 710 so that wouldnâ€™t be enough.

2/15/2021 5:36 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : They are not going to backstop us

---

2/15/2021 5:38 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : A Derate to 670 and carrying RRS would get below the rate unless the RRS gets deployed, so a a derate to 600 would likely be the for sure way to get under the supply rate

---

2/15/2021 5:40 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Pressure will fall and derate the unit if not trip on low inlet pressure when to do cut us back. Looks like de-rate only option?

2/15/2021 5:42 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : We can not afford losing the unit for sure, we are going to get a little bit more room on our position due to further load shedding so a derate now seems like the safest choice. Kevin?

2/15/2021 5:49 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : What will be the output of the unit when you take these actions? What are we going to communicate to ERCOT?

2/15/2021 5:53 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : Derate to 600 and 100 mw of RRS should give us desired volume we need once down if volume correct need to be made again RT will adjust derate.

2/15/2021 5:54 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : We have no other options? No other fuel to move to support Rio?

2/15/2021 5:55 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : At 600 mw we can carry 120 RRS

2/15/2021 5:56 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : FYI...HPL - Oasis continuing to hit me. They needed it / wanted it down two hours ago.

2/15/2021 5:57 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : 4 minutes start moving down 100 mw but not enough based off number above

---

2/15/2021 5:57 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : What is our limit of concern? Hourly or daily?

2/15/2021 5:59 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : 4000 hourly remainder of the should hit our gas daily limit. Is that correct?

2/15/2021 5:59 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : It was correct two hours ago.

2/15/2021 6:01 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : We burned about 5600 last two hours so we would need to get under 3800/hr for remainder. That is 540mw

---

2/15/2021 6:02 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Jennifer is now telling me that they are going to put a sale in place that will charge us a $300/mmbtu for any imbalance volume.

2/15/2021 6:02 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : I would like to know what we are communicating to ERCOT.

2/15/2021 6:02 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Can someone run the numbers and tell me what value of power equates to $300/MMBtu?

2/15/2021 6:03 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Would be 7M estimate if we continue at current rate for imbalance

---

2/15/2021 6:03 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : $7M for gas imbalance?

2/15/2021 6:03 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Sorry

2/15/2021 6:04 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce

Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : 1600/hr would be imbalance if we continue as is

---

2/15/2021 6:05 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Somebody please check my valuation of that imbalance

---

2/15/2021 6:05 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : That is MMBtu? If we continue as is, what would be the estimate for cost of the imbalance in dollars?

2/15/2021 6:07 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : 1600/hr for 15 more hours is 24000 mmbtu *$300 = $7.2 million

---

2/15/2021 6:08 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Correct

2/15/2021 6:09 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Does that account for the latest change on RRS?

2/15/2021 6:10 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Zach and Rick Maldonado are extremely concerned about the health of the grid right now? Can we work with Jennifer to run now and derate after peak hour passes at 10pm or so?

2/15/2021 6:10 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : Assuming RRS does not get deployed, unit would currently operate at 5100/hr mmbtu, so total imbalance would be 16500 MMBtu * $300 = 4.95M

2/15/2021 6:10 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : They want us on rate and do not have the gas to cover us

---

2/15/2021 6:11 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : Does that mean that our limit then is hourly?

2/15/2021 6:22 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : I understand hourly control will meet our daily target. So we are going to derate to 600 mw carry 120 mw responsive remainder of gas day due to fuel restrictions?

2/15/2021 6:22 PM +12102132865 Kevin M Pollo;+12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Kevin M Pollo <+12102132865> : What are we planning to communicate to ERCOT?

2/15/2021 6:58 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : AVR CT1 hit line. Rio derated and should be coming down to about 550 or less in minutes

---

2/15/2021 7:12 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Mike Hale <+12104858161> : OWS2 hit line

2/15/2021 9:05 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Keith Albers <+12102880231> : So thanks Kevin Mike Paul and Bruce with helping us come to a solution for Rio tonight! When yaâ€™ll get up in am please look at number for Rio

if we increase our capacity please let me know! Currently have not visibility to their numbers definite short fall from operations standpoint! Sorry and goodnight

---

2/15/2021 9:06 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Bruce Bordovsky <+12102752394> : Thanks for the help

2/15/2021 9:15 PM +12102132865 Kevin M Pollo (owner);+12102752394 Bruce Bordovsky;+12102880231 Keith Albers;+12104858161 Mike Hale;+12105694059 Ken Skaer;+12108271542 Paul Vinson;12102132865

Paul Vinson <+12108271542> : Thanks Keith. Iâ€™ll send you the Rio burn numbers we have so far tonight

Paul S. Barham
Chief Grid Optimization & Resiliency Officer (CGORO)

May 12, 2021

Mr. Reed Williams – Chairman
City of San Antonio
Committee on Emergency Preparedness (CEP)

RE: CoSA CEP RFI #12 – Power Produced/Received Hourly

Dear CEP Chairman Williams,

In response to your request for information regarding **how much power was produced by each generation unit or received from each purchased power source on an hourly basis for each day from February 9 through February 19**, we have provided the following document.

> **RFI 12 – Power Produced/Received Hourly** - A spreadsheet that shows the megawatts (MW) produced by hour at each generation unit owned by CPS Energy or received from each purchased power source from February 9 – February 19. The amount of power produced by these units can be used to support our customers and the ERCOT grid. Although these units have a specific maximum generation capacity, the output levels of these generation resources are controlled in conjunction with ERCOT. ERCOT sends direction, called dispatch signals, to the generation resources based on the grid conditions in real time including the actual load demand and the state of the transmission grid. These dispatch signals are essentially instructions for the generation resource to provide more or less output over the next five minutes and are based on the price for the generation resource that is included with the ERCOT dispatch signals. At certain times, the ERCOT dispatch signal may fall below a unit's maximum generation capacity. This condition may occur when market prices are low as this reduced generation capacity is the best price match to meet ERCOT load obligations. This situation could also occur

CPSE Response in Opp to ET MSJ
Exhibit A-161
MDL-2022-CI-02879
exhibitsticker.com

when the remaining capacity is dedicated to ancillary services. We often use a portion of our generation capacity to provide ancillary services, most frequently to provide all or a portion of the ancillary services obligation that is assigned to us as a market participant serving load within the ERCOT market. CPS Energy is assigned an hourly quantity of each ancillary service based upon the percentage of CPS Energy load compared to total ERCOT load. CPS Energy can provide all or a portion of these ancillary services from our generating units. When a generating unit is providing ancillary services, that capacity is held in reserve until ERCOT issues an instruction or a signal to the generating unit to release all or a portion of the ancillary service capacity to allow the unit to produce additional energy.

Conversely, all of our purchased power agreements are renewable resources and their output is managed in a different manner. Due to the intermittent nature of wind and solar generation primarily associated with weather conditions at the resource site, actual generation may not be the same as the maximum generation capacity of the resource. If there are no limitations on production output resulting from outages or other restrictions on the electric transmission system, wind and solar resources are allowed by ERCOT to produce as much power as the real time environmental conditions (such as the amount of wind and sunshine) allow.

Please let us know if you have any questions or require additional information.

Sincerely,

Paul

Generation Hourly Production

Generation Fleet Hourly Production

Explanation of values: This table shows the hourly generation from each of the resources that CPS Energy owns. The capacity listed is the winter season net capacity or the maximum amount of power that can be produced to support our customers and the grid. Although these units have a specific generation capacity, the real time output levels of these resources are controlled in conjunction with ERCOT. ERCOT sends direction, called dispatch signals, to the generation resources based on the grid conditions in real time including the actual load demand and the state of the transmission grid. These dispatch signals are essentially instructions for the generation resource to provide more or less output over the next five minutes and are based on the price for the generation resource that is included with the ERCOT dispatch signals. At certain times, the ERCOT dispatch signal may fall below a unit's maximum generation capacity. This condition may occur when market prices are low as this reduced generation capacity is the best price match to meet ERCOT load obligations. Units with 0 MW of generation were off line for reasons such as planned or unplanned maintenance outages, or they were not needed at that time to meet obligations.

For example: In the first hour of February 9, A VON ROSENBERG 1 was off line for maintenance and J K SPRUCE 1 generated 537.6 MW.

Generation Hourly Production

Generation Fleet Hourly Production

Explanation of values: This table shows the hourly generation from each of the resources that CPS Energy owns. The capacity listed is the winter season net capacity or the maximum amount of power that can be produced to support our customers and the grid. Although these units have a specific generation capacity, the real time output levels of these resources are controlled in conjunction with ERCOT. ERCOT sends direction, called dispatch signals, to the generation resources based on the grid conditions in real time including the actual load demand and the state of the transmission grid. These dispatch signals are essentially instructions for the generation resource to provide more or less output over the next five minutes and are based on the price for the generation resource that is included with the ERCOT dispatch signals. At certain times, the ERCOT dispatch signal may fall below a unit's maximum generation capacity. This condition may occur when market prices are low as this reduced generation capacity is the best price match to meet ERCOT load obligations. Units with 0 MW of generation were off line for reasons such as planned or unplanned maintenance outages, or they were not needed at that time to meet obligations.

For example: In the first hour of February 9, A VON ROSENBERG 1 was off line for maintenance and J K SPRUCE 1 generated 537.6 MW.

Generation Hourly Production

Generation Fleet Hourly Production

Explanation of values: This table shows the hourly generation from each of the resources that CPS Energy owns. The capacity listed is the winter season net capacity or the maximum amount of power that can be produced to support our customers and the grid. Although these units have a specific generation capacity, the real time output levels of these resources are controlled in conjunction with ERCOT. ERCOT sends direction, called dispatch signals, to the generation resources based on the grid conditions in real time including the actual load demand and the state of the transmission grid. These dispatch signals are essentially instructions for the generation resource to provide more or less output over the next five minutes and are based on the price for the generation resource that is included with the ERCOT dispatch signals. At certain times, the ERCOT dispatch signal may fall below a unit's maximum generation capacity. This condition may occur when market prices are low as this reduced generation capacity is the best price match to meet ERCOT load obligations. Units with 0 MW of generation were off line for reasons such as planned or unplanned maintenance outages, or they were not needed at that time to meet obligations.

For example: In the first hour of February 9, A VON ROSENBERG 1 was off line for maintenance and J K SPRUCE 1 generated 537.6 MW.

Generation Hourly Production

Generation Fleet Hourly Production

Explanation of values: This table shows the hourly generation from each of the resources that CPS Energy owns. The capacity listed is the winter season net capacity or the maximum amount of power that can be produced to support our customers and the grid. Although these units have a specific generation capacity, the real time output levels of these resources are controlled in conjunction with ERCOT. ERCOT sends direction, called dispatch signals, to the generation resources based on the grid conditions in real time including the actual load demand and the state of the transmission grid. These dispatch signals are essentially instructions for the generation resource to provide more or less output over the next five minutes and are based on the price for the generation resource that is included with the ERCOT dispatch signals. At certain times, the ERCOT dispatch signal may fall below a unit's maximum generation capacity. This condition may occur when market prices are low as this reduced generation capacity is the best price match to meet ERCOT load obligations. Units with 0 MW of generation were off line for reasons such as planned or unplanned maintenance outages, or they were not needed at that time to meet obligations.

For example: In the first hour of February 9, A VON ROSENBERG 1 was off line for maintenance and J K SPRUCE 1 generated 537.6 MW.

Generation Hourly Production

Generation Fleet Hourly Production

Explanation of values: This table shows the hourly generation from each of the resources that CPS Energy owns. The capacity listed is the winter season net capacity or the maximum amount of power that can be produced to support our customers and the grid. Although these units have a specific generation capacity, the real time output levels of these resources are controlled in conjunction with ERCOT. ERCOT sends direction, called dispatch signals, to the generation resources based on the grid conditions in real time including the actual load demand and the state of the transmission grid. These dispatch signals are essentially instructions for the generation resource to provide more or less output over the next five minutes and are based on the price for the generation resource that is included with the ERCOT dispatch signals. At certain times, the ERCOT dispatch signal may fall below a unit's maximum generation capacity. This condition may occur when market prices are low as this reduced generation capacity is the best price match to meet ERCOT load obligations. Units with 0 MW of generation were off line for reasons such as planned or unplanned maintenance outages, or they were not needed at that time to meet obligations.

For example: In the first hour of February 9, A VON ROSENBERG 1 was off line for maintenance and J K SPRUCE 1 generated 537.6 MW.

	CAPACITY	549 MW	217 MW	230 MW	412 MW	48 MW	48 MW	48 MW	47 MW	560 MW	785 MW	420 MW	410 MW	46 MW	46 MW	46 MW	46 MW	897 MW	541 MW	536 MW	10 MW	5 MW	1 MW

Generation Hourly Production

Generation Fleet Hourly Production

Explanation of values: This table shows the hourly generation from each of the resources that CPS Energy owns. The capacity listed is the winter season net capacity or the maximum amount of power that can be produced to support our customers and the grid. Although these units have a specific generation capacity, the real time output levels of these resources are controlled in conjunction with ERCOT. ERCOT sends direction, called dispatch signals, to the generation resources based on the grid conditions in real time including the actual load demand and the state of the transmission grid. These dispatch signals are essentially instructions for the generation resource to provide more or less output over the next five minutes and are based on the price for the generation resource that is included with the ERCOT dispatch signals. At certain times, the ERCOT dispatch signal may fall below a unit's maximum generation capacity. This condition may occur when market prices are low as this reduced generation capacity is the best price match to meet ERCOT load obligations. Units with 0 MW of generation were off line for reasons such as planned or unplanned maintenance outages, or they were not needed at that time to meet obligations.

For example: In the first hour of February 9, A VON ROSENBERG 1 was off line for maintenance and J K SPRUCE 1 generated 537.6 MW.

Purchased Power Sources Hourly Production

Explanation of the values: This table shows the hourly generation from each of the resources that CPS Energy has contracted with through a Purchased Power Agreement. The primary use of the output from these resources is to support our customers. The capacity listed is the maximum contracted quantity we expect from each resource. Due to the intermittent nature of wind and solar generation primarily associated with weather conditions at the resource site, actual generation may not be the same as the maximum generation capacity of the resource.

For example: Cedro Hill 1 is a wind generation resource with a capacity of 75 MW. In the first hour of February 9, the resource produced 29.76 MW, and CPS Energy was contracted to take this generation.

	TYPE	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Landfill	Solar	Solar	Landfill	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Bilateral

Purchased Power Hrly Production

Purchased Power Sources Hourly Production

Explanation of the values: This table shows the hourly generation from each of the resources that CPS Energy has contracted with through a Purchased Power Agreement. The primary use of the output from these resources is to support our customers. The capacity listed is the maximum contracted quantity we expect from each resource. Due to the intermittent nature of wind and solar generation primarily associated with weather conditions at the resource site, actual generation may not be the same as the maximum generation capacity of the resource.

For example: Cedro Hill 1 is a wind generation resource with a capacity of 75 MW. In the first hour of February 9, the resource produced 29.76 MW, and CPS Energy was contracted to take this generation.

	TYPE	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Landfill	Solar	Solar	Landfill	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Bilateral

Purchased Power Sources Hourly Production

Explanation of the values: This table shows the hourly generation from each of the resources that CPS Energy has contracted with through a Purchased Power Agreement. The primary use of the output from these resources is to support our customers. The capacity listed is the maximum contracted quantity we expect from each resource. Due to the intermittent nature of wind and solar generation primarily associated with weather conditions at the resource site, actual generation may not be the same as the maximum generation capacity of the resource.

For example: Cedro Hill 1 is a wind generation resource with a capacity of 75 MW. In the first hour of February 9, the resource produced 29.76 MW, and CPS Energy was contracted to take this generation.

	TYPE	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Landfill	Solar	Solar	Landfill	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Bilateral

CPSE-MDL_000008790

Purchased Power Sources Hourly Production

Explanation of the values: This table shows the hourly generation from each of the resources that CPS Energy has contracted with through a Purchased Power Agreement. The primary use of the output from these resources is to support our customers. The capacity listed is the maximum contracted quantity we expect from each resource. Due to the intermittent nature of wind and solar generation primarily associated with weather conditions at the resource site, actual generation may not be the same as the maximum generation capacity of the resource.

For example: Cedro Hill 1 is a wind generation resource with a capacity of 75 MW. In the first hour of February 9, the resource produced 29.76 MW, and CPS Energy was contracted to take this generation.

	TYPE	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Landfill	Solar	Solar	Landfill	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Bilateral

Purchased Power Sources Hourly Production

Explanation of the values: This table shows the hourly generation from each of the resources that CPS Energy has contracted with through a Purchased Power Agreement. The primary use of the output from these resources is to support our customers. The capacity listed is the maximum contracted quantity we expect from each resource. Due to the intermittent nature of wind and solar generation primarily associated with weather conditions at the resource site, actual generation may not be the same as the maximum generation capacity of the resource.

For example: Cedro Hill 1 is a wind generation resource with a capacity of 75 MW. In the first hour of February 9, the resource produced 29.76 MW, and CPS Energy was contracted to take this generation.

	TYPE	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Landfill	Solar	Solar	Landfill	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Bilateral

Purchased Power Sources Hourly Production

Explanation of the values: This table shows the hourly generation from each of the resources that CPS Energy has contracted with through a Purchased Power Agreement. The primary use of the output from these resources is to support our customers. The capacity listed is the maximum contracted quantity we expect from each resource. Due to the intermittent nature of wind and solar generation primarily associated with weather conditions at the resource site, actual generation may not be the same as the maximum generation capacity of the resource.

For example: Cedro Hill 1 is a wind generation resource with a capacity of 75 MW. In the first hour of February 9, the resource produced 29.76 MW, and CPS Energy was contracted to take this generation.

	TYPE	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Wind	Landfill	Solar	Solar	Landfill	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Solar	Bilateral

CPS - Ken Skaer	OXY - Ryan Hinze	02/12/2021 08:37:40	i can buy some more waha hub from you for gd waha + .70 if you want
OXY - Ryan Hinze	CPS - Ken Skaer	02/12/2021 08:37:41	hey, gm sir
OXY - Ryan Hinze	CPS - Ken Skaer	02/12/2021 08:38:07	can do another 9,000 at gd +.70
CPS - Ken Skaer	OXY - Ryan Hinze	02/12/2021 08:38:26	done, thanks
OXY - Ryan Hinze	CPS - Ken Skaer	02/12/2021 08:38:30	done..ty
CPS - Ken Skaer	OXY - Ryan Hinze	02/12/2021 08:41:18	please keep us in mind if you get some incremental volumes
OXY - Ryan Hinze	CPS - Ken Skaer	02/12/2021 08:42:30	will do
CPS - Ken Skaer	OXY - Ryan Hinze	02/16/2021 08:11:02	Good morning!Good news: it's going to be 48 tomorrow!Bad news: I'm still without electricity Are you a seller?
OXY - Ryan Hinze	CPS - Ken Skaer	02/16/2021 08:11:58	hey, gm...we have nothing here
CPS - Ken Skaer	OXY - Ryan Hinze	02/22/2021 16:15:33	Well, we almost survived Monday. Would you consider giving us a March baseload offer for our bid day tomorrow? Offers are due by 11am.
OXY - Ryan Hinze	CPS - Ken Skaer	02/22/2021 16:15:33	Away
OXY - Ryan Hinze	CPS - Ken Skaer	02/22/2021 16:31:57	hey Ken...prod still up and down here so not sure we can commit to an offer right now
OXY - Ryan Hinze	CPS - Ken Skaer	02/22/2021 16:32:10	may have some gas on the day and will touch base for sure
CPS - Ken Skaer	OXY - Ryan Hinze	02/22/2021 16:32:59	sounds good
OXY - Ryan Hinze	CPS - Ken Skaer	03/16/2021 12:18:18	Away
CPS - Ken Skaer	OXY - Ryan Hinze	03/16/2021 12:18:18	Hi Ryan.
OXY - Ryan Hinze	CPS - Ken Skaer	03/16/2021 13:10:38	hey sir
CPS - Ken Skaer	OXY - Ryan Hinze	03/16/2021 13:12:26	hi there
CPS - Ken Skaer	OXY - Ryan Hinze	03/16/2021 13:13:01	our management folks asked if they could talk to the oxy mgmt folks about feb and the storm and such.
CPS - Ken Skaer	OXY - Ryan Hinze	03/16/2021 13:13:23	is there someone i should refer them to or do you prefer they talk to you
OXY - Ryan Hinze	CPS - Ken Skaer	03/16/2021 13:13:44	did you get a FM letter from us?
CPS - Ken Skaer	OXY - Ryan Hinze	03/16/2021 13:14:17	i think their concerns are beyond that
CPS - Ken Skaer	OXY - Ryan Hinze	03/16/2021 13:15:20	they just want to chat.
OXY - Ryan Hinze	CPS - Ken Skaer	03/16/2021 13:15:28	gotchaShawn McGovern is VP of Gas Marketingcell: 713-206-4691shawn_mcgovern@oxy.com
CPS - Ken Skaer	OXY - Ryan Hinze	03/16/2021 13:15:37	cool, thanks
CPS - Ken Skaer	OXY - Ryan Hinze	03/17/2021 16:03:46	Hi Ryan. Just out of curiosity, is this still your address for notices: PO Box 27570, Houston, TX 77227-7570
OXY - Ryan Hinze	CPS - Ken Skaer	03/17/2021 16:03:46	Away
OXY - Ryan Hinze	CPS - Ken Skaer	03/17/2021 17:08:03	I believe sojust include Victoria_Versen@oxy.com (contract administration)
OXY - Ryan Hinze	CPS - Ken Skaer	03/17/2021 17:08:17	fax is usually 713-215-7616
OXY - Ryan Hinze	CPS - Ken Skaer	03/17/2021 17:08:42	address also used is..5 Greenway Plaza, Suite 110Houston, TX 77046
CPS - Ken Skaer	OXY - Ryan Hinze	03/17/2021 17:08:52	thanks Ryan
OXY - Ryan Hinze	CPS - Ken Skaer	03/17/2021 17:08:58	sure thing

THE VIDEOGRAPHER:

Terry Lindemann

A The priority was on delivering this lifesaving fuel to our customers, and we were not -- I was not involved in, you know, authorizing a price or anything like that because it was focused on buying the fuel necessary.

Q Did -- at this time, February 15th, 2021, when this message was sent by Mr. Pollo to you and others, did you believe these prices were excessive or exorbitant?

A Me, Frank, personally, absolutely.

Q At this time, February 15th, 2021?

A I was operating against a frame of reference of $2.50, $3. These numbers were stunning.

Q Did you communicate your concern about the prices being stunning --

A Stunning.

Q -- to -- to this group or another?

A I don't remember. I mean, I would say that -- that the organization was in reaction mode, and there were lots of conversations happening all over the place on the things that were necessary. Buying gas and electric power wasn't the only thing that we had to do.

Q Sure.

A We were doing hundreds of other things involving the whole organization. To the extent that this came up -- once again, this was not my area of

would pay for the natural gas it purchased; that's correct?

A I don't -- I'm not aware of any of -- as you described, I'm not aware of that.

Q Okay. Does the same apply for after February 15th, 2021?

MS. VALKENAAR: Objection, form.

A There -- well, there was obviously a point where we said, "Hey, we need to enter a good faith dispute under Section 7.4." I don't remember when that happened, and I don't remember at what point lawyers got involved. So I'm having a hard time describing, like, when exactly it happened.

But the thing that I think you're asking is whether it happened before the storm was over or after, and it was -- I have no recollection of it being before. My recollection is any of those types of conversations happened after -- after the storm.

Q (By Mr. DeBauche) That's a -- you got -- you -- you asked my question better than I did, so thank you.

A I think that means I didn't do it right, but that's -- we'll just keep that between us.

Q Yeah. Sometimes I ask bad questions, but you knew -- you knew what I wanted. So I -- I appreciate that.

A Did you say whether Energy Transfer was justified in...?

Q (By Mr. Woods) Yeah.

Was Energy Transfer justified in being concerned that CPS would not pay its invoices in full?

MS. VALKENAAR: Objection, form.

A I don't know how to answer that.

Q (By Mr. Woods) Well, if -- well, let me -- let me just ask it again, and you -- you tell me what -- what part of my question that you're not understanding.

Was Energy Transfer justified in being concerned that CPS Energy would not pay its invoices in full?

MS. VALKENAAR: Objection, form.

A I think you just said the same thing you did last time, and I still --

Q (By Mr. Woods) Yeah.

A -- don't understand.

Q Well, I guess I'm asking -- what is it about my question that you don't understand?

A I'm not sure how I'm supposed to know what Energy Transfer was justified in thinking or not thinking.

Q Well, you would agree with me, though, that CPS Energy did not pay the invoiced amount for natural

gas in full, right? That's -- I think that's established, right?

A We paid for the gas. We -- only Energy Transfer knows what Energy Transfer's going to charge. And if it was a million dollars a megawatt of MMBtu, then -- I -- I -- I guess my point is I don't know how to answer that question.

We -- CPS Energy paid an amount for the gas that reserved our rights and allowed us to enter into the dispute under 7.4 of the NAESB, and we're working out the differences here.

Q Do you know what a request for adequate assurance is?

A Do I know -- no.

Q But just to be clear, you signed a verification attached to this petition stating that you had personal knowledge of all the facts, right?

A Yeah.

Q And you state here that Energy Transfer made a disingenuous demand for adequate assurance from CPS Energy, right?

A Right.

MS. VALKENAAR: Objection, form.

Q (By Mr. Woods) But you also don't even know what adequate assurance is, right?

and tell me if it was from your lawyers if it was from your lawyers.

What is the factual basis that CPS Energy was at the mercy of Defendants?

A Well, looking at the whole thing -- I know that -- that -- that's your specific question. I think -- I think you're focused on the mercy of the defendants.

But the -- the answer has to do with the fact that CPS Energy has an obligation to serve our customers. You know, there were -- there were people dying, and we had no choice. So with -- with -- with no choice but to supply -- to purchase gas and to produce power with all of our effort, you know, all of our focus, I -- I -- I think it's fair to characterize us as buyers as being at the mercy of anyone that could supply to us at that time.

Q Let's look at Paragraph 29 on Page 9. You can read that, and just let me know when you're ready.

A (Reviewing document.)

MS. VALKENAAR: I'm sorry. What paragraph?

MR. WOODS: 29.

MS. VALKENAAR: Thanks.

REPORTER'S CERTIFICATION

ORAL AND VIDEOTAPED DEPOSITION OF FRANK ALMARAZ

AUGUST 19, 2022

I, Marcy Clark, Certified Shorthand Reporter in and for the State of Texas, hereby certify to the following:

That the witness, FRANK ALMARAZ, was duly sworn by the officer and that the transcript of the oral deposition is a true record of the testimony given by the witness;

That the deposition transcript was submitted on September 1, 2022 to the witness or to the

attorney for the witness for examination, signature and return to Hanna & Hanna, Inc. by September 22, 2022.

That the amount of time used by each party at the deposition is as follows:

By Mr. DeBauche - 4 hours, 24 minutes;

By Mr. Woods - 1 hour, 13 minutes;

That pursuant to information given to the deposition officer at the time said testimony was taken, the following includes counsel for all parties of record:

ON BEHALF OF PLAINTIFF, ENTERPRISE PRODUCTS OPERATING, LLC:

Thomas "Tal" DeBauche, Esq.
John A. Garza, Esq.
DOBROWSKI STAFFORD LLP
4601 Washington Avenue
Suite 300
Houston, Texas 77007
713.659.2900
tdebauche@doblaw.com
jgarza@doblaw.com

ON BEHALF OF DEFENDANT, CITY OF SAN ANTONIO ACTING BY AND THROUGH THE CITY PUBLIC SERVICE BOARD (CPS ENERGY), AND FRANK ALMARAZ:

Lauren A. Valkenaar, Esq.
Dylan Fedderman, Esq.
Megan Sturm, Esq.
CHASNOFF MUNGIA VALKENAAR PEPPING & STRIBLING, LLP
1020 N.E. Loop 410
Suite 150
San Antonio, Texas 78209
210.469.4155

CERTIFIED STENOGRAPHIC COURT REPORTER:

Ms. Pat English-Arredondo
CSR (TX), RMR, CRR, CLR

that's one thing. 11:23:14

I mean, they could have actually maybe 11:23:15
bought more gas and put it into storage if they 11:23:18
hadn't -- if they didn't top it off. You know, it's the 11:23:20
typical -- you go around and ask suppliers, you know, 11:23:28
what they have available. 11:23:30

Q. (By Ms. Ditty) And did CPS do that, go around 11:23:36
and ask suppliers what they had available on February 8? 11:23:38

MR. DOWNING: Object to form. 11:23:42

A. Oh, I'm sure they did for their normal course, 11:23:43
yeah. If they would have bought first of the month 11:23:46
index gas, they wouldn't have had to do that, would 11:23:49
they? They would have firm gas already. 11:23:52

Q. (By Ms. Ditty) Is it your opinion that CPS 11:23:56
Energy should buy? I think you're referring to baseload 11:24:00
gas. Am I right? 11:24:05

A. Say again. 11:24:06

Q. Are you referring to baseload gas? 11:24:08

A. Yes, ma'am. 11:24:10

Q. So is it your opinion that CPS Energy should 11:24:11
meet its full demand requirements through baseload gas? 11:24:14

A. Absolutely not. 11:24:16

Q. So how much baseload gas should CPS have 11:24:16
procured for the month of February? 11:24:19

A. It depends. The way you do that assessment is 11:24:20

you take a look at historical winters or months and things like that, take a look at the breakdown between generation and distribution load, how much volatility is around that and -- you know, you can say averages, whatever you want to do. 11:24:26 11:24:31 11:24:33 11:24:37 11:24:40

There are numerous ways you can do that and try to secure a large portion of what, let's say, that average is at a first-of-the-month price, in my opinion. Perhaps 90 percent of that average. If you want to be a little more -- 80 percent, if you want to be a little more conservative. 11:24:41 11:24:43 11:24:48 11:24:51 11:24:54 11:24:56

But something like that. A different program. I certainly wouldn't put 80 percent in the swing market. 11:24:57 11:24:59 11:25:03

Q. And at what point do the decisions about how much baseload gas to purchase have to be made? 11:25:03 11:25:06

A. Before the beginning of the month. 11:25:09

Q. January 25 for February 2021? 11:25:13

A. Bid week. 11:25:17

Q. During bid week. 11:25:18

And so what information was available during bid week in January 2021 that, in your opinion, should have indicated to CPS Energy the need to buy more baseload gas than historically due for February? 11:25:19 11:25:21 11:25:25 11:25:30

MR. DOWNING: Object to form. 11:25:36

A. Can you say that again? I'm sorry. You caught me for a loop there. 13:33:21 13:33:23

Q. (By Ms. Ditty) How would the review of CPS Energy's natural gas purchasing strategy help the fact-finder in this case determine whether the prices Energy Transfer charged were excessive? 13:33:23 13:33:26 13:33:28 13:33:31

MR. DOWNING: Object to form. 13:33:34

A. Regarding the individual prices, I think that's a separate issue. This is -- has more to say about the amount of risk that CPS inherently keeps in their book with their contracting strategy. 13:33:36 13:33:41 13:33:45 13:33:53

So it goes to the fact that, but for this, a lot of that daily gas wouldn't have been purchased. So I think that's how it's helpful. 13:33:57 13:34:01 13:34:06

Q. (By Ms. Ditty) But these specific opinions about their risk strategy don't go toward the determination of whether a price is excessive or not. Right? That's separate? 13:34:08 13:34:09 13:34:12 13:34:16

A. That's separate. Correct. 13:34:17

Q. Let's talk a little bit more about some of your risk management opinions. So one of the areas of analysis that you list below here in Paragraph 84 is "Analysis of historic baseload purchases versus swing gas purchases." Right? 13:34:26 13:34:27 13:34:29 13:34:32 13:34:38

A. Yes, ma'am. 13:34:39

to offload that gas, it would be offloading it into a low demand market. Right? 13:52:09 13:52:13

MR. DOWNING: Object to form. 13:52:15

A. Perhaps. It depends if they can move that gas somewhere else, where it's got higher demand. It would also depend -- it wouldn't even matter if it a low demand market, for instance, if they had bought the baseload first-of-the-month gas at a cheap price, call it $2. Right? 13:52:17 13:52:20 13:52:25 13:52:28 13:52:31 13:52:34

And throughout the month, even though the demand is low, the market has just moved up to 2.10. I mean, they could still make money on it. Right? 13:52:35 13:52:37 13:52:41

Q. (By Ms. Ditty) And is CPS Energy in the business of making money? 13:52:43 13:52:44

MR. DOWNING: Object to form. 13:52:47

A. CPS Energy is concerned about -- I mean, the first page of their risk policies talk about price risk. So are they speculators? No. 13:52:49 13:52:54 13:53:00

Q. (By Ms. Ditty) Let's turn to Paragraph 91. Sorry. One more follow-up. 13:53:27 13:53:40

If CPS Energy had purchased more baseload gas in January of 2021, there is no guarantee that that gas would have arrived. Correct? 13:53:42 13:53:46 13:53:49

MR. DOWNING: Object to form. 13:53:52

A. I can only speak to the gas that Energy 13:53:53

Transfer provided them, and I don't think they force-majeured on anything. I think they delivered all of them. Everything. 13:54:02 13:54:05 13:54:07

Q. (By Ms. Ditty) So setting aside Energy Transfer specific, if CPS Energy had purchased more baseload gas in January 2021, would it have been guaranteed to flow during Winter Storm Uri? 13:54:08 13:54:12 13:54:15 13:54:19

A. Of course not. But neither would daily gas. 13:54:21

Q. In putting together your opinions about baseload gas, did you investigate the extent to which baseload gas was cut or reduced during Uri? 13:54:25 13:54:27 13:54:30

A. I've read a lot of different reports on that, the University of Texas study. There are numerous ones out there dealing with cuts and things like that. They were significant. There is no doubt. 13:54:34 13:54:37 13:54:41 13:54:49

Q. Do you have a sense of whether it was more likely for baseload gas to get cut versus gas bought on the spot market? 13:54:50 13:54:52 13:54:57

A. Well, if they are both firm, on firm transport, probably not. 13:54:58 13:55:00

Q. But did you investigate whether there was a greater likelihood of baseload getting cut as opposed to spot market gas getting cut during Uri? 13:55:03 13:55:05 13:55:12

A. No, but I would say that more than likely the baseload is going to flow first, especially on its firm, 13:55:12 13:55:15

you're trying to go with here. 13:56:51

Q. (By Ms. Ditty) Well, my question is, there is no way to guarantee through baseload contracts that you would not have hd to purchase gas on the spot market during Winter Storm Uri. Correct? 13:56:52 13:56:53 13:56:57 13:57:00

A. Well, I agree with that. 13:57:01

Q. And this case is about price, not volume. Correct? 13:57:05 13:57:08

MR. DOWNING: Object to form. 13:57:12

A. It's about dollars. Right? So it's volume times price. Notional. 13:57:13 13:57:18

Q. (By Ms. Ditty) CPS Energy is challenging the prices that Energy Transfer charged. Correct? 13:57:20 13:57:22

A. Right. But the way they are doing that is the invoice and the invoice is a calculation of notional. 13:57:24 13:57:27

Q. I think you're already flipped to Paragraph 91. That's where I want to go next. 13:57:41 13:57:43

A. Okay. 13:57:45

Q. This is your opinion about CPS Energy's inter-month hedging strategy. Right? 13:57:46 13:57:49

A. Yes. 13:57:52

Q. And your opinion is that it's intra-month hedging strategy was inadequate. Is that correct? 13:57:54 13:57:57

A. Yes. 13:58:01

Q. Is your opinion limited to CPS Energy's 13:58:02

into account things like withdrawal limits and injection limits. Correct? 15:27:51 15:27:55

MR. DOWNING: Object to form. 15:27:57

A. You're talking about storage? 15:27:58

Q. (By Ms. Ditty) Yes. 15:28:00

A. When I was talking about alternatives, I was talking about alternative fuels a couple of minutes ago, so that's why I'm confused. 15:28:00 15:28:02 15:28:05

Q. I'm confused about, then, how storage is relevant to the fact-finders, the valuation of whether the prices Energy Transfer charged were excessive. How is storage relevant to that? 15:28:07 15:28:09 15:28:13 15:28:17

A. Well, if you've got gas sitting in the ground, right, and you're pulling it out at a cheap price, that's less gas that they had to buy from Energy Transfer. 15:28:19 15:28:22 15:28:25 15:28:27

Q. And any assessment of that would need to take into consideration withdrawal limits. Correct? 15:28:27 15:28:30

A. Absolutely. 15:28:33

Q. And transportation limits to move that gas out of storage. Right? 15:28:36 15:28:40

A. Sure. 15:28:40

Q. So, again, your opinion about storage is related to the amount of volume that CPS would need to buy from the spot market, not about the excessiveness of 15:28:50 15:28:53 15:28:57

the price. Correct? 15:29:01

MR. DOWNING: Object to form. 15:29:02

A. I think that's -- I think that's a decent way of saying it, yes. 15:29:03 15:29:07

Q. (By Ms. Ditty) So I have the same question about what we were discussing with hedging. So how would your opinion with respect to CPS Energy's inter-month hedging strategy help the fact-finder to determine whether the prices Energy Transfer charged were excessive? 15:29:28 15:29:30 15:29:32 15:29:39 15:29:41 15:29:44

MR. DOWNING: Object to form. 15:29:45

A. The absolute price, if they were just looking at the price of the transaction to the fact-finder to say if it's excessive or not, it wouldn't. 15:29:48 15:29:54 15:29:58

What it does do is -- what it does do is -- I don't think if CPS would have hedged a large amount of that daily swing gas we would even be sitting here today, frankly. 15:30:05 15:30:09 15:30:14 15:30:17

Q. (By Ms. Ditty) Do you understand that whether or not a price is unconscionable or not is evaluated based on the circumstances at the time of contracting? 15:30:22 15:30:24 15:30:27

MR. DOWNING: Object to form. 15:30:32

A. That seems like a legal interpretation, so I'm not a lawyer so... 15:30:33 15:30:37

Q. (By Ms. Ditty) How would CPS Energy's hedging 15:30:40

HIGHLY CONFIDENTIAL
REPORTER'S CERTIFICATION TO THE
ORAL and VIDEOTAPED DEPOSITION OF
MICHAEL DE LAVAL
JANUARY 10, 2024

****

I, Pat English-Arredondo, CSR, RMR, CRR, Certified Shorthand Reporter in and for the State of Texas, hereby certify to the following:

that the witness, MICHAEL DE LAVAL, was duly sworn by the officer and that the transcript of the oral deposition is a true record of the testimony given by the witness;

That the deposition transcript was submitted on January 22, 2024 to the attorney, MR. CASEY DOWNING, to forward to MICHAEL DE LAVAL, for examination and return to PLANET DEPOS by February 11, 2024;

that pursuant to information given to the deposition officer at the time said testimony was taken, the following includes counsel for all parties of record and the amount of time used by each party at the deposition:

Lauren Ditty - 5 Hours, 35 Minutes

I further certify that I am neither counsel for, related to, nor employed by any of the parties or attorneys in the action in which this proceeding was taken, and further that I am not financially or otherwise interested in the outcome of the action.

Further certification requirements pursuant to Rule 203 of TRCP will be certified to after they have occurred.

Certified to by me this 17th day of January, 2024.

FURTHER CERTIFICATION UNDER RULE 203 TRCP

The original deposition of MICHAEL DE LAVAL was/was not returned to the deposition officer on or before February 9, 2024. If returned after the stipulated date, the original deposition was returned on _____;

If returned, the attached "Changes and Corrections" page contains any changes and the reasons therefor;

If returned, the original deposition was delivered to MS. LAUREN DITTY, Custodial Attorney;

That $ 3,595.90 is the deposition officer's charges to MS. LAUREN DITTY, attorney for DEFENDANT/COUNTER-PLAINTIFF CPS ENERGY, for preparing the original deposition transcript and any copies of exhibits;

That the deposition was delivered in accordance with Rule 203.3, and that a copy of this certificate was served on all parties shown herein and filed with the Clerk.

Certified to by me this 17th day of January, 2024.

Q. And so is it okay with you is -- if I refer to it as Winter Storm Yuri or the February 2021 winter storm as opposed to CAO throughout the course of this deposition?

A. Yes, but I would appreciate that we do not use Yuri.

Q. What makes it different?

A. That -- that is -- because technically that is a media term for the events rather than a technical or scientific term for the events.

Q. Understood. So just for the -- keep things simple, I'll refer to it as a CAO and the February 2021 winter storm; does that sound good?

A. That sounds good.

Q. Okay. Great. So the first major category of opinion that you provide is that the February 2021 winter storm was unprecedented in the climatological record when you consider the combined attributes of its intensity, duration, and precipitation accumulation; is that right?

A. That is correct.

Q. And it's your opinion that this type of event would only happen 1 in every 314,432 years or .00032 percent in any given year; is that right?

A. That is the probabilistic, uhm, occurrence based on the available climate record, but I think it's also very fair to say that this would happen less than once in a lifetime.

MR. ARAVIND: I think it's .00032.

THE WITNESS: Yeah.

MR. ALI BHAI: Thank you.

A. Beyond historic times.

Q. (By Mr. Ali Bhai) Understand. Next in your report you catalog forecasts and warnings provided by the National Weather Service and the National Oceanic and Atmospheric Administration; correct?

A. That is correct.

Q. And it's your opinion and analysis that neither of these services identified a historic cold air event -- cold air outbreak -- I'm sorry -- in the southern Great Plains before January 25, 2021; correct?

A. That is correct.

Q. And then you go on to say that the first mention of such an event entering San Antonio only was communicated at the earliest by the National Weather Service on February 5th, 2021; is that correct?

A. That is correct. That is the first time in the forecast discussions at the National Weather Service office here that represents San Antonio and Austin made reference to a -- cold air or cold air outbreak occurring in this region.

Q. Next, your report opines that based on the uncertainty with respect to the timing, intensity, and duration as well as other factors like precipitation accumulation in tandem with the limited confidence based decision-making due to

the forecast process, that actionable forecasts were not reliable with respect to the February 2021 winter storm until February 11th, 2021; is that correct?

A. That is correct, and I will say that this -- the -- the challenge was confidence in the outcome. For example, in the timeline in the report on -- on the 10th of February it is mentioned by the National Weather Service that they could have subfreezing temperatures for 20 -- 24 to 30 hours approximately. That is approximately two days before the event started, and the event ended up having 107 hours below freezing. So that is a very good representation of a lack of confidence for, not just a winter weather event, but a historic extreme severe winter weather event.

Q. Understood. You go on to say that the urgent messaging about the life-threatening nature of this event was not publicly communicated until February 12th, 2021; is that correct?

A. That is correct. That is what the office -- the weather forecast office here -- the National Weather Service weather forecast office here representing San Antonio and Austin began the urgent messaging to essentially its stakeholders, which is the public, and then all other sectors as well, yes.

Q. You move on then to provide an analysis of CPS Energy's specific weather analytics with respect to the

but in this region, yes, that is correct.

Q. Understood. At the top of page 13 you write, "Thus while individual weather events may occur that deviate from the pattern, the seasonal conditions often resemble the climatological pattern forced by La Niña." Do you see that?

A. Yes.

Q. So it acknowledges that while there may be deviations, generally the temperatures will be warmer in the San Antonio area as result of La Niña; right?

A. Yes.

Q. You then go on to catalog forecasts and warnings provided by the National Weather Service and the National Oceanic -- the NOAA -- I do not remember the acronym at this time, but that's essentially what you're doing at this part of the report; right?

A. Yes.

Q. Okay.

A. For the record, the National Weather Service is under NOAA, which is the -- which is the parent government agency for the National Weather Service.

Q. Understood. Uhm, your main point on page 14 is that by the end of January, according to NOAA and the NWS, there seemed to be no sign that there would be a cold air outbreak in February 2021; is that fair?

A. That is correct.

REPORTER'S CERTIFICATION
DEPOSITION OF DR. JEFFREY BASARA
MARCH 29, 2023

I, Christy Nowotny, Certified Shorthand Reporter in and for the State of Texas, hereby certify to the following:

That the witness, DR. JEFFREY BASARA, was duly sworn by the officer and that the transcript of the oral deposition is a true record of the testimony given by the witness;

That the deposition transcript was submitted on 4-17, 2023, to the witness or to the attorney for the witness for examination, signature, and return to Esquire Deposition Solutions by 5-14, 2023;

That the amount of time used by each party at the deposition is as follows:

Santosh Aravind - 0 Hours: 0 Minutes
Rick Rosenblum - 0 Hours: 0 Minutes
Ali Shan Ali Bhai - 2 Hours: 16 Minutes
Joseph Q. Wood - 1 Hours: 37 Minutes

That pursuant to information given to the deposition officer at the time said testimony was taken, the following includes counsel for all parties of Record:

MR. SANTOSH ARAVIND AND MS. LAUREN DITTY
SCOTT DOUGLASS & MCCONNICO, LLP
303 Colorado Street, Suite 2400
Austin, Texas 78701

MR. RICK ROSENBLUM AND MR. DYLAN FEDDERMAN
CHASNOFF MUNGIA VALKENAAR PEPPING & STRIBLING, LLP
1020 Northeast Loop 410, Suite 150
San Antonio, Texas 78209

MR. ALI SHAN ALI BHAI AND MR. CASEY DOWNING
YETTER COLEMAN, LLP
811 Main Street, Suite 4100
Houston, Texas 77002

MR. JARED MCHAZLETT
DOBROWSKI STAFFORD, LLP
4601 Washington Avenue, Suite 300
Houston, Texas 77007

I further certify that I am neither counsel for, related to, nor employed by any of the parties or attorney in the action in which this proceeding was taken, and further that I am not financially or otherwise interested in the outcome of the action.

Further certification requirements pursuant to Rule 203 TRCP will be certified to after they have occurred.

Sworn to by me this 17th day of April, 2023.

P R O C E E D I N G S

THE VIDEOGRAPHER: On the record, 10:00 a.m.

PAULA GOLD-WILLIAMS,

having been first duly sworn, testified as follows:

EXAMINATION

BY MR. DOBROWSKI:

Q Good morning. Would you please state your name for the record.

A Paula Gold-Williams.

Q Okay. Ms. Williams, have you ever had your deposition taken before?

A Yes.

Q How many times?

A I can only remember one.

Q Okay. A couple of reminder ground rules. Number 1, if you don't understand something I say, please stop me, have me repeat it or rephrase it. Is that all right?

A Yes.

Q Okay. Number 2, if you'd be kind enough to verbalize your answers as opposed to a nod of the head or a wave of the hand, that'll be better for the court reporter to take down a clear record. Okay with you?

A Yes.

able to provide the natural gas that we needed.

Q And the reason --

A That was it.

Q And the reason you had no other choice, according to you, was because of the poor management in terms of hedging and storage and purchasing baseload contracts by CPSE, right, Ms. Williams?

MS. VALKENAAR: Objection --

A No.

MS. VALKENAAR: -- form.

Q (By Mr. Dobrowski) Then why did Austin -- the electric utility in Austin not have price spikes and actually was able to service all of its customers unlike San Antonio, Ms. Williams?

MS. VALKENAAR: Objection, form.

A So Austin Energy does not run a natural gas system. It is very different. Its needs are very different, and it had weather challenges just like every other utility in Texas.

Q (By Mr. Dobrowski) Did you -- if you could look back at Exhibit Number 118. If you go to Page 17 of that document -- it's Bates-stamped 14225.

Another reason that you set out to the board of directors for the price spikes is a request by ERCOT that requested a total system-wide load shed

Respondent.	§	_____ JUDICIAL DISTRICT

ASSURANCE OF VOLUNTARY COMPLIANCE

This Assurance of Voluntary Compliance ("Assurance") is made and entered into by and between Texas Attorney General Ken Paxton ("Attorney General") acting in the name of the State of Texas ("State"), Petitioner, and Thaman Enterprise, LLC d/b/a Caddo Stop, Respondent, pursuant to the Texas Business and Commerce Code section 17.58.

A. DEFINITIONS

As used in this Assurance, the following terms are defined as follows:

1. **"Claims Administrator"** means the entity selected by the State of Texas to administer the restitution claims for this settlement;
2. **"Effective Date"** means the date on which this Assurance is approved by the Court;
3. **"Eligible Consumer"** shall mean any consumer who paid $3.99 per gallon or more for fuel at 1001 South Caddo Street, Cleburne, Texas 76033 on August 31, 2017, and who timely and correctly fills out and submits a claim form to the Claims Administrator;
4. **"Respondent," "You,"** or **"Yours"** means Thaman Enterprise, LLC d/b/a Caddo Stop, its officers, agents, servants, employees, and attorneys, and any other persons

CPSE Response in Opp to ET MSJ
Exhibit A-179
MDL-2022-CI-02879
exhibitsticker.com

in active concert or participation with Thaman Enterprise, LLC d/b/a Caddo Stop who receive actual notice of the Assurance by personal service or otherwise;

5. **"Refund Amount"** shall be the difference between the price paid by an eligible consumer and the average price for the same grade of fuel charged by Respondent on August 29, 2017; and

6. **"State of Disaster"** means the period designated by the Texas Governor's disaster declaration pursuant to Chapter 418 of the Government Code.

B. PARTIES

1. The signatories to this Assurance are the Respondent, Thaman Enterprise, LLC d/b/a Caddo Stop, and the Petitioner, the State.

2. This action is brought by the Consumer Protection Division of the Office of the Attorney General of Texas in the name of the State as authorized under the Texas Deceptive Trade Practices – Consumer Protection Act ("DTPA"), Texas Business and Commerce Code section 17.41, *et seq*.

C. FACTUAL BACKGROUND

1. On August 23, 2017, Governor Greg Abbott declared a State of Disaster under Texas Government Code section 418.014 anticipating the landfall of then Tropical Storm Harvey (Harvey State of Disaster).

2. On August 25, 2017, Hurricane Harvey made landfall on the Texas Gulf Coast.

3. On September 1, 2017, Governor Abbott issued a price gouging declaration emphasizing the unlawful practice of price gouging: "Texans impacted by this disaster are particularly vulnerable to economic exploitation during this challenging time . . . Texas law prohibits price gouging and gives the attorney general the authority to prosecute anyone

throughout Texas who takes advantage of a declared disaster by charging an exorbitant or excessive price for fuel."

4. Respondent operates a fuel station located in Cleburne, Texas that sold fuel to consumers on August 31, 2017, which was during the Harvey State of Disaster.

5. The Attorney General's Consumer Protection Division received complaints from consumers that Respondent was charging $3.99 per gallon of regular grade gasoline during the Harvey State of Disaster.

D. VIOLATIONS OF TEXAS DECEPTIVE TRADE PRACTICES ACT

The State alleges that Respondent's conduct violated the DTPA. Specifically, the violations that have occurred include taking advantage of a disaster declared by the Governor of Texas under Chapter 418 of the Government Code by:

1. Selling fuel at an exorbitant or excessive price; or
2. Demanding an exorbitant or excessive price in connection with the sale of fuel.

E. STIPULATIONS

The parties hereby agree and stipulate that:

1. The State has jurisdiction over the subject matter and the parties in this matter under the DTPA;
2. The venue of this cause is proper in Travis County, Texas, pursuant to DTPA section 17.58(a);
3. This Assurance does not constitute an approval of Respondent's business practices by the State or the Court and Respondent shall make no representation or claim to the contrary;

4. Respondent and the State represent and warrant, each to the other, that each has the authority to enter into and make this Assurance, and to bind themselves to this Assurance;

5. This Assurance is being entered into by the parties for the sole purpose of compromising disputed claims without the necessity for protracted and expensive litigation, and this Assurance does not constitute an admission by Respondent of any violation of law or regulation; and

6. The State and Respondent agree to and do not contest the entry of this Assurance by this Court.

F. RESPONDENT'S ASSURANCES

Respondent voluntarily assures the State it will comply with the following terms:

1. Respondent shall not demand an exorbitant or excessive price for fuel or sell fuel at an exorbitant or excessive price during a State of Disaster. Respondent's price for fuel is presumed exorbitant or excessive when the price per gallon during a State of Disaster is greater than 125 percent of the Respondent's 30-day average price per gallon prior to the State of Disaster, unless Respondent can demonstrate through its written records that the price increase is attributable to additional fuel supply costs incurred by Respondent; and,

2. During any future State of Disaster and for a minimum of six months following the expiration of such State of Disaster, Respondent shall cease any ongoing or scheduled document or data destruction and shall preserve records reflecting:

    a. Each individual fuel sale transaction including price per gallon and gallons purchased;

b. The dates, times, and amounts of changes in fuel prices; and,

c. All fuel supply costs incurred by Respondent.

G. CONSUMER RESTITUTION

Respondent shall pay restitution as follows:

1. If the Respondent is able to identify and segregate credit/debit card payments from cash transactions for fuel, Respondent shall issue a chargeback or other automatic refund of the Refund Amount directly to each consumer. Within 14 days of the Effective Date of this Assurance, the Respondent will provide the State a list of consumers who received chargebacks under this provision. Such information shall include the Refund Amounts and the names of the persons receiving the chargebacks; and,

2. If the Respondent is not able to identify and segregate credit/debit card payments from cash transactions for fuel, and/or if the Respondent has additional consumers who made cash payments for their fuel transactions, the Respondent shall disgorge to the State of Texas the amount of TWO THOUSAND THREE HUNDRED AND NO/100 DOLLARS ($2,300.00) for these consumers and Respondent shall make such payment to the State within 30 days of the Effective Date. This payment will be referred to as the Restitution Payment. Respondent's payment to the State of Texas shall be made by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX4053119279 and if not by wire transfer, deliver/mailed to the Office of the Attorney General, ATTN: Accounting, Division, 300 W. 15th St., MC-003, Austin, TX 78701.

The procedures for the distribution of the Restitution Payment are as follows:

3. The State will remit the Restitution Payment to the Claims Administrator to pay refunds and the costs of administration;

4. The parties have agreed to the use of the attached claim form or a substantially similar form agreed to by the parties. The Claims Administrator may begin accepting claim forms by June 11, 2018. The Claims Administrator will not accept claim forms later than September 10, 2018, which will be the Claims Deadline Date. No refunds will be distributed by the Claims Administrator until after the Claims Deadline Date passes. Consumers who properly complete the claim form will be eligible to receive a refund payment;

5. The Claims Administrator will have discretion, in consultation with the State of Texas, to determine if the claim form has been properly completed and timely submitted, and to determine the specific Refund Amount each Eligible Consumer will receive. Once all Eligible Consumers have received their Refund Amount, and once the administration costs have been paid, the Claims Administrator, in consultation with the State of Texas, may pay additional Refund Amounts to other consumers filing claims, and may also pay additional Refund Amounts to Eligible Consumers in other price gouging settlements the State has entered into;

6. Eligible Consumers may receive pro rata Refund Amounts, if full payment is not available for all Eligible Consumers;

7. Once all Refund Amounts and costs of administration have been deducted from the Restitution Payment, any residual amounts will be allocated to the Supreme Court Judicial Fund;

8. After the Claims Deadline Date, the Claims Administrator will prepare such report as the State may require; and,

9. Checks returned to the Claims Administrator shall be treated in accordance with the State of Texas' unclaimed property laws.

H. GENERAL PROVISIONS

1. Respondent and the State agree that they will submit this Assurance to a district court of competent jurisdiction in Travis County and request that the court approve this Assurance, pursuant to the terms set forth herein and the DTPA section 17.58.

2. Nothing in this Assurance shall create any private rights, causes of action or remedies against Respondent and nothing in the Assurance shall be construed as a waiver of any private rights, causes of action, or remedies of any person against Respondent with respect to the practices or conduct described herein.

3. Respondent and the State agree that nothing in this Assurance shall be constructed to affect any action or proceeding by any regulatory body or state agency, whether such action or proceeding is related to any issue addressed by this Assurance or otherwise.

4. To the extent that the provisions of this Assurance conflict with any Texas, local, or federal law or regulation that now exists, or is later enacted or amended, such law or regulation, and not this Assurance shall apply. For the purpose of this Assurance, such conflict exists if conduct prohibited by this Assurance is required or expressly permitted by such Texas, local, or federal law or regulation, or if conduct required by this Assurance is prohibited by such Texas, local or federal law or regulation.

5. This Assurance is governed by section 17.58 of the DTPA. The parties agree that, should any clause, provision, or section of this Assurance, for any reason, be held illegal, invalid,

or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this Assurance, and this Assurance shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

6. This Assurance sets forth the entire agreement between the parties. Respondent represents that he has fully read and understands this Assurance, accepts the legal consequences involved in signing this Assurance, and that there are no other representations or agreements between the parties not stated in writing herein.

7. It is also understood by the Respondent that the subsequent failure to comply with the terms of this Assurance is *prima facie* evidence of a violation of the Deceptive Trade Practices – Consumer Protection Act.

8. The terms of this Assurance are not intended to alter Respondent's lawful contractual obligations with its fuel distributor(s) and suppliers.

9. The Parties agree that this Assurance shall not be modified or terminated except by written agreement signed by the parties and filed with the Court.

EXECUTED this 31st day of May, 2018.

ASSURANCE OF VOLUNTARY COMPLIANCE

This Assurance of Voluntary Compliance ("Assurance") is made and entered into by and between Texas Attorney General Ken Paxton ("Attorney General") acting in the name of the State of Texas ("State"), Petitioner, and CMDM, LLC d/b/a Hans Chevron, Respondent, pursuant to the Texas Business and Commerce Code section 17.58.

A. DEFINITIONS

As used in this Assurance, the following terms are defined as follows:

1. "**Claims Administrator"** means the entity selected by the State of Texas to administer the restitution claims for this settlement;
2. **"Effective Date"** means the date on which this Assurance is approved by the Court;
3. **"Eligible Consumer"** shall mean any consumer who paid $3.99 per gallon or more for premium or supreme grade fuel (93 octane) at 2590 E. Arkansas Lane, Arlington, Texas 76014 between August 31, 2017 and September 2, 2017, and who timely and correctly fills out and submits a claim form to the Claims Administrator;
4. **"Respondent," "You,"** or **"Yours"** means CMDM, LLC d/b/a Hans Chevron, its officers, agents, servants, employees, and attorneys, and any other persons in active

concert or participation with CMDM, LLC d/b/a Hans Chevron who receive actual notice of the Assurance by personal service or otherwise;

5. **"Refund Amount"** shall be the difference between the price paid by an eligible consumer and the average price for the same grade of fuel charged by Respondent on August 30, 2017; and

6. **"State of Disaster"** means the period designated by the Texas Governor's disaster declaration pursuant to Chapter 418 of the Government Code.

B. PARTIES

1. The signatories to this Assurance are the Respondent, CMDM, LLC d/b/a Hans Chevron, and the Petitioner, the State.

2. This action is brought by the Consumer Protection Division of the Office of the Attorney General of Texas in the name of the State as authorized under the Texas Deceptive Trade Practices – Consumer Protection Act ("DTPA"), Texas Business and Commerce Code section 17.41, *et seq*.

C. FACTUAL BACKGROUND

1. On August 23, 2017, Governor Greg Abbott declared a State of Disaster under Texas Government Code section 418.014 anticipating the landfall of then Tropical Storm Harvey (Harvey State of Disaster).

2. On August 25, 2017, Hurricane Harvey made landfall on the Texas Gulf Coast.

3. On September 1, 2017, Governor Abbott issued a price gouging declaration emphasizing the unlawful practice of price gouging: "Texans impacted by this disaster are particularly vulnerable to economic exploitation during this challenging time . . . Texas law prohibits price gouging and gives the attorney general the authority to prosecute anyone

throughout Texas who takes advantage of a declared disaster by charging an exorbitant or excessive price for fuel."

4. Respondent operates a fuel station located in Arlington, Texas that sold fuel to consumers between August 31, 2017 and September 2, 2017, which was during the Harvey State of Disaster.

5. The Attorney General's Consumer Protection Division received complaints from consumers that Respondent was charging $3.99 per gallon of premium grade gasoline during the Harvey State of Disaster.

D. VIOLATIONS OF TEXAS DECEPTIVE TRADE PRACTICES ACT

The State alleges that Respondent's conduct violated the DTPA. Specifically, the violations that have occurred include taking advantage of a disaster declared by the Governor of Texas under Chapter 418 of the Government Code by:

1. Selling fuel at an exorbitant or excessive price; or
2. Demanding an exorbitant or excessive price in connection with the sale of fuel.

E. STIPULATIONS

The parties hereby agree and stipulate that:

1. The State has jurisdiction over the subject matter and the parties in this matter under the DTPA;
2. The venue of this cause is proper in Travis County, Texas, pursuant to DTPA section 17.58(a);
3. This Assurance does not constitute an approval of Respondent's business practices by the State or the Court and Respondent shall make no representation or claim to the contrary;

4. Respondent and the State represent and warrant, each to the other, that each has the authority to enter into and make this Assurance, and to bind themselves to this Assurance;

5. This Assurance is being entered into by the parties for the sole purpose of compromising disputed claims without the necessity for protracted and expensive litigation, and this Assurance does not constitute an admission by Respondent of any violation of law or regulation; and,

6. The State and Respondent agree to and do not contest the entry of this Assurance by this Court.

F. RESPONDENT'S ASSURANCES

Respondent voluntarily assures the State it will comply with the following terms:

1. Respondent shall not demand an exorbitant or excessive price for fuel or sell fuel at an exorbitant or excessive price during a State of Disaster. Respondent's price for fuel is presumed exorbitant or excessive when the price per gallon during a State of Disaster is greater than 125 percent of the Respondent's 30-day average price per gallon prior to the State of Disaster, unless Respondent can demonstrate through its written records that the price increase is attributable to additional fuel supply costs incurred by Respondent; and,

2. During any future State of Disaster and for a minimum of six months following the expiration of such State of Disaster, Respondent shall cease any ongoing or scheduled document or data destruction and shall preserve records reflecting:

    a. Each individual fuel sale transaction including price per gallon and gallons purchased;

b. The dates, times, and amounts of changes in fuel prices; and,

c. All fuel supply costs incurred by Respondent.

G. CONSUMER RESTITUTION

Respondent shall pay restitution as follows:

1. If the Respondent is able to identify and segregate credit/debit card payments from cash transactions for fuel, Respondent shall issue a chargeback or other automatic refund of the Refund Amount directly to each consumer. Within 14 days of the Effective Date of this Assurance, the Respondent will provide the State a list of consumers who received chargebacks under this provision. Such information shall include the Refund Amounts and the names of the persons receiving the chargebacks; and,

2. If Respondent is not able to identify and segregate credit/debit card payments from cash transactions for fuel, and/or if Respondent has additional consumers who made cash payments for their fuel transactions, Respondent shall disgorge to the State of Texas the amount of ONE THOUSAND FOUR HUNDRED AND 00/100 DOLLARS ($1,400.00) for these consumers and Respondent shall make such payment to the State on the Effective Date. This payment will be referred to as the Restitution Payment. Respondent's payment to the State of Texas shall be made by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX4096711068 and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

The procedures for the distribution of the Restitution Payment are as follows:

3. The State will remit the Restitution Payment to the Claims Administrator to pay refunds and the costs of administration;

4. The parties have agreed to the use of the attached claim form or a substantially similar form agreed to by the parties. The Claims Administrator may begin accepting claim forms by April 15, 2019. The Claims Administrator will not accept claim forms later than June 30, 2019, which will be the Claims Deadline Date. No refunds will be distributed by the Claims Administrator until after the Claims Deadline Date passes. Consumers who properly complete the claim form will be eligible to receive a refund payment;

5. The Claims Administrator will have discretion, in consultation with the State of Texas, to determine if the claim form has been properly completed and timely submitted, and to determine the specific Refund Amount each Eligible Consumer will receive. Once all Eligible Consumers have received their Refund Amount, and once the administration costs have been paid, the Claims Administrator, in consultation with the State of Texas, may pay additional Refund Amounts to other consumers filing claims, and may also pay additional Refund Amounts to Eligible Consumers in other price gouging settlements the State has entered into;

6. Eligible Consumers may receive pro rata Refund Amounts, if full payment is not available for all Eligible Consumers;

7. Once all Refund Amounts and costs of administration have been deducted from the Restitution Payment, any residual amounts will be allocated to the Supreme Court

Judicial Fund as a civil penalty pursuant to Sec. 402.007(b)(1) of the Texas Government Code;

8. After the Claims Deadline Date, the Claims Administrator will prepare such report as the State may require; and,

9. Checks returned to the Claims Administrator shall be treated in accordance with the State of Texas' unclaimed property laws.

H. GENERAL PROVISIONS

1. Respondent and the State agree that they will submit this Assurance to a district court of competent jurisdiction in Travis County and request that the court approve this Assurance, pursuant to the terms set forth herein and the DTPA section 17.58.

2. Nothing in this Assurance shall create any private rights, causes of action or remedies against Respondent and nothing in the Assurance shall be construed as a waiver of any private rights, causes of action, or remedies of any person against Respondent with respect to the practices or conduct described herein.

3. Respondent and the State agree that nothing in this Assurance shall be constructed to affect any action or proceeding by any regulatory body or state agency, whether such action or proceeding is related to any issue addressed by this Assurance or otherwise.

4. To the extent that the provisions of this Assurance conflict with any Texas, local, or federal law or regulation that now exists, or is later enacted or amended, such law or regulation, and not this Assurance shall apply. For the purpose of this Assurance, such conflict exists if conduct prohibited by this Assurance is required or expressly permitted by such Texas, local, or federal law or regulation, or if conduct required by this Assurance is prohibited by such Texas, local or federal law or regulation.

5. This Assurance is governed by section 17.58 of the DTPA. The parties agree that, should any clause, provision, or section of this Assurance, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this Assurance, and this Assurance shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

6. This Assurance sets forth the entire agreement between the parties. Respondent represents that he has fully read and understands this Assurance, accepts the legal consequences involved in signing this Assurance, and that there are no other representations or agreements between the parties not stated in writing herein.

7. It is also understood by the Respondent that the subsequent failure to comply with the terms of this Assurance is *prima facie* evidence of a violation of the Deceptive Trade Practices – Consumer Protection Act.

8. The terms of this Assurance are not intended to alter Respondent's lawful contractual obligations with its fuel distributor(s) and suppliers.

9. The Parties agree that this Assurance shall not be modified or terminated except by written agreement signed by the parties and filed with the Court.

EXECUTED this 4th day of April, 2019.

CLAIM FORM FOR PRICE-GOUGING RESTITUTION FOR FUEL PURCHASES
DURING HURRICANE HARVEY DISASTER PROCLAMATION PERIOD

NOTE: This claim form must be emailed or mailed and postmarked on or before June 30, 2019.

Distribution of restitution is estimated to be made by August 1, 2019.

Please provide your name and address:

1. Name: _____
   (First) (Middle) (Last)
2. Current address: _____
   Street Name and Number (include apartment number, if applicable)

   City: _____ State: _____ Zip Code: _____

3. Email address: _____

Instructions: To be eligible for restitution, please provide the information below. If you have a receipt from this transaction, please **attach the original receipt** and you need fill out only those items below which are not included in the receipt; otherwise, fill out the entire form. Submit separate forms if you purchased fuel on more than one day or at more than one station. Final determination of eligibility will be made based upon the requirements set out in the settlement agreement between the State and the gas station where you made your purchase. Note that your refund may be made on a pro rata basis if claims exceed the restitution funds available, which means you may only receive a portion of the amount that you were overcharged.

a. The name of the gas station where you purchased the fuel: _____
   Address of that station _____
   Street Name and Number

   City: _____ State_____ Zip Code_____

b. Date of purchase: _____

c. Price you paid per gallon for the fuel: $_____

d. Number of gallons of fuel purchased: _____

e. Amount of total sale: $_____

f. Make and model of vehicle for which the fuel was purchased: _____

Please affirm that you are the individual who paid for fuel as shown on your receipt by dating and signing here:

Date: _____ _____
(Sign Here)

If you have any questions, call the settlement information line at 1-888-755-9508 (toll free), or write to the Hurricane Harvey Price-Gouging Claims Administrator at the address below:

Mail this form along with your receipt to: **Hurricane Harvey Price-Gouging Claims Administrator**

IN THE MATTER OF	§	**IN THE DISTRICT COURT**
	§	
STATE OF TEXAS,	§	
Petitioner,	§	
	§	**TRAVIS COUNTY, TEXAS**
And	§	
	§	
	§	
LOVELY PRODUCTS, LLC	§	
Respondent.	§	126TH **JUDICIAL DISTRICT**

ASSURANCE OF VOLUNTARY COMPLIANCE

This Assurance of Voluntary Compliance ("Assurance") is made and entered into by and between Texas Attorney General Ken Paxton ("Attorney General" herein) acting in the name of the State of Texas ("State"), Petitioner, and Lovely Products, LLC, Respondent, pursuant to the Texas Business and Commerce Code Section 17.58.

A. DEFINITIONS

As used in this Assurance, the following terms are defined as follows:

1. **"Effective Date"** means the date on which this Assurance is approved by the Court;

2. **"Eligible Consumer"** shall mean any consumer who purchased masks on or after March 13, 2020;

3. **"Respondent," "You,"** or **"Yours"** means Lovely Products, LLC, its officers, agents, servants, employees, and attorneys, and any other persons in active concert or participation with Lovely Products, LLC who receive actual notice of the Assurance by personal service or otherwise; and

4. **"State of Disaster"** means the period designated by the Texas Governor's disaster declaration pursuant to Chapter 418 of the Government Code.

B. PARTIES

5. The signatories to this Assurance are the Respondent, Lovely Products, LLC and the Petitioner, the State of Texas ("State").

6. This action is brought by the Consumer Protection Division of the Office of the Attorney General of Texas in the name of the State as authorized under the Texas Deceptive Trade Practices – Consumer Protection Act ("DTPA"), Texas Business and Commerce Code section 17.41, *et seq*.

C. FACTUAL BACKGROUND

7. On March 13, 2020, Governor Greg Abbott declared a State of Disaster under Texas Government Code section 418.014 to prepare for, respond to and mitigate the spread of COVID-19 to protect the health and welfare of Texas.

8. In addition to issuing multiple executive orders to protect the public and slow the spread of COVID-19, on March 24, 2020, Governor Abbott announced the establishment of the Supply Chain Task Force to secure the purchase of millions of essential personal protection supplies.[1]

9. Respondent Lovely Products, LLC operates the website, www.saleforusa.com and offered for sale necessities such as 3M 8210 masks and KN95 masks on their website. Lovely Products sold 3M Model 8210 N95 respirators for $12 per mask. 3M has issued a statement that these types of masks range from $2.45-$3.11,[2] which indicates a markup of almost 1,000%. In addition, Lovely Products is not an authorized distributor of 3M products. Lovely Products, LLC advertises their KN95 masks provide "100% protection."

[1] The March 24, 2020 Press Release announcing Governor Gregg Abbott's GA-09 Executive Order. Available online at: https://gov.texas.gov/news/post/governor-abbott-announces-increased-ppe-supply-issues-executive-order-to-strengthen-reporting-capabilities. (Last visited on April 1, 2020).
[2] https://multimedia.3m.com/mws/media/1803670O/fraudulent-activity-price-gouging-and-counterfeit-products.pdf

However, there is no such designation as "100% protection" from Covid-19 and making such a claim causes confusion among consumers and only seeks to entice consumers to buy a product which does not provide 100% protection.

D. VIOLATIONS OF TEXAS DECEPTIVE TRADE PRACTICES ACT

10. The State alleges that Respondent's conduct violated the DTPA. Specifically, the violations that have occurred include taking advantage of a disaster declared by the Governor of Texas under Chapter 418 of the Government Code by:

a. Selling masks at an exorbitant or excessive price;

b. Demanding an exorbitant or excessive price in connection with the sale of masks in violation of DTPA § 17.46(b)(27);

c. Causing confusion or misunderstanding as to the source, sponsorship, approval, certification of goods in violation of DTPA § 17.46(b)(2); and

d. Representing that goods have sponsorship or approval which they do not have in violation of DTPA § 17.46(b)(5).

E. STIPULATIONS

The parties hereby agree and stipulate that:

11. The State has jurisdiction over the subject matter and the parties in this matter under the DTPA;

12. The venue of this cause is proper in Travis County, Texas, pursuant to DTPA section 17.58(a);

13. This Assurance does not constitute an approval of Respondent's business practices by the State or the Court and Respondent shall make no representation or claim to the contrary;

14. Respondent and the State represent and warrant, each to the other, that each has the authority to enter into and make this Assurance, and to bind themselves to this Assurance;

15. This Assurance is being entered into by the parties for the sole purpose of compromising disputed claims without the necessity for protracted and expensive litigation, and this Assurance does not constitute an admission by Respondent of any violation of law or regulation; and

16. The State and Respondent agree to and do not contest the entry of this Assurance by this Court.

F. RESPONDENT'S ASSURANCES

17. Respondent voluntarily assures the State it will comply with the following terms:

a. Respondent shall not make claims regarding that masks have benefits which they do not have;

b. Respondent shall not cause confusion or misunderstanding as to the source, sponsorship, approval, certification of masks;

c. Respondent shall not demand an exorbitant or excessive price for masks or sell masks at an exorbitant or excessive price during a State of Disaster;

d. During any future State of Disaster and for a minimum of six months following the expiration of such State of Disaster, Respondent shall cease any ongoing or scheduled document or data destruction and shall preserve records reflecting all advertisements of masks; and

e. Selling masks or other PPE unless you are an authorized retailer/distributor of such masks or PPE as required by the manufacturer.

G. CONSUMER RESTITUTION

18. Pursuant to this Assurance, Respondent agrees to provide restitution to consumers for transactions for the sale of 3M masks that took place from March 13, 2020 through the present. Within 45 days following the entry of this Assurance of Voluntary Compliance, Respondent shall provide credit card chargebacks to the consumers whose purchases are represented by the invoice numbers listed on Exhibit A. The amount of restitution paid will be the difference between what the Respondent paid for the masks and what each consumer paid for masks.

H. MONETARY PROVISION

19. The Respondent agrees to pay to the State a civil penalty pursuant to DTPA 17.47(c) in the amount of $5,000.00 and attorneys' fees in the amount of $2,500.00. The Respondent shall pay all civil penalties and attorney's fees within 45 days after the Effective Date. Payment is to be made by certified check or wire transfer payable to the "State of Texas," bearing the AG Number: CX1718240307. If not by wire transfer, payment is to be mailed to the Office of the Attorney General, ATTN: Accounting Division, PO Box 12548, MC-003, Austin, Texas 78711.

I. GENERAL PROVISIONS

20. Respondent and the State agree that they will submit this Assurance to a district court of competent jurisdiction in Travis County and request that the court approve this Assurance, pursuant to the terms set forth herein and the DTPA section 17.58.

21. Nothing in this Assurance shall create any private rights, causes of action or remedies against Respondent and nothing in the Assurance shall be construed as a waiver of any private rights, causes of action, or remedies of any person against Respondent with respect to the practices or conduct described herein.

22. Respondent and the State agree that nothing in this Assurance shall be constructed to affect any action or proceeding by any regulatory body or state agency, whether such action or proceeding is related to any issue addressed by this Assurance or otherwise.

23. To the extent that the provisions of this Assurance conflict with any Texas, local, or federal law or regulation that now exists, or is later enacted or amended, such law or regulation, and not this Assurance shall apply. For the purpose of this Assurance, such conflict exists if conduct prohibited by this Assurance is required or expressly permitted by such Texas, local, or federal law or regulation, or if conduct required by this Assurance is prohibited by such Texas, local or federal law or regulation.

24. This Assurance is governed by section 17.58 of the DTPA. The parties agree that, should any clause, provision, or section of this Assurance, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this Assurance, and this Assurance shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

25. This Assurance sets forth the entire agreement between the parties. Respondent represents that he has fully read and understands this Assurance, accepts the legal consequences involved in signing this Assurance, and that there are no other representations or agreements between the parties not stated in writing herein.

26. It is also understood by the Respondent that the subsequent failure to comply with the terms of this Assurance is *prima facie* evidence of a violation of the Deceptive Trade Practices – Consumer Protection Act.

27. The terms of this Assurance are not intended to alter Respondent's lawful contractual obligations with its mask distributor(s) and suppliers.

28. The Parties agree that this Assurance shall not be modified or terminated except by written agreement signed by the parties and filed with the Court.

EXECUTED this 28th day of October, 2020.

CAUSE NO. 2020DCV-0829-A

STATE OF TEXAS, Plaintiff,	§ § §	IN THE DISTRICT COURT
v.	§ §	28th JUDICIAL DISTRICT
GREGORY MARKWARDT D/B/A HOTEL CORPUS CHRISTI BAYFRONT, Defendant.	§ § §	NUECES COUNTY, TEXAS

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

TO THE HONORABLE JUDGE OF SAID COURT:

On this ___ day of _____, 2021, came for hearing on the above-entitled and numbered cause in which the STATE OF TEXAS (State), acting by and through the Attorney General of Texas, Ken Paxton, is the Plaintiff and GREGORY MARKWARDT D/B/A HOTEL CORPUS CHRISTI BAYFRONT (Markwardt) is the Defendant. In this action, the State alleges that Markwardt violated §17.46 of the Deceptive Trade Practices-Consumer Protection Act, Tex. Bus. & Com. Code § 17.41 *et seq*. (DTPA), by demanding and charging an excessive price for lodging following the Governor's disaster declaration due to Hurricane Harvey (price gouging). The State and Markwardt, by and through their respective attorneys of record, wish to make the following stipulations and have agreed to the entry of this Agreed Final Judgment and Permanent Injunction (Agreed Judgment).

FACTUAL BACKGROUND

1. On August 23, 2017, Governor Greg Abbott declared a State of Disaster under § 418.014 of the Texas Government Code, anticipating the landfall of then Tropical Storm Harvey (Harvey State of Disaster).

2. On August 25, 2017, Hurricane Harvey made landfall on the Texas Gulf Coast.

3. On September 1, 2017, Governor Abbott issued a price gouging declaration emphasizing the unlawful practice of price gouging: "Texans impacted by this disaster are particularly vulnerable to economic exploitation during this challenging time ... Texas law prohibits price gouging and gives the attorney general the authority to prosecute anyone throughout Texas who takes advantage of a declared disaster by charging an exorbitant or excessive price for fuel."

4. The Attorney General's Consumer Protection Division received complaints from consumers that Marqwardt was demanding and charging excessive or exorbitant prices for lodging at Hotel Corpus Christi Bayfront located at 601 N. Water Street, in Corpus Christi, Texas, 78401 (Hotel Corpus Christi Bayfront), a facility he then owned and operated during the Harvey State of Disaster.

STIPULATIONS

5. Marqwardt stipulates that he owned and operated Hotel Corpus Christi Bayfront during the Harvey State of Disaster; however, he has since sold the property to a third party and is no longer involved in its operation.

6. The parties agree to and do not contest the entry of this Agreed Judgment.

7. Markwardt stipulates that he has entered into this Agreed Judgment voluntarily in order to resolve the litigation; that he actively participated in negotiations leading to this Agreed Judgment; and that this agreement is freely and voluntarily made without duress.

8. Markwardt stipulates that he is aware of the duties placed upon him by the Agreed Judgment and is desirous and capable of carrying out those duties in full.

9. Markwardt acknowledges receipt of a copy of this Agreed Judgment and has full and actual notice of its terms.

10. The parties agree to waive the thirty (30) day period in which to file a Motion for New Trial and waive any and all rights to appeal this Agreed Judgment.

FINDINGS

11. Having reviewed the pleadings in this case and the stipulations of the parties, the Court hereby finds as follows:

a. The Court has jurisdiction over the parties;

b. Venue is proper in Nueces County, Texas; and

c. Entry of this Agreed Judgment is in the public interest.

12. It appearing to the Court that the parties agree to entry of this Agreed Judgment and that they have approved entry of such, it is therefore ordered that Markwardt shall be enjoined as recited below.

DEFINITIONS

13. IT IS HEREBY ORDERED that, as used in this Agreed Judgment, the following definitions shall be used in construing this Agreed Judgment:

a. "Defendant" means Gregory Markwardt and his agents, subcontractors, servants, employees, and any other Persons in active concert or participation with him;

b. "Person" means an individual, sole proprietorship, firm, partnership, corporation, association, joint venture or other group, or business entity, however organized;

c. "Designated Disaster Period," as defined in § 17.4625 of the DTPA, means the period: (1) beginning on the earliest of the date the disaster occurs; or the date of: (i) the proclamation or executive order of the Governor declaring the disaster; or (ii) the declaration of the disaster by the President of the United States, if any part

of Texas is named in the federally declared disaster area; and (2) ending on the 30th day after the date the disaster declaration expires or is terminated;

d. "Consumer" means an individual, partnership, corporation, this state, or a subdivision or agency of this state that seeks or acquires by purchase or lease any goods or services; and

e. "Eligible Consumer" shall mean any Consumer identified from data Marqwardt provided to the State who: (1) stayed at Hotel Corpus Christi Bayfront between the dates of August 24, 2017 and September 30, 2017; (2) paid a room rate that increased by 67% or more over the facility's average price for that room during the three months preceding August 2017; and (3) timely and correctly fills out and submits a claim form to the State in accordance with procedures set forth in the Consumer Restitution section below.

PERMANENT INJUNCTION

14. IT IS FURTHER ORDERED that Markwardt, his officers, agents, servants, employees, attorneys, and any other Persons in active concert or participation with him who receive actual notice of this order by personal service or otherwise, whether acting directly or through any trust, corporation, subsidiary, division, entity, or other devise shall be PERMANENTLY ENJOINED from engaging in the following acts or practices:

a. Taking advantage of a disaster declared by the Governor under Chapter 418 of the Texas Government Code or by the President of the United States if any part of this state is named in the federally declared disaster area, by:

i. selling or leasing lodging or any other necessity at an exorbitant or excessive price; or

ii. demanding an exorbitant or excessive price in connection with the sale or lease of lodging or any other necessity;

b. Collecting state or local taxes from a disaster victim, personnel participating in relief operations, or any other Person if, during a Designated Disaster Period, such taxes have been suspended by the Governor pursuant to Chapter 418 of the Texas Government Code;

c. Violating any regulation, proclamation, declaration, or executive order made by the Governor pursuant to Chapter 418 of the Government Code or the President of the United States, if any part of Texas is named in the federally declared disaster area;

d. Failing to provide a sales tax exemption certificate to a disaster victim, personnel participating in relief operations, or any other Person if, during a Designated Disaster Period, the Governor suspends the Hotel Occupancy Tax pursuant to Chapter 418 of the Government Code;

e. Failing to obtain a sales tax exemption certificate from evacuees;

f. Failing to maintain a registration system to record the identity and contact information from guests of the hotel or motel including the guests' names, addresses, the length of their stay, and the price charged per day; and

g. Altering, destroying, or mutilating records ordered to be kept pursuant to Subparagraphs (e) and (f) above for a three-year period after the event, provided the matter is not in litigation. If the matter is in litigation, records shall not be altered, destroyed, or mutilated until a three-year period following the entry of a final judgment that is not subject to further appeal.

15. IT IS FURTHER ORDERED that the above-referenced injunctive terms are intended to effectively prevent such activity by Markwardt and any attempt to conduct such activity through another Person in circumvention of this injunction shall be deemed a violation of the injunction.

CONSUMER RESTITUTION

16. IT IS FURTHER ORDERED that the State shall have judgment from Marqwardt in the amount of TWENTY-FIVE THOUSAND DOLLARS ($25,000) for consumer restitution (Restitution Payments) upon execution of the Agreed Judgment.

17. IT IS FURTHER ORDERED that the procedures for the distribution of the Restitution Payments are as follows:

a. The parties have agreed to the use of the attached claim form or a substantially similar form agreed to by the parties. The State may begin accepting claim forms by October 1, 2021. The State will not accept claim forms later than January 15, 2021, which will be the Claims Deadline Date. No refunds will be distributed by the State until after the Claims Deadline Date passes. Eligible Consumers who properly complete the claim form will be eligible to receive a refund payment;

b. The State will determine if the claim form has been properly completed and timely submitted, and determine the specific refund amount each Eligible Consumer will receive;

c. Eligible Consumers may receive pro rata refund amounts, if claimed amounts by Eligible Consumers exceed the Restitution Payments;

d. If the full claimed amounts by all Eligible Consumers is less than the Restitution Payments, any residual amounts will be allocated to the State for the reimbursement of attorneys' fees and court costs; and

e. Checks returned to the State shall be treated in accordance with the State of Texas' unclaimed property laws.

18. IT IS FURTHER ORDERED that Marqwardt will cooperate with reasonable requests from the State for consumer information for the purpose of restitution distribution.

MISCELLANEOUS PROVISIONS

19. IT IS FURTHER ORDERED that upon execution of the Agreed Judgment Marqwardt shall immediately pay the State a total of TWENTY-FIVE THOUSAND DOLLARS ($25,000). Payments shall be made via certified check or wire transfer, payable to "THE STATE OF TEXAS," bearing the reference AG# CX5839980697, and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th Street, MC-003, Austin, TX 78701. The State shall be permitted to abstract the judgment as provided by law; however, it will forbear execution so long as payment is made pursuant to the terms of the Agreed Judgment.

20. IT IS FURTHER ORDERED that if the State believes that Markwardt is in default of the Permanent Injunction for any reason, the State shall provide Markwardt with written notice by certified mail to Markwardt's last known address of the circumstances that the State believes constitute a default. Markwardt shall have ten (10) days to either provide the State with written documentation that no such default occurred or to cure such default.

21. IT IS FURTHER ORDERED that in the event of a finding of default of the Permanent Injunction the State shall be entitled to declare the unpaid principal balance, earned

interest, and any other amounts owed on the obligation immediately due. Markwardt waives all demand for payment, presentation for payment, notice of intention to accelerate maturity, notice of acceleration of maturity, protest, and notice of protest.

22. IT IS FURTHER ORDERED that Markwardt, by his signature below, hereby acknowledges notice of this Agreed Judgment and acceptance of the same; therefore, no injunctive writ need be issued. Plaintiff may enforce the Agreed Judgment through any procedure or process available under the laws of the State of Texas.

23. IT IS FURTHER ORDERED that Markwardt shall not represent to the public that this Agreed Judgment constitutes approval by the State or this Court of any of Markwardt's actions or business practices.

24. IT IS FURTHER ORDERED that this Agreed Judgment is final as to Markwardt and disposes of all claims between the parties in this cause. All relief asserted or which could have been asserted among the parties to this Agreed Judgment hereto based on the legal and factual allegations not expressly granted herein is denied.

25. IT IS FURTHER ORDERED that all costs of court expended or incurred in this cause are adjudged against the party incurring the same.

SIGNED this ____ day of 09/27/2021, 2021.

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

TO THE HONORABLE DISTRICT JUDGE:

On this 28 day of June, 2021, came for hearing on the above-entitled and numbered cause in which the State of Texas (State), acting by and through its Attorney General, KEN PAXTON, is Plaintiff and Cornwell Enterprises, Inc. d/b/a Springhill Suites By, Marriott Hotel and Vishal Hotel, L.P. d/b/a Springhill Suites By, Marriott Hotel (Defendant) is Defendant. In this action, the State alleges that Defendant engaged in false, misleading, and deceptive acts and practices in violation of § 17.46 of the Deceptive Trade Practices-Consumer Protection Act ("DTPA"), TEX. BUS. & COM. CODE § 17.41 *et seq*. Specifically, the State alleges that Defendant violated the DTPA because it took advantage of a disaster declared by the Texas Governor under Chapter 418 of the Government Code by demanding or charging excessive prices for lodging. The parties, by and through their attorneys of record, have made the following stipulations and agree to the entry of this Agreed Final Judgment and Permanent Injunction (AFJPI) as a compromise and settlement of disputed claims.

STIPULATIONS

1. The Court has jurisdiction over the subject matter and parties in this action under the DTPA.

2. This AFJPI does not constitute an approval of Defendant's business and practices by the State or the Court and Defendant shall make no representation or claim to the contrary. Defendant continues to deny any illegal conduct and denies all liability but enters into this AFJPI only to buy its peace.

3. The parties agree to the entry of this AFJPI and agree that the Court has continuing jurisdiction to enforce this AFJPI.

4. This AFJPI sets forth the entire agreement between the parties and there are no other representations or agreements between the parties not stated in writing herein.

5. Defendant is aware of the terms and duties placed upon it by the AFJPI, acknowledges that it has fully read and understands this AFJPI, accepts the legal consequences involved in signing this AFJPI, and represents that it is desirous and capable of carrying out the terms and duties of this AFJPI in full.

6. Defendant acknowledges receipt of copies of this AFJPI.

7. The parties agree that, should any clause, provision, or section of this AFJPI, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this AFJPI, and this AFJPI shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

8. The parties agree to waive the thirty (30) day period in which to file a Motion for New Trial and waive any and all rights to appeal this AFJPI.

FINDINGS

9. Having reviewed the pleadings in this case and the stipulations of the parties, the Court hereby finds as follows:

a. The Court has jurisdiction over the parties;

b. The Court has jurisdiction over the subject matter of this action;

c. Venue is proper in Nueces County, Texas;

d. Entry of this AFJPI is in the public interest; and

e. The issuance and service of a writ of injunction are waived.

PERMANENT INJUNCTION

10. IT IS FURTHER ORDERED that Cornwell Enterprises, Inc. d/b/a Springhill Suites By, Marriott Hotel and Vishal Hotel, L.P. d/b/a Springhill Suites By, Marriott Hotel, its officers, agents, servants, employees, and those persons in active concert or participation with it who receive actual notice of the AFJPI by personal service or otherwise are hereby PERMANENTLY ENJOYED from the following:

a. Taking advantage of any disaster, declared by the Governor under Chapter 418 of the Government Code, by offering accommodations or other necessities at an exorbitant or excessive price;

b. Collecting state and local taxes from disaster victims, personnel participating in relief operations, or person identified by the Governor's declaration during a disaster declared by the Governor of Texas when such taxes have been suspended by the Governor pursuant to Chapter 418 of the Government Code;

c. Violating any regulation, proclamation, declaration, or executive order made by the Governor pursuant to Chapter 418 of the Government Code;

d. Failing to provide a sales-tax-exemption certificate to any disaster victim any time the Governor suspends the Hotel Occupancy Tax pursuant to Chapter 418 of the Government Code;

e. Failing to obtain a sales-tax-exemption certificate from evacuees;

f. Failing to maintain a registration system to record the identity and contact information from guests of the hotel or motel including the guests' names, addresses, the length of their stay, and the price charged per day; and

g. Altering, destroying or mutilating records ordered to be kept pursuant to Subparagraphs E and F above for a three-year period after the disaster declaration, provided the matter is not in litigation. If the matter is in litigation, records shall not be altered, destroyed or mutilated until a three-year period following the entry of a final judgment, not subject to further appeal.

MONETARY JUDGMENT

11. IT IS FURTHER ORDERED that the State shall have judgment against Defendant for civil penalties and court costs in the amount of FIVE THOUSAND DOLLARS ($5,000).

12. IT IS FURTHER ORDERED that the State shall have judgment against Defendant for attorneys' fees and court costs in the amount of FIVE THOUSAND DOLLARS ($5,000).

13. IT IS FURTHER ORDERED that the State shall have judgment against Defendant for consumer restitution in the amount of TWENTY THOUSAND DOLLARS ($20,000).

14. IT IS FURTHER ORDERED that the State will distribute restitution under the following procedures: The State will send a claim form to eligible consumers. Eligible consumers are consumers who stayed at Defendant's hotel during the aftermath of Hurricane Harvey between the dates of August 24, 2017 and September 30, 2017 and who paid a room rate that increased by 66% or more over Defendant's price for that room during the three months preceding August 2017. Distribution of restitution will be limited to eligible consumers who return the claim form before the deadline. The State will determine if the claim form has been properly completed and timely submitted, and determine the specific refund amount each eligible consumer will receive. Consumers may receive pro rata refund amounts, if claimed amounts by eligible consumers exceed the restitution payments. If the full claimed amounts by all eligible consumers is less than the

restitution award, any residual amounts for such unlocated eligible guests will be allocated to the Supreme Court Judicial Fund as a civil penalty pursuant to Sec. 402.007(b)(1) of the Texas Government Code. Checks sent to eligible consumers which are returned to the State shall be treated in accordance with the State of Texas' unclaimed property laws.

15. IT IS FURTHER ORDERED that Defendant will cooperate with reasonable requests from Plaintiff for consumer information for the purpose of restitution distribution.

16. IT IS FURTHER ORDERED that Defendant's payment of these monetary amounts to the State shall be paid upon entry of this Judgment by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX4059211467 and if not by wire transfer, deliver/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

MISCELLANEOUS PROVISIONS

17. IT IS FURTHER ORDERED that nothing in this AFJPI shall create any private rights, causes of action, or remedies against Defendant and nothing in the Agreed Judgment shall be construed as a waiver of any private rights, causes of action, or remedies of any person against Defendant with respect to the practices of conduct described herein.

18. IT IS FURTHER ORDERED that Defendant's indebtedness to the State identified above are for alleged violations of the DTPA, which alleged violations Defendant continues to deny; however, Defendant agrees to make payment as part of the settlement.

19. IT IS FURTHER ORDERED that the State shall be permitted to abstract the judgment as provided by law, but will forbear execution so long as payment is made pursuant to the terms of the AFJPI.

20. IT IS FURTHER ORDERED that Defendant, by its signature below, hereby

acknowledges notice of this AFJPI and acceptance of the same. Plaintiff may enforce the AFJPI through any procedure or process available under the laws of the State of Texas.

21. IT IS FURTHER ORDERED that Defendant shall not represent to the public that this AFJPI constitutes approval by the State or this Court of any of Defendant's actions or business practices.

22. IT IS FURTHER ORDERED that this AFJPI is final as to all parties and disposes of all claims asserted by the parties in this instant case. All relief asserted or which could have been asserted among the parties to this AFJPI hereto based on the legal and factual allegations in this underlying cause for alleged violations of the DTPA not expressly granted herein is denied. The State hereby fully releases, waives, and discharges Defendant and its officers, agents, representatives, and employees from any claims arising out of or related to facts alleged in this underlying cause which were brought or could have been brought in a consumer protection action, including claims for alleged violations of the DTPA, prior to the date this AFJPI is entered by the Court. This AFJPI does not, however, affect the rights of or remedies available to any third party that is not subject to this order, except as provided by law.

SIGNED this 28 day of June, 2021.

DEC 11 2018
DAVID R. LLOYD
DISTRICT CLERK - JOHNSON COUNTY, TEXAS
BY DEPUTY

NO. DC-C201700674

THE STATE OF TEXAS, Plaintiff,	§	IN THE DISTRICT COURT
v.	§	
SUN MACRO CORPORATION D/B/A BIG WILLY'S; MR. GROUP, INC. D/B/A BIG WILLY'S; AND STAR IMPEX, INC. D/B/A BIG WILLY'S, HAPPY HILL GROCERY, and LUCKY MART, Defendants.	§	JOHNSON COUNTY, TEXAS
	§	18TH JUDICIAL DISTRICT

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

TO THE HONORABLE JUDGE OF SAID COURT:

On this 11 day of Dec, 2018, came on to be heard the above-entitled and numbered cause wherein the STATE OF TEXAS (State) is Plaintiff and Sun Macro Corporation d/b/a Big Willy's; Mr. Group, Inc. d/b/a Big Willy's; and Star Impex, Inc. d/b/a Big Willy's, Happy Hill Grocery, and Lucky Mart, are Defendants (hereinafter "Defendants"). In this action, the State alleges that following the Texas Governor's disaster declaration due to Hurricane Harvey, Defendants engaged in price gouging by charging consumers up to $4.99 per gallon of regular unleaded grade gasoline in violation of § 17.46 of the Texas Deceptive Trade Practices Act, Tex. Bus. & Com. Code (DTPA). Specifically, the State alleges that Defendants violated the DTPA because they took advantage of a disaster declared by the governor under Chapter 418 of the Government Code by selling fuel at an exorbitant or excessive price or by demanding an exorbitant or excessive price in connection with the sale of fuel. The parties, by and through their attorneys of record, have made the following stipulations and agree to the entry of this Agreed Final

Judgment and Permanent Injunction (Agreed Judgment) as a compromise and settlement of disputed claims.

STIPULATIONS

1. The Court has jurisdiction over the subject matter and parties in this action under the DTPA;

2. This Agreed Judgment does not constitute approval by the State or the Court of Defendants' business practices, and Defendants shall make no representation or claim to the contrary;

3. The parties agree to and do not contest the entry of this Agreed Judgment and agree that the Court has continuing jurisdiction to enforce this Agreed Judgment;

4. This Agreed Judgment sets forth the entire agreement between the parties, and there are no other representations or agreements between the parties not stated in writing herein;

5. Defendants are aware of the terms and duties placed upon them by the Agreed Judgment, acknowledge that they have fully read and understand this Agreed Judgment, accept the legal consequences involved in signing this Agreed Judgment, and represent that they are desirous and capable of carrying out the terms and duties of this Agreed Judgment in full;

6. Defendants acknowledge receipt of copies of this Agreed Judgment;

7. The parties have compromised and settled all claims alleged by the State in this cause without the necessity of a trial, and this Agreed Judgment does not constitute an admission by Defendants of any violation of law or regulation;

8. The parties agree that nothing in this Agreed Judgment shall be constructed to affect any action or proceeding by any regulatory body or other state agency, whether such action or proceeding is related to any issue addressed by this Agreed Judgment or otherwise; and

9. The parties agree that, should any clause, provision, or section of this Agreed Judgment, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this Agreed Judgment, and this Agreed Judgment shall be construed and enforced as if such illegal, invalid, or unenforceable clause, provision, or section had not been contained herein.

FINDINGS

10. Having reviewed the pleadings in this case and the stipulations of the parties, the Court hereby finds as follows:

a. The Court has jurisdiction over the parties;

b. The Court has jurisdiction over the subject matter of this action;

c. Venue is proper in Johnson County, Texas;

d. Entry of this Agreed Judgment is in the public interest; and

e. The issuance and service of a writ of injunction are waived.

FACTUAL BACKGROUND

11. On August 23, 2017, Governor Greg Abbott declared a State of Disaster under Texas Government Code § 418.014 anticipating the landfall of then Tropical Storm Harvey (Harvey State of Disaster).

12. On August 25, 2017, Hurricane Harvey made landfall on the Texas Gulf Coast.

13. On September 1, 2017, Governor Abbott issued a price gouging declaration emphasizing the unlawful practice of price gouging: "Texans impacted by this disaster are particularly vulnerable to economic exploitation during this challenging time . . . Texas law prohibits price gouging and gives the attorney general the authority to prosecute anyone throughout Texas who takes advantage of a declared disaster by charging an exorbitant or excessive price for fuel."

14. Defendants operate fuel stations located in multiple cities in Texas, namely, Burleson, Mansfield, Arlington, Lake Worth, Joshua, Cleburne, Mineral Wells, and Alvarado, that sold fuel to consumers during the Harvey State of Disaster.

15. The Attorney General's Consumer Protection Division received complaints from consumers that Defendants were charging up to $4.99 per gallon of regular unleaded grade gasoline during the Harvey State of Disaster.

DEFINITIONS

16. **IT IS ORDERED** that, as used in this Agreed Judgment, the following terms are defined as follows:

a. "Claims Administrator" means the entity selected by the State of Texas to administer the restitution claims for this settlement;

b. "Defendants," "You," or "Yours" means Sun Macro Corporation d/b/a Big Willy's; Mr. Group, Inc. d/b/a Big Willy's; and Star Impex, Inc. d/b/a Big Willy's, Happy Hill Grocery, and Lucky Mart, their officers, agents, subcontractors, servants, employees, and attorneys, and any other persons in active concert or participation with Defendants;

c. "Effective Date" means the date on which this Agreed Judgment is entered by the Court;

d. "Eligible Consumer" shall mean any consumer who paid $3.99 per gallon or more for fuel from August 31, 2017, through September 6, 2017, at Defendants' facilities located at the following addresses, and who timely and correctly fills out and submits a claim form to the Claims Administrator:

i. 1595 East Broad Street, Mansfield, Texas 76063;

ii. 4500 South Bowen Road, Arlington, Texas 76017;

iii. 6051 Lake Worth Boulevard, Lake Worth, Texas 76135;

iv. 216 NW Renfro Street, Burleson, Texas 76028;

v. 500 South Broadway Street, Joshua, Texas 76058;

vi. 707 East Jefferson Avenue, Whitney, Texas 76692;

vii. 710 South Main Street, Cleburne, Texas 76033;

viii. 1703 E Hubbard Street, Mineral Wells, Texas 76067;

ix. 420 North Broadway Street, Joshua, Texas 76058;

x. 3841 Cummings Drive, Alvarado, Texas 76009; and

xi. 8101 E FM 917, Alvarado, Texas 76009;

e. "Refund Amount" shall be the difference between the price paid by an Eligible Consumer and the average price for the same grade of fuel charged by Defendants on August 30, 2017; and

f. "State of Disaster" means the period designated by the Governor's disaster declaration pursuant to Chapter 418 of the Government Code.

PERMANENT INJUNCTION

17. **IT IS FURTHER ORDERED** that Defendants, their officers, agents, servants, employees, and attorneys, and those persons in active concert or participation with Defendants who receive actual notice of the Agreed Final Judgment and Permanent Injunction by personal service or otherwise, are hereby permanently ENJOINED from the following:

a. Demanding an exorbitant or excessive price for fuel or selling fuel at an exorbitant or excessive price during a State of Disaster. Defendants' price for fuel is presumed exorbitant or excessive when the price per gallon during a State of Disaster is

greater than 125 percent of Defendants' 30-day average price per gallon immediately prior to the State of Disaster, unless Defendants can demonstrate through their written records that the price increase is attributable to additional fuel supply costs incurred by Defendants.

18. **IT IS FURTHER ORDERED** that during any future State of Disaster and for a minimum of six months following the expiration of such State of Disaster, Defendants shall cease any ongoing or scheduled document or data destruction and shall preserve records reflecting:

a. Each individual fuel sale transaction, including price per gallon and gallons purchased;

b. The dates, times, and amounts of changes in fuel prices; and

c. All fuel supply costs incurred by Defendants.

CONSUMER RESTITUTION

19. **IT IS FURTHER ORDERED** that Defendants shall pay restitution as follows:

a. If Defendants are able to identify and segregate credit/debit card payments from cash transactions for fuel, Defendants shall issue a chargeback or other automatic refund of the Refund Amount directly to each Eligible Consumer. Within 14 days of the Effective Date of this Agreed Judgment, Defendants will provide the State a list of consumers who received chargebacks under this provision. Such information shall include the Refund Amounts and the names of the persons receiving the chargebacks; and

b. If Defendants are not able to identify and segregate credit/debit card payments from cash transactions for fuel, and/or if Defendants have additional consumers who made cash payments for their fuel transactions, Defendants shall disgorge to the

State of Texas the amount of TWENTY-SEVEN THOUSAND FOUR AND NO/100 DOLLARS ($27,004.00) for these consumers. The State shall have Judgment against Defendants, jointly and severally, in the amount of $27,004.00. This $27,004.00 payment will be referred to as the Restitution Payment. Defendants' payment to the State of Texas shall be made by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX4753181818 and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

20. **IT IS FURTHER ORDERED** that the procedures for the distribution of the Restitution Payment are as follows:

a. The State will remit the Restitution Payment to the Claims Administrator to pay refunds and the costs of administration;

b. The parties have agreed to the use of the attached claim form or a substantially similar form agreed to by the parties. The Claims Administrator may begin accepting claim forms by December 1, 2018. The Claims Administrator will not accept claim forms later than January 31, 2019, which will be the Claims Deadline Date. No refunds will be distributed by the Claims Administrator until after the Claims Deadline Date passes. Eligible Consumers who properly complete the claim form will be eligible to receive a refund payment;

c. The Claims Administrator will have discretion, in consultation with the State of Texas, to determine if the claim form has been properly completed and timely submitted, and to determine the specific Refund Amount each Eligible Consumer

will receive. Once all Eligible Consumers have received their Refund Amounts, and once the administration costs have been paid, the Claims Administrator, in consultation with the State of Texas, may pay additional Refund Amounts to other consumers filing claims, and may also pay additional Refund Amounts to Eligible Consumers in other price gouging settlements the State has entered into;

d. Eligible Consumers may receive pro rata Refund Amounts, if full payment is not available for all Eligible Consumers;

e. Once all Refund Amounts and costs of administration have been deducted from the Restitution Payment, any residual amounts will be allocated to the Supreme Court Judicial Fund as a civil penalty pursuant to § 402.007(b)(1) of the Texas Government Code;

f. After the Claims Deadline Date, the Claims Administrator will prepare such report as the State may require; and

g. Checks returned to the Claims Administrator shall be treated in accordance with the State of Texas' unclaimed property laws.

ATTORNEY'S FEES

21. **IT IS FURTHER ORDERED** that the State shall have judgment against Defendants, jointly and severally, for attorney's fees and court costs in the amount of NINE THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($9,500.00).

22. **IT IS FURTHER ORDERED** that Defendants' payments to the State for attorney's fees and court costs shall be made by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX4753181818, and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th

St., MC-003, Austin, TX 78701.

MISCELLANEOUS PROVISIONS

23. **IT IS FURTHER ORDERED** that Defendants' payments to the State for restitution and attorney's fees and court costs, referenced in paragraphs 19.b and 22, respectively, shall be made in accordance with the following schedule: Defendants shall pay SIX THOUSAND AND NO/100 DOLLARS ($6,000.00) to the State within 10 days of the Effective Date; Defendants shall pay the remaining THIRTY THOUSAND FIVE HUNDRED FOUR AND NO/100 DOLLARS ($30,504.00) in four installments of SEVEN THOUSAND SIX HUNDRED TWENTY-SIX AND NO/100 DOLLARS ($7,626.00) with the first installment due within ninety (90) days after the Effective Date, the second installment due within one hundred and eighty (180) days after the Effective Date, the third installment due within two hundred and seventy (270) days after the Effective Date, and the remainder due within three hundred and sixty-five (365) days after the Effective Date.

24. **IT IS FURTHER ORDERED** that nothing in the Agreed Judgment shall be construed as a waiver of any private rights, causes of action, or remedies of any person against Defendants with respect to the practices or conduct described herein.

25. **IT IS FURTHER ORDERED** that to the extent that the provisions of this Agreed Judgment conflict with any Texas, local, or federal law or regulation that now exists, or is later enacted or amended, such law or regulation, and not this Agreed Judgment shall apply. For the purpose of this Agreed Judgment, such conflict exists if conduct prohibited by this Agreed Judgment is required or expressly permitted by such Texas, local, or federal law or regulation, or if conduct required by this Agreed Judgment is prohibited by such Texas, local, or federal law or regulation.

26. **IT IS FURTHER ORDERED** that the terms of this Agreed Judgment are not intended to alter Defendants' lawful contractual obligations with their fuel distributor(s) and supplier(s).

27. **IT IS FURTHER ORDERED** that Defendants' indebtedness to the State identified above is for alleged violations of the DTPA.

28. **IT IS FURTHER ORDERED** that payment to the State will be allocated in the following order until each is fully paid: (1) restitution; and (2) attorney's fees and court costs.

29. **IT IS FURTHER ORDERED** that Defendants, by the signature below of their legal representative, hereby acknowledge notice of this Agreed Judgment and acceptance of the same. Plaintiff may enforce the Agreed Judgment through any procedure or process available under the laws of the State of Texas.

30. **IT IS FURTHER ORDERED** that this Agreed Judgment is final as to all parties and disposes of all claims asserted by the parties in this instant case. All relief asserted or which could have been asserted among the parties to this Agreed Judgment hereto based on the legal and factual allegations in this underlying cause for alleged violations of the DTPA not expressly granted herein is denied. The State hereby fully releases, waives, and discharges Defendants and their officers, agents, representatives, and employees from any claims arising out of or related to facts alleged in this underlying cause for alleged violations of the DTPA prior to the date this Agreed Judgment is entered by the Court. This Agreed Judgment does not, however, affect the rights of or remedies available to any third party that is not subject to this order.

SIGNED this 11 day of Dec 2018.

No. 17-09-00133-CVL

STATE OF TEXAS, **Plaintiff,**	§	**IN THE DISTRICT COURT**
v.	§	**LA SALLE COUNTY, TEXAS**
ENCINAL FUEL, LLC d/b/a ENCINAL FUEL STOP, **Defendant.**	§	**81st JUDICIAL DISTRICT**

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

TO THE HONORABLE JUDGE OF SAID COURT:

On this 16th day of May, 2019, came on to be heard the above-entitled and numbered cause wherein the STATE OF TEXAS (State) is Plaintiff and ENCINAL FUEL, LLC d/b/a ENCINAL FUEL STOP (Encinal Fuel) is Defendant. In this action, the State alleges that following the Texas Governor's disaster declaration due to Hurricane Harvey, Defendant engaged in price gouging by charging consumers up to $9.99 per gallon of gasoline in violation of § 17.46 of the Texas Deceptive Trade Practices Act, Tex. Bus. & Com. Code (DTPA). Specifically, the State alleges that Defendant violated the DTPA because it took advantage of a disaster declared by the Texas Governor under Chapter 418 of the Government Code by selling fuel at an exorbitant or excessive price or demanding an exorbitant or excessive price in connection with the sale of fuel. The parties, by and through their attorneys of record, have made the following stipulations and agree to the entry of this Agreed Final Judgment and Permanent Injunction (Agreed Judgment) as a compromise and settlement of disputed claims.

VOL 0124 PG 0353

STIPULATIONS

1. The Court has jurisdiction over the subject matter and parties in this action under the DTPA.

2. This Agreed Judgment does not constitute an approval of Defendant's business practices by the State or the Court and Defendant shall make no representation or claim to the contrary.

3. The parties agree to and do not contest the entry of this Agreed Judgment and agree that the Court has continuing jurisdiction to enforce this Agreed Judgment.

4. This Agreed Judgment sets forth the entire agreement between the parties and there are no other representations or agreements between the parties not stated in writing herein.

5. Defendant is aware of the terms and duties placed upon it by the Agreed Judgment, acknowledges that it has fully read and understands this Agreed Judgment, accepts the legal consequences involved in signing this Agreed Judgment, and represents that it is desirous and capable of carrying out the terms and duties of this Agreed Judgment in full.

6. Defendant acknowledges receipt of copies of this Agreed Judgment.

7. The parties have compromised and settled all claims alleged by the State in this cause without the necessity of a trial and this Agreed Judgment does not constitute an admission by Defendant of any violation of law or regulation.

8. The parties agree that nothing in this Agreed Judgment shall be constructed to affect any action or proceeding by any regulatory body or other state agency, whether such action or proceeding is related to any issue addressed by this Agreed Judgment or otherwise.

9. The parties agree that, should any clause, provision, or section of this Agreed Judgment, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this Agreed Judgment, and this Agreed

VOL 0124PG0354

Judgment shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

10. The parties agree to waive the thirty (30) day period in which to file a Motion for New Trial and waive any and all rights to appeal this Agreed Judgment.

FINDINGS

11. Having reviewed the pleadings in this case and the stipulations of the parties, the Court hereby finds as follows:

a. The Court has jurisdiction over the parties;

b. The Court has jurisdiction over the subject matter of this action;

c. Venue is proper in La Salle County, Texas;

d. Entry of this Agreed Judgment is in the public interest; and

e. The issuance and service of a writ of injunction are waived.

FACTUAL BACKGROUND

12. On August 23, 2017, Governor Greg Abbott declared a State of Disaster under Texas Government Code section 418.014 anticipating the landfall of then Tropical Storm Harvey (Harvey State of Disaster).

13. On August 25, 2017, Hurricane Harvey made landfall on the Texas Gulf Coast.

14. On September 1, 2017, Governor Abbott issued a price gouging declaration emphasizing the unlawful practice of price gouging: "Texans impacted by this disaster are particularly vulnerable to economic exploitation during this challenging time . . . Texas law prohibits price gouging and gives the attorney general the authority to prosecute anyone throughout Texas who takes advantage of a declared disaster by charging an exorbitant or excessive price for fuel."

VOL 0124 PG 0355

15. Encinal Fuel operated a fuel station located in Encinal, Texas, that sold fuel to consumers from August 31, 2017 through September 3, 2017, which was during the Harvey State of Disaster.

16. The Attorney General's Consumer Protection Division received complaints from consumers that Defendant was charging up to $9.99 per gallon of gasoline during the Harvey State of Disaster.

DEFINITIONS

17. **IT IS ORDERED** that, as used in this Agreed Judgment, the following terms are defined as follows:

a. "Defendant," "You," or "Yours" means Encinal Fuel, LLC d/b/a Encinal Fuel Stop, its officers, agents, subcontractors, servants, employees, attorneys, and any other persons in active concert or participation with Encinal Fuel, LLC d/b/a Encinal Fuel Stop;

b. "State of Disaster" means the period designated by the Texas Governor's disaster declaration pursuant to Chapter 418 of the Government Code;

c. "Refund Amount" shall be the difference between the price paid by an Eligible Consumer and the average price for the same grade of fuel charged by Encinal Fuel on August 29, 2017;

d. "Claims Administrator" means the entity selected by the State of Texas to administer the restitution claims for this settlement;

e. "Effective Date" means the date on which this Agreed Judgment is entered by the Court; and

f. "Eligible Consumer" shall mean any consumer who paid $3.99 per gallon or more for fuel at the facility located at 28442 South IH-35, Encinal, La Salle County, Texas

VOL 0124 PG 0356

78019, on August 31, 2017 through September 3, 2017, and who timely and correctly fills out and submits a claim form to the Claims Administrator.

PERMANENT INJUNCTION

18. **IT IS FURTHER ORDERED** that Encinal Fuel, its officers, agents, servants, employees, attorneys, and those persons in active concert or participation with it who receive actual notice of the Agreed Judgment by personal service or otherwise are hereby **PERMANENTLY ENJOINED** from demanding an exorbitant or excessive price for fuel or selling fuel at an exorbitant or excessive price during a State of Disaster. Defendant's price for fuel is presumed exorbitant or excessive when the price per gallon during a State of Disaster is greater than 125 percent of Defendant's 30-day average price per gallon immediately prior to the State of Disaster, unless Defendant can demonstrate through its written records that the price increase is attributable to additional fuel supply costs incurred by Defendant.

19. **IT IS FURTHER ORDERED** that during any future State of Disaster and for a minimum of six months following the expiration of such State of Disaster, Defendant shall cease any ongoing or scheduled document or data destruction and shall preserve records reflecting:

a. Each individual fuel sale transaction including price per gallon and gallons purchased;

b. The dates, times, and amounts of changes in fuel prices; and

c. All fuel supply costs incurred by Defendant.

CONSUMER RESTITUTION

20. **IT IS FURTHER ORDERED** that Defendant shall pay to the State of Texas the amount of SEVENTEEN THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($17,500.00) for consumers. This $17,500.00 payment will be referred to as the Restitution Payment. Consumers

who have already been issued full refunds by Defendant will not be eligible to receive restitution. Defendant's payment to the State shall be made by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX5282824539 and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

21. **IT IS FURTHER ORDERED** that the procedures for the distribution of the Restitution Payment are as follows:

a. The State will remit the Restitution Payment to the Claims Administrator to pay refunds and the costs of administration;

b. The parties have agreed to the use of the attached claim form or a substantially similar form agreed to by the parties. The Claims Administrator may begin accepting claim forms by April 23, 2019. The Claims Administrator will not accept claim forms later than June 30, 2019, which will be the Claims Deadline Date. No refunds will be distributed by the Claims Administrator until after the Claims Deadline Date passes. Eligible Consumers who properly complete the claim form will be eligible to receive a refund payment;

c. The Claims Administrator will have discretion, in consultation with the State of Texas, to determine if the claim form has been properly completed and timely submitted, and to determine the specific Refund Amount each Eligible Consumer will receive. Once all Eligible Consumers have received their Refund Amount, and once the administration costs have been paid, the Claims Administrator, in consultation with the State of Texas, may pay additional Refund Amounts to other

VOL 0124 PG 0358

consumers filing claims, and may also pay additional Refund Amounts to Eligible Consumers in other price gouging settlements the State has entered into;

d. Eligible Consumers may receive pro rata Refund Amounts, if full payment is not available for all Eligible Consumers;

e. Once all Refund Amounts and costs of administration have been deducted from the Restitution Payment, any residual amounts will be allocated to the Supreme Court Judicial Fund as a civil penalty pursuant to Sec. 402.007(b)(1) of the Texas Government Code;

f. After the Claims Deadline Date, the Claims Administrator will prepare such report as the State may require; and

g. Checks returned to the Claims Administrator shall be treated in accordance with the State of Texas' unclaimed property laws.

ATTORNEYS' FEES

22. **IT IS FURTHER ORDERED** that the State shall have judgment against Defendant for attorneys' fees and court costs in the amount of FIVE THOUSAND AND NO/100 DOLLARS ($5,000.00).

23. **IT IS FURTHER ORDERED** that Defendant's payments to the State for attorneys' fees and court costs shall be paid by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX5282824539 and if not by wire transfer, deliver/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

VOL 0124 PG 0359

MISCELLANEOUS PROVISIONS

24. **IT IS FURTHER ORDERED** that Defendant's payment to the State in the amount of TWENTY-TWO THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($22,500.00) for restitution and attorneys' fees and court costs referenced in Paragraphs 20.b and 22-23, respectively, shall be made upon execution of the Agreed Judgment by the parties.

25. **IT IS FURTHER ORDERED** that nothing in this Agreed Judgment shall create any private rights, causes of action, or remedies against Defendant and nothing in the Agreed Judgment shall be construed as a waiver of any private rights, causes of action, or remedies of any person against Defendant with respect to the practices or conduct described herein.

26. **IT IS FURTHER ORDERED** that to the extent that the provisions of this Agreed Judgment conflict with any Texas, local, or federal law or regulation that now exists, or is later enacted or amended, such law or regulation, and not this Agreed Judgment shall apply. For the purpose of this Agreed Judgment, such conflict exists if conduct prohibited by this Agreed Judgment is required or expressly permitted by such Texas, local, or federal law or regulation, or if conduct required by this Agreed Judgment is prohibited by such Texas, local or federal law or regulation.

27. **IT IS FURTHER ORDERED** that the terms of this Agreed Judgment are not intended to alter Defendant's lawful contractual obligations with its fuel distributor(s) and supplier(s).

28. **IT IS FURTHER ORDERED** that Defendant's indebtedness to the State identified above are for alleged violations of the DTPA.

29. **IT IS FURTHER ORDERED** that the State shall be permitted to abstract the judgment as provided by law, but will forbear execution so long as payment is made pursuant to the terms of the Agreed Judgment.

VOL 0124 PG 0360

30. **IT IS FURTHER ORDERED** that Defendant, by its signatures below, hereby acknowledges notice of this Agreed Judgment and acceptance of the same. Plaintiff may enforce the Agreed Judgment through any procedure or process available under the laws of the State of Texas.

31. **IT IS FURTHER ORDERED** that Defendant shall not represent to the public that this Agreed Judgment constitutes approval by the State or this Court of any of Defendant's actions or business practices.

32. **IT IS FURTHER ORDERED** that this Agreed Judgment is final as to all parties and disposes of all claims asserted by the parties in this instant case. All relief asserted or which could have been asserted among the parties to this Agreed Judgment hereto based on the legal and factual allegations in this underlying cause for alleged violations of the DTPA not expressly granted herein is denied. The State hereby fully releases, waives, and discharges Defendant and its officers, agents, representatives, and employees from any claims arising out of or related to facts alleged in this underlying cause for alleged violations of the DTPA prior to the date this Agreed Judgment is entered by the Court. This Agreed Judgment does not, however, affect the rights of or remedies available to any third party that is not subject to this order.

SIGNED this 16 day of May 2019.

AMENDED

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

TO THE HONORABLE JUDGE OF SAID COURT:

On this _____ day of _____, 2019, came on to be heard the above-entitled and numbered cause wherein the STATE OF TEXAS (State) is Plaintiff and LAFAYETTE C-STORE, LLC d/b/a TEJANO MART 505 (Lafayette C-Store) is Defendant. In this action, the State alleges that following the Texas Governor's disaster declaration due to Hurricane Harvey, Defendant engaged in price gouging by charging consumers up to $9.99 per gallon of gasoline in violation of § 17.46 of the Texas Deceptive Trade Practices Act, Tex. Bus. & Com. Code (DTPA). Specifically, the State alleges that Defendant violated the DTPA because it advertised fuel with intent not to sell it as advertised and took advantage of a disaster declared by the Texas Governor under Chapter 418 of the Government Code by selling fuel at an exorbitant or excessive price or demanding an exorbitant or excessive price in connection with the sale of fuel. The parties, by and through their attorneys of record, have made the following stipulations and agree to the entry of this Agreed Final Judgment and Permanent Injunction (Agreed Judgment) as a compromise and settlement of disputed claims.

STIPULATIONS

1. The Court has jurisdiction over the subject matter and parties in this action under the DTPA.

2. This Agreed Judgment does not constitute an approval of Defendant's business practices by the State or the Court and Defendant shall make no representation or claim to the contrary.

3. The parties agree to and do not contest the entry of this Agreed Judgment and agree that the Court has continuing jurisdiction to enforce this Agreed Judgment.

4. This Agreed Judgment sets forth the entire agreement between the parties and there are no other representations or agreements between the parties not stated in writing herein.

5. Defendant is aware of the terms and duties placed upon it by the Agreed Judgment, acknowledges that it has fully read and understands this Agreed Judgment, accepts the legal consequences involved in signing this Agreed Judgment, and represents that it is desirous and capable of carrying out the terms and duties of this Agreed Judgment in full.

6. Defendant acknowledges receipt of copies of this Agreed Judgment.

7. The parties have compromised and settled all claims alleged by the State in this cause without the necessity of a trial and this Agreed Judgment does not constitute an admission by Defendant of any violation of law or regulation.

8. The parties agree that nothing in this Agreed Judgment shall be constructed to affect any action or proceeding by any regulatory body or other state agency, whether such action or proceeding is related to any issue addressed by this Agreed Judgment or otherwise.

9. The parties agree that, should any clause, provision, or section of this Agreed Judgment, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this Agreed Judgment, and this Agreed

Judgment shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

10. The parties agree to waive the thirty (30) day period in which to file a Motion for New Trial and waive any and all rights to appeal this Agreed Judgment.

FINDINGS

11. Having reviewed the pleadings in this case and the stipulations of the parties, the Court hereby finds as follows:

a. The Court has jurisdiction over the parties;

b. The Court has jurisdiction over the subject matter of this action;

c. Venue is proper in Webb County, Texas;

d. Entry of this Agreed Judgment is in the public interest; and

e. The issuance and service of a writ of injunction are waived.

FACTUAL BACKGROUND

12. On August 23, 2017, Governor Greg Abbott declared a State of Disaster under Texas Government Code section 418.014 anticipating the landfall of then Tropical Storm Harvey (Harvey State of Disaster).

13. On August 25, 2017, Hurricane Harvey made landfall on the Texas Gulf Coast.

14. On September 1, 2017, Governor Abbott issued a price gouging declaration emphasizing the unlawful practice of price gouging: "Texans impacted by this disaster are particularly vulnerable to economic exploitation during this challenging time . . . Texas law prohibits price gouging and gives the attorney general the authority to prosecute anyone throughout Texas who takes advantage of a declared disaster by charging an exorbitant or excessive price for fuel."

15. Lafayette C-Store operated a fuel station located in Laredo, Texas, that sold fuel to consumers from August 31, 2017 through September 3, 2017, which was during the Harvey State of Disaster.

16. The Attorney General's Consumer Protection Division received complaints from consumers that Defendant was charging up to $9.99 per gallon of gasoline during the Harvey State of Disaster.

DEFINITIONS

17. **IT IS ORDERED** that, as used in this Agreed Judgment, the following terms are defined as follows:

a. "Defendant," "You," or "Yours" means Lafayette C-Store, LLC d/b/a Tejano Mart 505, its officers, agents, subcontractors, servants, employees, attorneys, and any other persons in active concert or participation with Lafayette C-Store, LLC d/b/a Tejano Mart 505;

b. "State of Disaster" means the period designated by the Texas Governor's disaster declaration pursuant to Chapter 418 of the Government Code;

c. "Refund Amount" shall be the difference between the price paid by an Eligible Consumer and the average price for the same grade of fuel charged by Lafayette C-Store on August 27, 2017, for regular and plus grades, and August 28, 2017, for premium grade;

d. "Claims Administrator" means the entity selected by the State of Texas to administer the restitution claims for this settlement;

e. "Effective Date" means the date on which this Agreed Judgment is entered by the Court; and

f. "Eligible Consumer" shall mean any consumer who paid $3.99 per gallon or more for fuel at the facility located at 502 Lafayette Street, Laredo, Webb County, Texas 78041, on August 31, 2017, and who timely and correctly fills out and submits a claim form to the Claims Administrator.

PERMANENT INJUNCTION

18. **IT IS FURTHER ORDERED** that Lafayette C-Store, its officers, agents, servants, employees, attorneys, and those persons in active concert or participation with it who receive actual notice of the Agreed Judgment by personal service or otherwise are hereby **PERMANENTLY ENJOINED** from:

a. Collecting or attempting to collect a price per gallon of fuel that is other than the price posted at the fuel pump;

b. Collecting or attempting to collect a price per gallon of fuel other than the price posted on signage located at or near the dispensing pump or visible from the street; and

c. Demanding an exorbitant or excessive price for fuel or selling fuel at an exorbitant or excessive price during a State of Disaster. Defendant's price for fuel is presumed exorbitant or excessive when the price per gallon during a State of Disaster is greater than 125 percent of Defendant's 30-day average price per gallon immediately prior to the State of Disaster, unless Defendant can demonstrate through its written records that the price increase is attributable to additional fuel supply costs incurred by Defendant.

19. **IT IS FURTHER ORDERED** that during any future State of Disaster and for a minimum of six months following the expiration of such State of Disaster, Defendant shall cease any ongoing or scheduled document or data destruction and shall preserve records reflecting:

a. Each individual fuel sale transaction including price per gallon and gallons purchased;

b. The dates, times, and amounts of changes in fuel prices; and

c. All fuel supply costs incurred by Defendant.

CONSUMER RESTITUTION

20. **IT IS FURTHER ORDERED** that Defendant shall pay to the State of Texas the amount of SEVENTEEN THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($17,500.00) for consumers. This $17,500.00 payment will be referred to as the Restitution Payment. Consumers who have already been issued full refunds by Defendant will not be eligible to receive restitution. Defendant's payment to the State shall be made by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX5192048165 and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

21. **IT IS FURTHER ORDERED** that the procedures for the distribution of the Restitution Payment are as follows:

a. The State will remit the Restitution Payment to the Claims Administrator to pay refunds and the costs of administration;

b. The parties have agreed to the use of the attached claim form or a substantially similar form agreed to by the parties. The Claims Administrator may begin accepting claim forms by April 23, 2019. The Claims Administrator will not accept claim forms later

than June 30, 2019, which will be the Claims Deadline Date. No refunds will be distributed by the Claims Administrator until after the Claims Deadline Date passes. Eligible Consumers who properly complete the claim form will be eligible to receive a refund payment;

c. The Claims Administrator will have discretion, in consultation with the State of Texas, to determine if the claim form has been properly completed and timely submitted, and to determine the specific Refund Amount each Eligible Consumer will receive. Once all Eligible Consumers have received their Refund Amount, and once the administration costs have been paid, the Claims Administrator, in consultation with the State of Texas, may pay additional Refund Amounts to other consumers filing claims, and may also pay additional Refund Amounts to Eligible Consumers in other price gouging settlements the State has entered into;

d. Eligible Consumers may receive pro rata Refund Amounts, if full payment is not available for all Eligible Consumers;

e. Once all Refund Amounts and costs of administration have been deducted from the Restitution Payment, any residual amounts will be allocated to the Supreme Court Judicial Fund as a civil penalty pursuant to Sec. 402.007(b)(1) of the Texas Government Code;

f. After the Claims Deadline Date, the Claims Administrator will prepare such report as the State may require; and

g. Checks returned to the Claims Administrator shall be treated in accordance with the State of Texas' unclaimed property laws.

ATTORNEYS' FEES

22. **IT IS FURTHER ORDERED** that the State shall have judgment against Defendant for attorneys' fees and court costs in the amount of FIVE THOUSAND AND NO/100 DOLLARS ($5,000.00).

23. **IT IS FURTHER ORDERED** that Defendant's payments to the State for attorneys' fees and court costs shall be paid by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX5192048165 and if not by wire transfer, deliver/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

MISCELLANEOUS PROVISIONS

24. **IT IS FURTHER ORDERED** that Defendant's payments to the State for restitution and attorneys' fees and court costs referenced in Paragraphs 20.b and 22-23, respectively, shall be made in accordance with the following schedule: an initial payment to the State of FIVE THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($5,500.00) within thirty (30) days of entry of the Agreed Judgment, and thereafter, five (5) consecutive monthly payments of THREE THOUSAND FOUR HUNDRED AND NO/100 DOLLARS ($3,400.00), with the first payment due on or before May 15, 2019, and a final payment due on or before September, 15, 2019. Payments to the State shall be allocated in the following order until each is fully paid: (1) restitution; and (2) attorney's fees and court costs.

25. **IT IS FURTHER ORDERED** that nothing in this Agreed Judgment shall create any private rights, causes of action, or remedies against Defendant and nothing in the Agreed Judgment shall be construed as a waiver of any private rights, causes of action, or remedies of any person against Defendant with respect to the practices or conduct described herein.

26. **IT IS FURTHER ORDERED** that to the extent that the provisions of this Agreed Judgment conflict with any Texas, local, or federal law or regulation that now exists, or is later enacted or amended, such law or regulation, and not this Agreed Judgment shall apply. For the purpose of this Agreed Judgment, such conflict exists if conduct prohibited by this Agreed Judgment is required or expressly permitted by such Texas, local, or federal law or regulation, or if conduct required by this Agreed Judgment is prohibited by such Texas, local or federal law or regulation.

27. **IT IS FURTHER ORDERED** that the terms of this Agreed Judgment are not intended to alter Defendant's lawful contractual obligations with its fuel distributor(s) and supplier(s).

28. **IT IS FURTHER ORDERED** that Defendant's indebtedness to the State identified above are for alleged violations of the DTPA.

29. **IT IS FURTHER ORDERED** that in consideration of the State's agreement to accept payments over time, Edelmiro Jose Martinez, as shown by his signature below, agrees to guaranty in his individual capacity, all payments hereunder, and if for any reason there is a default in payments, the full amount owed becomes due. The State shall be permitted to abstract the judgment as provided by law, but will forbear execution so long as payments are made pursuant to the terms of the Agreed Judgment.

30. **IT IS FURTHER ORDERED** that Defendant, by its signatures below, hereby acknowledges notice of this Agreed Judgment and acceptance of the same. Plaintiff may enforce the Agreed Judgment through any procedure or process available under the laws of the State of Texas.

31. **IT IS FURTHER ORDERED** that Defendant shall not represent to the public that this Agreed Judgment constitutes approval by the State or this Court of any of Defendant's actions or business practices.

32. **IT IS FURTHER ORDERED** that this Agreed Judgment is final as to all parties and disposes of all claims asserted by the parties in this instant case. All relief asserted or which could have been asserted among the parties to this Agreed Judgment hereto based on the legal and factual allegations in this underlying cause for alleged violations of the DTPA not expressly granted herein is denied. The State hereby fully releases, waives, and discharges Defendant and its officers, agents, representatives, and employees from any claims arising out of or related to facts alleged in this underlying cause for alleged violations of the DTPA prior to the date this Agreed Judgment is entered by the Court. This Agreed Judgment does not, however, affect the rights of or remedies available to any third party that is not subject to this order.

SIGNED this 13th day of May 2019.

Respondent.	§	_____ JUDICIAL DISTRICT

ASSURANCE OF VOLUNTARY COMPLIANCE

TO THE HONORABLE JUDGE OF SAID COURT:

COMES NOW, the STATE OF TEXAS ("State"), acting by and through its Attorney General, Ken Paxton, and Gopaul Investments, Inc., ("Respondent"), and respectfully submit the following Assurance of Voluntary Compliance ("AVC") for the Court's approval and filing in accordance with the Deceptive Trade Practices-Consumer Protection Act ("DTPA"),[1] section 17.58 of the Texas Business & Commerce Code.

PARTIES

1. The signatories to this AVC are the Petitioner, the State of Texas and the Respondent.

ACTS OF AGENTS

2. Whenever in this AVC it is alleged that Respondent did any act, it is meant that Respondent is alleged to have performed or participated in the act, or Respondent's, agents, or employees allegedly performed or participated in the act on behalf of and under the authority of the Respondent.

[1] TEX. BUS. & COM. CODE ANN. §17.41 *et seq.*

Filed 1/21/2020 11:58 AM
Heather B. Marks
District Clerk
San Patricio County, Texas

BACKGROUND

3. Pursuant to Texas law, it is illegal to take advantage of a disaster declared by the Governor by selling necessities, such as food, fuel, and medicine, at excessive or exorbitant prices. TEX. BUS. & COM. CODE § 17.46(b)(27). On August 23, 2017, and pursuant to Tex. Gov't Code §418.014, the Texas Governor initially declared a state of disaster for thirty counties, due to the threat of imminent disaster from then Tropical Depression Harvey, and the Governor extended the disaster proclamation on June 6, 2019. On August 25, 2017, and pursuant to Tex. Gov't Code § 418.020, the Texas Governor suspended all laws authorizing or requiring the collection of state or local hotel or motel occupancy taxes from the victims of Hurricane Harvey, or personnel participating in relief operations, and the Governor extended the suspension on September 21, 2017, for a suspension period of August 23, 2017 through October 23, 2017. On September 1, 2017, the Governor issued a proclamation reiterating that the price gouging laws in Texas apply throughout the state of Texas following a disaster declaration. Executive orders, proclamations, and regulations issued by the Governor have the force and effect of law. *See* TEX. GOV'T CODE § 418.012.

4. During the course of its investigation, the State alleged that once Hurricane Harvey made landfall, Respondent engaged in price gouging by offering, demanding, or charging excessive prices for lodging, thus allegedly taking advantage of disaster victims and personnel participating in relief operations. The State also alleges that in violation of the suspension of occupancy taxes issued by the Governor, Respondent continued to charge and collect state and local hotel occupancy taxes from Hurricane Harvey disaster victims and personnel participating in relief operations.

VIOLATIONS OF TEXAS DECEPTIVE TRADE PRACTICES

5. The State contends that such alleged conduct, if proven, would violate Sections 17.46(a), (b)(12), and (b)(27) of the DTPA.[2]

TERMS OF COMPLIANCE

6. Respondent, Respondent's officers, agents, servants, employees, and any other person in active concert or participation with Respondent, hereby agree and voluntarily assures the Office of the Attorney General of Texas effective the day of the entry of this AVC, that Respondent shall permanently refrain from:

(a) Taking advantage of any disaster, declared by the Governor under Chapter 418 of the Government Code, by advertising, offering for sale, or selling or leasing lodging or other necessities at an exorbitant or excessive price;

(b) Taking advantage of any disaster, declared by the Governor under Chapter 418 of the Government Code, demanding from consumers an exorbitant price or excessive price in connection with the sale or lease of lodging or other necessities;

(c) Collecting state and local taxes from disaster victims or personnel participating in relief operations, or persons identified by the Governor's declaration during a disaster declared by the Governor of Texas when such taxes have been suspended by the Governor pursuant to Chapter 418 of the

---

[2] § 17.46(a): "false, misleading, or deceptive acts or practices in the conduct of any trade or commerce;"
§ 17.46(b)(12): "representing that an agreement confers or involves rights, remedies, or obligations which it does not have or involve, or which are prohibited by law;"
§ 17.46(b)(27): "Taking advantage of a disaster, declared by the Governor under Chapter 418 of the Government Code, by offering, demanding, selling and/or leasing fuel, food, medicine, lodging, or other necessity at an exorbitant or excessive price."

Government Code;

(d) Violating any regulation, proclamation, declaration, or executive order made by the Governor pursuant to Chapter 418 of the Government Code;

(e) Failing to provide a sales-tax-exemption certificate to any disaster victim any time the Governor suspends the Hotel Occupancy Tax pursuant to Chapter 418 of the Government Code; and

(f) Failing to obtain a sales-tax-exemption certificate from evacuees.

MONETARY PROVISIONS

7. Respondent further agrees to pay the sum of TEN THOUSAND TWO HUNDRED FIFTY-SIX DOLLARS AND SEVENTY CENTS ($10,256.70) as restitution.

8. Respondent further agrees to pay the sum of TEN THOUSAND FIVE HUNDRED DOLLARS ($10,500) to the State of Texas as a civil penalty pursuant to DTPA § 17.47(c).

9. Respondent further agrees to pay the sum of TEN THOUSAND FIVE HUNDRED DOLLARS ($10,500) to the State of Texas for the State's reasonable attorneys' fees and investigative costs.

10. Respondent agrees to payments to the State in accordance with the following schedule: an initial $10,000 payment will be made upon execution of the AVC by the parties, with $3,000 payments due on February 1, 2020, May 1, 2020, August 1, 2020, December 1, 2020, February 1, 2021, May 1, 2021, and a final payment of $3,256.70 due on August 1, 2021. Payments will first be allocated to restitution, then to civil penalties, and then to attorneys' fees.

11. Respondent agrees to make such payment by certified check, money order, or wire

transfer, payable to the "Office of the Attorney General," bearing the reference AG No. CX0395241090, and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division MC-003, P.O. Box 12548, Austin, Texas 78711-2548.

12. The parties agree that restitution to consumers as provided in this AVC shall be through the Consumer Protection Division of the Office of the Attorney General. With respect to amounts of restitution that the STATE OF TEXAS may collect, it is hereby ordered that the review, determination, and allocations of amounts of money to be restored to consumers shall be within the sole discretion of the Consumer Protection Division. There are 174 consumers that the Consumer Protection Division has identified as being eligible for restitution pursuant to this settlement.

13. The parties agree that in the event the State is unable to disburse the entire restitution amount assessed herein, after exercising reasonable diligence to affect same, then and in that event, any residual restitution amounts will be allocated to the Supreme Court Judicial Fund as a civil penalty pursuant to Sec. 402.007(b)(1) of the Texas Government Code. In addition, any returned checks will be treated in accordance with the State of Texas' unclaimed property laws.

STIPULATIONS

14. The parties hereby agree and stipulate that:

(a) The Court has jurisdiction over the subject matter and the parties in this matter under the DTPA;

(b) The venue of this cause is proper in San Patricio County, Texas, pursuant

to DTPA § 17.58(a); and

(c) The State and Respondent agree to and do not contest the filing of this AVC.

GENERAL PROVISIONS

15. It is agreed and understood that nothing in this AVC shall be construed as a waiver of private rights, causes of action, or remedies of any person against Respondent with respect to any alleged act or practice described in this AVC. It is agreed and understood that nothing in this AVC will be construed to limit the authority of the Office of the Attorney General to seek enforcement in a court of competent jurisdiction of Respondent's compliance with the terms in this AVC.

16. The State and Respondent acknowledge, as set forth in Tex. Bus. & Com. Code §17.58(c), that unless this AVC is rescinded by agreement of the parties or voided by the Court for good cause, the subsequent failure to comply with the terms of this AVC is *prima facie* evidence of a violation of the DTPA in any action by the State of Texas acting by and through the Office of the Attorney General. Respondent does not waive and hereby expressly reserves all defenses to any claim that they have failed to comply with the terms of this AVC.

17. The State's agreement to this AVC does not constitute any approval by the State of any alleged practice of Respondent, and Respondent will not represent that this AVC constitutes approval by the Office of the Attorney General or the Court of any of Respondent's alleged practices.

18. Respondent's signature on this AVC does not constitute an admission of

wrongdoing or an admission of a violation of any applicable legal provisions. Further, the Respondent and State agree that nothing herein may be taken as or construed to be an admission or concession of any violation of any law, or of any other matter of fact or law or of any liability or wrongdoing, all of which Respondent expressly denies. This AVC is being signed in order to avoid possible litigation and to resolve all disputed claims and contentions in connection with this matter.

19. The parties agree that nothing in AVC shall be constructed to affect any action or proceeding by any other regulatory body or state agency, whether such action or proceeding is related to any issue addressed by this AVC or otherwise.

20. The parties agree that, should any clause, provision, or section of this AVC, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this AVC, and this AVC shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

21. The State hereby fully releases, waives, and discharges Respondent and its officers, agents, representatives, and employees from any claims arising out of or related to facts alleged in this underlying cause which were brought or could have been brought in a consumer protection action, including claims for alleged violations of the DTPA, prior to the date this AVC is executed by the parties.

22. Respondent has actively participated in the negotiations leading up to this AVC. Respondent is aware of the obligations this AVC places on it and is capable of carrying out those duties. Respondent does not dispute that entry of this AVC is in the public interest.

23. This AVC shall be deemed effective the day it is approved by the parties and filed with the Clerk of the Court.

24. It is further agreed and understood that this AVC will be filed and placed in the public record, in compliance with Tex. Bus. & Com. Code §17.58(a), with all costs of filing assessed against Respondent.

Executed effective as of January 21, 2020.

CAUSE NO. 2017DCV-4142-H

THE STATE OF TEXAS, **Plaintiff,**	§	**IN THE DISTRICT COURT**
v.	§	**NUECES COUNTY, TEXAS**
ROBSTOWN ENTERPRISES, INC. **Defendant.**	§	**347TH JUDICIAL DISTRICT**

AGREED FINAL JUDGMENT

TO THE HONORABLE JUDGE OF SAID COURT:

On this 17 day of Sept., 2019, came for hearing on the above-entitled and numbered cause in which THE STATE OF TEXAS (State), acting by and through the Attorney General of Texas, Ken Paxton, is Plaintiff and ROBSTOWN ENTERPRISES, INC., (Defendant) is Defendant. In this action, the State alleges that following the Texas Governor's disaster declaration due to Hurricane Harvey, Defendant engaged in price gouging in violation of §17.46 of the Texas Deceptive Trade Practices Act, Tex. Bus. & Com. Code (DTPA). Specifically, the State alleges that Defendant violated the DTPA because it took advantage of a disaster declared by the Texas Governor under Chapter 418 of the Government Code by demanding or charging excessive prices for lodging. The parties, by and through their attorneys of record, have made the following stipulations and agree to the entry of this Agreed Final Judgment (Agreed Judgment) as a compromise and settlement of disputed claims.

STIPULATIONS

1. The Court has jurisdiction over the subject matter and parties in this action under the DTPA.

2. This Agreed Judgment does not constitute an approval of Defendant's business practices by the State or the Court and Defendant shall make no representation or claim to the

contrary.

3. The parties agree to the entry of this Agreed Judgment and agree that the Court has continuing jurisdiction to enforce this Agreed Judgment.

4. Defendant has strongly denied the State's allegations and continues to do so; however, Defendant agrees to entry of this Agreed Judgment to save costs of litigation. The parties stipulate that this Agreed Judgment does not constitute an admission by Defendant of any violation of the law. The parties further stipulate that Defendant has adjusted the room rates and/or provided refunds to any guests who were charged above the rate that was in effect prior to the Governor's proclamation.

5. This Agreed Judgment sets forth the entire agreement between the parties and there are no other representations or agreements between the parties not stated in writing herein.

6. Defendant is aware of the terms and duties placed upon it by the Agreed Judgement, acknowledges that it has fully read and understands this Agreed Judgment, accepts the legal consequences involved in signing this Agreed Judgment, and represents that it is desirous and capable of carrying out the terms and duties of this Agreed Judgment in full.

7. Defendant acknowledges receipt of copies of this Agreed Judgment.

8. The parties agree that nothing in this Agreed Judgment shall be constructed to affect any action or proceeding by any other regulatory body or state agency, whether such action or proceeding is related to any issue addressed by this Agreed Judgment or otherwise.

9. The parties agree that, should any clause, provision, or section of this Agreed Judgment, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this Agreed Judgment, and this Agreed Judgment shall be construed and enforced as if such illegal, invalid, or

unenforceable clause, section or provision had not been contained herein.

10. The parties agree to waive the thirty (30) day period in which to file a Motion for New Trial and waive any and all rights to appeal this Agreed Judgment.

FINDINGS

11. Having reviewed the pleadings in this case and the stipulations of the parties, the Court hereby finds as follows:

a. The Court has jurisdiction over the parties;

b. The Court has jurisdiction over the subject matter of this action;

c. Venue is proper in Nueces County, Texas;

d. Entry of this Agreed Judgment is in the public interest; and

e. The issuance and service of a writ of injunction are waived.

PERMANENT INJUNCTION

12. IT IS FURTHER ORDERED that Robstown Enterprises, Inc., its officers, agents, servants, employees, and those persons in active concert or participation with it who receive actual notice of the Agreed Judgment by personal service or otherwise are hereby PERMANENTLY ENJOINED from the following:

a. Taking advantage of any disaster, declared by the Governor under Chapter 418 of the Government Code, by advertising, offering for sale, or selling accommodations or other necessities at an exorbitant or excessive price;

b. Collecting state and local taxes from disaster victims, personnel participating in relief operations, or persons identified by the Governor's declaration during a disaster declared by the Governor of Texas when such taxes have been suspended by the Governor pursuant to Chapter 418 of the Government Code;

c. Violating any regulation, proclamation, declaration, or executive order made by the Governor pursuant to Chapter 418 of the Government Code;

d. Failing to provide a sales-tax-exemption certificate to any disaster victim any time the Governor suspends the Hotel Occupancy Tax pursuant to Chapter 418 of the Government Code;

e. Failing to obtain a sales-tax-exemption certificate from evacuees.

MONETARY JUDGMENT

13. IT IS FURTHER ORDERED that the State shall have judgment against Defendant for civil penalties and court costs in the amount of FIFTEEN THOUSAND DOLLARS ($15,000).

14. IT IS FURTHER ORDERED that the State shall have judgment against Defendant for attorneys' fees and court costs in the amount of TEN THOUSAND DOLLARS ($10,000).

15. IT IS FURTHER ORDERED that Defendant's payments to the State shall be made in accordance with the following schedule: an initial $4,000 payment will be made upon execution of the Agreed Judgment by the parties, with $3,000 payments due on November 25, 2019, February 24, 2020, May 25, 2020, August 24, 2020, February 22, 2021, May 31, 2021, and August 30, 2021. Payments will first be allocated to civil penalties and then to attorneys' fees.

16. IT IS FURTHER ORDERED that Defendant's payments to the State shall be paid by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX3550425622 and if not by wire transfer, deliver/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

MISCELLANEOUS PROVISIONS

17. IT IS FURTHER ORDERED that nothing in this Agreed Judgment shall create any private rights, causes of action, or remedies against Defendant and nothing in the Agreed Judgment shall be construed as a waiver of any private rights, causes of action, or remedies of any person against Defendant with respect to the practices or conduct described herein.

18. IT IS FURTHER ORDERED that Defendant's indebtedness to the State identified above are for alleged violations of the DTPA, which alleged violations Defendant continues to deny; however, Defendant agrees to make payment as part of the settlement.

19. IT IS FURTHER ORDERED that the State shall be permitted to abstract the judgment as provided by law, but will forbear execution so long as payment is made pursuant to the terms of the Agreed Judgment.

20. IT IS FURTHER ORDERED that Defendant, by its signatures below, hereby acknowledges notice of this Agreed Judgment and acceptance of the same. Plaintiff may enforce the Agreed Judgment through any procedure or process available under the laws of the State of Texas.

21. IT IS FURTHER ORDERED that Defendant shall not represent to the public that this Agreed Judgment constitutes approval by the State or this Court of any of Defendant's actions or business practices.

22. IT IS FURTHER ORDERED that this Agreed Judgment is final as to all parties and disposes of all claims asserted by the parties in this instant case. All relief asserted or which could have been asserted among the parties to this Agreed Judgment hereto based on the legal and factual allegations in this underlying cause for alleged violations of the DTPA not expressly granted herein is denied. The State hereby fully releases, waives, and discharges Defendant and its officers, agents, representatives, and employees from any claims arising out of or related to facts alleged in this underlying cause which were brought or could have been brought in a consumer protection action, including claims for alleged violations of the DTPA, prior to the date this Agreed Judgment is entered by the Court. This Agreed Judgment does not, however, affect

the rights of or remedies available to any third party that is not subject to this order, except as provided by law.

SIGNED this 17 day of Sept., 2019.

CAUSE NO. 2020DCV-0829-A

STATE OF TEXAS, Plaintiff,	§ § §	IN THE DISTRICT COURT
v.	§ §	28th JUDICIAL DISTRICT
GREGORY MARKWARDT D/B/A HOTEL CORPUS CHRISTI BAYFRONT, Defendant.	§ § §	NUECES COUNTY, TEXAS

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

TO THE HONORABLE JUDGE OF SAID COURT:

On this ___ day of _____, 2021, came for hearing on the above-entitled and numbered cause in which the STATE OF TEXAS (State), acting by and through the Attorney General of Texas, Ken Paxton, is the Plaintiff and GREGORY MARKWARDT D/B/A HOTEL CORPUS CHRISTI BAYFRONT (Markwardt) is the Defendant. In this action, the State alleges that Markwardt violated §17.46 of the Deceptive Trade Practices-Consumer Protection Act, Tex. Bus. & Com. Code § 17.41 *et seq*. (DTPA), by demanding and charging an excessive price for lodging following the Governor's disaster declaration due to Hurricane Harvey (price gouging). The State and Markwardt, by and through their respective attorneys of record, wish to make the following stipulations and have agreed to the entry of this Agreed Final Judgment and Permanent Injunction (Agreed Judgment).

FACTUAL BACKGROUND

1. On August 23, 2017, Governor Greg Abbott declared a State of Disaster under § 418.014 of the Texas Government Code, anticipating the landfall of then Tropical Storm Harvey (Harvey State of Disaster).

2. On August 25, 2017, Hurricane Harvey made landfall on the Texas Gulf Coast.

3. On September 1, 2017, Governor Abbott issued a price gouging declaration emphasizing the unlawful practice of price gouging: "Texans impacted by this disaster are particularly vulnerable to economic exploitation during this challenging time ... Texas law prohibits price gouging and gives the attorney general the authority to prosecute anyone throughout Texas who takes advantage of a declared disaster by charging an exorbitant or excessive price for fuel."

4. The Attorney General's Consumer Protection Division received complaints from consumers that Marqwardt was demanding and charging excessive or exorbitant prices for lodging at Hotel Corpus Christi Bayfront located at 601 N. Water Street, in Corpus Christi, Texas, 78401 (Hotel Corpus Christi Bayfront), a facility he then owned and operated during the Harvey State of Disaster.

STIPULATIONS

5. Marqwardt stipulates that he owned and operated Hotel Corpus Christi Bayfront during the Harvey State of Disaster; however, he has since sold the property to a third party and is no longer involved in its operation.

6. The parties agree to and do not contest the entry of this Agreed Judgment.

7. Markwardt stipulates that he has entered into this Agreed Judgment voluntarily in order to resolve the litigation; that he actively participated in negotiations leading to this Agreed Judgment; and that this agreement is freely and voluntarily made without duress.

8. Markwardt stipulates that he is aware of the duties placed upon him by the Agreed Judgment and is desirous and capable of carrying out those duties in full.

9. Markwardt acknowledges receipt of a copy of this Agreed Judgment and has full and actual notice of its terms.

10. The parties agree to waive the thirty (30) day period in which to file a Motion for New Trial and waive any and all rights to appeal this Agreed Judgment.

FINDINGS

11. Having reviewed the pleadings in this case and the stipulations of the parties, the Court hereby finds as follows:

a. The Court has jurisdiction over the parties;

b. Venue is proper in Nueces County, Texas; and

c. Entry of this Agreed Judgment is in the public interest.

12. It appearing to the Court that the parties agree to entry of this Agreed Judgment and that they have approved entry of such, it is therefore ordered that Markwardt shall be enjoined as recited below.

DEFINITIONS

13. IT IS HEREBY ORDERED that, as used in this Agreed Judgment, the following definitions shall be used in construing this Agreed Judgment:

a. "Defendant" means Gregory Markwardt and his agents, subcontractors, servants, employees, and any other Persons in active concert or participation with him;

b. "Person" means an individual, sole proprietorship, firm, partnership, corporation, association, joint venture or other group, or business entity, however organized;

c. "Designated Disaster Period," as defined in § 17.4625 of the DTPA, means the period: (1) beginning on the earliest of the date the disaster occurs; or the date of: (i) the proclamation or executive order of the Governor declaring the disaster; or (ii) the declaration of the disaster by the President of the United States, if any part

of Texas is named in the federally declared disaster area; and (2) ending on the 30th day after the date the disaster declaration expires or is terminated;

d. "Consumer" means an individual, partnership, corporation, this state, or a subdivision or agency of this state that seeks or acquires by purchase or lease any goods or services; and

e. "Eligible Consumer" shall mean any Consumer identified from data Marqwardt provided to the State who: (1) stayed at Hotel Corpus Christi Bayfront between the dates of August 24, 2017 and September 30, 2017; (2) paid a room rate that increased by 67% or more over the facility's average price for that room during the three months preceding August 2017; and (3) timely and correctly fills out and submits a claim form to the State in accordance with procedures set forth in the Consumer Restitution section below.

PERMANENT INJUNCTION

14. IT IS FURTHER ORDERED that Markwardt, his officers, agents, servants, employees, attorneys, and any other Persons in active concert or participation with him who receive actual notice of this order by personal service or otherwise, whether acting directly or through any trust, corporation, subsidiary, division, entity, or other devise shall be PERMANENTLY ENJOINED from engaging in the following acts or practices:

a. Taking advantage of a disaster declared by the Governor under Chapter 418 of the Texas Government Code or by the President of the United States if any part of this state is named in the federally declared disaster area, by:

i. selling or leasing lodging or any other necessity at an exorbitant or excessive price; or

ii. demanding an exorbitant or excessive price in connection with the sale or lease of lodging or any other necessity;

b. Collecting state or local taxes from a disaster victim, personnel participating in relief operations, or any other Person if, during a Designated Disaster Period, such taxes have been suspended by the Governor pursuant to Chapter 418 of the Texas Government Code;

c. Violating any regulation, proclamation, declaration, or executive order made by the Governor pursuant to Chapter 418 of the Government Code or the President of the United States, if any part of Texas is named in the federally declared disaster area;

d. Failing to provide a sales tax exemption certificate to a disaster victim, personnel participating in relief operations, or any other Person if, during a Designated Disaster Period, the Governor suspends the Hotel Occupancy Tax pursuant to Chapter 418 of the Government Code;

e. Failing to obtain a sales tax exemption certificate from evacuees;

f. Failing to maintain a registration system to record the identity and contact information from guests of the hotel or motel including the guests' names, addresses, the length of their stay, and the price charged per day; and

g. Altering, destroying, or mutilating records ordered to be kept pursuant to Subparagraphs (e) and (f) above for a three-year period after the event, provided the matter is not in litigation. If the matter is in litigation, records shall not be altered, destroyed, or mutilated until a three-year period following the entry of a final judgment that is not subject to further appeal.

15. IT IS FURTHER ORDERED that the above-referenced injunctive terms are intended to effectively prevent such activity by Markwardt and any attempt to conduct such activity through another Person in circumvention of this injunction shall be deemed a violation of the injunction.

CONSUMER RESTITUTION

16. IT IS FURTHER ORDERED that the State shall have judgment from Marqwardt in the amount of TWENTY-FIVE THOUSAND DOLLARS ($25,000) for consumer restitution (Restitution Payments) upon execution of the Agreed Judgment.

17. IT IS FURTHER ORDERED that the procedures for the distribution of the Restitution Payments are as follows:

a. The parties have agreed to the use of the attached claim form or a substantially similar form agreed to by the parties. The State may begin accepting claim forms by October 1, 2021. The State will not accept claim forms later than January 15, 2021, which will be the Claims Deadline Date. No refunds will be distributed by the State until after the Claims Deadline Date passes. Eligible Consumers who properly complete the claim form will be eligible to receive a refund payment;

b. The State will determine if the claim form has been properly completed and timely submitted, and determine the specific refund amount each Eligible Consumer will receive;

c. Eligible Consumers may receive pro rata refund amounts, if claimed amounts by Eligible Consumers exceed the Restitution Payments;

d. If the full claimed amounts by all Eligible Consumers is less than the Restitution Payments, any residual amounts will be allocated to the State for the reimbursement of attorneys' fees and court costs; and

e. Checks returned to the State shall be treated in accordance with the State of Texas' unclaimed property laws.

18. IT IS FURTHER ORDERED that Marqwardt will cooperate with reasonable requests from the State for consumer information for the purpose of restitution distribution.

MISCELLANEOUS PROVISIONS

19. IT IS FURTHER ORDERED that upon execution of the Agreed Judgment Marqwardt shall immediately pay the State a total of TWENTY-FIVE THOUSAND DOLLARS ($25,000). Payments shall be made via certified check or wire transfer, payable to "THE STATE OF TEXAS," bearing the reference AG# CX5839980697, and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th Street, MC-003, Austin, TX 78701. The State shall be permitted to abstract the judgment as provided by law; however, it will forbear execution so long as payment is made pursuant to the terms of the Agreed Judgment.

20. IT IS FURTHER ORDERED that if the State believes that Markwardt is in default of the Permanent Injunction for any reason, the State shall provide Markwardt with written notice by certified mail to Markwardt's last known address of the circumstances that the State believes constitute a default. Markwardt shall have ten (10) days to either provide the State with written documentation that no such default occurred or to cure such default.

21. IT IS FURTHER ORDERED that in the event of a finding of default of the Permanent Injunction the State shall be entitled to declare the unpaid principal balance, earned

interest, and any other amounts owed on the obligation immediately due. Markwardt waives all demand for payment, presentation for payment, notice of intention to accelerate maturity, notice of acceleration of maturity, protest, and notice of protest.

22. IT IS FURTHER ORDERED that Markwardt, by his signature below, hereby acknowledges notice of this Agreed Judgment and acceptance of the same; therefore, no injunctive writ need be issued. Plaintiff may enforce the Agreed Judgment through any procedure or process available under the laws of the State of Texas.

23. IT IS FURTHER ORDERED that Markwardt shall not represent to the public that this Agreed Judgment constitutes approval by the State or this Court of any of Markwardt's actions or business practices.

24. IT IS FURTHER ORDERED that this Agreed Judgment is final as to Markwardt and disposes of all claims between the parties in this cause. All relief asserted or which could have been asserted among the parties to this Agreed Judgment hereto based on the legal and factual allegations not expressly granted herein is denied.

25. IT IS FURTHER ORDERED that all costs of court expended or incurred in this cause are adjudged against the party incurring the same.

SIGNED this ____ day of 09/27/2021, 2021.

STATE OF TEXAS, Plaintiff,	§	IN THE DISTRICT COURT
v.	§	SAN PATRICIO COUNTY, TEXAS
PORTLAND PROPERTIES, INC. d/b/a COUNTRY INN & SUITES, Defendant.	§	36TH JUDICIAL DISTRICT

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

TO THE HONORABLE DISTRICT JUDGE:

On this 28 day of June, 2021, came ~~for hearing~~ to be considered on the above-entitled and numbered cause in which the State of Texas (State), acting by and through its Attorney General, KEN PAXTON, is Plaintiff and PORTLAND PROPERTIES, INC. d/b/a COUNTRY INN & SUITES (Defendant) is Defendant. In this action, the State alleges that Defendant engaged in false, misleading, and deceptive acts and practices in violation of § 17.46 of the Deceptive Trade Practices-Consumer Protection Act ("DTPA"), TEX. BUS. & COM. CODE § 17.41 *et seq.* Specifically, the State alleges that Defendant violated the DTPA because it took advantage of a disaster declared by the Texas Governor under Chapter 418 of the Government Code by demanding or charging excessive prices for lodging. The parties, by and through their attorneys of record, have made the following stipulations and agree to the entry of this Agreed Final Judgment and Permanent Injunction (AFJPI) as a compromise and settlement of disputed claims.

STIPULATIONS

1. The Court has jurisdiction over the subject matter and parties in this action under the DTPA.

2. This AFJPI does not constitute an approval of Defendant's business and practices by the State or the Court and Defendant shall make no representation or claim to the contrary. Defendant

FILED
AT 12:15 M O'CLOCK
JUN 29 2021
HEATHER B. MARKS, CLERK DISTRICT COURT
SAN PATRICIO COUNTY, TEXAS
BY: DEPUTY

continues to deny any illegal conduct and denies all liability but enters into this AFJPI only to buy its peace.

3. The parties agree to the entry of this AFJPI and agree that the Court has continuing jurisdiction to enforce this AFJPI.

4. This AFJPI sets forth the entire agreement between the parties and there are no other representations or agreements between the parties not stated in writing herein.

5. Defendant is aware of the terms and duties placed upon it by the AFJPI, acknowledges that it has fully read and understands this AFJPI, accepts the legal consequences involved in signing this AFJPI, and represents that it is desirous and capable of carrying out the terms and duties of this AFJPI in full.

6. Defendant acknowledges receipt of copies of this AFJPI.

7. The parties agree that, should any clause, provision, or section of this AFJPI, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this AFJPI, and this AFJPI shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

8. The parties agree to waive the thirty (30) day period in which to file a Motion for New Trial and waive any and all rights to appeal this AFJPI.

FINDINGS

9. Having reviewed the pleadings in this case and the stipulations of the parties, the Court hereby finds as follows:

a. The Court has jurisdiction over the parties;

b. The Court has jurisdiction over the subject matter of this action;

c. Venue is proper in San Patricio County, Texas;

d. Entry of this AFJPI is in the public interest; and

e. The issuance and service of a writ of injunction are waived.

PERMANENT INJUNCTION

10. IT IS FURTHER ORDERED that Portland Properties, Inc. d/b/a Country Inn & Suites, its officers, agents, servants, employees, and those persons in active concert or participation with it who receive actual notice of the AFJPI by personal service or otherwise are hereby PERMANENTLY ENJOYED from the following:

a. Taking advantage of any disaster, declared by the Governor under Chapter 418 of the Government Code, by offering accommodations or other necessities at an exorbitant or excessive price;

b. Collecting state and local taxes from disaster victims, personnel participating in relief operations, or person identified by the Governor's declaration during a disaster declared by the Governor of Texas when such taxes have been suspended by the Governor pursuant to Chapter 418 of the Government Code;

c. Violating any regulation, proclamation, declaration, or executive order made by the Governor pursuant to Chapter 418 of the Government Code;

d. Failing to provide a sales-tax-exemption certificate to any disaster victim any time the Governor suspends the Hotel Occupancy Tax pursuant to Chapter 418 of the Government Code;

e. Failing to obtain a sales-tax-exemption certificate from evacuees;

f. Failing to maintain a registration system to record the identity and contact information from guests of the hotel or motel including the guests' names, addresses, the length of their stay, and the price charged per day; and

g. Altering, destroying or mutilating records ordered to be kept pursuant to Subparagraphs E and F above for a three-year period after the disaster declaration, provided the matter is not in litigation. If the matter is in litigation, records shall not be altered, destroyed or mutilated until a three-year period following the entry of a final judgment, not subject to further appeal.

MONETARY JUDGMENT

11. IT IS FURTHER ORDERED that the State shall have judgment against Defendant for civil penalties and court costs in the amount of FIVE THOUSAND DOLLARS ($5,000).

12. IT IS FURTHER ORDERED that the State shall have judgment against Defendant for attorneys' fees and court costs in the amount of FIVE THOUSAND DOLLARS ($5,000).

13. IT IS FURTHER ORDERED that the State shall have judgment against Defendant for consumer restitution in the amount of TWENTY THOUSAND DOLLARS ($20,000).

14. IT IS FURTHER ORDERED that the State will distribute restitution under the following procedures: The State will send a claim form to eligible consumers. Eligible consumers are consumers who stayed at Defendant's hotel during the aftermath of Hurricane Harvey between the dates of August 24, 2017 and September 30, 2017 and who paid a room rate that increased by 66% or more over Defendant's price for that room during the three months preceding August 2017. Distribution of restitution will be limited to eligible consumers who return the claim form before the deadline. The State will determine if the claim form has been properly completed and timely submitted, and determine the specific refund amount each eligible consumer will receive. Consumers may receive pro rata refund amounts, if claimed amounts by eligible consumers exceed the restitution payments. If the total claimed amounts by all eligible consumers is less than the restitution award, any residual amounts for such unlocated eligible guests will be allocated to the Supreme Court Judicial Fund as a civil penalty pursuant to Sec. 402.007(b)(1) of the Texas Government Code. Checks sent to eligible consumers which are returned to the State shall be treated in accordance with the State of Texas' unclaimed property laws.

15. IT IS FURTHER ORDERED that Defendant will cooperate with reasonable requests from Plaintiff for consumer information for the purpose of restitution distribution.

16. IT IS FURTHER ORDERED that Defendant's payment of these monetary amounts to the State shall be paid upon entry of this Judgment by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX6925852474 and if not by wire transfer, deliver/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

MISCELLANEOUS PROVISIONS

17. IT IS FURTHER ORDERED that nothing in this AFJPI shall create any private rights, causes of action, or remedies against Defendant and nothing in the Agreed Judgment shall be construed as a waiver of any private rights, causes of action, or remedies of ay person against Defendant with respect to the practices of conduct described herein.

18. IT IS FURTHER ORDERED that Defendant's indebtedness to the State identified above are for alleged violations of the DTPA, which alleged violations Defendant continues to deny; however, Defendant agrees to make payment as part of the settlement.

19. IT IS FURTHER ORDERED that the State shall be permitted to abstract the judgment as provided by law, but will forbear execution so long as payment is made pursuant to the terms of the AFJPI.

20. IT IS FURTHER ORDERED that Defendant, by its signature below, hereby acknowledges notice of this AFJPI and acceptance of the same. Plaintiff may enforce the AFJPI through any procedure or process available under the laws of the State of Texas.

21. IT IS FURTHER ORDERED that Defendant shall not represent to the public that this AFJPI constitutes approval by the State or this Court of any of Defendant's actions or business practices.

22. IT IS FURTHER ORDERED that this AFJPI is final as to all parties and disposes

of all claims asserted by the parties in this instant case. All relief asserted or which could have been asserted among the parties to this AFJPI hereto based on the legal and factual allegations in this underlying cause for alleged violations of the DTPA not expressly granted herein is denied. The State hereby fully releases, waives, and discharges Defendant and its officers, agents, representatives, and employees from any claims arising out of or related to facts alleged in this underlying cause which were brought or could have been brought in a consumer protection action, including claims for alleged violations of the DTPA, prior to the date this AFJPI is entered by the Court. This AFJPI does not, however, affect the rights of or remedies available to any third party that is not subject to this order, except as provided by law.

SIGNED this 28 day of June, 2021.

NO. D-1-GN-20-007368

IN THE MATTER OF	§	IN THE DISTRICT COURT
	§	
STATE OF TEXAS,	§	
Petitioner,	§	
	§	
vs.	§	TRAVIS COUNTY, TEXAS
	§	
CTD, INC.,	§	
Respondent.	§	261ST JUDICIAL DISTRICT

ASSURANCE OF VOLUNTARY COMPLIANCE

This Assurance of Voluntary Compliance (this "**Assurance**") is made and entered into by and between Texas Attorney General Ken Paxton (the "**Attorney General**") acting in the name of the State of Texas (the "**State**"), as Petitioner, and CTD, Inc. ("**CTD**"), as Respondent, pursuant to Section 17.58 of the Texas Business and Commerce Code.

A. DEFINITIONS

As used in this Assurance, the following terms are defined as follows:

1. **"COVID-19 Disaster"** means the Disaster Declaration declared by the Texas Governor (the "**Governor**") on March 13, 2020 and recorded in Tex. Gov. Proclamation No. 41-3720, 45 Tex. Reg. 2094 (Mar. 27, 2020), and as extended from time to time thereafter.
2. **"Disaster Declaration"** means (i) a proclamation or executive order by the Governor declaring a disaster pursuant to Chapter 418 of the Texas Government Code or (ii) a declaration of a disaster by the President of the United States, if any part of the State is named in the federally declared disaster area.
3. **"DTPA"** means Chapter 17, Subchapter E of the Texas Business and Commerce Code.

4. **"Effective Date"** means the date this Assurance is approved by the Court.

5. **"National Disaster Declaration"** means a declaration of a disaster by the President of the United States in which the federally declared disaster area is the entirety of all states within the United States.

6. **"Price Adjustment"** means an increase in price of an individual product on Respondent's website.

7. **"Price Gouging Statute"** means Section 17.46(b)(27) of the DTPA.

8. **"Respondent," "You,"** or **"Yours"** means CTD, its successors, employees, agents, assigns, and officers.

9. **"State of Disaster"** means the period: (i) beginning on the earlier of: (a) the date a disaster occurs or (b) the date of a Disaster Declaration or a National Disaster Declaration, as applicable, and (ii) ending on the 30th day after the date the Disaster Declaration or National Disaster Declaration, as applicable, as may be extended, expires, or is terminated.

B. PARTIES

1. The signatories to this Assurance are Respondent and the State.

2. This action is brought by the Consumer Protection Division of the Office of the Attorney General of Texas in the name of the State as authorized under the DTPA, Section 17.41, *et seq.*

C. NATURE OF ALLEGED VIOLATIONS

1. Respondent is an e-commerce retailer of ammunition, firearms, and related products based in Fort Worth, Texas. Its headquarters and shipping facility are both in Fort

Worth, Texas. Respondent does not manufacturer these products; it acquires them and then sells them via its website to consumers nationwide. Its website is http://www.CheaperThanDirt.com.

2. The same week that the Governor declared the COVID-19 Disaster, Respondent began to experience an increased demand and limited supply for its ammunition, as the orders on its website substantially increased. By no later than March 14, 2020, in response to the increased demand for its products and limited supply, Respondent raised the prices on hundreds of its top selling products.

3. Additionally, during the weekend of March 14, Respondent made the decision to make Price Adjustments on its website. Rather than proceeding in the normal manner, which usually takes several days for price changes to appear on its website, Respondent attempted to make manual "real-time" Price Adjustments so that the price increases would be immediately reflected on its website. Making these manual "real-time" price changes caused confusion for consumers because the prices consumers saw on the website pages when selecting items for purchase were different from the prices that appeared in the final check-out cart on Respondent's website.

D. ALLEGED VIOLATIONS OF TEXAS DECEPTIVE TRADE PRACTICES ACT

The State alleges that Respondent's conduct violated the DTPA as follows:

1. Respondent engaged in false, misleading, or deceptive acts or practices in violation of Section 17.46(a) of the DTPA by representing prices for some of its products on Respondent's website that were different from the prices in the check-out cart on Respondent's website; and

2. Respondent violated Section 17.47(b)(27) of the DTPA by:

    a. Selling another necessity at an exorbitant or excessive price; and/or

b. Demanding an exorbitant or excessive price in connection with the sale of another necessity.

E. STIPULATIONS

Subject to the Asserted Defenses (defined below) and the other terms and conditions of this Assurance, the parties hereby agree and stipulate that:

1. Respondent is an e-commerce retailer that does not have any brick-and-mortar storefronts in Texas or in any other state.
2. For purposes of this Assurance, Respondent's home county is Tarrant County, Texas.
3. The State has jurisdiction over the subject matter and the parties in this matter under the DTPA;
4. The venue of this cause is proper in Travis County, Texas, pursuant to DTPA Section 17.58(a);
5. This Assurance does not constitute an approval of Respondent's business practices by the State or the Court and Respondent shall make no representation or claim to the contrary;
6. Respondent and the State represent and warrant, each to the other, that each has the authority to enter into and make this Assurance, and to bind themselves to this Assurance;
7. This Assurance is being entered into by the parties for the sole purpose of compromising disputed claims amongst the parties without the necessity for protracted and expensive litigation, and this Assurance does not constitute an

admission by Respondent of any violation of law, rule, or regulation, including, without limitation, the DTPA; and

8. The State and, subject to the other terms and conditions of this Assurance, Respondent agree to and do not contest the entry of this Assurance by this Court.

F. RESPONDENT'S RESPONSE

Respondent denies any violation of law, rule, or regulation, including, without limitation, the DTPA, and, even if the allegations in Paragraph C of this Assurance are taken as true as alleged by the State, Respondent does not waive and specifically maintains and reserves all of its legal, statutory, and common-law defenses (collectively, the "**Asserted Defenses**").

G. RESPONDENT'S ASSURANCES

Subject to and without Respondent waiving the Asserted Defenses and the other terms and conditions of this Assurance, and with the understanding that for the purposes of this Assurance the State views "another necessity" in the Price Gouging Statute to include ammunition, which the Respondent denies with respect to at least the COVID-19 Disaster, Respondent voluntarily agrees to comply with the following terms:

1. Respondent will not, during the applicable State of Disaster, take advantage of the COVID-19 Disaster by:

    a. selling or leasing fuel, food, medicine, lodging, building materials, construction tools, or another necessity at an exorbitant or excessive price; or

    b. demanding an exorbitant or excessive price in connection with the sale or lease of fuel, food, medicine, lodging, building materials, construction tools, or another necessity.

2. Respondent will not, during the applicable State of Disaster, take advantage of any future Disaster Declaration that applies to Respondent or any future National Disaster Declaration by:

   a. selling or leasing fuel, food, medicine, lodging, building materials, construction tools, or another necessity at an exorbitant or excessive price; or

   b. demanding an exorbitant or excessive price in connection with the sale or lease of fuel, food, medicine, lodging, building materials, construction tools, or another necessity.

3. During the COVID-19 Disaster, any future Disaster Declaration that applies to Respondent, or any future National Disaster Declaration, and for a minimum of six months following the expiration of such applicable State of Disaster, Respondent shall preserve records reflecting:

   a. Each individual sale transaction during such foregoing period;

   b. The dates, times, and amounts of changes in prices during such foregoing period; and

   c. All supply costs incurred by Respondent during such foregoing period.

4. If Respondent makes any Price Adjustments, it agrees to reflect such Price Adjustment simultaneously throughout its website in its entirety for each of its products that has a Price Adjustment. If Respondent makes a Price Adjustment on a product that is not reflected throughout the website in its entirety, Respondent will promptly rectify the price discrepancy when it is discovered or brought to Respondent's attention.

Notwithstanding the foregoing, Respondent shall not be considered to be taking advantage of a Disaster Declaration if the Respondent's home county is neither included nor affected by the Disaster Declaration.

H. CONSUMER REFUNDS

1. Pursuant to this Assurance, Respondent agrees to provide refunds to the consumers referenced in Exhibit A in the total amount of Four Hundred Two Thousand Seven Hundred Eighty Six Dollars and Nine cents ($402,786.09). The refunds provided by Respondent to the consumers referenced in Exhibit A will be partial refunds of a recent purchase from Respondent's website. The partial refund amount for each of the consumers referenced in Exhibit A is determined solely by the State. Within 60 days following the Effective Date, Respondent shall provide refund checks or a credit card credit/chargeback to the consumers whose purchases are represented by the invoice numbers listed on Exhibit A. The partial refund amounts to be paid by Respondent for each of the invoice numbers is also included on Exhibit A. If any of the checks are returned to Respondent or are otherwise undeliverable, or if any of the credits/chargebacks are not processed, Respondent will consult with the State about alternative mailing addresses, and if the State provides Respondent with an alternative mailing address or if Respondent on its own identifies an alternative mailing address, Respondent will thereafter make a second attempt to provide such remaining consumers with their partial refunds. The second refund payment attempt shall only be by mail and shall be made within 210 days following the date the first attempt is made. No matter how the partial refund amount is provided, Respondent shall provide consumers with an explanation letter or email transmittal, as applicable, that is substantially similar to the letter attached as Exhibit B. To the extent Respondent uses checks, the envelopes that Respondent uses to issue the checks shall be reasonably approved by the State before mailing. Furthermore, if

Respondent decides to retain a third party to administer the issuance of the checks, Respondent shall consult with the State before retaining such third party and will not retain such third party without the prior approval of the State.

2. Checks returned to Respondent after the second payment attempt, or after the first attempt if an alternative address is not located, shall be treated in accordance with the unclaimed property laws of the state where the consumers receiving refund payments reside.

3. Within sixteen (16) months following the Effective Date, Respondent will provide a final report to the State in the form of an affidavit which will refer to the invoice numbers in Exhibit A and indicate whether the persons associated with the invoice numbers have cashed their checks or whether the partial refund payment has been treated in accordance with the relevant unclaimed property laws.

4. Unless agreed between the parties otherwise, every three months from the Effective Date until the final report referenced in Paragraph H.3 of this Assurance is provided to the State, Respondent agrees to provide the State a status report indicating how many checks and/or credits/chargebacks were issued to the consumers referenced in Exhibit A during the relevant reporting period, how many of these checks were cashed by the recipients, how many credit card credits/chargebacks were processed, and the total amount of refunds represented by the cashed checks and credits/chargebacks. The first status report will be due 90 days after the Effective Date.

I. ATTORNEYS' FEES

Respondent agrees to pay to the State its attorneys' fees in the amount of Thirty Two Thousand and No/100 Dollars ($32,000.00). Respondent shall pay such foregoing amount within 30 days after the Effective Date. Respondent's attorneys' fees payment to the State shall be made

in accordance with the following instructions: by certified check or wire transfer, payable to the "STATE OF TEXAS," bearing the reference AG# CX4066053152, and if not by wire transfer, delivered/mailed to the Office of the Attorney General, ATTN: Accounting Division, 300 W. 15th St., MC-003, Austin, TX 78701.

J. DISPUTE RESOLUTION

If the State believes that Respondent has not complied with any provision of this Assurance and, if in the State's sole reasonable discretion the failure to comply does not threaten the health or safety of the citizens of the State and/or does not create an emergency requiring immediate action, the State will provide written notice to Respondent of such alleged failure to comply. Respondent shall have thirty (30) days from receipt of such notice to provide a good faith written response, including either a statement that Respondent believes it is in full compliance with the relevant provision or a statement explaining how the alleged violation occurred, how it has been addressed or when it will be addressed, and what Respondent will do to make sure the alleged violation does not occur again. Within that thirty (30) day period, Respondent may request a meeting to discuss the alleged violation. If Respondent makes such a request, the State will meet with Respondent, either by phone or in person, at the earliest possible date, but in no event more than ten (10) business days from the date of Respondent's request. Respondent shall provide its written response in advance of any meeting with the State, unless the State agrees to waive this requirement. The request for, or occurrence of, a meeting does not enlarge the period of time for Respondent to provide its written response, although the State may agree to provide Respondent with more than thirty (30) days to respond.

K. GENERAL PROVISIONS

1. Respondent and the State agree that they will submit this Assurance to a district court of competent jurisdiction in Travis County and request that the court approve this Assurance, pursuant to the terms set forth herein and in Section 17.58 of the DTPA.

2. Nothing in this Assurance shall create any private rights, causes of action or remedies against Respondent, and nothing in the Assurance shall be construed as a waiver of any private rights, private causes of action, or private remedies of any person against Respondent with respect to the practices or conduct described herein.

3. Respondent and the State agree that nothing in this Assurance shall be constructed to affect any action or proceeding by any regulatory body or state agency, other than the State, whether such action or proceeding is related to any issue addressed by this Assurance or otherwise.

4. To the extent that the provisions of this Assurance conflict with any Texas, local, or federal law, rule, or regulation that now exists, or is later enacted or amended, such law, rule, or regulation, and not this Assurance, shall apply. For the purpose of this Assurance, such conflict exists if conduct prohibited by this Assurance is required or expressly permitted by such Texas, local, or federal law, rule, or regulation, or if conduct required by this Assurance is prohibited by such Texas, other state, local or federal law, rule, or regulation.

5. If the State finds it necessary to enforce Paragraph G-1 or G-2 of this Assurance following the Effective Date, and if in that instance it is determined that consumers from outside of the State may be the basis for a violation of this Assurance, and if the specific state(s) where the affected consumers reside in notify the State that they are pursuing claims on behalf of their

consumers, the State will defer the out of state claim to such state(s). Nothing in this provision, however, prevents the State from pursuing enforcement claims involving residents of the State.

6. This Assurance is governed by Section 17.58 of the DTPA. The parties agree that, should any clause, provision, or section of this Assurance, for any reason, be held illegal, invalid, or unenforceable, such illegality, invalidity, or unenforceability shall not affect any other clause, provision, or section of this Assurance, and this Assurance shall be construed and enforced as if such illegal, invalid, or unenforceable clause, section or provision had not been contained herein.

7. This Assurance sets forth the entire agreement between the parties. Respondent represents that it has fully read and understands this Assurance, accepts the legal consequences involved in signing this Assurance, and that there are no other representations or agreements between the parties not stated in writing herein.

8. It is also understood by Respondent that the subsequent failure to comply with the terms of this Assurance is *prima facie* evidence of a violation of the DTPA. However, an inadvertent, occasional good faith mistake on the part of Respondent will not constitute a violation of this Assurance.

9. The terms of this Assurance are not intended to alter Respondent's lawful contractual obligations with its ammunition distributor(s) and suppliers.

10. The State hereby waives, releases, and forever discharges Respondent and its successors and assigns, and each of its and their affiliates, employees, agents, representatives, officers, directors, members, managers, and shareholders, in all cases, from the civil claims that arise from the matters alleged herein in Paragraphs C and D of this Assurance, that could have been brought by the Office of the Attorney General of Texas under the DTPA up to including the Effective Date of this Assurance. Notwithstanding anything to the contrary herein, subject to the

meet and confer provision in Paragraph J of this Assurance, nothing in this release shall prevent the State from enforcing the terms of this Assurance, if it finds it necessary to do so.

11. The parties agree that this Assurance shall not be modified or terminated except by written agreement signed by the parties and filed with the Court.

EXECUTED this 3rd day of December, 2020.

Redford, Texas 00000

Dear Mr. Smith,

You recently made a purchase from the CTD, Inc. (CTD) website. As a result of a legal settlement between CTD and the Attorney General of Texas, a credit in the amount of $[_____.___] has been issued to the credit card you used to make your purchase.[1] Please review your credit card statement to confirm that you have received your credit. If you have any questions about this settlement, please contact the Attorney General's office directly at 1-800-621-0508.

Thank you.

CTD, Inc.

[1] If CTD is not able to provide the restitution via a credit to a consumer's credit card, CTD will send the consumer a check via mail and will include a letter that is similar to the language above except that the second and third sentences will be replaced with the following language: As a result of a legal settlement between CTD and the Attorney General of Texas, you are being provided the enclosed partial refund check in the amount of $[.].

NO. 05-CV-146322

STATE OF TEXAS Plaintiff	§	IN THE DISTRICT COURT OF
v.	§	FORT BEND COUNTY, TEXAS
RNB ENTERPRISES, INC. D/B/A HOMER NORTON MOTEL Defendant	§	268th JUDICIAL DISTRICT

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

On this date, came for hearing the above-entitled and numbered cause in which the STATE OF TEXAS ("State" or "Plaintiff"), acting by and through Attorney General of Texas, GREG ABBOTT, is Plaintiff, and RNB ENTERPRISES, INC., doing business as HOMER NORTON MOTEL ("Defendant"), acting by and through his attorneys of record, is Defendant. Through their respective attorneys of record, Plaintiff and Defendant agree to the entry of this AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION.

STIPULATIONS

The parties agree to the entry of this Judgment and, at their request, the Court finds that:

a. It has jurisdiction over the subject matter of this action;

b. It has jurisdiction over the Defendant;

c. Venue is proper in Fort Bend County, Texas;

d. The activities of Defendant constitute trade and/or commerce;

e. Entry of this judgment is in the public interest;

f. This judgment is non-appealable;

g. Nothing in this Agreed Judgment in any way effects an individual's cause of action

ROUTED TO COURT
RT'D TO D. CLERK
K. Colson SEP 10 2007
Date:

under the DTPA, or any other laws or regulations of this State;

h. Defendant acknowledges notice of this permanent injunction and acceptance of the same; therefore no writ need be issued;

i. This judgment resolves any remaining issues the State of Texas has with Defendant pursuant to the DTPA concerning Defendant's price gouging during the Hurricane Rita state of disaster through the date of this AFJ.

j. The court shall have continuing jurisdiction to enforce this judgment.

DEFINITIONS

For the purposes of this Agreed Final Judgment and Permanent Injunction, the following definitions shall apply:

a. "DTPA" shall mean the Texas Deceptive Trade Practices-Consumer Protection Act, TEX. BUS. & COM. CODE ANN. § 17.41 *et seq.* (Vernon 2002).

b. "Homer Norton" shall mean the motel which is located at 4606 Avenue H, Rosenberg, Texas 77471.

c. "State of disaster" shall mean the period of time from September 20, 2005, when Texas Governor Rick Perry issued a proclamation certifying Hurricane Rita as an imminent disaster, to November 18, 2005, when the second proclamation extending the state of disaster expired.

d. "Average price" shall mean the average price charged for a good or service over a two month period prior to the declaration of a disaster by the Texas Governor.

e. "Effective Date" of the judgment shall mean the date that this Agreed Final Judgment and Permanent Injunction is signed by the Court.

PERMANENT INJUNCTION

IT IS THEREFORE ORDERED, ADJUDGED, AND DECREED that Defendant, its officers, agents, servants, employees, attorneys, and all other persons in active concert or participation with the Defendant who receive actual notice of this injunction shall be permanently enjoined, restrained, and prohibited from engaging in the following conduct:

1. Offering for sale or selling goods or services at exorbitant or excessive prices during a disaster declared by the Texas Governor; to wit: charging rates in excess of ten percent (10%) of the average price for those goods and services.

2. Taking advantage of any disaster or natural calamity by charging excessive prices for goods and services sought out by consumers as necessary to their daily living or to the operation of their business; to wit: charging in excess of ten percent (10%) of the average price for those goods and services.

3. Collecting the hotel occupancy tax from evacuees during a disaster declared by the Texas Governor and/or failing to obtain a completed exemption certificate from those evacuees.

4. Failing to post a sign or card in a conspicuous place in each room with the daily room rate and the date the sign or card was posted as required by TEX. OCC. CODE § 2155.001(a).

5. Failing to maintain a guest registration system to record the name and contact information of guests of the motel including the guests' names, addresses, the length of their stay, and the price charged per day.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that Defendant shall, within thirty (30) days of the Effective Date of this Judgment:

1. Provide a list of the names and contact information of all individuals who stayed at the Homer Norton Motel during the state of disaster who were charged an excessive price for a room and who have not already been refunded the excessive charges. That information shall go to Mary Vinson, Investigator, Office of the Attorney General, Consumer Protection and Public Health Division, P.O. Box 12548, Austin, TX 78711-2548.

2. Send a notice letter to guests of Homer Norton who stayed at the motel during the state of disaster who were charged an excessive price for a room and who have not already been refunded the excessive charges. This notice letter shall instruct individuals of their right to have the difference between the average price and the amount they were charged over the average price refunded. If a notice letter is returned marked with a different forwarding address, Defendant shall immediately mail a second notice letter to the person at the new address. If a person contacts Defendant indicating that they are entitled to such a notice letter, Defendant shall immediately mail a notice letter to that person;

3. Place a notice in a newspaper of general circulation in Harris and Fort Bend Counties which informs readers of the overcharge and restitution provided under this Agreed

Final Judgment;

4. Such notices as described in paragraphs 2 and 3 shall instruct all consumers to contact Mary Vinson, Investigator, Office of the Attorney General, Consumer Protection Division, P.O. Box 12548, Austin, Texas 78711-2548, or at telephone number 1-800-621-0508 for information on how to submit a request for restitution under this judgment;

5. Defendant shall also send a copy of the notices described in paragraphs 3 and 4 to Mary Vinson, Investigator, Office of the Attorney General, Consumer Protection and Public Health Division, P.O. Box 12548, Austin, TX 78711-2548, no later than sixty (60) days after the Court signs this judgment; and

6. In the event the Plaintiff is unable to disburse the entire restitution amount assessed herein, after exercising reasonable diligence to effect same, then and in that event, any excess restitution amounts shall revert to Plaintiff as additional attorney fees and investigative costs.

PENALTIES, ATTORNEY'S FEES, RESTITUTION AND COURT COSTS

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that Plaintiff shall have judgment against Defendant RNB Enterprises, Inc. in the amount of SIXTY-TWO THOUSAND THREE HUNDRED AND SEVENTY ONE Dollars ($62,371.03), which shall be paid to the State as follows:

1. FORTY THOUSAND Dollars and No/100 ($40,000.00) shall be paid to the State of Texas as civil penalties to or for the benefit of the State of Texas, pursuant to DTPA §17.47(c)(1)-(2). These civil penalties shall constitute a civil fine or penalty to and for a governmental unit and are not compensation for actual pecuniary loss. The amount of civil penalties stated herein may be reduced if Defendants perform certain acts which are memorialized in a separate compromise and settlement agreement between the parties

2. TWENTY THOUSAND THREE HUNDRED AND SEVENTY-ONE Dollars and 03/100 ($20,371.03) shall be paid to the State of Texas as Plaintiff's reasonable and necessary attorneys' fees, investigative costs and court costs.

3. TWO THOUSAND DOLLARS ($2,000.00) shall be paid to the State, which will be set aside for restitution to all consumers who were Hurricane Rita evacuees and were overcharged by the Homer Norton motel during the weeks of September 19 and

26, 2005.

4. Payment shall be made by cashier's check or money order made payable to the State through the "Texas Attorney General," bearing the reference **AG # 052230596**, and delivered to the Consumer Protection and Public Health Division, Office of the Attorney General, P.O. Box 12548, or at its physical address, 300 W. 15th Street, 9th Floor, Austin, Texas 78711-2548. ATTN: David Ashton.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that if Defendants fail to pay these amounts on the effective date of this Judgment, postjudgment interest at the rate of 8.25% shall accrue.

MISCELLANEOUS

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that the State of Texas shall have all writs of execution and other processes necessary to enforce this Agreed Final Judgment and Permanent Injunction. Defendant, by his signature below, hereby acknowledges notice of this Permanent Injunction and acceptance of same; therefore, no writ need be issued.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that Defendant shall not represent to the public that this Judgment constitutes approval by Plaintiff or this Court of any of Defendant's actions or business activities.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED in the event that Defendant files for bankruptcy prior to making all the payments set forth above, Plaintiff, the State of Texas, shall have an undisputed liquidated claim in the bankruptcy proceeding for the amount of the civil penalties, plus any accrued interest and less any and all amounts paid by Defendant to the State of Texas pursuant to this Agreed Judgment, representing civil penalties and attorney's fees.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that if in the future any definition or provision in this Judgment is inconsistent with the laws of the State of Texas or any

rules or regulations promulgated thereunder, then such laws and/or rules and regulations will prevail over the terms of this Judgment, provided that the remaining terms of the Judgment not affected by such laws, rules, or regulations will remain in full force and effect.

IT IS FURTHER ORDERED, ADJUDGED, AND DECREED that all relief not expressly granted herein is denied.

SIGNED this 11th day of September, 2007.

STATE OF TEXAS Plaintiff,	§	IN THE DISTRICT COURT OF
V.	§	HARRISON COUNTY, TEXAS
JASWANTIBEN PATEL, RAMBHAI PATEL, PIL, L.L.C & PURSHOTAM INVESTMENTS, LTD., DBA QUALITY INN & SUITES Defendants	§	71st JUDICIAL DISTRICT

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

On this day came on to be considered the above-entitled and numbered cause wherein Plaintiff is State of Texas and Defendants are Jaswantiben Patel, Rambhai Patel, PIL, L.L.C. and Purshotam Investments, Ltd. dba Quality Inn & Suites. All parties, appearing herein, and through their attorneys of record, enter into the following stipulations and agree to and do not contest the entry of this Agreed Final Judgment and Permanent Injunction.

It is stipulated that all parties have compromised and settled all claims stated by Plaintiff in this cause without the necessity of a trial, and that by entering into such settlement, Defendants make no admission of liability.

The Court then proceeded to read the pleadings and stipulations of the parties, and it appears to the Court that the parties agree to the entry of this judgment and that they have approved entry of this judgment.

1. **IT IS ORDERED, ADJUDGED AND DECREED** that Defendants, their officers, agents, servants, employees, and any other person in active concert or participation with them who receives actual notice of this judgment by personal service or otherwise, whether acting directly or

A TRUE AND CORRECT COPY

through any trust, corporation, subsidiary, division, or other devise, shall be permanently enjoined from engaging in the following acts or practices:

A. Charging, invoicing, demanding or requesting an excessive or exorbitant price for any type of good furnished or service offered to any consumer in any area in which a disaster has occurred or the Governor of Texas has declared it a disaster area;

B. Charging, invoicing, demanding or requesting excessive or exorbitant prices for any type of good or service offered to a consumer because such consumer is in any way affected by any type of disaster or calamity;

C. Charging, invoicing, demanding or requesting from any consumer any amount of money or type of fee or payment or thing of value for any good or service without notifying such consumer in advance of the exact amount of money to be charged for such good or service;

D. Charging, invoicing, demanding or requesting from any consumer any amount of money or type of fee or payment or thing of value for any good or service without receiving said consumer's express authorization in advance to furnish such good or perform such service for the amount demanded for such good or service;

E. Representing, expressly or by implication, that the price for a particular good or service is a certain amount and then charging more than that price without the express knowledge and written consent of the consumer prior to consummation of the transaction;

F. Charging, invoicing, demanding or requesting any amount of money or type of fee or payment or thing of value from a consumer for a good or service which was not

A TRUE AND CORRECT COPY

completely furnished or performed;

G. Charging, invoicing, demanding or requesting any amount of money or type of fee or payment or thing of value from a consumer for a good or service which has not yet been furnished or performed;

H. Representing, expressly or by implication, that a good or service has been furnished or performed, when in fact such good or service has not yet been furnished or performed;

I. Failing to tender and deliver a written receipt or itemized billing statement to every consumer purchasing goods or services from Defendants which reflect all goods or services purchased by them and the precise amount paid for each good or service;

J. Charging, invoicing, demanding or requesting a consumer's credit card unless Defendants:

1. Disclose to the consumer all of the terms, conditions, restrictions, and costs associated with Defendants' good or service prior to implementing a charge; and

2. Obtain the expressed consent and authorization from a consumer to have the consumer's credit card charged before it is charged;

K. Failing to refund money to consumers when they have not been informed of any additional fees, terms or conditions which are being imposed or have not given their express authorization in advance to purchase a good or service for the amount demanded to the consumer for such good or service;

L. Failing to keep copies of all records where consumers have put down deposits or

A TRUE AND CORRECT COPY

down payments but did not complete a purchase or sale for a period of not less than two years;

M. Failing to keep accurate, detailed records of all sales made by Defendants whether or not such sales resulted in the consumer actually staying as a guest at the hotel for a period of not less than two years.

2. **IT IS FURTHER ORDERED, ADJUDGED AND DECREED** that, as used in this Agreed Final Judgment and Permanent Injunction, the following terms are defined as follows:

A. **"Consumer"** means an individual, partnership, corporation, or entity of any kind, including this state, or a subdivision or agency of this state who seeks or acquires, by purchase or lease, any goods or services;

B. **"Defendant(s)"** means Jaswantiben Patel, Rambhai Patel, PIL, L.L.C. and Purshotam Investments, Ltd. dba Quality Inn & Suites, their successors, assigns, officers, agents, subcontractors, servants, present and former employees, corporations, relatives, family, and any other persons in active concert or participation with them;

C. **"Excessive"** or **"exorbitant,"** with respect to a price charged, means exceeding the amount charged for similar goods and services sold in the 90 day period immediately preceding a disaster or calamity by an amount of 10% or greater;

D. **"Disaster"** , **"disaster area" or "calamity"** means an area officially declared to be the scene of any kind of emergency created by a natural or man made event by any municipal, county or state authority;

E. **"Person"** means an individual, partnership, corporation, or entity of any kind,

A TRUE AND CORRECT COPY

including this state, or a subdivision or agency of this state who seeks or acquires, by purchase or lease, any goods or services;

F. **"Services"** means work, labor, or service purchased or leased for use, including services furnished in connection with the sale or repair of goods;

G. **"Sell," "market"** or **"solicit"** means any type of contact with a person or entity for the purpose of requesting, persuading, or seeking any type of contribution, sponsorship, compensation, or anything of value from said person or entity for any reason whatsoever.

3. **IT IS FURTHER ORDERED, ADJUDGED AND DECREED** that Plaintiff, the State of Texas, have judgment in the amount of Fifty Thousand and No/100 Dollars ($50,000.00) for civil fines and penalties from and against Defendants Jaswantiben Patel, Rambhai Patel, PIL, L.L.C. and Purshotam Investments, Ltd., jointly and severally, which the Court further finds are civil fines and penalties to and for a governmental unit and not for pecuniary compensation and which do not constitute an antecedent debt with respect to this litigation.

4. **IT IS FURTHER ORDERED, ADJUDGED AND DECREED** that Plaintiff, the State of Texas, have judgment in the amount of One Hundred Fifty Thousand and No/100 Dollars ($150,000.00) from and against Defendants Jaswantiben Patel, Rambhai Patel, PIL, L.L.C. and Purshotam Investments, Ltd., jointly and severally, to be used in whole or in part, for restoration of money or other property illegally taken from consumers by Defendants as Plaintiff determines appropriate. The State of Texas shall use best efforts to contact consumers who may have been affected by actions complained of in this cause, by sending a letter by regular mail to the last known address advising consumers of the restitution fund. The State of Texas shall disburse any collected

A TRUE AND CORRECT COPY

restitution herein to consumers as it deems advisable and necessary. In the event any portion of this collected restitution judgment is not able to be distributed to consumers of Plaintiff's choosing, within a reasonable time period, such amounts shall revert to Plaintiff, State of Texas, as additional attorney fees.

5. **IT IS FURTHER ORDERED, ADJUDGED AND DECREED** that Plaintiff, the State of Texas, have judgment in the amount of Two Hundred Thousand and No/100 Dollars ($200,000.00) from and against Defendants Jaswantiben Patel, Rambhai Patel, PIL, L.L.C. and Purshotam Investments, Ltd., jointly and severally, for reimbursement of the State's attorneys' fees, court costs and investigative costs incurred in this case, which sum is for the benefit of the State of Texas, a governmental unit, and which is not compensation for any actual or pecuniary loss and do not constitute an antecedent debt with respect to this litigation.

6. **IT IS FURTHER ORDERED** that **Bancorp South** issue (2) cashier's checks made payable to "STATE OF TEXAS" in the respective amounts of Two Hundred Thousand Dollars ($200,000.00) from the proceeds of Certificate of Deposit No. 972950 [1] standing in the name of Jaswantiben Patel, and Two Hundred Thousand Dollars ($200,000.00) from Certificate of Deposit No. 973187[2] standing in the name of Rambhai Patel upon presentment of a signed copy of this Order. It is also **Ordered** that **Bancorp South** may deduct all reasonable costs of said cashier's check, and any other applicable processing or administrative fees (including penalties for early withdrawal), from the proceeds of Certificates of Deposit Nos. 972950 & 973187 prior to issuing said cashier's

[1] Referred to as Certificate of Deposit No. 972949 in the Agreed Order Modifying Temporary Injunction signed by the court on November 16, 2005.

[2] Referred to as Certificate of Deposit No. 972950 in the Agreed Order Modifying Temporary Injunction signed by the court on November 16, 2005.

A TRUE AND CORRECT COPY

check. It is further **Ordered** that **Bancorp South** shall mail said cashier's check to Scot Clinton, counsel for Plaintiff, at the address of 808 Travis, Suite 300, Houston, Texas 77002.

7. **IT IS FURTHER ORDERED** that once the total sum of $400,000 has been deducted from Certificates of Deposit Nos. 972950 & 973187 and remitted to Plaintiff, State of Texas, pursuant to the terms of this order, said asset freeze on said certificates of deposit shall be completely released for use by the Defendants in this cause. Within ten (10) days of receiving all funds, the Plaintiff shall cause to be filed a dismissal of this action with prejudice with no right to refile.

8. **IT IS FURTHER ORDERED** that all other costs of court expended or incurred in this cause be borne by the party incurring the same.

9. **IT IS FURTHER ORDERED** that Plaintiff the State of Texas, shall have all writs and processes as may be necessary in the enforcement and collection of this judgment.

10. The clerk of the court is hereby directed to issue a Writ of Permanent Injunction to each Defendant and to issue such writs of execution or other process necessary to enforce this Agreed Final Judgment and Permanent Injunction.

11. All relief not expressly granted herein is denied.

SIGNED this 15 day of NOV. 2006.

NO. 2009-V-0017

STATE OF TEXAS Plaintiff	§	IN THE DISTRICT COURT OF
v.	§	AUSTIN COUNTY, TEXAS
STARLIGHT INTERNATIONAL, INC. D/B/A RODEWAY INN; HSIANG-TING HUANG; and WEI-CHENG KAO, Defendants.	§	155th JUDICIAL DISTRICT

AGREED FINAL JUDGMENT AND PERMANENT INJUNCTION

1. On this the 14 day of Sept., 2009, came before this court, Plaintiff, STATE OF TEXAS and Defendants, STARLIGHT INTERNATIONAL, INC. doing business as RODEWAY INN; HSIANG-TING HUANG, and WEI-CHENG KAO, in the above entitled and numbered cause. The STATE OF TEXAS, by and through Texas Attorney General GREG ABBOTT, and Defendants, by and through their attorney of record, announce to the Court that all claims, matters of fact, and things in controversy between them have been fully and finally compromised and settled as specified in a Compromise and Settlement Agreement between the parties, and present to the Court this Agreed Final Judgment and Permanent Injunction ("Judgment").

2. By their duly authorized signatures, the parties stipulate to the Court the following: that they understand the terms of this Judgment; that they agree to the terms of this Judgment; that they have waived all rights of appeal from this Judgment; that they actively participated in the negotiations leading up to this Judgment and are aware of the duties placed upon them by it and are desirous and capable of carrying out those duties in full; that they acknowledge receipt of copies of this Judgment and have full and actual notice of the terms of this Judgment; that the issuance and service of a writ of injunction are waived; that the terms of this Judgment are sufficiently detailed and specific to be

enforceable by the Court in conformance with Tex.R.Civ.P. 683; that this Judgment represents a compromise and settlement of all claims and matters arising out of facts alleged by the STATE OF TEXAS in this cause.

3. The parties submit to the jurisdiction of the Court and do not contest the entry of this Judgment.

4. The Attorney General has brought this lawsuit alleging that Defendants took advantage of consumers by improperly offering for sale and selling lodging at exorbitant or excessive prices during the Hurricane Ike disaster and its aftermath in violation of sections 17.46(a) and 17.46(b)(27)(A)&(B) of the Texas Deceptive Trade Practices Act. TEX. BUS. & COM. CODE Chapter 17. The parties, desiring to resolve this lawsuit and avoid further cost, inconvenience and burden associated with contested litigation, have agreed to entry of this Judgment, which is not an admission of liability on any claim or admission of any issue of fact or law by Defendants.

5. It appearing to the Court that all parties agree to the entry of this Judgment and that they have approved its entry by their duly authorized signatures and the signature of their respective attorneys below, the Court, upon the stipulations of the parties and after being fully advised in this matter, finds as follows:

A. THAT it has jurisdiction of the parties and subject matter of this suit;

B. THAT the settlement of this dispute is fair, reasonable, and just; and

C. THAT it would be in the best interests of the parties if the Court approved the settlement and rendered judgment accordingly.

6. Based on these findings, and having heard and considered the representations made by the parties, the Court is of the opinion that a permanent injunction should be issued as granted in this Judgment and the Court orders as follows:

I. DEFINITIONS

7. For purposes of this Judgment, these words are defined as follows:

A. "**The Defendants**" means STARLIGHT INTERNATIONAL, INC. doing business as RODEWAY INN ("Starlight International"), HSIANG-TING HUANG, and WEI-CHENG KAO, their predecessors, successors, assigns, officers, agents, subcontractors, representatives, shareholders, directors, servants, present and former employees, parent entities, affiliates, and subsidiaries.

B. "**The Rodeway Inn**" means the hotel which is located at 2021 Highway 36 South, Sealy, Texas 77474;

C. "**State of Disaster**" shall mean the period of time from September 8, 2008, when Texas Governor Rick Perry issued a proclamation certifying Hurricane Ike as an imminent disaster, to April 5, 2009, when the last proclamation extending the state of disaster expired;

D. "**Declared disaster**" means the Governor of Texas, by executive order or proclamation, declared a state of disaster when the Governor finds a disaster has occurred or that the occurrence or threat of disaster is imminent, pursuant to TEX. GOV'T CODE § 418.011 *et seq.*;

E. "**Disaster**" means the occurrence or imminent threat of widespread or severe damage, injury, or loss of life or property resulting from any natural or man-made cause, including fire, flood, earthquake, wind, storm, wave action, oil spill or other water contamination, volcanic activity, epidemic, air contamination, blight, drought, infestation, explosion, riot, hostile military or paramilitary action, other public calamity requiring emergency action, or energy emergency, pursuant to TEX. GOV'T

CODE § 418.004(1);

F. "Effective date" shall mean the date that this Judgment is signed by the Court;

G. "Consumer" and "Person" means an individual, partnership, corporation, or entity of any kind, including this state, or a subdivision or agency of this state that seeks or acquires, by purchase or lease, any goods or services;

H. "Normal price" means the average price for a specific hotel room or specific type of hotel room as charged over the preceding two months prior to the Governor's disaster declaration issued under Chapter 418 of the TEXAS GOVERNMENT CODE; and

I. "Tax exemption certificate" means the Texas Sales and Use Tax Exemption Certification (Form 01-339(Back)) provided by the Office of the Comptroller. The URL for the form is http://www.window.state.tx.us/taxinfo/taxforms/01-3392.pdf.

II. INJUNCTIVE RELIEF

8. It is hereby ordered, adjudged and decreed that, in the pursuit and conduct of trade or commerce within the STATE OF TEXAS, the Defendants, their officers, agents, servants, employees and attorneys and any other person in active concert or participation with the Defendants who receives actual notice of this order by personal service or otherwise are restrained from the following:

A. Taking advantage of any declared disaster by demanding or charging a price for lodging or other necessities that exceeds the normal price by more than ten percent (10%).

B. Taking advantage of any declared disaster by demanding or charging a higher price for extra guests or children than the price charged for extra guests or children during the two months preceding the declared disaster.

C. Collecting state and local taxes from disaster victims during a declared disaster when such taxes have been waived by the Governor pursuant to Chapter 418 of the Government Code.

D. Failing to obtain tax exemption certificates from disaster evacuees during any time the Governor waives the Hotel Occupancy Tax pursuant to Chapter 418 of the Government Code.

E. Failing to maintain a guest registration system to record the identity and contact information of guests of the hotel or motel including the guests' names, addresses, the length of their stay, and the price charged per day.

F. Altering, destroying or mutilating records ordered to be kept pursuant to Subparagraph D and E, above, for a three year period after a declared disaster, provided the records are not related to a matter that is in litigation. If the records are related to a matter that is in litigation, Defendants duty to preserve records may extend beyond three years after the declared disaster as determined by applicable laws, regulations, rules, or common law of the State of Texas.

III. OTHER RELIEF

9. IT IS FURTHER ORDERED that nothing in this order impacts or restricts Defendants pricing practices during times when there is no declared disaster and Defendants will be permitted to honor reservations for accommodations at the rates which were confirmed or contracted for prior to a declared disaster, even if the reservation is for a date within the period of the declared disaster and the rates exceed the normal price by more than ten percent (10%).

IV. POTENTIAL CONFLICTS OF LAW

10. To the extent that the terms of this Judgment conflict with any Texas, local or federal law or

regulation which now exists or is later enacted or amended, such law and not this Judgment shall apply where such conflict exists. For purposes of this Judgment, a conflict exists if conduct prohibited by this Judgment is required or permitted by such Texas, local, or federal law or regulation, or if such conduct required by this Judgment is prohibited by such Texas, local or federal law or regulation.

V. MISCELLANEOUS

11. **Legal Exposure** – This Judgment is not intended to give any legal rights or remedies of any nature to any third party.

12. **Notices** – All notices required by this Judgment shall be sent by certified or registered mail, return receipt requested, postage prepaid or by hand delivery to:

If to the Attorney General:
Robert A. Lemus
Assistant Attorney General
Office of the Attorney General
808 Travis, Suite 1520
Houston, Texas 77002
Telephone: (713) 223-5886

If to the Defendants:
R. Eric Hagenswold
Scott, Douglass & McConnico, L.L.P.
One American Center
600 Congress Avenue, 15th Floor
Austin, Texas 78701-2589
Telephone: (512) 495-6300

13. **Retention of Jurisdiction** – This Court shall retain jurisdiction over the enforcement of this Judgment.

14. **Final Judgment** – After signing by the Court, this agreement constitutes a final judgment in this matter.

15. Costs of court are adjudged against the party who incurred them.

16. This Judgment disposes of all parties, claims, and issues which were included or could have been included in this lawsuit.

17. Both parties have waived all right to appeal from this Judgment.

18. All relief not expressly granted herein is denied.

WEI-CHENG KAO,
Defendant

NO. 2007CI14425

STATE OF TEXAS,	§	**IN THE DISTRICT COURT OF**
	§	
and	§	**BEXAR COUNTY, TEXAS**
	§	
THE ST. ANTHONY, A WYNDHAM HISTORICAL HOTEL, AND WYNDHAM INTERNATIONAL, INC.	§	**45th JUDICIAL DISTRICT**
Respondents.	§	

ASSURANCE OF VOLUNTARY COMPLIANCE

The STATE OF TEXAS, acting by and through Attorney General GREG ABBOTT, and Wyndham Hotel Management, Inc. ("WHM"), on behalf of The St. Anthony, a Wyndham Historical Hotel ("St. Anthony"), and Wyndham International, Inc. ("WII") (WHM, St. Anthony and WII collectively, "Respondents") respectfully submit to the Court the following Assurance of Voluntary Compliance ("AVC") in accordance with the Deceptive Trade Practices Act ("DTPA"), TEX. BUS. & COM. CODE ANN. § 17.58.

I.
STATE'S ALLEGATIONS

The Office of the Attorney General alleges that WII and St. Anthony took advantage of consumers by selling lodging at exorbitant or excessive prices in violation of sections 17.46(a) and 17.46(b)(27)(A)&(B) of the DTPA. Specifically, the State alleges that WII and St. Anthony improperly offered for sale and sold lodging at excessive prices to consumers for several days in September 2005 during a Governor-declared disaster referred to as Hurricane Rita.

II.
WHM'S RESPONSE

WHM assumed certain liabilities associated with WII's business as a result of the sale of

certain assets of WII on or about October 11, 2005. WII managed the St. Anthony during September 2005, and WHM had no control of the management of the St. Anthony during September 2005. Neither WHM nor WII serves as the management company for the St. Anthony as of the date of this AVC.

The Respondents specifically deny they violated the Deceptive Trade Practices Act ("DTPA"), TEX. BUS. & COM. CODE ANN. § 17.46(b)(27)(A)&(B) and 17.46(a), or any other Texas law or rule, and further deny all other allegations asserted by the Texas Attorney General in connection with its investigation.

III.
STIPULATIONS

The State and Respondent agree that:

This AVC shall fully resolve any and all claims, causes of action, and allegations which may have arisen out of the investigation by the Consumer Protection Division of the Office of the Attorney General into the business practices of Respondents during the period of Hurricane Rita;

WHM shall institute reasonable practices to provide notice of the applicable terms of this agreement to all agents and employees involved in the sale of hotel accommodations during any natural disaster or calamity declared by the Governor of the State of Texas;

In consideration of the terms of this Assurance, the Office of the Attorney General releases the Released Parties as defined herein, from all claims, complaints, demands, suits, actions or causes of action resulting from acts or omissions which were the subject of the DTPA investigation referred to in paragraph I., above, which occurred on or before the date of the execution of this AVC. This release does not and is not intended, however, to constitute a

waiver of the right of the State of Texas to seek enforcement in a court of competent jurisdiction of WHM's compliance with the terms contained herein;

They do not contest, the entry of this agreement; and

The corporate signatory hereto is a WHM officer who is authorized to enter into this AVC on behalf of WHM and has read the AVC and agrees to entry of same.

IV.
DEFINITIONS

As used in this AVC, the following terms are defined as follows:

A. **"Released Parties"** means Respondents, their predecessors, successors, assigns, officers, agents, subcontractors, representatives, shareholders, directors, servants, present and former employees, parent entities, affiliates, subsidiaries, and any other person or entity in active concert or participation with them;

B. **"The St. Anthony"** shall mean the hotel which is located at 300 East Travis, San Antonio, Texas 78205;

C. **"State of Disaster"** shall mean the period of time from September 20, 2005, when Texas Governor Rick Perry issued a proclamation certifying Hurricane Rita as an imminent disaster, to November 18, 2005, when the second proclamation extending the state of disaster expired;

D. **"Declared disaster"** means the Governor of Texas by executive order or proclamation may declare a state of disaster if the Governor finds a disaster has occurred or that the occurrence or threat of disaster is imminent pursuant to TEXAS GOVERNMENT CODE § 418.014 *et seq.*;

E. **"Disaster"** means the occurrence or imminent threat of widespread or sever damage, injury, or loss of life or property resulting from any natural or man-made cause, including fire, flood, earthquake, wind, storm, wave action, oil spill or other water contamination, volcanic activity, epidemic, air contamination, blight, drought, infestation, explosion, riot, hostile military or paramilitary action, other public calamity requiring emergency action, or energy emergency pursuant to TEXAS GOVERNMENT CODE § 418.004(1);

F. **"Effective Date"** shall mean the date that this AVC is signed by the Court; and

G. **"Consumer" and "Person"** means an individual, partnership, corporation, or entity of any kind, including this state, or a subdivision or agency of this state that seeks or acquires, by purchase or lease, any goods or services.

V.
TERMS OF COMPLIANCE

WHM assures the Office of the Attorney General (and thereby the consumers of Texas) that from the effective date of this AVC, WHM:

A. Subject to subsection B below, WHM shall not charge or demand during a declared disaster in the State of Texas, a price for accommodations at hotel properties it manages in the State of Texas in excess of 10% or greater the average amount charged demanded or offered by the hotel properties for rent for each room type for the 90 day period immediately preceding such disaster;

B. WHM however is permitted to honor reservations for accommodations at the rates confirmed or contracted for prior to a disaster; and

C. Shall not charge sales taxes during a period in which the Governor of the State of Texas has suspended the collection of state and local hotel and motel taxes under GOV. CODE § 418.012, § 418.014, § 418.015, § 418.016 or § 418.020.

VI.
ATTORNEYS' FEES AND RESTITUTION

The State of Texas, through the Office of the Attorney General of Texas, shall have and recover restitution in the amount of Ninety Thousand and No/100 Dollars ($90,000.00) from WHM, to be used in whole or in part, for restoration of money or other property taken from consumers by WII and/or St. Anthony as the State determines appropriate, advisable and necessary. In the event the State is not able to distribute all of this restitution to consumers within one year from the effective date of this AVC, such amounts shall revert to the State, as additional attorney fees.

WHM shall pay said restitution on September 10, 2007, by cashier's check made payable to the State of Texas through the Texas Attorney General, bearing the reference **AG # 052230430**, and deliver it to the attention of Paul Carmona, Chief, Consumer Protection and Public Health Division, Office of the Attorney General, by mail at P.O. Box 12548, Austin, Texas, 78711-2548 or by other delivery at 300 W. 15 th St., WPC Building, Floor 9, Austin, Texas, 78701.

The State of Texas, through the Office of the Attorney General of Texas, shall have and recover attorneys' fees in the amount of One Hundred Thousand and No/100 Dollars ($100,000.00) from WHM for reimbursement of the State's attorneys' fees and investigative costs incurred in this case, which sum is for the benefit of the State of Texas, a governmental

unit, and which is not compensation for any actual or pecuniary loss and do not constitute an antecedent debt with respect to this investigation.

WHM shall pay said State's attorneys' fees and investigative costs on September 10, 2007, by cashier's check made payable to the State of Texas through the Texas Attorney General, bearing the reference **AG # 052230430**, and delivered to the attention of Paul Carmona, Chief, Consumer Protection and Public Health Division, Office of the Attorney General, by mail at P.O. Box 12548, Austin, Texas, 78711-2548 or by other delivery at 300 W. 15th St., WPC Building, Floor 9, Austin, Texas, 78701.

IX.
NOTICE

As set forth in TEX. BUS. COM. CODE § 17.58(c), both the State of Texas and Respondent acknowledge that unless this AVC has been rescinded by agreement of the parties or voided by the Court for good cause, the subsequent failure to comply with the terms of this AVC is *prima facie* evidence of a violation of the Texas Deceptive Trade Practices Act in any action by the State of Texas acting by and through the Office of the Attorney General. Respondents do not waive and hereby expressly reserve all defenses to any claim that any of them have failed to comply with the terms of this AVC. Further, it is agreed and understood that this AVC shall not in any way affect individual rights of action by any consumers.

The State's signature on this AVC does not constitute an approval by the State of any practices of the Respondent and the Respondent agrees not to make any representations to the contrary.

SIGNED this 21 day of Sept, 2007.

Exhibit A-180

OFFICE OF THE ATTORNEY GENERAL
CONSUMER PROTECTION DIVISION

CIVIL INVESTIGATIVE DEMAND

TO: Energy Transfer LP
C/o: Corporation Service Company
251 Little Falls Drive
Wilmington, Delaware 19808

via CMRRR: 7020 1810 0000 0711 6611
Return Date: June 1, 2021

Pursuant to this office's specific authority under article IV, section 22 of the Texas Constitution and section 17.61 of the Texas Deceptive Trade Practices – Consumer Protection Act, sections 17.41-.63, Texas Business and Commerce Code ("DTPA"), Energy Transfer Fuel, LP is hereby directed to produce the items listed in Exhibit "A" attached hereto. Such production is governed by the instructions and definitions on this page and subsequent pages.

You are to make available the documentary material described in Exhibit "A" to the undersigned Assistant Attorney General or other authorized agent(s) identified by the Consumer Protection Division ("Division"). This documentary material shall be produced for inspection and copying during normal business hours at your principal office or place of business, or may be sent electronically or by certified mail to the Office of Attorney General, 112 E. Pecan St., Ste 735, San Antonio, Texas 78205 and is due on June 1, 2021. If providing documents electronically, please provide them to Steven Robinson at steven.robinson@oag.texas.gov. **Please contact one of the persons listed below upon receipt in order to discuss the return date and the logistics of producing the requested documents to the Consumer Protection Division.**

Pursuant to this office's specific authority under article IV, section 22 of the Texas Constitution and section 17.61 of the Texas Deceptive Trade Practices – Consumer Protection Act, sections 17.41-.63, Texas Business and Commerce Code, the Division believes that Energy Transfer Fuel, LP may be in possession, custody, or control of documentary material relevant to an investigation of possible violations of DTPA sections 17.46(a) and/or 17.46(b) with respect to the prices of physical natural gas in the State of Texas during the month of February 2021.

TAKE NOTICE THAT pursuant to section 17.62, Texas Business and Commerce Code, any person who attempts to avoid, evade, or prevent compliance, in whole or in part, with this directive by removing, concealing, withholding, destroying, mutilating, altering, or by any other means falsifying any documentary material may be guilty of a misdemeanor and on conviction is punishable by a fine of not more than $5,000.00 or by confinement in the county jail for not more than one year, or both.

ISSUED THIS 11th day of May, 2021.

Instructions

1. **Read These Instructions/Definitions Carefully.** Your production must comply with these instructions and definitions.

2. **Duty to Preserve Documents**. All documents and/or other data which relate to the subject matter or requests of this Civil Investigative Demand must be preserved. ***Any ongoing, scheduled or other process of document or data destruction involving such documents or data must cease even if it is your normal or routine course of business for you to delete or destroy such documents or data and even if you believe such documents or data are protected from discovery by privilege or otherwise.*** Failure to preserve such documents or data may result in legal action and may be regarded as spoliation of evidence under applicable law.

3. **Relevant Time Period**. Unless otherwise noted, the requests in this Civil Investigative Demand require production of documents from February 1, 2021, to February 26, 2021.

4. **Custody and Control.** In responding to this Civil Investigative Demand, you are required to produce not only all requested documents in your physical possession, but also all requested documents within your custody and control. A document is in your custody and control if it is the possession of another person and you have a right to possess that document that is equal or superior to that other person's right of possession. On the rare occasion that you cannot obtain the document, you must provide an explanation as to why you cannot obtain the document which includes the following information:

   a. The name of each author, sender, creator, and initiator of such document;

   b. the name of each recipient, addressee, or party for whom such document was intended;

   c. the date the document was created;

   d. the date(s) the document was in use;

   e. a detailed description of the content of the document;

   f. the reason it is no longer in your possession, custody or control; and

   g. the document's present whereabouts.

   If the document is no longer in existence, in addition to providing the information indicated above, state on whose instructions the document was destroyed or otherwise disposed of, and the date and manner of the destruction or disposal.

5. **Non-identical Copies to be Produced.** Any copy of a document that differs in any manner, including but not limited to the presence of handwritten notations, different senders or recipients, etc. must be produced.

6. **No Redaction**. All materials or documents produced in response to this Civil Investigative Demand shall be produced in complete unabridged, unedited and unredacted form, even if portions may contain information not explicitly requested, or might include interim or final editions of a document.

7. **Document Organization**. Each document and other tangible thing produced shall be clearly designated as to which request, and each sub-part of a request, that it satisfies. The documents produced shall be identified and segregated to correspond with the number and subsection of the request.

8. **Production of Documents.** You may submit photocopies (with color photocopies where necessary to interpret the document) in lieu of original hard-copy documents if the photocopies provided are true, correct and complete copies of the original documents. If the requested information is electronically stored information, it shall be produced in electronic form. Electronically stored information shall be produced with the accompanying metadata, codes and programs necessary for translating it into usable form, or the information shall be produced in a finished usable form. For any questions related to the production of documents you may consult with the Office of the Attorney General representatives above.

Definitions

1. **"You," "your," "the business,"** and **"Energy Transfer LP"** means the entity named on page one of this Civil Investigative Demand and includes its past and present officers, employees, agents and representatives, parents and predecessors, divisions, subsidiaries, affiliates, partnerships and joint ventures, and all persons and entities acting or purporting to act under the guidance or on behalf of any of the above. The terms "subsidiary," "affiliate," and "joint venture" refer to any firm in which there is total or partial ownership (25 percent or more) or control between the company and any other person or entity.

2. **"Document"** means the original and all non-identical copies (whether different from the original because of notes, underlining, attachments, or otherwise) of all computer files, and all written, printed, graphic or recorded material of every kind, regardless of authorship. It includes communications in words, symbols, pictures, photographs, sounds, films, and tapes, as well as electronically stored information, computer files, together with all codes and/or programming instructions and other materials necessary to understand and use such systems.

3. **"Communication"** is to be broadly construed and includes but is not limited to e-mails, notes, faxes, memos, text messages, social media posts, letters, notes of conversations and meetings and recordings of conversations and meetings, whether in text or audio form.

4. **"Identify"** for an individual means providing the individual's name and all contact information. For an entity it means providing the entity's name and all contact information. For any other tangible thing it means providing a reasonably detailed description of the item and all contact information for the custodian or person who has possession, custody or control thereof.

5. **"Including"** means including, but not limited to.

6. **"Person"** includes you and means any entity or natural person.

7. **"Any"** means any and all.

8. **"Relate**," **"related**," and **"relating"** mean being in any way legally, logically, or factually connected with the subject matter of the request at issue.

9. The words **"and"** and **"or"** shall be construed either conjunctively or disjunctively as required by the context to bring within the scope of the request, any document(s) that might be deemed outside its scope by another construction.

10. Unless the context otherwise clearly indicates, words used in the singular include the plural, the plural includes the singular, and the neuter gender includes the masculine and the feminine.

11. "**Physical Fixed Price Spot Transaction"** means a purchase or sale of physical natural gas delivered firm at a specified location for a pre-determined fixed price involving any of the following: (1) a buyer in Texas, (2) a seller in Texas, (3) the sale of physical natural gas in Texas, or (4) the delivery of physical natural gas to an entity in Texas.

EXHIBIT A: DOCUMENTS TO BE PRODUCED

1. For all natural gas You offered for sale as Physical Fixed Price Spot Transactions during the Relevant Time Period, documentation sufficient to show whether and when You obtained title to said gas, as well as the price You paid for said gas.

2. Documents sufficient to identify increases in Your costs unique to the Relevant Time Period which factored into your sales prices per MMBTU increasing, including any changes in delivery charges and processing charges You incurred. This request includes communications relating to natural gas plants and producers temporarily ceasing output or deliveries during the Relevant Time Period.

3. All settlement statements and account statements received from Intercontinental Exchange, Inc. pertaining to natural gas sales occurring as Physical Fixed Price Spot Transactions during the Relevant Time Period.

4. All internal routine reporting (including daily or weekly reports to management) showing gross or net margin, or otherwise showing profitability of natural gas You sold as Physical Fixed Price Spot Transactions during the Relevant Time Period.

5. All contracts and agreements governing purchases or sales of physical natural gas occurring during the Relevant Time Period. This request includes contracts generally referred to as "Base Contract[s] for Sale and Purchase of Natural Gas" or "NAESB" contracts.

6. All transactions summaries, account statements, and trade confirmations for transactions governed by the contracts requested in Request No. 5.

7. All external communications pertaining to the price level and volume at which You offered or sold physical natural gas during the Relevant Time Period. This request includes invoices and billing statements transmitted to entities purchasing physical natural gas from You.

8. All non-privileged internal communications relevant to the determination of the price level and volume at which You offered physical natural gas for sale during the Relevant Time Period.

   g. the document's present whereabouts.

   If the document is no longer in existence, in addition to providing the information indicated above, state on whose instructions the document was destroyed or otherwise disposed of, and the date and manner of the destruction or disposal.

5. **Non-identical Copies to be Produced.** Any copy of a document that differs in any manner, including but not limited to the presence of handwritten notations, different senders or recipients, etc. must be produced.

6. **No Redaction**. All materials or documents produced in response to this Civil Investigative Demand shall be produced in complete unabridged, unedited and unredacted form, even if portions may contain information not explicitly requested, or might include interim or final editions of a document.

7. **Document Organization**. Each document and other tangible thing produced shall be clearly designated as to which request, and each sub-part of a request, that it satisfies. The documents produced shall be identified and segregated to correspond with the number and subsection of the request.

8. **Production of Documents.** You may submit photocopies (with color photocopies where necessary to interpret the document) in lieu of original hard-copy documents if the photocopies provided are true, correct and complete copies of the original documents. If the requested information is electronically stored information, it shall be produced in electronic form. Electronically stored information shall be produced with the accompanying metadata, codes and programs necessary for translating it into usable form, or the information shall be produced in a finished usable form. For any questions related to the production of documents you may consult with the Office of the Attorney General representatives above.

Definitions

1. **"You," "your," "the business,"** and **"Oasis Pipeline, LP"** means the entity named on page one of this Civil Investigative Demand and includes its past and present officers, employees, agents and representatives, parents and predecessors, divisions, subsidiaries, affiliates, partnerships and joint ventures, and all persons and entities acting or purporting to act under the guidance or on behalf of any of the above. The terms "subsidiary," "affiliate," and "joint venture" refer to any firm in which there is total or partial ownership (25 percent or more) or control between the company and any other person or entity.

2. **"Document"** means the original and all non-identical copies (whether different from the original because of notes, underlining, attachments, or otherwise) of all computer files, and all written, printed, graphic or recorded material of every kind, regardless of authorship. It includes communications in words, symbols, pictures, photographs, sounds, films, and tapes, as well as electronically stored information, computer files, together with all codes and/or programming instructions and other materials necessary to understand and use such systems.

3. **"Communication"** is to be broadly construed and includes but is not limited to e-mails, notes, faxes, memos, text messages, social media posts, letters, notes of conversations and meetings and recordings of conversations and meetings, whether in text or audio form.

4. **"Identify"** for an individual means providing the individual's name and all contact information. For an entity it means providing the entity's name and all contact information. For any other tangible thing it means providing a reasonably detailed description of the item and all contact information for the custodian or person who has possession, custody or control thereof.

5. **"Including"** means including, but not limited to.

6. **"Person"** includes you and means any entity or natural person.

7. **"Any"** means any and all.

8. **"Relate**," **"related**," and **"relating"** mean being in any way legally, logically, or factually connected with the subject matter of the request at issue.

9. The words **"and"** and **"or"** shall be construed either conjunctively or disjunctively as required by the context to bring within the scope of the request, any document(s) that might be deemed outside its scope by another construction.

10. Unless the context otherwise clearly indicates, words used in the singular include the plural, the plural includes the singular, and the neuter gender includes the masculine and the feminine.

11. "**Physical Fixed Price Spot Transaction"** means a purchase or sale of physical natural gas delivered firm at a specified location for a pre-determined fixed price involving any of the following: (1) a buyer in Texas, (2) a seller in Texas, (3) the sale of physical natural gas in Texas, or (4) the delivery of physical natural gas to an entity in Texas.

EXHIBIT A: DOCUMENTS TO BE PRODUCED

1. For all natural gas You offered for sale as Physical Fixed Price Spot Transactions during the Relevant Time Period, documentation sufficient to show whether and when You obtained title to said gas, as well as the price You paid for said gas.

2. Documents sufficient to identify increases in Your costs unique to the Relevant Time Period which factored into Your physical natural gas sales prices per MMBTU increasing, including any increased delivery charges and processing charges You incurred. This request includes communications relating to natural gas plants and producers temporarily ceasing output or deliveries during the Relevant Time Period.

3. All settlement statements and account statements received from Intercontinental Exchange, Inc. pertaining to natural gas sales occurring as Physical Fixed Price Spot Transactions during the Relevant Time Period.

4. All internal routine reporting (including daily or weekly reports to management) showing gross or net margin, or otherwise showing profitability of natural gas You sold as Physical Fixed Price Spot Transactions during the Relevant Time Period.

5. All contracts and agreements governing purchases or sales of physical natural gas occurring during the Relevant Time Period. This request includes contracts generally referred to as "Base Contract[s] for Sale and Purchase of Natural Gas" or "NAESB" contracts.

6. All transactions summaries, account statements, and trade confirmations for transactions governed by the contracts requested in Request No. 5.

7. All external communications pertaining to the price level and volume at which You offered or sold physical natural gas during the Relevant Time Period. This request includes invoices and billing statements transmitted to entities purchasing physical natural gas from You.

8. All non-privileged internal communications relevant to the determination of the price level and volume at which You offered physical natural gas for sale during the Relevant Time Period.

In Re CPS Energy Gas Supplier Litigation	§	In the District Court of
	§	Bexar County, Texas
	§	407th Judicial District

Cause No. 2021 CI 05138

CPS Energy, Plaintiff–Counter-defendant,	§	In the District Court of
v.	§	Bexar County, Texas
Houston Pipe Line Company, LP and **Oasis Pipeline, LP**, Defendants–Counterclaimants.	§	407th Judicial District

AFFIDAVIT OF BRUCE BORDOVSKY

STATE OF TEXAS §
§
COUNTY OF BEXAR §

BEFORE ME, the undersigned authority, personally appeared Bruce Bordovsky, who, after being by me duly sworn, deposed as follows:

1. My name is Bruce Bordovsky. I am of sound mind, and am capable of making this affidavit and am personally acquainted with the facts stated herein.

2. In February 2021, I was a natural gas trader at CPS Energy. My current title is Gas Acquisitions and Scheduling Manager. I am familiar with the pipelines that interconnect with various receipt and delivery points on CPS Energy's system by virtue of my duties and responsibilities as a

CPSE Response in Opp to ET MSJ
Exhibit B
MDL-2022-CI-02879
exhibitsticker.com

gas trader. I am also familiar with the manner in which CPS Energy purchased gas in February 2021, and the creation of documents related to CPS Energy's purchase of gas.

3. In February 2021, CPS Energy had transportation contracts in place with three different pipeline companies: Energy Transfer (via Houston Pipeline "HPL" and Oasis Pipeline "Oasis"), Enterprise Texas Pipeline LLC, and TPL SouthTex Transmission Company LP (an affiliate of Targa).

4. CPS Energy's transportation contracts with each of these companies focused on receipt points in different geographic areas. Specifically, CPS Energy's transportation agreements with HPL and Oasis allowed CPS Energy to transport gas primarily from points in the Katy and Houston Ship Channel areas of southeast Texas, with small volumes from points in South Texas as well. The agreements with Enterprise Texas Pipeline allowed CPS Energy to transport gas from West Texas (e.g., from the Waha hub) and trading points in South Texas (such as South Texas Map). And the agreement with Targa permitted CPS Energy to transport gas from the tailgate of Targa's Silver Oak (also known as Teak) processing plant in South Texas.

5. CPS Energy purchases gas at two basic types of sale points: (1) trading points and (2) the gates or inlets of CPS Energy's own natural gas system or power plants.

6. In addition to buying at various trading points and then using transportation contracts to deliver it to CPS Energy's delivery points, CPS Energy can also purchase delivered gas sold at one of its actual delivery points—such as North Gate, South Gate, or Rio Nogales—thereby eliminating the need to transport that gas.

7. The Oasis Northgate, Karnes County, and Rio Nogales delivery points are not available sale points for most gas suppliers; instead, only the pipelines that interconnect with those delivery points can offer delivered gas there.

8. In February 2021, the only gas pipelines that could supply the Rio Nogales power plant were the Guadalupe Pipeline owned and operated by DCP Midstream ("DCP"), and HPL and Oasis, both operated by Energy Transfer. Thus, if CPS Energy needed to purchase delivered gas at

Rio Nogales in February 2021, its only two options were to purchase it from Energy Transfer or DCP.

9. In February 2021, the only two pipelines that could supply gas to CPS Energy's Southgate pipeline in Karnes County were HPL and Targa's TPL SouthTex pipeline. Thus, if CPS Energy needed to purchase delivered gas at Southgate in Karnes County, its only two options were to purchase it from Energy Transfer or Targa.

10. Therefore, if either DCP or Targa could not sell CPS Energy delivered gas on a particular day due to limited supply or operational problems, CPS Energy's only option for delivered gas at Southgate in Karnes County and Rio Nogales would be Energy Transfer.

11. In February 2021, the only pipeline that could supply gas at the Oasis Northgate delivery point was Oasis. Accordingly, CPS Energy's only option for delivered gas at Oasis Northgate was Energy Transfer.

12. Attached as **Exhibit 1** is spreadsheet that Ken Skaer and I used in February 2021 to track CPS Energy's daily gas purchases, stamped CPSE-MDL_000001016. Each numbered tab corresponds to a specific gas day and reflects the natural gas deals CPS Energy entered into for gas on that particular day. Our practice was to update the spreadsheet as we traded to reflect CPS Energy's daily gas purchases.

13. I am familiar with the manner in which the daily gas purchases spreadsheet at **Exhibit 1** was created and maintained by virtue of my duties and responsibilities as a CPS Energy natural gas trader. I am qualified to attest that **Exhibit 1** was made as part of CPS Energy's regularly conducted business activity.

14. **Exhibit 1** was made at or near the time of each act, event, or condition set forth in it.

15. **Exhibit 1** was made by, or from information transmitted by, persons with knowledge of the matters set forth in it.

16. **Exhibit 1** was kept in the course of a regularly conducted business activity.

17. It is CPS Energy's regular practice to make **Exhibit 1**.

18. Attached as **Exhibit 2** is a document stamped CPSE-MDL_000010339–000010357 that truly and accurately reflects a text message exchange dated February 15, 2021, between me, Kevin Pollo, Keith Albers, Mike Hale, Ken Skaer, and Paul Vinson.

19. Attached as **Exhibit 3** is a document stamped CPSE-MDL_000010372–000010378 that truly and accurately reflects a text message exchange dated February 14, 2021, between me, Amber Irving, Ken Skaer, and Paul Vinson.

20. Attached as **Exhibit 4** is a document stamped CPSE-MDL_000010380–000010383 that truly and accurately reflects a text message exchange dated February 15, 2021, between me, Amber Irving, Ken Skaer, and Paul Vinson.

21. Attached as **Exhibit 5** is a document stamped CPSE-MDL_000010809–000010826 that truly and accurately reflects a text message exchange dated February 15, 2021, between me, Kevin Pollo, Keith Albers, Mike Hale, Ken Skaer, and Paul Vinson.

Affiant says no further.

Bruce Bordovsky

AFFIDAVIT OF BUSINESS RECORDS

STATE OF TEXAS §
§
COUNTY OF BEXAR §

BEFORE ME, the undersigned authority, personally appeared Amber Irving, who, after being by me duly sworn, deposed as follows:

1. My name is Amber Irving. I am of sound mind, and am capable of making this affidavit and am personally acquainted with the facts stated herein.

2. In February 2021, I was CPS Energy's senior natural gas scheduler. In that role, I coordinated with the pipelines as well as natural gas suppliers to handle the logistics of getting the gas CPS Energy purchased into its system, which included nominating and scheduling natural gas (i.e., confirming the gas is set up to flow on the date for which CPS Energy purchased it) and

CPSE Response in Opp to ET MSJ
Exhibit C
MDL-2022-CI-02879
exhibitsticker.com

tracking any cuts to supply. I am familiar with the manner in which CPS Energy's records are created and maintained by virtue of my duties and responsibilities.

3. Attached as **Exhibit 1** is CPS Energy's February 2021 Gas Transactions spreadsheet, stamped as CPSE-MDL_000026240. In my role as CPS Energy's lead natural gas scheduler, I would update the "Sched Qty" column in the "Transaction Data" worksheet to reflect any cuts to the volume of gas CPS Energy had nominated for that day from each supplier. **Exhibit 1** is the most up-to-date version the February 2021 Gas Transactions spreadsheet.

4. I am familiar with the manner in which the February 2021 Gas Transactions spreadsheet at **Exhibit 1** was created and maintained by virtue of my duties and responsibilities at CPS Energy. I am qualified to attest that **Exhibit 1** was made as part of CPS Energy's regularly conducted business activity.

5. **Exhibit 1** was made at or near the time of each act, event, or condition set forth in it.

6. **Exhibit 1** was made by, or from information transmitted by, persons with knowledge of the matters set forth in it.

7. **Exhibit 1** was kept in the course of a regularly conducted business activity.

8. It is CPS Energy's regular practice to make **Exhibit 1**.

Affiant says no further.

Amber Irving

DECLARATION OF PATRICK BERGIN IN SUPPORT OF CPS ENERGY'S RESPONSE IN OPPOSITION TO ENERGY TRANSFER'S MOTION FOR SUMMARY JUDGMENT

I, Patrick Bergin, declare and state the following facts, all of which are within my personal knowledge and are true and correct:

1. I am over eighteen (18) years of age. I am of sound mind and fully competent to testify to the matters stated herein. I have never been convicted of a felony or other crime involving dishonesty or moral failing and I am not suffering from any disability, which would impair my ability to know or perceive the truth. Furthermore, I have personal knowledge of all of the facts and matters stated herein and they are true and correct, unless otherwise specified, and my conclusions stated herein are true and correct based on reasonable scientific probability.

2. I have been previously designated as an expert by CPS Energy in this matter. I submit this declaration in support of CPS Energy's Response in Opposition to Energy Transfer's Motion for Summary Judgment. This declaration is substantially identical to my expert designation that CPS Energy previously served on opposing counsel in this matter.

3. I am a private energy consultant based in College Station, Texas, working through my private consulting firm, FPS Energy Consulting, LLP. I have over twenty-three years of experience in the energy industry with leading energy firms. My experience has included energy trading and trading operations, investment management, market analysis and risk management, and accounting and financial analysis. A copy of my curriculum vitae, list of previous trial testimony, and list of doc-

exhibitsticker.com

uments, tangible things, reports, models, or data compilations has been provided to opposing counsel**.** I am being compensated for his time spent on study and testimony in this case at the rate of $500 per hour.

4. I have offered testimony and opinions concerning various indices published by S&P Global Platts ("Platts") for natural gas at various delivery points in Texas, including the methodology Platts employed to produce those indices during February 2021, the Texas physical natural gas indices published during February 2021, and the transactions underlying the indices published during February 2021 and, in particular, for flow dates February 13–19, 2021 (the "Disaster Period").

5. At trial, I intend to provide the following opinions:

a. Platts publishes several types of indices for physical natural gas at various delivery points in the United States and Canada, including (i) monthly indices, commonly referred to as Inside FERC or First of Month indices, and (ii) daily indices, known as Gas Daily indices.

b. Platts's Gas Daily indices are based on (i) transaction data received from the Intercontinental Exchange ("ICE"), which operates a trading platform through which market participants may enter into transactions for the purchase and sale of physical natural gas at certain delivery points, and (ii) transaction data reported by market participants to Platts, which may include transactions executed on the ICE exchange and transactions executed through other means.

c. For each flow day, Platts publishes three price components for each Gas Daily location: the midpoint, the common range, and the absolute range. The midpoint or index is generally the volume-weighted average of all transactions submitted to Platts for that location for the flow date, excluding transactions that Platts determines to be

outliers. Platts also publishes the total volume and number of deals used to determine the index on each day.

d. Not all participants in the market for physical natural gas report their transactions to Platts. For example, Enterprise Products Operating—which operates one of the largest intrastate natural gas pipeline systems in Texas—does not report to Platts. Further, many physical natural gas transactions are not executed on the ICE exchange but are instead executed directly between counterparties through other means, such as instant message, text message, phone, or email. As a result, many of the physical natural gas transactions executed each day are not reported to Platts by either ICE or the participants and, therefore, are not included in the Gas Daily indices.[1]

e. Additionally, according to Platts's published methodology, Platts includes both the buy and the sell side of a transaction executed on ICE in its daily indices.[2] For direct transactions, however, often only one side of the transaction is reported to Platts and, therefore, only one side is included in the index.

f. Because the Gas Daily index for any particular location on any given flow day is generally a volume-weighted average of transactions reported at that location for that day, market participants whose transactions make up a large number and volume of transactions at particular locations can have a large influence on the Gas Daily indices for those locations.

[1] At this time, I lack information sufficient to determine how Platts decides which transactions to exclude as outliers.

[2] There are some discrepancies, however, between the number of deals reflected in ICE's data and the number of deals labeled as ICE deals in Platts' data for certain days at some locations.

g. Based on review of information produced by Platts, ICE, and Energy Transfer, I calculated the impact of Energy Transfer's transactions on the Gas Daily index (calculated as a percentage of overall volume underlying the index) during February 2021 at the following locations:

Flow Date(s)	HSC	Katy	Waha
Feb. 6–8	100%	54%	58%
Feb. 9	91%	51%	60%
Feb. 10	0%	2%	48%
Feb. 11	100%	34%	42%
Feb. 12	32%	0%	13%
Feb. 13–16	93%	36%	34%
Feb. 17	100%	6%	0%
Feb. 18	64%	56%	15%
Feb. 19	64%	77%	2%
Feb. 20–22	63%	48%	34%
Feb. 23	100%	30%	31%
Feb. 24	100%	12%	41%
Feb. 25	0%	0%	0%
Feb. 26–28[3]	0%	48%	55%

6. My name is Patrick Bergin, my date of birth is 6/24/64, and my business address is 18976 Glenmeadows Lane, College Station, TX 77845. I declare under penalty of perjury that the foregoing is true and correct.

7. Executed in College Station, State of Texas on the 29th day of February, 2024.

Patrick Bergin

[3] Platts data shows that no trades were reported by ICE or off ICE for HSC Feb. 26–28.

CPS ENERGY'S RESPONSE IN OPPOSITION TO ENERGY TRANSFER'S MOTION FOR SUMMARY JUDGMENT

TABLE OF CONTENTS

INTRODUCTION 1

SUMMARY JUDGMENT EVIDENCE 2

FACTUAL BACKGROUND 8

A. **Who is CPS Energy?** 8

B. **How CPS Energy Obtains Natural Gas** 9

1. NAESB Base Contracts and Specific Transaction Confirmations 9

2. Transaction Date and Delivery Period: Monthly Baseload vs. Daily Spot 10

3. Means of Transacting: Direct Deals vs. ICE Trading Platform 11

4. Sale Points and Transportation: Hubs vs. Delivered Gas 11

5. Transaction Price: Fixed Price vs. Index-Based Price 15

C. **Energy Transfer's Outsized Role in the Texas Natural Gas Market** 17

D. **Winter Storm Uri** 19

1. CPS Energy purchases gas for the long-weekend. 20

2. The situation worsens over and after the long weekend. 21

E. **Energy Transfer's Profits** 23

F. **Energy Transfer's Attempt to Preemptively Collect** 23

G. **The Disputed Amounts and this Lawsuit** 24

LEGAL STANDARD 26

ARGUMENT & AUTHORITIES 26

A. **Energy Transfer's prices are unconscionable and, thus, unenforceable.** 27

1. The evidence shows that the prices Energy Transfer charged CPS Energy during Winter Storm Uri were unconscionable. 32

a. The prices Energy Transfer charged CPS Energy on February 12, 2021 for gas over the long weekend (February 13–16) are unconscionable. 33

i. Energy Transfer deploys oppressive and sharp practices to exploit the disaster by demanding unprecedented prices for desperately needed gas. 33

ii. CPS Energy had no choice but to purchase gas for the long weekend from Energy Transfer. 36

iii. Energy Transfer's unique access to low-cost supply allows it to profit enormously from the disaster. 38

iv. Energy Transfer understood and celebrated their exorbitant profits on February 12. 42

v. Energy Transfer's "different market" argument is unavailing. 44

b. The Long Weekend: February 13-16, 2021 47

i. Saturday, February 13 47

ii. Sunday, February 14 48

iii. Monday, February 15 50

c. The next-day prices Energy Transfer charged CPS Energy on February 16, 2021 are unconscionable. 53

i. As gas supply grew even worse, CPS Energy was left with no available alternatives besides Enterprise and Energy Transfer. 53

ii. Energy Transfer took advantage of CPS Energy's lack of bargaining power to extract exorbitant prices. 54

iii. Energy Transfer deploys sharp business practices to extract the highest prices it could from CPS Energy. 57

d. The prices Energy Transfer charged CPS Energy on February 17, 2021 are unconscionable. 59

i. The prices Energy Transfer charged "shock the conscience" and compel the court to intercede. 59

ii. Energy Transfer's attempts to normalize the shocking prices they charged are unavailing. 61

e. The prices Energy Transfer charged CPS Energy on February 18, 2021 are unconscionable. 64

2. The prices Energy Transfer charged CPS Energy during the storm bore no reasonable relationship to their supply costs. 66

3. Sophisticated entities are not precluded from asserting the affirmative defense of unconscionability. 67

4. Energy Transfer's sideshow arguments are unavailing. 70

a. Energy Transfer's so-called alternatives are not relevant. 71

b. Energy Transfer's risk-allocation argument is a red herring. 78

c. CPS Energy did not purchase gas during Winter Storm Uri "with a clear plan to profit." 79

B. The prices Energy Transfer charged during Winter Storm Uri are unenforceable because they violate Texas public policy. 81

1. Exemptions to a DTPA private cause of action do not alter Texas's public policy against price gouging. 82

2. Price gouging is anathema to Texas public policy 83

C. Energy Transfer's arguments regarding $38.83 and "short pay" are more misdirection. 86

D. CPS Energy's declaratory judgment claims survive. 89

CONCLUSION.....90

The City of San Antonio, acting by and through its City Public Service Board ("CPS Energy"), files this response in opposition to the motion for summary judgment filed by defendants Houston Pipe Line Company, L.P. ("HPL") and Oasis Pipeline, LP's ("Oasis" and, together with HPL, "the ET Pipelines") on their breach of contract claim.

INTRODUCTION

During the February 2021 winter storm disaster, temperatures plunged to the single digits, over four million Texans lost power, and Texas's electrical grid came within four minutes and thirty-seven seconds of complete collapse. As the municipally owned gas and electric utility for millions of people in and around San Antonio, CPS Energy required large volumes of natural gas to both run its gas-fired power plants and distribute to its residential and commercial gas customers. In the midst of this catastrophic disaster, the ET Pipelines and their parent company, Energy Transfer, saw an opportunity to exploit an emergency for profit.

At the height of the state-declared disaster and with full knowledge that CPS Energy had no option but to buy as much gas as possible, the ET Pipelines demanded that CPS Energy pay prices for natural gas that were as much as 15,000% higher than prevailing prices before the winter storm. Desperate for fuel to keep power on and gas flowing to furnaces and stovetops in its customers' homes, CPS Energy had no choice but to agree to these exorbitant prices. While regular Texans were facing the disaster's enormous human and economic toll, Energy Transfer excitedly bragged to its investors about its ability to "benefit" from "strong commodity prices." Ultimately, Energy Transfer would reap a $2.4 billion windfall from the winter storm, much of which it attributed to gas sales.

This lawsuit is about whether the prices the ET Pipelines charged CPS Energy for natural gas during a declared disaster are unconscionable and/or excessive or exorbitant in violation of public policy. For well over a century, Texas law has recognized that unconscionable contract terms—i.e., grossly unfair terms extracted through an unequal bargaining process—are unenforceable. Further, a contract term that violates public policy is likewise void under Texas law, and Texas public policy has long prohibited taking advantage of a disaster to charge exorbitant or excessive prices for

necessities. The ET Pipelines' blatant price gouging during the winter weather disaster fails both tests, and the outrageous prices they demand are therefore unenforceable.

The prices the ET Pipelines charged CPS Energy during a state-declared disaster are shocking, and as every witness in this case testified, unprecedented. The prices alone are sufficient to raise a fact issue with respect to CPS Energy's unconscionability and public policy defenses. The circumstances surrounding each transaction, including CPS Energy's lack of alternatives, inability to bargain, and the backdrop of the statewide disaster only further emphasize the outrageousness of Energy Transfer's blatant price gouging. The Court should deny the ET Pipelines' motion for summary judgment.

FACTUAL BACKGROUND

A. Who is CPS Energy?

CPS Energy is the nation's largest municipally owned natural gas and electric utility company and has been serving San Antonio, Texas and the surrounding area for 164 years. Ex. A-1, CPSE-MDL_000008619, at 8623. CPS Energy supplies power to more than 930,000 electric customers and also supplies natural gas directly to over 381,000 natural gas customers in Bexar County and portions of seven adjacent counties. Ex. A-2, Bordovsky Dep. 356:5–357:18; Ex. A-3, Eugster Dep. 122:14–21. In addition to residents living in the greater San Antonio area, CPS Energy's customers include hospitals, nursing homes, police and fire stations and military bases. Ex. A-4, Barham Dep. 88:19-91:17; Ex. A-5 Perryman Dep. 42:25-43:6.

CPS Energy is the sole entity responsible for providing electric and natural gas services to all the residents and businesses within its service area. Ex. A-2, Bordovsky Dep. 356:5-357:18. CPS Energy is neither a natural gas producer nor a natural gas marketer. Ex. A-6, Skaer Dep. 40:23. As a municipal utility, CPS Energy exists and operates solely for the benefit of the residents in its service area. Ex. A-7, Kuchinsky Dep. 12:9–18, 44:22–23, 95:8–11.

CPS Energy purchases natural gas to warm and power its customers' homes either by (1) distributing natural gas directly to its natural gas customers, or (2) using natural gas to generate electricity for its electric customers. Ex. A-6, Skaer Dep. 108:18–109:5, 109:16–20. Natural gas is the largest

single source of CPS Energy's generating capacity for electricity generation. *See* https://www.cpsenergy.com/en/about-us/powering-our-communitys-future.html. Demand for electric power and natural gas distribution can vary widely day-to-day, and CPS Energy's natural gas needs can therefore vary considerably even during relatively normal conditions. Ex. A-6. Skaer Dep. 109:6–15. Further, and importantly, CPS Energy is not structured to sell excess natural gas back to the market. Ex. A-8. Bayazitoglu Dep. 93:12-19; Ex. A-6, Skaer Dep. 40:22–23.

The costs CPS Energy incurs in purchasing natural gas for the benefit of its customers are passed on to, and ultimately paid by, those customers. Ex. A-7, Kuchinsky Dep. 44:16–45:18. CPS Energy's customers are particularly cost sensitive. In 2022, approximately 18% of San Antonio residents were living in poverty compared to 14.2% of Texans and 12.8% of Americans. *See* City of San Antonio, Dep't of Hum. Serv., *Status of Poverty in San Antonio 2022*, at 3 (2022), available at https://www.sanantonio.gov/Portals/0/Files/HumanServices/Poverty/2022PovertyReport.pdf. CPS Energy is committed to, and proud of, its long and storied history of providing low-cost energy to its residents. *See Who We Are*, CPS Energy, https://www.cpsenergy.com/en/about-us/who-we-are.html (last visited Feb. 16, 2024). With the average monthly income for single households in San Antonio totaling approximately $1,122 in 2022, every dollar counts. *See* City of San Antonio, Dep't of Hum. Serv., *Status of Poverty in San Antonio 2022*, at 3 (2022), available at https://www.sanantonio.gov/Portals/0/Files/HumanServices/Poverty/2022PovertyReport.pdf.

B. How CPS Energy Obtains Natural Gas

1. NAESB Base Contracts and Specific Transaction Confirmations

To serve its customers, CPS Energy typically purchases natural gas from a number of different suppliers with which CPS Energy has entered into standard form contracts produced by the North American Energy Standards Board ("**NAESB Contract**"). *See* Ex. A-9, CPSE-HPL NAESB Contract (ETP_000000689); Ex. A-10 CPSE-Oasis NAESB Contract (ETP_000000020 &

ETP_000000036)[1]. The NAESB Contracts provide the general terms and legal framework for the relationship between CPS Energy and its suppliers, but they do not effectuate any actual gas transactions. The parties later effectuate specific gas transactions and the terms thereof—including price, quantity, delivery point, and period of delivery—orally or via electronic communication, and those terms are then memorialized in a Transaction Confirmation. *See* Ex. A-2, Bordovsky Dep. 28:10–24; Ex. A-9, CPSE-HPL NAESB § 1.2; Ex. A-10, CPSE-Oasis NAESB § 1.2; Ex. A-6, Skaer Dep., at 78:1–79:15. Terms of transactions therefore vary considerably from transaction to transaction.

2. Transaction Date and Delivery Period: Monthly Baseload vs. Daily Spot

When it comes to transaction and delivery timing, CPS Energy enters into primarily two types of transactions: monthly baseload and daily spot transactions. In a monthly baseload transaction, CPS Energy buys a set quantity of gas per day at a particular delivery point for every day of a month. Ex. A-2, Bordovsky Dep. 362:11–23; Ex. A-11, Irving Dep. 15:12–21. CPS Energy enters into these baseload transactions near the end of the month preceding the delivery month. Ex. A-2, Bordovsky Dep. 362:11–23; Ex. A-11, Irving Dep. 15:12–21.

CPS Energy also purchases gas through the daily "spot market." In a daily spot transaction, the buyer purchases gas for delivery on a single day or a few consecutive days. Ex. A-2, Bordovsky Dep. 100:6–20; Ex. A-11, Irving Dep. 15:12–21. The most common spot transactions are "next-day" transactions in which the buyer purchases gas for delivery on the day following the date of the transaction. Ex. A-2, Bordovsky Dep. 100:6–20. For example, when parties enter into a next-day transaction on a Monday, they are transacting for gas to be delivered on Tuesday. Because there is limited-to-no trading activity on Saturdays and Sundays, next-day deals entered into on Friday are generally for gas to be delivered on Saturday, Sunday, and Monday. [redacted] And when Monday is a legal holiday—as it was during the long-weekend of Winter Storm Uri—those "next-day" weekend transactions will generally extend through Tuesday. [redacted]

[1] CPS Energy's NAESB Contract with Oasis was originally with a company called Texas Energy Transfer Company (TETC). TETC later assigned the NAESB Contract to Oasis. *See* Ex. A-12, Notice of Assignment of NAESB (CPSE-MDL_000028613).

Though the majority of spot transactions are next-day transactions, participants in the spot market can also enter into same-day transactions, in which, as the name suggests, parties transact for gas that is to be delivered on the same day as the transaction. Ex. A-2, Bordovsky Dep. 100:17–20.

3. Means of Transacting: Direct Deals vs. ICE Trading Platform

There are two means of consummating spot market transactions. First, in what are sometimes referred to as "direct" or over-the-counter ("OTC") transactions, two counterparties communicate directly—usually via instant-message, text, or phone—to enter into a transaction. *See* [redacted] Because these transactions are conducted solely between the parties, these transactions are generally not visible to the rest of the market while they are happening. *See id.* [redacted]

The other common method for trading physical natural gas on the spot market is the electronic Intercontinental Exchange ("ICE") platform. *See* [redacted]. Potential buyers post "bids" to buy and sellers post "offers" to sell certain volumes of natural gas delivered to certain popular delivery points known as "hubs" at specified prices. [redacted] Although all market participants on the ICE platform can see all posted bids, offers, and closed transactions for the day, parties can only accept the offers or bids of counterparties with which they have an enabling agreement in place, such as a NAESB contract. [redacted] Notably, however, the identity of the parties who have posted bids and offers is unknown to other market participants; only after a transaction closes will the parties to that transaction know who they have just transacted with. *See* [redacted]

4. Sale Points and Transportation: Hubs vs. Delivered Gas

Every natural gas transaction will specify the point where the gas is tendered from the seller to the buyer. The NAESB Contracts call this the Delivery Point, *see* Ex. A-9, CPSE-HPL NAESB

[2] Confusingly, the instant messenger application that most gas traders now use to conduct direct deals is owned by ICE and is called ICE Chat. *See* [redacted] But this instant messaging application is not to be confused with the separate ICE trading platform; direct deals over ICE Chat are distinct from the trading that happens over the ICE platform.

Contract §§ 4.1, 8.1, but for clarity CPS Energy refers to this as the "sale point" in this response. CPS Energy purchases gas at two basic types of sale points: (1) commonly used trading points known as "hubs," and (2) the gates or inlets of CPS Energy's own natural gas system or power plants. *See* [redacted]

Hubs. Hubs are usually locations where two or more pipelines intersect. *See* [redacted] These hubs include Katy Oasis (a point on the Oasis pipeline in Katy, Texas), HSC HPL Pool (several pooled interconnection points on HPL in the Houston Ship Channel region), Enterprise South Texas Map Point (a point on one of Enterprise's pipelines in South Texas), and Waha Hub (several delivery points in West [redacted] Ex. A-16, ICE, North American Physical Gas Hubs. Parties can transact for gas at hubs either directly or via the ICE platform. [redacted] Because natural gas is usually neither produced nor ultimately used by purchasers at trading hubs, most sellers and buyers must enter into transportation contracts with pipelines to ship natural gas to and from the sale point. *See* [redacted] The sale point where the buyer takes possession of the gas is known as the "receipt point" under a transportation contract, and the point where that buyer transports the gas to is known as the "delivery point." *See, e.g.*, Ex. A-17, CPSE-HPL Firm Intrastate Transportation Agreement §§ 2.1, 2.2 (CPSE-MDL_000026189).

During the relevant time period, CPS Energy had transportation contracts in place with three different pipeline companies: Energy Transfer (via HPL and Oasis), Enterprise Texas Pipeline LLC, and [redacted] *See* [redacted] Ex. A-25- A-30; CPSE-Enterprise Texas Pipeline Transport Agreements; [redacted] CPS Energy's transportation contracts with each of these companies focused on receipt points in different geographic areas. Specifically, CPS Energy's transportation agreements with HPL and Oasis allowed CPS Energy to transport gas primarily from the Katy and HSC hubs in southeast Texas, with small volumes from South Texas as well. *See*

[redacted] The agreements with Enterprise Texas Pipeline allowed CPS Energy to transport gas from hubs in West Texas (such as Waha) and South Texas (such as South Texas Map). *See* Exs. A-25 – A-30, CPSE-Enterprise Transport Agreements. And the agreement with [redacted] permitted CPS Energy to transport gas from [redacted] in South Texas. *See* [redacted]

The transportation agreements also varied with respect to the delivery points on CPS Energy's systems. CPS Energy's gas distribution system and most of its power plants receive gas through three primary delivery points: (1) North Gate, located in Comal County at the inlet to CPS Energy's North Pipeline and provides gas exclusively for distribution purposes; (2) South Gate, located in Karnes County at the inlet to CPS Energy's South Pipeline and provides gas for both distribution and generation purposes, and (3) CPS Energy's Pooling Point or Aggregation Point, an amalgamation of a number of different interconnections between CPS Energy's system and Enterprise Texas Pipeline. Ex. B, Bordovsky Aff. ¶ 4. Additionally, CPS Energy owns and operates the Rio Nogales power plant in Guadalupe County, which is separate from CPS Energy's distribution system and other power plants. Ex. A-6, Skaer Dep. 239:20-25. CPS Energy's transportation agreements with Energy Transfer allowed CPS Energy to transport gas to North Gate, South Gate, and to Rio Nogales. [redacted] Ex. B, Bordovsky Aff. ¶¶ 7–9. The agreements with Enterprise Texas Pipeline permitted CPS Energy to transport gas exclusively to the CPS Pooling Point. Exs. A-25 – A-30, CPSE-Enterprise Transport Agmts. And the agreements with [redacted] permitted CPS Energy to transport gas exclusively to [redacted]

Importantly, the transportation agreements with each pipeline company imposed limits on the overall volumes that CPS Energy could transport per day, as well as daily volumetric limits on specific receipt and delivery points. For example, the transportation agreements with Energy Transfer imposed a maximum daily quantity of [redacted] across all receipt and delivery points. [redacted] The Katy and HSC receipt points were limited to

[redacted] per day, the North Gate delivery point was limited to [redacted] per day, the Rio Nogales delivery point was limited to [redacted] per day, and the South Gate delivery point was limited to [redacted] per day. [redacted] Similarly, although one of the intrastate transport agreements with Enterprise Texas Pipeline permitted CPS Energy to transport a maximum of 85,000 MMBtu per day, intrastate receipts at the West Texas Map sale point were limited to 30,000 MMBtu per day. Ex. A-33, CPSE-Enterprise West Texas Intrastate Transport (CPSE-MDL_000001517).

During the relevant period, CPS Energy also had natural gas storage agreements with Enterprise and HPL. Ex. A-34, CPSE-MDL_000028821 (Master Storage Agreement). Those storage agreements worked in conjunction with the transportation agreements CPS Energy had with Enterprise and Energy Transfer, giving CPS Energy operational flexibility by automatically correcting any daily transportation imbalances up to certain daily limits. Ex. A-35, Guinn Dep. 84:16-85:4.

Delivered Gas. In addition to buying gas at hubs and then using transportation contracts to transport it to CPS Energy's delivery points, CPS Energy can also purchase gas sold at one of its actual delivery points—such as North Gate, South Gate, or Rio Nogales—thereby eliminating the need to transport that gas. Ex. A-2, Bordovsky Dep. 367:23–368:12; [redacted] But CPS Energy's delivery points are not available sale points for most gas suppliers; instead, only the pipelines that interconnect with those delivery points can offer delivered gas there. Ex. A-2, B. Bordovsky Dep. 367:23–368:12; Ex. B, Bordovsky Aff. ¶ 7. This is because the pipelines generally do not offer other suppliers transportation contracts that permit delivery to CPS Energy's delivery points. *Id.* Thus, if CPS Energy needed to purchase delivered gas at Northgate, its only option was to purchase it from Energy Transfer. Ex. A-6, Skaer Dep. 240:18-241:1; Ex. A-2, Bordovsky Aff. ¶ 11. Similarly, if CPS Energy needed to purchase delivered gas at Rio Nogales, its only possible options were to purchase from Energy Transfer or DCP Midstream (whose Guadalupe pipeline also connected to Rio Nogales). Ex. A-37, CPS Energy Corp. Rep. Dep. 276:16-277:8. And if CPS Energy needed to purchase delivered gas at Southgate in Karnes County, its only possible options were to purchase it from Energy Transfer or Targa. Ex. B,

Bordovsky Aff. ¶ 9. Of course, if any one of these pipelines could not sell CPS Energy delivered gas on a particular day due to limited supply or operational problems, the options narrowed even further.

5. Transaction Price: Fixed Price vs. Index-Based Price

Finally, the last necessary term of any natural gas transaction is price. Natural gas may be traded, whether on or off the ICE platform, using a fixed price or a price tied to a published index. [redacted] A fixed-price transaction specifies an exact price per MMBtu that the supplier will charge for the natural gas delivered. [redacted] For example, a gas transaction priced at $2.75 per MMBtu is a fixed-price transaction.

In an index-based transaction, however, the parties agree not to a fixed price but to a price tied to a specified natural gas index published by a third party, usually S&P Platts. [redacted] Ex. A-6, Skaer Dep. 32:20–33:13. Each of the various indexes that Platts publishes is simply the volume-weighted average price of the fixed-price transactions at delivery points within specific geographic areas in a particular time period that are reported to Platts. *See* [redacted] Ex. A-38 Platts Methodology and Specifics Guide (CPSE-MDL_000035497). For example, on every trading day of a month, Platts publishes daily indexes for more than 60 geographic areas. *See, e.g.*, Ex. A-39, *Gas Daily*, Feb. 5, 2021 (CPSE-MDL_000020017).[3] One of those indexes is for the Houston Ship Channel (HSC) area an "industrial area extending from the east side of Houston to Galveston Bay and northeastward to the Port Arthur-Beaumont area." Ex. A-38 Platts Methodology and Specifics Guide, at 12. Thus, the Gas Daily index for HSC for flow date February 5, 2021, was the volume-weighted average of all fixed-

[3] Platts also publishes indexes of monthly gas transactions, such as baseload transactions. Those indexes are commonly referred to as first-of-month or "Inside FERC" indexes. During the relevant time period, first-of-month indexes were calculated as the volume-weighted average of fixed-priced, monthly transactions consummated during the last five days immediately preceding the first of each month (otherwise known as "bid week"). *See* Ex. A-38 (CPSE-MDL_000035497 – Platts Methodology and Specifics Guide), at 5, 43.

price deals for gas to be delivered that day, as reported to Platts. *See id.*, Ex. A-39, *Gas Daily*, Feb. 5, 2021, at 2.

Platts obtains information on the fixed-price transactions that underlie its indexes from two sources. First, ICE reports all fixed-price deals done on the ICE platform to Platts in the early afternoon of every trading day, after next-day trading has largely concluded. Ex. A-38, Platts Methodology and Specifics Guide at 8. Second, many market participants, including Energy Transfer, also report their direct fixed-price deals to Platts in the afternoon of every trading day. *Id.*; [redacted] Platts then publishes the Gas Daily index at the end of the trading day, generally between 4:30 PM and 5:00 PM. Ex. A-38, Platts Methodology and Specifics Guide at 8. So, returning to the example above, in the afternoon of February 4, 2021, after most next-day trading for February 5 gas was done, ICE and market participants reported all fixed-price trades to Platts. *See* [redacted] Platts then identified the trades that fall into its definition of the HSC area (excluding trades between affiliated entities), calculated the volume-weighted average price of those trades, and then published that as the HSC Gas Daily index for February 5, 2021. *See* Ex. A-39, *Gas Daily*, Feb. 5, 2021.

Because Platts does not publish daily indexes until after most next-day trading has concluded, most trades with index-based prices are consummated before the parties definitively know what the published index will be. *See* [redacted] However, because a large portion of next-day fixed-price trading occurs over the ICE platform, gas traders can approximate where a particular index will be by reviewing the fixed-price trading in real-time on the ICE platform. [redacted] Further, when entering into index-price transactions, natural gas suppliers also have the discretion to charge an "adder," which is an additional per-MMBtu premium that is tacked onto the final invoiced price over and above the settled index price. [redacted] For example, a supplier might offer to sell gas at the HSC Gas Daily index plus five cents.

C. Energy Transfer's Outsized Role in the Texas Natural Gas Market

Energy Transfer plays an outsized role in the Texas natural gas market because of its dual role as transporters of natural gas for third parties and sellers of their own natural gas. According to Energy Transfer's website, approximately 30% of the nation's natural gas and crude oil are moved through its more than 125,000 miles of pipelines and other infrastructure nationwide. *See* Energy Transfer Aug. 2023 Investor Fact Sheet, available at https://www.energytransfer.com/wp-content/uploads/2023/11/ET-IR-Fact-Sheet-8-23.pdf (last visited Feb. 27, 2024). Among Energy Transfer's many business segments is its intrastate natural gas transportation and storage business in Texas, which in 2021 spanned more than 9,400 miles of natural gas pipelines across multiple interconnected pipeline systems, including but not limited to the ET Pipelines. Ex. A-41, Energy Transfer LP, Annual Report (Form 10-K) 3, 7–8 (Feb. 12, 2021); [redacted] The ET Pipelines and Energy Transfer's other intrastate gas pipelines in Texas—such as the ET Fuel System, the ETC Katy Pipeline, and the Old Ocean Pipeline, [redacted] are, by statute, "affected with the public interest," Tex. Util. Code. § 121.051, and engaged in business that is "in its nature and according to the established method of conducting the business…a monopoly" *id.* 121.052(a).

Energy Transfer's intrastate gas pipeline business generates revenue in two primary ways. First, its intrastate pipelines enter into transportation and storage agreements under which third parties—such as other gas sellers as well as end users like CPS Energy—purchase capacity to ship and store their gas using Energy Transfer's intrastate pipelines and storage facilities. [redacted] Ex. A-41, Energy Transfer LP, Annual Report (Form 10-K) 3, 87 (Feb. 12, 2021). Historically, the transportation and storage fees from such contracts have made up the largest component of Energy Transfer's earnings in its intrastate segment. *Id.* at 3.

Second, Energy Transfer's intrastate pipelines generate revenues and margin by selling natural gas to third parties such as gas and electric utilities and other end users. *Id.* Energy Transfer's intrastate pipelines acquire the natural gas they sell by purchasing it from [redacted] as well as

by [redacted] *See* [redacted] For example, as of December 31, 2020, more than 60% of the 47.7 billion cubic feet of gas stored in HPL's Bammel storage facility was gas stored for HPL's own account. Ex. A-41, Energy Transfer LP, Annual Report (Form 10-K) 3 (Feb. 12, 2021).

Energy Transfer's vast interconnected network of intrastate pipelines in Texas, and its dual role as a seller of gas and a provider of transportation services to other market participants, gives it an outsized role in the Texas natural gas market. As transporters of natural gas, Energy Transfer's intrastate pipelines have access to information about the gas supplies and purchases made by other market participants, who are Energy Transfer's competitors and customers when it comes to gas sales. [redacted] Further, as explained above, the intrastate pipelines have an advantage of being able to sell gas at delivery points that other sellers cannot. Ex. A-2, B. Bordovsky Dep. 367:23–368:12; Ex. B_, Bordovsky Aff. ¶ 7.

These advantages, combined with the massive reach of Energy Transfer's combined intrastate system, provide Energy Transfer with enormous influence over the natural gas market in Texas. And Energy Transfer has a history of exploiting that influence to its advantage. For example, at the conclusion of a market manipulation investigation, FERC and the CFTC found that in September 2005—when Hurricane Rita hit Houston—Energy Transfer's intrastate pipelines had a dominant position over the market for natural gas at HSC, such that their fixed-price transactions often comprised more than 80% of all reported trades in the HSC area. Ex. A-43, Order to Show Cause and Notice of Proposed Penalties, Docket. No. IN06-3-002, 120 FERC ¶ 61,086 (July 26, 2007). This allowed Energy Transfer to drive the HSC index in order to benefit sizable index-based positions. *Id.*

Winter Storm Uri would present another opportunity for Energy Transfer to leverage its outsized role in the Texas gas market for its own benefit and the expense of millions of Texans.

D. Winter Storm Uri

In the early part of 2021, CPS Energy went about its gas purchasing activities in the same manner it usually did during the winter months. At the end of January 2021, CPS Energy purchased baseload natural gas for the upcoming month based on the same thorough analysis of historical burn rates and projected weather forecasts. *See* Ex. A-6, K. Skaer Dep., at 259:13-261:17; *see also* Ex. A-2, B. Bordovsky Dep. 362:11–363:13. And in the first week or so of February, CPS Energy bought gas on the spot market as needed to fulfill its varying daily needs. Ex. A-44, CPSE-MDL_000009514.

However, in mid-February 2021, an "unprecedented and historical" winter storm barreled across the state of Texas. *See* February 2021 Historical Winter Storm Event South-Central Texas, Austin/San Antonio Weather Forecast Office, https://www.weather.gov/media/ewx/wxevents/ewx-20210218.pdf. What would ultimately become known as "Winter Storm Uri," which left more than four million Texas households without power, materialized rapidly and quickly became dire. On February 12, 2021, Governor Greg Abbott issued a Declaration of Disaster covering all 254 counties in Texas due to the imminent prolonged freezing temperatures, heavy snow, and freezing rain statewide. Ex. A-45, Feb. 12, 2021 Gov. Abbott Decl., CPSE-MDL_000062050. The express stated purpose of the Governor's declaration was to "reduce vulnerability of people and communities of this state to damage, injury, and loss of… property resulting from natural or man-made catastrophes[.]" TEX. GOV'T CODE § 418.002(1).

The same day, the Railroad Commission of Texas issued an Emergency Order that it deemed necessary "to protect human needs customers in the State of Texas because of current conditions which threaten [the] health, safety and welfare of those customers." Ex. A-46, Feb. 12, 2021 RRC Order, ETP_00000162. The Railroad Commission ordered that "the transportation, delivery and/or sale of natural gas in the State of Texas for any other purpose than serving human

needs customers should be curtailed to the extent possible and necessary for the duration of this Emergency Order." *Id.* As the weather deteriorated, CPS Energy needed to purchase natural gas for its plants to continue operating for its customers, but also to keep the ERCOT grid from collapsing. *See* https://www.ercot.com/files/docs/2021/03/03/EEA_Tools_One_Pager_Winter_2021_2-13-2021.pdf; Ex. A-47, Albers Dep. 43:17-44:20.

1. CPS Energy purchases gas for the long-weekend.

The first days of Winter Storm Uri fell over a long weekend culminating with President's Day on Monday, February 16. This meant that spot-market purchases for gas during the long weekend would have to cover CPS Energy's expected load for four days: Saturday through Tuesday. Ex. A-44, CPSE-MDL_000009514 at 9517. As weather forecasts began to solidify in the days leading up to February 12, CPS Energy began attempting to secure supply for the long weekend earlier than usual. On February 9, CPS Energy asked Energy Transfer and other suppliers about securing supply for the long weekend ahead, but it declined. *Id.* at 9514. On February 11, CPS Energy again asked Energy Transfer for gas for the long weekend, but it again declined. *Id.* at 9516.

When February 12 arrived, CPS Energy worked feverishly to secure the supply it needed for the bitter cold that was coming. When the dust settled on February 12, CPS Energy had contracted for 740,900 MMBtu of gas per day for the long weekend, amounting to a four-day total of more than 2.96 million MMBtu. 190,000 MMBtu per day (amounting to 25.6%) of the weekend gas CPS Energy secured was from the ET Pipelines because of their outsize role in the Texas gas market in general, and for CPS Energy in particular. Ex. A-44, CPSE-MDL_00009514 at 9517; Ex. A-48_, ETP_000000166; Ex. A-49, ETP_000000167; Ex. A-50, ETP_000000168; Ex. A-51, ETP_000000169; Ex. A-52, ETP_000000170; Ex. A-53, ETP_000000171; Ex. A-54, ETP_000000172. The vast majority of this was for delivered gas at North Gate, South Gate, and Rio Nogales. Ex. A-44, CPSE-MDL_00009514 at 9517. For the necessary natural gas that Energy Transfer sold to CPS Energy during a declared disaster, Energy Transfer demanded the highest prices CPS Energy had ever seen: $225 per MMBtu for the delivered gas, and $150–$180 for gas pur-

chased from HPL at Katy and HSC-HPL Pool. *Id.*; Ex. A-48, ETP_000000166; Ex. A-49, ETP_000000167; Ex. A-50, ETP_000000168; Ex. A-51, ETP_000000169. But CPS Energy had no other options to secure the gas offered by Energy Transfer, and so it reluctantly agreed to the prices. *See infra* Part A.1.ii.

2. The situation worsens over and after the long weekend.

As the weekend progressed, the situation grew more dire. Late in the evening of February 14, CPS Energy lost two vital sources of supply that only strengthened Energy Transfer's hand. First, at around 11:00 PM, [redacted] 50,000 MMBtu per day sale of delivered gas at Rio Nogales stopped flowing. [redacted] This left Energy Transfer as the only source for delivered gas at Rio Nogales. Ex. B, Bordovsky Aff. ¶ 8. Second, late on February 14, suppliers who had sold CPS Energy gas at the tailgate to [redacted] began notifying CPS Energy that their production was getting shut in. [redacted]. Eventually, the [redacted] would go down altogether, leaving Energy Transfer as the only source of delivered gas at South Gate as well. [redacted].

As CPS Energy was losing critical gas supply, the ERCOT power grid was approaching disaster due to sky-high demand and loss of generation across the state. As a result, early in the morning on February 15, ERCOT ordered utilities across the state to begin "load shed" or blackouts for parts of their service areas. Ex. A-51, CPSE-MDL_000010339, at 10340-41. Later that day, well after CPS Energy had purchased its gas for the long weekend, the Texas Public Utility Commission ("PUCT") administratively set the price of electricity at the system-wide offer cap of $9,000 per MWh. Ex. A-58, Feb. 15, 2021 PUCT Order. The PUCT did not state how long electricity prices would remain at the system-wide offer cap. *Id.*

As temperatures remained below freezing, CPS Energy began experiencing even more significant cuts to the natural gas supply it had previously secured—including significant cuts from Enterprise. *See* [redacted]; Ex. C, Irving Aff. ¶ 3 & Ex. A. By the end of Monday,

February 15, CPS Energy received only 42% of the natural gas it contracted for from all suppliers. *Id.* The cuts continued on Tuesday, February 16. Of the 740,900 MMBtu that CPS Energy originally contracted for on that day, only 364,908 was delivered. *Id.*; Ex. C, Irving Aff. ¶ 3 & Ex. A.

When regular trading resumed on February 16, there was very little gas to be had in the next-day market. CPS Energy attempted to purchase natural gas from multiple suppliers, including [redacted] but was repeatedly told that these suppliers had no gas to sell. [redacted] For the few suppliers other than Energy Transfer that had gas to sell on Tuesday, February 16, volumes were generally low. [redacted] Energy Transfer remained the only option for delivered gas at North Gate, South Gate, and Rio Nogales. Ultimately, of the 465,294 MMBtu of gas that CPS Energy contracted for delivery on February 17, 205,000 MMBtu (44%) came from Energy Transfer. Ex. C, Irving Aff. ¶ 3 & Ex. A. Once again, Energy Transfer demanded astronomical prices: between $400 and $500 per MMBtu, higher than any known price for natural gas in Texas. Ex. A-44, CPSE-MDL_000009514 at 9521-9523; Ex. A-68, ETP_000000196, Ex. A-69, ETP_000000197; Ex. A-70, ETP_000000229; Ex. A-71, ETP_000000230.

Energy Transfer's price gouging continued through February 18, 2021, when CPS Energy purchased gas for February 19. Ex. A-72, ETP_000000234; Ex. A-74, ETP_000000233. When temperatures finally began to fall and the snow began to melt, Energy Transfer's sales to CPS Energy over seven days totaled more than **$317 million**. Ex. A-81, Oasis February 2021 Invoice, ETP_000025683-25684; Ex. A-177, HPL Feb. 2021 Invoice, ETP_0000629.

E. Energy Transfer's Profits

Energy Transfer began celebrating its expected windfall even before the storm ended. On February 17, 2024, during the heart of the storm, Energy Transfer's co-CEO bragged to investors on a conference call that Energy Transfer would "benefit" from what he described as the "strong commodity prices" Energy Transfer was demanding. Ex. A-74, *Fossil Fuel Executives Gloat About Profits, PR From Winter Storm Crisis,* THE INTERCEPT, Feb. 23, 2021. That was putting it mildly. When McCrea made that statement, Energy Transfer's intrastate team had already specifically informed him that Energy Transfer stood to make close to [redacted] in profit from gas sales during the long weekend alone. *See* [redacted]

When all was said and done, Energy Transfer announced that it reaped a **$2.4 billion windfall** from the disaster, and almost all of those gains were attributable to its intrastate transportation and storage segment. Ex. A-76, Energy Transfer LP, Current Report (Form 8-K) Ex. 99.1, at 2 (May 6, 2021). In particular, for the first quarter of 2021, Energy Transfer's intrastate segment reported $1.07 billion in margin from natural gas sales alone, as well as $1.55 billion in realized storage margin. Ex. A-77, Energy Transfer LP, Quarterly Report (Form 10-Q) 40 (May 7, 2021). By comparison, Energy Transfer reported just $88 million in such margin for the first quarter of 2020, Ex. A-78, Energy Transfer LP, Quarterly Report (Form 10-Q) 42 (May 11, 2020), and $317 million for the entire year of 2020, Ex. A-41, Energy Transfer LP, Annual Report (Form 10-K) 87 (Feb. 12, 2021). In other words, Energy Transfer extracted more than three years' worth of intrastate gas-sales margin in just a matter of days.

F. Energy Transfer's Attempt to Preemptively Collect

Energy Transfer knew the prices it had charged CPS Energy during the storm were problematic. In an email to Energy Transfer's Vice President of U.S. Pipelines, Beth Hickey, Brian Riley

[redacted]

That is why just days after the snow finally melted, Energy Transfer sought to quickly collect on its enormous profits and demanded that CPS Energy provide "adequate assurance" in the form of a

letter of credit or cash for the full amount of its unlawful and unconscionable charges, which it estimated to be $317,500,000. Ex. A-80, ET Demand for Adequate Assurance, ETP_000000252. Neither HPL nor Oasis had submitted their invoices to CPS Energy for February 2021 gas deliveries and would not do so until mid-March. Ex. A-81, Oasis February 2021 Invoice, ETP_000025683-25684; Ex. A-177, HPL Feb. 2021 Invoice, ETP_0000629. Payment of the invoices was not due until March 26, more than a month later. But Energy Transfer was demanding early payment of the yet-to-be sent invoices, knowing full well how problematic those exorbitant prices were. Ex. A-82, J. Castrejana Email to O. Flores, ETP_000000579; [redacted]

Following receipt of Energy Transfer's February 23 demand for adequate assurance, CPS Energy responded with a request for justification. Ex. A--83, J. Kuo Email to J. Castrejana, ETP_000000280 at 280. Under the parties' NAESB agreement, a party may only demand adequate assurance if it has "reasonable grounds for insecurity." Ex. A-9, HPL-CPSE NAESB, ETP_000000689 at ETP_000000696. The only "grounds" Energy Transfer cited in its demand for adequate assurance to CPS Energy was the "unprecedented weather event" and "the price of natural gas." Ex. A-80, ET Demand for Adequate Assurance, ETP_000000252. In response to Energy Transfer's baseless demand, CPS Energy furnished Energy Transfer with financial information establishing CPS Energy's ability to meet all of its lawful obligations as they became due. Ex. A-83, J. Kuo Email to J. Castrejana, ETP_000000280 at 280. Six days later, without any additional conversation with CPS Energy, Energy Transfer instructed its natural gas traders to stop selling natural gas to CPS Energy. [redacted] When CPS Energy did not immediately accede to its baseless demand for early payment, Energy Transfer increased the frequency and urgency of its demands for adequate assurance, eager to accelerate collection of the outrageous prices it had charged CPS Energy.

G. The Disputed Amounts and this Lawsuit

CPS Energy invoked Section 7.4 of the parties' NAESB agreement, which gave CPS Energy the right to dispute the amount of an invoice "or any part thereof":

> If the invoiced party, in good faith, disputes the amount of any such invoice or any part thereof, such invoiced party will pay such amount as it concedes to be correct; provided, however, if the invoiced party disputes the amount due, it must provide supporting documentation acceptable in industry practice to support the amount paid or disputed. In the event the parties are unable to resolve such dispute, either party may pursue any remedy available at law or in equity to enforce its rights pursuant to this Section.

Ex. A-9, HPL-CPSE NAESB, ETP_000000689 at ETP_000000696.

To dispute a portion of an invoice, CPS Energy had to first determine what amount it "concede[d] to be correct." *Id.* To make that determination, CPS Energy hired an econometrician, Dr. Ray Perryman, who performed an economic analysis showing the upper bound of an appropriate price had the natural gas markets been functioning appropriately, which he determined to be $38.83/MMBtu. That amount ultimately became the conceded price under Section 7.4 of the NAESB. CPS Energy provided "supporting documentation" in the form of a spreadsheet showing the excessive amounts charged by Energy Transfer along with the conceded amount paid by CPS Energy. *See* CPS Energy's 1st Am. Pet., Ex. F. Pursuant to that calculation, CPS Energy then paid Energy Transfer more than $46 million for the gas the ET Pipelines delivered during the disaster, which reflects a 1,000% increase from the prices prevailing just days earlier.

Energy Transfer's baseless demand for adequate assurance made it clear that it had no intention of abiding by the dispute resolution procedures in the parties' NAESB agreement. Concerned that Energy Transfer would use CPS Energy's refusal to cede to its baseless demands for adequate assurance as an attempt to manufacture grounds to declare an Event of Default under the NAESB Contracts to use as further leverage against CPS Energy, CPS Energy sought judicial intervention, by invoking its rights under Section 7.4 of the NAESB and filing suit.

After three years of litigation and more than 35 depositions, Energy Transfer now seeks to evade a trial and obtain summary judgment based on invented bright-line rules at odds with the fact-intensive inquiry the unconscionability doctrine requires. Myriad fact disputes pervade that fact-intensive inquiry and make resolution of this case on summary judgment improper.

LEGAL STANDARD

Pursuant to Rule 166a of the Texas Rules of Civil Procedure, traditional summary judgment is proper when the movant demonstrates that there is no genuine issue of material fact, and that it is entitled to judgment as a matter of law. Tex. R. Civ. P. 166a(c). In deciding whether there is a disputed material fact precluding summary judgment, courts will take evidence favorable to the non-movant as true. *Nixon v. Mr. Property Management*, 690 S.W.2d 546, 548–49 (Tex. 1985). Every reasonable inference must be indulged in favor of the non-movant and all doubts must be resolved in the non-movant's favor. *Id.*

ARGUMENT & AUTHORITIES

Freedom of contract is a bedrock principle of Texas contract law, but it is not and has never been a limitless or singular principle in the law. To the contrary, the law of contracts—in Texas and elsewhere—has always recognized countervailing principles that demand exceptions to the general enforceability of agreements. Two of those exceptions apply here and render unenforceable the prices Energy Transfer demanded for critical natural gas during Winter Storm Uri. First, under the long-standing doctrine of unconscionability, grossly unfair bargains will not be enforced. Unconscionability requires a deeply fact-intensive analysis of the circumstances surrounding the agreement in question, in light of several factors. Energy Transfer asks the Court to chisel a CPS Energy shaped hole into unconscionability by adopting multiple limitations to the doctrine, but none of those supposed limitations find any basis in the law. Under the correct analysis, the evidence here shows, at the very least, that genuine issues of material fact exist as to whether the prices Energy Transfer demanded during Winter Storm Uri are unconscionable. And it is therefore up to the fact-finder to weigh that evidence and resolve those disputed issues.

Second, independent of the unconscionability doctrine, Texas law has long refused to enforce contracts that violate Texas public policy. And Texas has for decades had a public policy against taking advantage of a declared disaster by demanding excessive or exorbitant prices for necessities. Unable to contest the evidence showing that it did exactly that during Winter Storm Uri, Energy Transfer focuses its efforts on arguing that there is no such public policy in Texas, or that it

is limited to a single cause of action under the DTPA. As with its attempt to erode the unconscionability doctrine, Energy Transfer's attempt to limit that public policy to a single cause of action under the DTPA misunderstands the law.

A. Energy Transfer's prices are unconscionable and, thus, unenforceable.

"Contracts offending the conscience are 'an exception to the freedom that generally pervades contract law.'" *Muzquiz v. Para Todos, Inc.*, 624 S.W.3d 263, 275 (Tex. App.—El Paso 2021, pet. denied) (quoting *Venture Cotton Co-op. v. Freeman*, 435 S.W.3d 222, 228 (Tex. 2014)). The "notion that parties are free to negotiate their own bargains conflicts with the equally compelling notion that grossly unfair bargains should not be enforced." *Venture Cotton Co-op.*, 435 S.W.3d at 228. "Unconscionable bargains are therefore an exception to the freedom that generally pervades contract law" and have long been unenforceable in Texas. *Id.* ("[T]he [unconscionability] defense has a long history."); *see also In re Poly-Am., L.P.*, 262 S.W.3d 337, 349 (Tex. 2008) ("[U]nconscionability…has been recognized and applied by this Court for well over a century."). Despite its long history, unconscionability is "not easily defined." *Venture Cotton Co-op.*, 435 S.W.3d at 228. "The term defies a precise legal definition because "it is not a concept, but a determination to be made in light of a variety of factors not unifiable into a formula." *Id.*

Article 2 of the Uniform Commercial Code ("UCC")—which governs certain sales of goods in most states, including Texas—incorporates the doctrine of unconscionability and is "intended to allow the court to pass directly on the unconscionability of the contract or a particular clause therein and to make a conclusion of law as to its unconscionability." TEX. BUS. & COM. CODE § 2.302 cmt 1. "A contract for the sale of oil or natural gas is a contract for the sale of goods under the UCC" and thus applies to this case. *Aquila Sw. Pipeline, Inc. v. Harmony Expl., Inc.*, 48 S.W.3d 225, 234 (Tex. App.—San Antonio, 2001, pet. denied). "[S]ection 2.302 of the Business and Commerce Code does not limit its protections to only those involved in personal, as opposed to commercial, transactions." *El Paso Nat. Gas Co. v. Minco Oil & Gas Co.*, 964 S.W.2d 54, 62 (Tex. App.—Amarillo 1997), *opinion modified on reh'g* (Apr. 8, 1998), *rev'd sub nom. El Paso Nat. Gas Co. v. Minco Oil & Gas, Inc.*,

8 S.W.3d 309 (Tex. 1999). The unconscionability analysis under the UCC is substantively the same as under the common law. Indeed, because unconscionability is not easily defined, Texas courts often turn to the doctrine's common law roots for context. *See, e.g.*, *Venture Cotton Co-Op*, 435 S.W.3d at 228 ("One of the earliest decisions to apply the defense described an unconscionable contract as one that 'no man in his senses and not under delusion would make on the one hand, and as no honest and fair man would accept on the other.'") (quoting *Earl of Chesterfield v. Janssen,* 28 Eng. Rep. 82, 100, 2 Ves. Sr. 125, 155 (1751)).

"Under the UCC, an unconscionability defense is a question of law that involves a highly fact-specific inquiry into the circumstances of the bargain, such as the commercial atmosphere in which the agreement was made, the alternatives available to the parties at the time and their ability to bargain, any illegality or public-policy concerns, and the agreement's oppressive or shocking nature." *Id.* As part of its fact-intensive analysis, courts also consider whether the party seeking to enforce the contract employed "sharp business practices." *El Paso Natural Gas Co.*, 964 S.W.2d at 61; *LDF Constr., Inc. v. Texas Friends of Chabad Lubavitch, Inc.*, 459 S.W.3d 720, 731 (Tex. App.—Houston [14th] 2015, no pet.). The UCC "provides that a court should afford the parties a reasonable opportunity to present evidence as to a contract's commercial setting, purpose and effect to aid the court in evaluating the defense." *Venture Cotton Co-op.*, 435 S.W.3d at 228 (citing TEX. BUS. & COM. CODE § 2.302(b).)

"Texas recognizes both procedural and substantive unconscionability as a defense against contract enforcement." *Budget Rent a Car Sys., LLC v. Ozumba*, No. 01-20-00408-CV, 2022 WL 2347742, at *12 (Tex. App.—Houston [1st Dist.] June 30, 2022, no pet.); *Muzquiz*, 624 S.W.3d at 275 ("A contract or contract provision can be found unenforceable based on egregious facts supporting either procedural or substantive unconscionability."). "[S]ubstantive unconscionability refers to the inherent unfairness of a particular contract or provision; procedural unconscionability deals with the circumstances surrounding a contract's adoption." *Muzquiz*, 624 S.W.3d at 275. Contrary to Energy Transfer's MSJ, a contract can be unenforceable "if it is procedurally unconscionable, substantively unconscionable, or both." *Royston, Rayzor, Vickery, & Williams, LLP v. Lopez*, 467 S.W.3d 494, 499

(Tex. 2015); *ReadyOne Indus., Inc. v. Flores*, 460 S.W.3d 656, 666–67 (Tex. App.—El Paso 2014) ("Unconscionability . . . may exist in one or both of two forms: (1) procedural unconscionability, which refers to the circumstances surrounding the adoption of the arbitration provision, and (2) substantive unconscionability, which refers to the fairness of the arbitration provision itself.").[4]

Price unconscionability cases constitute a special subclass of the unconscionability doctrine. *See generally* Frank P. Darr, *Unconscionability and Price Fairness*, 30 HOUS. L. REV. 1819, 1820 (1994). Typically, in a price unconscionability case, "one party asserts that the price to be paid is grossly disproportionate to the cost or value of the good or service received in exchange." *Id.* at 1820. Although no Texas court has directly addressed the issue, courts in other jurisdictions have concluded that "[t]here is no reason to doubt [that Section 2-302 of the Uniform Commercial Code] is intended to encompass the price term of an agreement." *Jones v. Star Credit Corp.*, 59 Misc. 2d 189, 191 (Sup. Ct. Nassau Cty. 1969); *see also Cent. Budget Corp. v. Sanchez*, 53 Misc. 2d 620, 621 (Civ. Ct. 1967) ("Excessively high prices may constitute unconscionable contractual provisions within the meaning of Sec. 2—302 UCC"); *Perdue v. Crocker Nat'l Bank*, 38 Cal. 3d 913, 916 (1985) ("[T]he price term, like any other term in a contract, may be unconscionable."). "Indeed no other provision of an agreement more intimately touches upon the question of unconscionability than does the term regarding price." *Jones*, 59 Misc. 2d at 191.

Moreover, courts in other jurisdictions applying the UCC have consistently held in price unconscionability cases that the degree to which a seller profits from a given price is relevant to wheth-

[4] Energy Transfer cites *In re Green Tree Servicing LLC*, 275 S.W.3d 592, 603 (Tex. App.—Texarkana 2008, orig. proceeding) for the proposition that a party asserting unconscionability bears the burden of proving both procedural and substantive unconscionability. ET Mot. Summ. J. at 20. The Texas Supreme Court, and later cases, say otherwise. *See Royston, Rayzor, Vickery, & Williams, LLP*, 467 S.W.3d at 499 (stating a contract can be unenforceable "if it is procedurally unconscionable, substantively unconscionable, or both."); *see also Muzquiz*, 624 S.W.3d at 275. The unconscionability analysis rarely proceeds in discrete "procedural" and "substantive" buckets because the unconscionability factors are interrelated and the unconscionability inquiry requires an assessment based on the totality of the circumstances as they existed at the time of contracting. *El Paso Nat. Gas Co.*, 964 S.W.2d at 61 ("We admit that there is an interrelationship between the indicia used under both prongs and agree that the assessment should be made based upon the totality of the circumstances. Yet, the two-pronged analysis is a way of categorizing the pertinent factors and, to that extent, it is useful.").

er that price is unconscionable or excessive. *See California Grocers Assn. v. Bank of Am.*, 27 Cal. Rptr. 2d 396, 403 (1994) (concluding that a bank's fee was not unconscionable only after comparing the fee to the bank's costs and examining the bank's profit margin); *Frostifresh Corp. v. Reynoso*, 281 N.Y.S.2d 964, 965 (App. Term 1967) (taking the seller's net costs and profit margin into account in evaluating unconscionability under the UCC); *Moran v. Prime Healthcare Mgmt., Inc.*, 208 Cal. Rptr. 3d 303, 316 (Cal. Ct. App. 2016) (explaining that in evaluating an unconscionable price term, "courts consider not only the market price, but also the cost of the goods or services to the seller"); *Jones*, 59 Misc. 2d at 191-192 (finding $900 price charged was unconscionable under the UCC by examining "the mathematical disparity" between the cost of the good and its retail value and concluding that "the value disparity itself leads inevitably to the felt conclusion that knowing advantage was taken of the plaintiffs.").

In assessing unconscionability, the court may not consider any one factor in a vacuum "because [the court] must determine whether the [a]greement is unconscionable based on the totality of the circumstances" as they existed at the time of contracting. *Delfingen US-Texas, L.P. v. Valenzuela*, 407 S.W.3d 791, 801 (Tex. App.—El Paso 2013, no pet.); *El Paso Nat. Gas Co.*, 964 S.W.2d at 61 ("[T]he situation must be assessed as of the time it occurred, not via hindsight . . . What may be fair in one scenario may not be in another. Thus, the totality of the situation (as of the time the situation unfolded) must again be measured."). Because unconscionability requires an individualized, fact-specific inquiry into the circumstances surrounding each bargain, "unconscionability must be determined on a case-by-case basis." *Pony Exp. Courier Corp. v. Morris*, 921 S.W.2d 817, 821 (Tex. App.—San Antonio 1996, no writ); *see also Besteman v. Pitcock*, 272 S.W.3d 777, 787–88 (Tex. App.—Texarkana 2008, no pet.). In determining whether a contract provision is unconscionable, Texas courts examine "the **entire atmosphere** in which the agreement was made." *Ski River Dev., Inc. v. McCalla,* 167 S.W.3d 121, 136 (Tex. App.—Waco 2005, pet denied) (emphasis added).

Eager to circumvent the fact-intensive inquiry unconscionability requires, Energy Transfer oversimplifies the standard of review, asserting that the unconscionability defense "present[s] questions of law and can be disposed of on summary judgment." ET Mot. Summ. J. at 20. That is mis-

leading. While "[t]he ultimate question of unconscionability of a contract is one of law, to be decided by the court[,] . . . it cannot be forgotten that the decision of whether some agreement is or is not unconscionable is dependent upon the existence of facts which allegedly illustrate unconscionability." *Ski River Dev.*, 167 S.W.3d at 126 (cleaned up). "The determination of the facts relevant to the question of unconscionability . . . presents a question of fact for the factfinder." *Budget Rent a Car Sys*, 2022 WL 2347742 at *12. That is, "[u]nconscionability involves both questions of law *and fact* and is committed to the trial court by statute." *Pony Exp. Courier Corp.*, 921 S.W.2d at 820 (emphasis added). Similarly, the UCC expressly addresses the factfinding inherent to the unconscionability inquiry. TEX. BUS. & COM. CODE § 2.302 (recognizing that a party "shall be afforded a reasonable opportunity to present evidence as to [the contract's] commercial setting, purpose and effect to aid the court in making the determination."); *see also Venture Cotton Co-op.*, 435 S.W.3d at 228 (noting that the unconscionability defense involves a "highly fact-specific inquiry into the circumstances of the bargain").

In a further effort to avoid an analysis of the facts, Energy Transfer cites a federal bankruptcy decision, *Brazos v. 507 Capital LLC, et al.*, from the Southern District of Texas for the proposition that a federal court has "rejected as a matter of law identical arguments from another Texas utility challenging natural gas prices during Winter Storm Uri" on unconscionability and public policy grounds. ET Mot. Summ. J. at 1, 21. Even if the *Brazos* pleadings and transcripts were proper summary judgment evidence,[5] that case is easily distinguishable. *Brazos* is a Rule 12(b)(6) decision. The bankruptcy judge merely determined that Brazos failed to plead sufficient facts to show that each of the challenged transactions were unconscionable or void as to public policy. The bankruptcy judge did not decide in *Brazos*, as Energy Transfer represents, that a utility like CPS Energy "has no legal

[5] Rather than cite a particular court opinion, Energy Transfer attaches several pleadings and transcripts from the *Brazos* case as evidence to support its MSJ. As will be detailed in CPS Energy's Objections to Energy Transfer's MSJ Evidence, to be filed before the hearing, those pleadings and transcripts are not proper summary judgment evidence and the Court should strike them from the summary judgment record.

claim under Texas law that the contracts were either unconscionable or against public policy."[6] ET Mot. Summ. J. at 21. The issue before the court in *Brazos* was about garden-variety, Rule 12(b)(6) pleading sufficiency.[7] The federal bankruptcy court, sitting in diversity, did not—and could not—rewrite state unconscionability law to eliminate the totality of the circumstances analysis when sophisticated parties are involved. Indeed, during a hearing in the *Brazos* case, the judge noted that if Brazos *had* pleaded sufficient facts, in his mind, they would have a "pretty good claim." ET Summ. J., Ex. 1 at Ex. F., at 50.

Of course, we are well past the pleadings stage in this case. And, unlike in the *Brazos* case, CPS Energy has produced evidence demonstrating that specific contracts are unconscionable. The evidence obtained in discovery has now confirmed everything CPS Energy alleged and more: that CPS Energy had no choice but to buy natural gas at the excessive prices Energy Transfer demanded and Energy Transfer chose to exploit that desperation, during a state-declared disaster, for profit. At the very least, the evidence creates a material fact issue on CPS Energy's unconscionability and public policy defenses and therefore precludes resolution of Energy Transfer's breach of contract claim on summary judgment.

1. The evidence shows that the prices Energy Transfer charged CPS Energy during Winter Storm Uri were unconscionable.

CPS Energy challenges 16 transactions as unconscionable. The factual circumstances surrounding each challenged transaction are, at a minimum, sufficient to raise a material fact issue with respect to CPS Energy's unconscionability defense.

---

[6] Indeed, the court issued a two-page summary order in the *Brazos* case that provides no reasoning or basis for its decision. So while Energy Transfer attaches a copy of ETC Marketing's brief, there is no indication that the *Brazos* court adopted those arguments.

[7] Energy Transfer insists that the only reason this case proceeded to discovery is because "Texas state law does not have an analogue to a Fed. R. Civ. P. 12(b)(6) motion." ET. Mot. Summ. J. at 21. If Energy Transfer really thought CPS Energy's claims had no basis in law or fact, it could have filed a Rule 91(a) motion. It did not do so because it knew then and it knows now that CPS Energy has sufficient facts to substantiate its unconscionability and public policy defenses.

a. The prices Energy Transfer charged CPS Energy on February 12, 2021 for gas over the long weekend (February 13–16) are unconscionable.

February 12, 2021 was a Friday. Because most trading in the spot market for natural gas is done only on weekdays, CPS Energy and other buyers typically secure their gas supplies for Saturday, Sunday, and Monday on the preceding Friday. In this instance, however, Monday was President's Day, meaning that CPS Energy needed to also secure gas for the following four days: Saturday, February 13 through Tuesday, February 16. Accordingly, CPS Energy set out on February 12 to buy the significant volumes of natural gas necessary to serve its customers' critical human needs over the long weekend, including from Energy Transfer.

Recognizing that CPS Energy needed large volumes of gas, Energy Transfer leveraged the disaster and CPS Energy's lack of options to extract unprecedented prices and reap unparalleled profits. Energy Transfer was able to do so because it knew, by virtue of its unique status as a pipeline operator and as a trading desk, [redacted] that CPS Energy had no other alternatives—no other gas supplier could sell CPS Energy the volumes of gas it needed for the long weekend at the locations where it needed it.

i. Energy Transfer deploys oppressive and sharp practices to exploit the disaster by demanding unprecedented prices for desperately needed gas.

Even before the storm began, Energy Transfer discussed [redacted] Energy Transfer understood before the storm that utilities like CPS Energy were going to need large volumes of natural gas to run their gas-fired power plants and distribute directly to their customers. Ex. A-87, ETP_000008924. And Energy Transfer understood demand for natural gas would only climb further as the temperatures continued to drop and the weather situation became increasingly dire. *Id.*; [redacted] So, on February 9, when CPS Energy first reached out to Energy Transfer about obtaining gas for the long weekend, Energy Transfer refused to sell CPS Energy weekend gas, holding out for higher same-day prices as the weather grew steadily worse. Ex. A-44,

CPSE-MDL_000009514; [redacted]. Specifically, Bruce Bordovsky, one of CPS Energy's traders, messaged Energy Transfer's trader Jennifer Merritt, to purchase delivered volumes at three different points on CPS Energy's facilities: HPL's interconnect with CPS Energy's Southgate Pipeline in Karnes County; CPS Energy's North Gate interconnect with Oasis; and CPS Energy's Rio Nogales power plant. Ex. A-44_, CPSE-MDL_000009514. But Merritt refused to transact for the weekend at that point, saying that "it will be a day to day look for us." *Id.*

On Thursday, February 11, CPS Energy again tried to secure supply for the long weekend. *Id.* at 9515. While negotiating a purchase of 100,000 MMBtu of gas for delivery on Friday, February 12 for $15—already more than three times prevailing prices for the previous day—CPS Energy asked if Energy Transfer would agree to extend the deal through February 16. *Id.* at 9516. But Merritt declined, stating "I won't be able to price the weekend until tomorrow." *Id.* The next day, CPS Energy's traders continued to secure gas, including the large delivered volumes that CPS Energy needed from Energy Transfer. At 7:30 AM,[8] Bordovsky contacted Merritt and asked for a price quote for 150,000 MMBtu of delivered gas per day for February 13–16, across three different points on CPS Energy's facilities: 50,000 for delivery at HPL's interconnect with CPS Energy's Southgate Pipeline in Karnes County; 50,000 for delivery at CPS Energy's North Gate interconnect with Oasis; and 50,000 for delivery at the Rio Nogales power plant. *Id.* at 9517. Merritt did not respond with an offer for an hour and a half. *Id.* While CPS Energy waited for an offer from Merritt, Energy Transfer's commercial development team confirmed the [redacted] weekend gas purchase they had negotiated with [redacted] the prior evening. [redacted].

When Merritt finally responded to CPS Energy, the first thing she said was: "ok, are you sitting down?" Ex. A-44, CPSE-MDL_000009514 at 9517. Merritt then quoted CPS Energy a price of $150/MMBtu—ten times the price charged the previous morning for next-day gas. *Id.* Neither Merritt nor any member of Energy Transfer's intrastate optimization team—the team that sold CPS En-

[8] All time stamps in the ICE Chat between Jennifer Merritt and Bruce Bordovsky during the storm are in Eastern Standard Time.

ergy natural gas during Winter Storm Uri—had ever seen prices that high. [redacted]

Bordovsky responded, understandably, "Wow," and then asked for "one sec" to discuss the price with his superiors. Ex. A-44, CPSE-MDL_000009514 at 9517. But just nine minutes later—before CPS Energy could even respond to the $150 offer—Merritt messaged "out," withdrew the offer, and raised the asking price even higher to $225/MMBtu. *Id.* Bordovsky attempted to clarify whether Energy Transfer was "out" of gas or merely out of gas at the $150 price. *Id.* Merritt ignored him and repeated "$225.00 offer." *Id.* Unable to risk losing the much-needed gas, CPS Energy had no choice but to accept. *Id.*

During her deposition, Merritt admitted that [redacted] When asked [redacted] Merritt merely stated [redacted] But [redacted] At 9:20 AM, when Merritt demanded $225 from CPS Energy, [redacted] Rather, it was Merritt herself who, just one minute before demanding $225 from CPS Energy, posted an offer on ICE to sell gas at HSC for $225. Ex. A-91A, ICE-Energy_Transfer000011. [redacted] Indeed, consistent with Energy Transfer's historical control over the HSC market,[9] Energy Transfer's sales would make up [redacted]

[9] *See, e.g.,* FERC Order to Show Cause and Notice of Proposed Penalties, July 26, 2007 (noting FERC investigation concluded that Energy Transfer manipulated wholesale natural gas prices at HSC).

ii. CPS Energy had no choice but to purchase gas for the long weekend from Energy Transfer.

CPS Energy had no choice but to accede to Energy Transfer's exorbitant prices both to provide gas to its customers and to generate electricity to protect the grid, as ERCOT demanded. Ex. A-47, Albers Dep. 43:10-44:20. CPS Energy's lack of choice has two aspects: volume and delivery point. First, CPS Energy could not obtain the volume of gas it needed for the long weekend from any other supplier. On February 11 and 12, CPS Energy purchased a total of 740,990 MMBtu per day for the long weekend from 22 different suppliers. More than [redacted] of those volumes [redacted]—were purchases from Energy Transfer. [redacted] Other than Enterprise Products—which sold CPS Energy 90,000 MMBtu per day during the long weekend—no other supplier could sell CPS Energy even close to the volumes of gas that Energy Transfer did.

Second, in February 2021, Energy Transfer was one of only two suppliers that could sell CPS Energy delivered gas at CPS Energy's Southgate in Karnes County and at its Rio Nogales power plant, and it was the only supplier that could sell CPS Energy delivered gas at Oasis Northgate. Ex. A-6, Skaer Dep.at 253:7-20; Ex. B, Bordovsky Aff. ¶¶ 8–11. Specifically, in February 2021, only [redacted] and Energy Transfer could sell CPS Energy delivered gas at Rio Nogales and only [redacted] and Energy Transfer could sell CPS Energy delivered gas at Karnes. Ex. B, Bordovsky Aff. ¶¶ 8–10. Moreover, CPS Energy's transportation contract with Oasis Pipeline limited the amount of gas it could transport from gas hubs like Katy and HSC to the Oasis North Gate point to [redacted] per day. [redacted] Once CPS Energy maxed out that 50,000 MMBtu limit—as it did for the long weekend—the only other option for getting gas to Oasis North Gate was the purchase of delivered gas from Energy Transfer. Energy Transfer, as a party to that transportation contract, understood those limitations and CPS Energy's corresponding reliance on delivered gas.

On February 12, CPS Energy purchased 50,000 MMBtu of delivered gas per day for the long weekend from Energy Transfer at Karnes, Rio Nogales and Oasis Northgate because no other supplier could sell them that gas. Ex. B, Bordovsky Aff. ¶¶ 8–10. When Energy Transfer raised its prices from $150 to $225 in a period of nine minutes, CPS Energy had no ability to bargain. Ex. A-44, CPSE-MDL_00009514 at 9517. Energy Transfer knew CPS Energy's options were limited—it "had no meaningful choice, no real alternative" but to agree to that exorbitant price. *Ski River Dev.*, 167 S.W.3d at 136 ("Gross inequality of bargaining power, together with terms unreasonably favorable to the stronger party may show that the weaker party had no meaningful choice, no real alternative, or did not in fact assent or appear to assent to the unfair terms.").

Energy Transfer nevertheless argues that CPS Energy "had numerous alternatives to purchasing gas from Energy Transfer." ET Mot. Summ. J. at 25. According to Energy Transfer, the fact that CPS Energy purchased natural gas from other counterparties during Winter Storm Uri "by itself, defeats any argument that CPS had no alternative but to buy from Energy Transfer." ET Mot. Summ J. at 25. That CPS Energy purchased gas from other counterparties does not mean that CPS Energy could have purchased the *volumes* it purchased from Energy Transfer from another counterparty. Energy Transfer points to no evidence suggesting—much less conclusively demonstrating—that CPS Energy could have purchased the 190,000 MMBtu it purchased from Energy Transfer for the long weekend from another counterparty.

Energy Transfer's argument also ignores CPS Energy's lack of alternatives for delivered gas at the Karnes, Rio Nogales, and Oasis Northgate delivery points. Energy Transfer points to no evidence suggesting that CPS Energy could have purchased the 50,000 MMBtu/day of delivered gas at Rio Nogales it purchased from Energy Transfer for the long weekend from DCP instead. It likewise points to no evidence suggesting that CPS Energy could have purchased the 50,000 MMBtu/day of delivered gas at Karnes for the long weekend from Targa. To the contrary, when CPS Energy reached out to Targa to secure supply for the long weekend, Targa's trader responded that he had no gas to sell and predicted that Targa would actually be reducing its gas supply over the weekend by 40%. Ex. A-92, CPSE-MDL_000009416, at 9418 (Ken Skaer: "I would absolutely love to be your

market for any gas you might sell tomorrow [Feb. 12]." Joe Brice: "man i wish," "im sure we'll be reducing like 40% of our gas."). And because Energy Transfer is the only party that could sell CPS Energy delivered gas at Oasis Northgate, it was simply not possible to obtain that delivered gas from another counterparty. Ex. B. Bordovsky Aff. ¶ 11. Any suggestion from Energy Transfer to the contrary is false.

Disinterested in grappling with specifics, Energy Transfer simply asks the Court to "See generally" a list of suppliers CPS Energy purchased gas from during Winter Storm Uri and asserts CPS Energy could have purchased gas from one of those counterparties instead. ET Mot. Summ. J. at 25. But Energy Transfer does not bother to identify a specific counterparty from that list who (1) had the available volumes and (2) had the ability to get that gas to the necessary delivery points on CPS Energy's system. Moreover, every CPS Energy witness testified that CPS Energy had no choice but to buy the gas it did from Energy Transfer. Ex. A-93, Pollo Dep at 229:19-230:5; Ex. A-6, Skaer Dep. 235:7-20; *see also Ski River Dev.*, 167 S.W.3d at 137 (citing testimony that party felt he had no choice and could not change anything about the lease before signing it as evidence supporting unconscionability). Indeed, CPS Energy typically didn't do "that much business with Energy Transfer when there was an option," but when CPS Energy needed significant volumes of natural gas at Karnes, Rio Nogales, and Oasis Northgate—as it did during Winter Storm Uri—CPS Energy was "at [Energy Transfer's] mercy," "because they were the only ones that could deliver into [the CPS Energy] system at the places [CPS Energy] needed it." Ex. A-6, Skaer Dep. 253:7-20. This reality is, at a minimum, sufficient to demonstrate a material fact issue with respect to the alternatives available to CPS Energy on February 12.

iii. Energy Transfer's unique access to low-cost supply allows it to profit enormously from the disaster.

Energy Transfer had planned for days before the storm to reap a profit from high-volume natural gas users like CPS Energy. To execute its plan, Energy Transfer [redacted]

[redacted] —all for the purpose of obtaining gas for the intrastate optimization team to flip for exorbitant prices.[10] [redacted]

While Energy Transfer demanded unprecedented prices from CPS Energy, its intrastate optimization team withdrew large volumes of low-cost gas from its Bammel, Bethel, and Bryson storage facilities to sell during the long weekend. From February 13 through February 16, Energy Transfer withdrew over [redacted] of gas from Bammel, Bryson, and Bethel. [redacted] The intrastate optimization team then [redacted] During the storm, the intrastate optimization team assigned the gas it withdrew from storage an estimated cost basis of [redacted]. But Energy Transfer's internal accounting records attributed an even lower cost to that gas: [redacted] *See* [redacted], at RFP 9 & 10 & 11. So, while the intrastate optimization team was pulling gas out of storage for [redacted] or less, it demanded $225 per MMBtu from CPS Energy.

Energy Transfer supplemented this low-cost storage gas with relatively low-cost supply secured by its intrastate commercial development team. The commercial development team typically did not engage in [redacted] That changed during the storm.

The commercial development team, headed by Brian Riley, had preexisting relationships with [redacted]

[10] [redacted]

[redacted][11] Energy Transfer also [redacted] Prior to Winter Storm Uri, the intrastate optimization and commercial development teams [redacted] But during Winter Storm Uri, [redacted]. Energy Transfer understood [redacted] But [redacted] As a result, Energy Transfer's intrastate optimization team [redacted]

This required extensive coordination. [redacted]

[11] "Buy Mortimer Buy" is a reference to the film *Trading Places*. [redacted]

[redacted]

While the commercial development team acquired low-cost supply through [redacted] the intrastate optimization team demanded unprecedented prices from CPS Energy. Less than 10 minutes before Merritt demanded $225 from CPS Energy for weekend gas, Energy Transfer's commercial development team directed [redacted] Approximately 13 minutes after Merritt demanded $225 from CPS Energy, Energy Transfer's commercial development team purchased even more weekend gas for its own supply through [redacted]. Throughout the day, Energy Transfer continued to [redacted] By late evening on February 12, Energy Transfer was [redacted]

By the evening of February 12, Energy Transfer had successfully executed on its plan to turn the impending storm disaster into a sales opportunity. [redacted]. Riegler poured

[12] [redacted]

[13] Energy Transfer also [redacted]

himself a rum. Ex. A1-108, ETP_000039814. Ryan Lee poured himself a scotch. *Id.* They joked about buying [redacted] "a drink when we visit them next" for all his help. *Id.* Later that evening, Energy Transfer purchased [redacted] When Riegler closed that final deal of the day, he texted the group thread [redacted]. Riegler then texted Ochoa: [redacted].

iv. Energy Transfer understood and celebrated their exorbitant profits on February 12.

Energy Transfer knew that [redacted] meant an exorbitant profit at the expense of utilities like CPS Energy. [redacted]. As Brian Riley testified, he understood that [redacted]; *see also* [redacted] As just one example, when Energy Transfer was offered a package of gas for $60 on February 12, Riegler [redacted]. But Riley reminded him that Energy Transfer could flip that gas for an enormous profit, texting back [redacted].

Energy Transfer reveled in the exorbitant profit it was making off the intrastate optimization team's gas sales. When Ochoa texted that he was [redacted] to utilities that were just trying to keep the lights on, the commercial development team [redacted] When the commercial development team secured low-cost supply for the intrastate optimization team to sell, they [redacted]

For Energy Transfer, other market participants' desperation for gas was one big fist bump. In reporting on the status of the day to another Energy Transfer colleague, Riley said That colleague texted back Late that evening, another Energy Transfer employee, Ryan Lee, began to

Eager to assess the extent of the profits Energy Transfer had made, From Energy Transfer's perspective, it was,

.

All in all, the ET Pipelines charged CPS Energy a volume-weighted average price of **$212/MMBtu** for gas to be delivered over the long weekend. Such prices were completely unprecedented. According to *Gas Daily*, prior to February 2021, the highest midpoint price experienced in the Texas intrastate gas market since October 1994 was $24.96/MMBtu at Houston Ship Channel on February 26, 2003, which exceeded even the highest midpoint prices reported during a series of severe cold and polar vortex events in 2011 and 2014. Exploiting CPS Energy and other utilities' desperation for natural gas at the onset of an unprecedented winter storm to "flip gas" at an exorbitant profit—and reveling in it—are exactly the kind of "sharp business practices" courts consider as evidence of unconscionability. *El Paso Nat. Gas Co.*, 964 S.W.2d at 61.

v. Energy Transfer's "different market" argument is unavailing.

When confronted with the gross disparity between the prices Energy Transfer was paying for its own supply and the prices it demanded from CPS Energy, some Energy Transfer witnesses have insisted that any such comparison is improper because Carthage is a "different market." But during Winter Storm Uri, Energy Transfer's traders routinely acknowledged the relevance of Carthage supply to sales all over the state, including in CPS Energy's area. For example,

[redacted]. Other parties likewise acknowledged the connection between [redacted]. In negotiating with Riegler over price, [redacted]

Energy Transfer has also at times insisted that it cannot move gas from the Tiger-Carthage interconnect to Central Texas on the HPL system, so it could not possibly flip the gas it was buying in Carthage to customers like CPS Energy in Central Texas. Ex. A133, Chambers Dep. at 36:8-38:23. But this litigation-driven argument runs headlong into Energy Transfer's own business practices. During Winter Storm Uri, Energy Transfer [redacted]

It is perhaps for this reason that, [redacted]. More fundamentally, as Alex Thom at ETC Marketing explained, when selling gas,

the focus is on balancing receipts and deliveries, not on tracking particular molecules—"[R]egardless of where [the gas] sits geographically on the pipe, if we can achieve that delivery, it does not matter to me if it's north, south, east, west, back haul, forward haul." Ex. A-135, Thom Dep. 166:9-14. And ultimately, all of the trades the business development team did at Carthage through ETC Marketing were moved over to the commercial optimization team's book. Ex. A-14, Small Dep. 217:7-218:3; Ex. A-136, ETP_000039587 at 39588. There is, at a minimum, a fact dispute on this issue.

Energy Transfer has similarly contended that the natural gas it purchased for its own supply at single-digit prices off the interstate Trunkline Pipeline at Trunk Katy (again through ETC Marketing) has no relevance to CPS Energy. Ex. A-133, Chambers Dep. at 130: 1-5. But, once again, Energy Transfer's contemporaneous conduct contradicts its after-the-fact litigation position. Internal communications show that Energy Transfer used natural gas purchased from ETC Marketing at Trunk Katy to displace third-party storage withdrawals from Energy Transfer's Bammel storage facility—the very same HPL storage facility where CPS Energy stored gas and from which it withdrew gas during February 2021. Ex. A-137, ETP_000040606; Ex. A-138, ETP_000040417[14]; Ex. A-101, ETP_000040423; Ex. A-34, CPSE-MDL_000028821 (Master Storage Agreement); Ex. A-139, CPSE-MDL_000004510 (Storage Agreement Confirmation). To say the low-cost supply Energy Transfer acquired from ETC Marketing at Trunk Katy had no relevance to gas available to CPS Energy during Winter Storm Uri is plain false.

The totality of the circumstances surrounding the prices Energy Transfer charged CPS Energy on February 12 demonstrate that they were unconscionable and/or void as to public policy. Accordingly, the Court should deny Energy Transfer's motion for summary judgment with respect to the following February 12 transactions:

Transaction No.	Seller	Trade Date & Time	Sale Point	Price (All fixed price deals)	Quantity + Flow Date(s)
CPSE # 62083	HPL	Feb. 12 9:24 AM	987357 HPL CPS Karnes Delivered Gas	$225	50,000/day (Feb. 13-16)

[14] Panhandle Energy is a third party storage customer at Bammel.

CPSE #62089	Oasis	Feb. 12 9:24 AM	1702 Oasis Rio Nogales Delivered Gas	$225	50,000/day (Feb. 13-16)
CPSE #62090	Oasis	Feb. 12 9:24 AM	1483 Oasis North Gate Delivered Gas	$225	50,000/day (Feb. 13-16)
CPSE # 62086	HPL	Feb. 12 9:51 AM	986780 Oasis Katy	$180	10,000/day (Feb. 13-16)
CPSE # 62087	HPL	Feb. 12 9:52 AM	986780 Oasis Katy	$180	10,000/day (Feb. 13-16)
CPSE# 62084	HPL	Feb. 12 10:02 AM	987342 HSC Pool	$150	10,000/day (Feb. 13-16)
CPSE# 62085	HPL	Feb. 12 10:05 AM	987342 HSC Pool	$150	10,000/day (Feb. 13-16)

b. The Long Weekend: February 13-16, 2021

Throughout the long weekend, temperatures plummeted and freezing precipitation bore down on Texas. Energy Transfer remained focused on exploiting the winter storm for profit. While weather reports warned of an impending human needs crisis, Energy Transfer remained laser-focused on profit and continued to [redacted]

i. Saturday, February 13

Throughout the weekend, Energy Transfer continued to insist on exorbitant fixed price deals, prompting one counterparty to [redacted] Meanwhile, ETC Marketing continued to [redacted] Riegler confirmed that [redacted]

[redacted]. That day, Beth Hickey texted the accounting department [redacted]:

[redacted]

ii. Sunday, February 14

On February 14, CPS Energy experienced the first of many weather-related cuts to its supply. [redacted] Ex. A-144, CPSE-MDL_000010372 (A. Irving et al. Text Thread). That morning, [redacted])—the only other supplier besides Energy Transfer able to deliver gas to Rio Nogales—notified CPS Energy's Bordovsky that [redacted] was "seeing some significant freezeoffs behind [its] plants and watching production disappear by the moment." [redacted] Ex. A-144, CPSE-MDL_000010372 (A. Irving et al. Text Thread). As Bordovsky explained, CPS Energy really needed

that gas from [redacted] Without [redacted] Energy Transfer was CPS Energy's only option for delivered gas at Rio Nogales. Ex. B, Bordovsky Aff. ¶ 8. If [redacted] volumes failed to show up, CPS Energy's only option would be to purchase those replacement volumes at exorbitant prices from Energy Transfer or derate its Rio Nogales power plant as customer generation demand only continued to climb. *Id.*, [redacted]; Ex. A-145, CPSE-MDL_000010809. Understanding that bind[redacted] trader messaged [redacted]. But by 11:00pm that evening, [redacted] and gas stopped showing up to Rio Nogales. [redacted].

Meanwhile, Energy Transfer continued to [redacted] By late afternoon, [redacted] At this point, Energy Transfer was purchasing so much low-cost supply from [redacted] that it prompted Ochoa to text "How much gas does [redacted] have[?]" "Unlimited?" Ex. A-158, ETP_000040658 at 40661. Later that afternoon, Riegler texted [redacted]. Small replied "Yeah. …We will take it all." [redacted].

By early evening, Energy Transfer was still [redacted] Just before 5:00 pm on February 14, [redacted] Ex[redacted]

[redacted]. As processing plants in West Texas went down, Small instructed the commercial development team to [redacted].

That afternoon, Energy Transfer's Co-CEO Mackie McCrea asked Small's intrastate optimization team to [redacted]. As Small put it, [redacted] Indeed, in a single weekend, Energy Transfer had just made almost triple what it typically makes from intrastate gas sales in an entire year. [redacted]; Ex. A-41, Energy Transfer LP, Annual Report (Form 10-K) 87 (Feb. 12, 2021); *see also Frostifresh*, 281 N.Y.S.2d at 965 (taking the seller's net costs and profit margin into account in evaluating unconscionability under the UCC).

iii. Monday, February 15

On February 15, temperatures plunged to 9 degrees. That morning, one-third of the state's power-generation capacity was down. To prevent a total collapse of Texas' power grid, ERCOT first ordered retail electric providers like CPS Energy to ensure all generators were working, and then eventually issued load-shedding directives to drastically reduce electricity distribution to CPS Energy's customers. The result was widespread blackouts across Texas.

The gas supply situation continued to deteriorate. [redacted]s gas supply remained down, eliminating the only source of gas for CPS Energy's Rio Nogales power plant other than Energy Transfer. [redacted]; Bordovsky Aff. ¶ 9. And things were only getting worse. Later that day, CPS Energy's supply from other gas suppliers, [redacted], coming in on HPL had been cut. Ex. A-158, CPSE-MDL_000010380, at 10381. Indeed, [redacted] reported to

CPS Energy that it was "losing gas all over the place." [redacted] Of the 354,500 MMBtu CPS Energy had counted on coming in off the Enterprise pipeline, 252,833 MMBtu had been cut. Ex. A-158, CPSE-MDL_000010380 at 10382. All natural gas scheduled to flow on the Permian Highway Pipeline had been cut to zero. *Id.* An HPL cut notification email arrived at around 11:30 AM, indicating approximately [redacted] of cuts at Katy Oasis and Houston Ship Channel. [redacted] As the day continued, cuts at the hubs climbed to 65,150 MMBtu. Ex. A-158, CPSE-MDL_000010380 at 10382. 41,692 MMBtu were cut at West Texas Map. *Id.* Of the 740,900 MMBtu CPS Energy had purchased for the long weekend, only 319,532 MMBtu were even flowing. *Id.* at 10383.

Critically, earlier that morning, CPS Energy learned that the Teak processing plant had shut down entirely, making it impossible for CPS Energy to receive any gas at Karnes from the Targa Pipeline. [redacted]; Ex. A-158, CPSE-MDL_000010380 at 10383. Once the Teak plant went down, CPS Energy's only option for delivered gas at Karnes was Energy Transfer. Ex. B, Bordovsky Aff. ¶¶ 4, 9–10. And because [redacted] had already cut CPS Energy's deliveries to zero, Energy Transfer was CPS Energy's only option at Rio Nogales as well. *Id.* at ¶8; [redacted] With no other gas showing up at Rio Nogales from [redacted] CPS Energy had to turn to Energy Transfer to meet the increasing demand of its customers. *Id.*; Ex. A-145 CPSE-MDL_000010809.

Around 3:30 PM—hours after ERCOT's load shedding left millions of Texans in the dark—Merritt demanded that CPS Energy put a deal in place "in the event" CPS Energy pulled more gas off the pipeline at Rio Nogales than it had nominated to the pipeline. Ex. A-44, CPSE-MDL_000009514 at 9519. Less than 10 minutes later, she messaged Bordovsky: "Right now, we do not have the gas. [W]e cannot support the overpull." *Id.* But she quickly clarified that the only overpull Energy Transfer could not support was one "outside of contractual rights." *Id.* That is, it wasn't that Energy Transfer lacked the gas that CPS Energy needed. It was instead that Energy Transfer wanted to extract as much money as possible for that gas. Accordingly, Merritt demanded $300 per

MMBtu for any overpulled volumes at Rio Nogales. *Id.* Bordovsky told Merritt CPS Energy was looking into whether Rio Nogales was overpulling. *Id.* "300.00/mmbtu," Merritt repeated. *Id.* One minute later, Merritt again demanded that CPS Energy confirm it would pay the $300.00/MMBtu price. *Id.* CPS Energy's transportation contract with HPL allowed for them to withdraw gas from their storage account with HPL at Bammel to automatically balance any overpulled volumes, up to their maximum daily withdrawal rate. Ex. A-17, CPSE-MDL_000026189 at 26195-26196; [redacted] It also allowed CPS Energy to cash out any overpulled volumes at an index price at the end of the month. Ex. A-17, CPSE-MDL_000026189 at 26195-26196. Confused about Merritt's demand, Bordovsky attempted to clarify whether Energy Transfer just wanted to put a sale in place or whether Energy Transfer truly did not have the volumes. Ex. A-44, CPSE-MDL_000009514 at 9520. Merritt did not answer. *Id.* She simply kept demanding CPS Energy agree to her $300 price. *Id.*

CPS Energy was in a bind—it had yet to pull more gas off the system than it had nominated and despite CPS Energy's contractual right to automatic balancing from its storage account for any overpulled volumes, Energy Transfer was still preemptively attempting to extract $300 for any excess gas CPS Energy *might* pull off the system. *Id.* Rio Nogales was pulling hard, and CPS Energy did not know if it could decrease its volumes to avoid the overpull without losing the unit. [redacted] Despite the fact that Energy Transfer had already made over [redacted] on intrastate gas sales over the weekend, Energy Transfer seized on another opportunity to exploit the human needs crisis: [redacted] Merritt insisted. Ex. A-44, CPSE-MDL_000009514 at 9519; [redacted] That day, the highest price HPL had paid to buy sameday gas for its own supply was [redacted]

When CPS Energy did not immediately agree to her $300 price, Merritt demanded that CPS Energy get on the phone with her and Small. Ex. A-44, CPSE-MDL_000009514 at 9520. CPS Energy and the rest of the state were "extremely concerned about the health of the grid," but Energy Transfer would not budge. *Id.*; Ex. A-145, CPSE-MDL_000010809 at 10824. Ultimately, as a result of Energy Transfer's sharp business practices, CPS Energy was forced to de-rate its Rio Nogales

plant, cutting its hourly power output by more than 35%. Ex. A-161, CPSE-MDL_000008776, at 8784.

c. The next-day prices Energy Transfer charged CPS Energy on February 16, 2021 are unconscionable.

When normal day-ahead gas trading resumed on Tuesday, February 16, temperatures had reached record low temperatures for two consecutive days. Temperatures in San Antonio would dip to another record-low 12 degrees. Millions of Texans remained without power. And the gas-supply situation was worse than ever. As CPS Energy's access to available supply became increasingly limited, CPS Energy was again left with no choice but to purchase gas from Energy Transfer. Knowing that CPS Energy had no available alternatives, Energy Transfer took advantage of that lack of bargaining power to extract exorbitant prices, deploying oppressive and sharp business practices to do so.

i. As gas supply grew even worse, CPS Energy was left with no available alternatives besides Enterprise and Energy Transfer.

CPS Energy's traders began contacting suppliers at 6:17 AM, asking anyone and everyone for any gas they could supply at a variety of sale points. But supplier after supplier responded the same way: they had no gas available to sell.

OXY - Ryan Hinze	CPS - Ken Skaer	02/16/2021 08:11:58	hey, gm...we have nothing here

Ex. A-162, CPSE-MDL_000009053.

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

To make matters worse, [redacted] remained unable to sell any delivered gas Rio Nogales, [redacted] and [redacted] So Energy Transfer remained the only option for delivered gas three critical CPS Energy delivery points.

ii. Energy Transfer took advantage of CPS Energy's lack of bargaining power to extract exorbitant prices.

Amidst these conditions, Energy Transfer surged their prices to truly unimaginable levels. Early that morning, Bordovsky reached out to Merritt for an offer on delivered gas. Ex. A-44, CPSE-MDL_000009514 at 9520. Four days earlier, the Railroad Commission had ordered gas suppliers like Energy Transfer to prioritize gas for local distribution companies serving human needs like CPS Energy. Ex. A-46, ETP_000000162 But that morning, Merritt stalled, telling Bordovsky that she would need to see how they were "shaping up for the new day." Ex. A-44, CPSE-MDL_000009514 at 9520. Meanwhile, Small set out to bid up prices on ICE. At 9:44 AM, Small posted offers on ICE for [redacted]. Over the next 45 minutes, he [redacted] At 10:23 AM, Small posted an offer [redacted]. The counterparty that lifted a small volume at that $400 price was Energy Transfer affiliate, ETC Marketing. Ex. A-91B, ICE-ET-EP000001.

[redacted] then instructed Merritt to offer CPS Energy $400 for next day (i.e., February 17) delivered gas at Rio, Karnes, and Oasis North Gate. Ex. A-44, CPSE-MDL_000009514 at 9521; [redacted] As [redacted] conceded, [redacted]

[redacted][5] CPS Energy implored Energy Transfer to lower the price. Bordovsky asked Merritt if she would consider selling CPS Energy gas on an index basis as opposed to demanding a $400 fixed price. Ex. A-44, ETP_000009514 at 9521. Merritt responded "No" without any further explanation, as directed by [redacted] *Id.*; [redacted] A few minutes later, Bordovsky again attempted to negotiate: "Katy price has been coming off a bit. Can we wiggle on your $400 price offer?" Ex. A-44, ETP_000009514 at 9521. Merritt refused to negotiate, responding "No wiggle room." *Id.* Again, that directive came directly from [redacted] Bordovsky tried one final time, reminding Energy Transfer that the gas was for human needs. Ex. A-44, ETP_000009514 at 9521. Merritt refused to budge: "We have to hold at $400." *Id.* CPS Energy had no choice but to accede to the $400 price. *Id.*

CPS Energy could not obtain the supply it needed at Oasis North Gate or Rio Nogales from any other supplier. *Freeman*, 435 S.W.3d at 228 (in assessing unconscionability, courts consider "the alternatives available to the parties at the time and their ability to bargain"); *El Paso Nat. Gas Co.*, 964 S.W.2d at 61 (listing "the absence of a viable alternative," as a factor to consider in the unconscionability analysis). Energy Transfer knew CPS Energy had no other options and no ability to bargain, so Energy Transfer refused to negotiate. Ex. A-44, CPSE-MDL_00009514 at 9521. CPS Energy needed the gas for human needs; it could not walk away. *Id.* So Energy Transfer, holding all the cards, doggedly insisted on their concocted price of $400. *Id.* Lacking any other option, CPS Energy purchased 25,000 MMBtu for delivery at Oasis North Gate and 50,000 MMBtu for delivery at Rio Nogales for $400. *Id.*

---

15 [redacted]

Notwithstanding these facts, Energy Transfer insists that the bargaining process was "standard and fair" and—more remarkably—that "[t]here was nothing unusual about the bargaining process during Winter Storm Uri." ET Mot. Summ. J. at 24. The evidence demonstrates that there was nothing standard and fair about Winter Storm Uri or Energy Transfer's conduct. Instead, Energy Transfer planned in advance of the storm to leverage its unique position in the natural gas market to take advantage of the sales opportunity that CPS Energy's human needs obligation would present. [redacted] As temperatures plummeted and snowfall pummeled San Antonio, Energy Transfer capitalized on CPS Energy's lack of alternatives and demanded $400 for natural gas. Ex. A-44, CPSE-MDL_00009514 at 9521. It then refused to "wiggle" on price, understanding full well that CPS Energy had no ability to bargain and nowhere else to turn. *Id.* It did not matter that the gas was for human needs. *Id.* ("[W]e can definitely attest that this would be for human needs.") It did not matter that the Governor had declared a statewide disaster. It did not matter that CPS Energy had no other options—indeed, that was the point. Because Energy Transfer knew that on February 16, CPS could not buy the gas it needed from any other counterparty, Energy Transfer could demand whatever price it wanted and CPS Energy had no choice but to accede.

Energy Transfer also insists that CPS Energy was "free" to reject offers from Energy Transfer during the storm and simply purchase gas from some other, unidentified counterparty. ET Mot. Summ. J. at 25-26. Again, that argument ignores the realities of Winter Storm Uri, the massive cuts to supply CPS Energy had already received, and the limited number of options that CPS Energy had, even outside of the storm, to acquire delivered gas at Rio Nogales, Karnes, and Oasis North Gate. Ex. B, Bordovsky Aff. ¶¶ 7–11. As CPS Energy's attempts to buy gas from other suppliers demonstrate, CPS Energy's options to purchase gas at the hubs were also limited. Although a typical trading day would see upwards of 50 deals totaling millions of MMBtu of gas traded at Katy, on February 16, only nine fixed-price next-day deals for gas at Katy Oasis, totaling only 78,400 MMBtu, closed on the ICE platform. Ex. A-91B, ICE-ET-EP0000001. Similarly, only two transactions for gas at HSC pool, totaling less than 10,000 MMBtu, closed on the ICE platform. *Id.* Both were sales

by HPL. *Id.* Indeed, 100% of all transactions at HSC reported to Platts for flow day February 17 were sales by Energy Transfer. Ex. D, P. Bergin Decl. at ¶ 5(g).

With gas continuing to be cut at the hubs, CPS Energy had to purchase delivered gas, leaving them at Energy Transfer's mercy. Ex. A-6, Skaer Dep. at 253:7-20. Delivered gas that CPS Energy normally could count on receiving at Karnes off the [redacted]; *see also* Ex. B, Bordovsky Aff. ¶ 9. Again, because [redacted] had cut CPS Energy to zero, Energy Transfer was CPS Energy's only option for delivered gas at Rio Nogales as well. [redacted]; *see also* Ex. B, Bordovsky Aff. ¶ 8. And even outside of Winter Storm Uri, Energy Transfer was CPS Energy's only option for delivered gas at Oasis North Gate. Ex. B, Bordovsky Aff. ¶ 11. As Skaer explained "[T]here are only limited companies that can sell gas directly to CPS Energy…CPS Energy was at the mercy of those companies and we, essentially, had to buy the gas at whatever price they dictated, unless our executive team was willing to not buy the gas and have people freeze." Ex. A-6, Skaer Dep. at 69:11-17. Another CPS Energy executive explained: "[T]here were people dying, and we had no choice." Ex. A-168, Almaraz Dep. at 219:10-17. CPS Energy was "at the mercy of anyone that could supply to us at that time." *Id.*

iii. Energy Transfer deploys sharp business practices to extract the highest prices it could from CPS Energy.

Energy Transfer deployed sharp business practices to exploit CPS Energy's desperation in two ways. First, before offering gas to CPS Energy on February 16, Small posted offers on ICE to drive up prices. Ex. A-91B, ICE-ET-EP0000001. The Railroad Commission's order required suppliers like Energy Transfer to prioritize natural gas sales to local distribution companies serving human needs. Ex. A-46, ETP_000000162. In defiance of that order, Energy Transfer was not first communicating with utilities like CPS Energy—it was posting offers on ICE to the open market to drive up prices so that it could extract the highest price it could from CPS Energy. *Id.*

In addition to bidding up prices on ICE to extract the highest price it could from CPS Energy for next-day gas, Energy Transfer also deployed sharp business practices to capitalize on sameday pricing, as they had planned to do before the storm even started. Ex. A-85, CPSE-MDL_00009014. Later on February 16, when CPS Energy asked Merritt for an offer for additional next day delivered gas at Oasis North Gate and Karnes, she refused to make an offer. Ex. A-44, CPSE-MDL_000009514 at 9521-9522 ("We'll have to wait and look at it tomorrow. [S]ame day[.]")

Energy Transfer's decision to wait to price gas for February 17 until the following day had nothing to do with available supply and everything to do with holding out for higher prices as the winter storm disaster grew steadily worse. Indeed, Merritt could not identify a single instance during Winter Storm Uri when Energy Transfer turned down a deal because of a lack of available volumes to sell. Ex. A-36, Merritt Dep. 174:3-14.

So on February 16, Energy Transfer had CPS Energy exactly where it wanted them—desperate for gas and with no other supplier to turn to. CPS Energy had no choice but wait until the following day to see what exorbitant price Energy Transfer would demand for same day gas. Ex. A-85, ETP_000009014. Because the totality of the circumstances surrounding the prices Energy Transfer charged CPS Energy for next-day gas on February 16 demonstrate that they were unconscionable, the Court should deny Energy Transfer's motion for summary judgment with respect to the following February 16 transactions:

Transaction No.	Seller	Trade Date & Time	Sale Point	Price (Note: All fixed price deals)	Quantity + Flow Date(s)
CPSE #62325	Oasis	Feb. 16 12:38 PM	1702 Oasis Rio Nogales Delivered	$400	50,000 (Feb. 17)
CPSE# 62326	Oasis	Feb. 16 12:38 PM	1483 Oasis North Gate Delivered	$400	25,000 (Feb. 17)

d. The prices Energy Transfer charged CPS Energy on February 17, 2021 are unconscionable.

The next day, on February 17, 2021, at the height of the declared statewide disaster, and after San Antonio had experienced 100-plus consecutive hours of below freezing temperatures, Energy Transfer's prices went even higher. That day, Energy Transfer charged their highest price for natural gas of the entire disaster period: $500/MMBtu for same-day gas for delivery at Karnes and Oasis North Gate, representing an increase of more than 15,000% over pre-event prices. Ex. A-70, ETP_000000229; Ex. A-71, ETP_000000230. Energy Transfer also charged CPS Energy outrageous prices for next-day gas to be delivered on February 18: $300 for gas delivered to Rio Nogales, Oasis North Gate, and Karnes. Ex. A-169, ETP_000000226; Ex. A-170, ETP_000000227; Ex. A-171, ETP_000000228.

i. The prices Energy Transfer charged "shock the conscience" and compel the court to intercede.

The prices Energy Transfer charged CPS Energy are "sufficiently shocking or gross to compel the court to intercede." *Ski River Dev.*, 167 S.W.3d at 136; *Venture Cotton Co-op.*, 435 S.W.3d at 228 ("Under the UCC," the unconscionability analysis considers "the agreement's oppressive or shocking nature"). Every Energy Transfer witness conceded that they had never seen prices that high. Energy Transfer's own traders referred to the very prices they were charging as [redacted] Ex. A-178, ETP_000039658 at 39660; [redacted] But because those [redacted] prices were [redacted] they didn't think twice about charging them. [redacted]. The prices alone are sufficiently shocking and oppressive as to warrant court intervention. *Jones*, 59 Misc. 2d at 192 (finding the price charged was unconscionable because it was "exorbitant on its face," and so outrageous that it warranted a finding of unconscionability irrespective of the presence of any unfairness in the contract formation process); TEX. BUS. & COM. CODE § 2.302, cmt. 1.

The oppressive and shocking nature of Energy Transfer's prices is only heightened by the fact that Energy Transfer never considered whether it should charge any price other than the highest

price it could charge, even during the height of the storm on February 17. [redacted]; *see also* [redacted] When asked whether Energy Transfer could have charged less for natural gas during the storm and still made a significant profit, Small testified [redacted] Indeed, Energy Transfer—to this day—has no second thoughts about price gouging during a declared disaster and is [redacted] of its conduct during the storm. [redacted]

There is no reason Energy Transfer could not have chosen a different path and charged lower prices during the state-declared disaster. *See Jones*, 59 Misc. 2d at 191 ("Section 2-302 of the Uniform Commercial Code enacts the moral sense of the community into the law of commercial transactions."). Recognizing the severity of Winter Storm Uri, other natural gas suppliers made the decision after the long weekend not to extract whatever price they could get from CPS Energy. For instance, [redacted] decided starting on February 16 to charge CPS Energy first of month prices: "[M]aking sure people get gas," [redacted] trader said "[N]ot price gouging in these times if its for human needs":

[redacted]

[redacted].

Energy Transfer, too, could have made different choices. By the end of the long weekend, Energy Transfer had already made record profits. [redacted] If Energy Transfer had charged first of month prices like [redacted], Energy Transfer still would have made [redacted] Indeed, Energy Transfer's profit margin coming out of the long weekend was already triple what it typically was for an entire year. Ex. A-78, Energy Transfer LP, Quarterly Report (Form 10-Q) 42 (May 11, 2020); Ex. A-41,

Energy Transfer LP, Annual Report (Form 10-K) 87 (Feb. 12, 2021). But Energy Transfer wanted more and it deployed oppressive and shocking business practices—during a declared disaster—to get it.

ii. Energy Transfer's attempts to normalize the shocking prices they charged are unavailing.

Unable to escape the fact that the prices it charged CPS Energy are exorbitant and shocking on their face, Energy Transfer makes several unpersuasive attempts to normalize them. First, Energy Transfer insists that the prices it charged CPS Energy were "not market outliers," but were in fact "consistent" with prices charged by other suppliers. ET Mot. Summ J. at 28-31. That is misleading for several reasons. First, Energy Transfer ignores the fact that by February 16, only the pipeline companies had any gas. *See supra*. Second, it ignores that a number of the comparator sales plotted on pg. 32 of Energy Transfer's motion were done on an index basis. The *Gas Daily* index is a volume-weighted average of all reported fixed-price transactions for a given hub. [redacted] Energy Transfer's vast intrastate natural gas transportation and storage assets, including HPL and Oasis, give it a dominant role as a seller of natural gas in many Texas market areas, especially at Houston Ship Channel and Katy. For instance, on February 13-16, Energy Transfer's transactions made up **93%** of the reported fixed-price transactions at Houston Ship Channel. Ex. D, P. Bergin Aff. ¶ 5(g). On February 17, Energy Transfer's transactions made up **100%** of the reported fixed-price transactions at Houston Ship Channel.

Flow Date(s)	HSC	Katy	Waha
Feb. 6–8	100%	54%	58%
Feb. 9	91%	51%	60%
Feb. 10	0%	2%	48%
Feb. 11	100%	34%	42%
Feb. 12	32%	0%	13%
Feb. 13–16	93%	36%	34%
Feb. 17	100%	6%	0%
Feb. 18	64%	56%	15%
Feb. 19	64%	77%	2%

Id. Thus, any argument about the reasonableness of the prices Energy Transfer charged that relies on a comparison to an index price or a price charged by another supplier based on an index price must be assessed with an understanding of Energy Transfer's outsize influence on the daily indices reported for various hubs. Because of Energy Transfer's dominant influence—and on February 17—complete influence over the index price at Houston Ship Channel, any comparison to that index price is essentially a comparison with itself.

Energy Transfer next asserts that there is "abundant, undisputed evidence that CPS did not think the prices were unfair at the time." ET Mot. Summ. J. at 35. There could not be a more hotly disputed issue in this case. Every CPS Energy witness has testified that they thought the prices Energy Transfer was demanding were excessive and exorbitant. *See, e.g.*, Ex. A-168, Almaraz Dep at 97:6-12 ("**Q.** Did - - at this time, February 15th 2021 . . . did you believe these prices were excessive or exorbitant? **A.** Me, Frank, personally, absolutely. **Q.** At this time, February 15th, 2021? **A.** I was operating against a frame of reference of $2.50, $3. These numbers were stunning."); Ex. A-6, Skaer Dep. at 25:9-13 ("As the gas prices began to elevate, we were very concerned about the prices and wanted to ensure that - - that we had full support before buying any gas deals that were, what we considered, to be excessively priced.") Contemporaneous documents corroborate that testimony. Ex. A-44,CPSE-MDL_00009514 at 9521 ("[T]he numbers are so large . . . it's got everyone pretty freaked out"). And even Energy Transfer understood the prices at the time were "crazy". *See* Ex. A-172, ETP_000039658 at ETP_000039660.

Grasping at straws, Energy Transfer argues that because CPS Energy "was aware of market conditions and gas prices when it made its gas purchases during the storm," the prices Energy Transfer charged were somehow not unconscionable. ET Mot. Summ. J. at 34. CPS Energy knew that Energy Transfer was demanding outrageous prices during the storm. It also knew that because of Energy Transfer's outsize influence over the daily indexes at Houston Ship Channel and Katy, Energy Transfer was influencing—if not wholly driving—the index prices at various hubs. Ex. A-6, Skaer Dep. at 160:12-20; Ex. D, Bergin Aff. ¶ 5(g). CPS Energy's *awareness* of Energy Transfer's outrageous prices—and Energy Transfer's influence over the daily index prices at various hubs—does

not make those prices any less shocking. Indeed, because CPS Energy was constantly monitoring price and available supply, it made every effort to avoid buying gas from Energy Transfer when it had any other option, given Energy Transfer's reputation for charging the highest prices that it could. Ex. A-6, Skaer Dep. 252:11-15 ("I would say that oftentimes when we asked them for a price, Bruce, for instance, was afraid to hang up the phone because he said if he called them back in one minute they would raise the price."). CPS Energy only turned to Energy Transfer when it had no other option, and Energy Transfer used CPS Energy's lack of choice and ability to bargain to demand oppressive and shocking prices. Ex. B, Bordovsky Aff. ¶¶ 7–11.

Because the totality of the circumstances surrounding the prices Energy Transfer charged CPS Energy for next-day and same-day gas on February 17 demonstrate that they were unconscionable, the Court should deny Energy Transfer's motion for summary judgment with respect to the following February 17 transactions:

Transaction No.	**Seller**	**Trade Date & Time**	**Sale Point**	**Price (Note: All fixed price deals)**	**Quantity + Flow Date(s)**
CPSE# 62419	Oasis	Feb. 17 11:17 AM	Oasis Rio Nogales Delivered	$300	50,000 (Feb. 18)
CPSE# 62420	Oasis	Feb. 17 11:17 AM	Oasis North Gate Delivered	$300	75,000 (Feb. 18)
CPSE# 62417	HPL	Feb. 17 11:26 AM	987357 HPL CPS Karnes Delivered	$300	35,000 (Feb. 18)
CPSE #62323	HPL	Feb. 17 11:58 AM (intraday)	987357 HPL CPS Karnes Delivered	$500	80,000 (Feb. 17)

CPSE #62327	Oasis	Feb. 17 3:25 PM (intraday)	1483 Oasis North Gate Delivered	$500	50,000 (Feb. 17)

e. The prices Energy Transfer charged CPS Energy on February 18, 2021 are unconscionable.

At 8:00 AM on February 18, Bordovsky messaged Jennifer Merritt asking for 75,000 MMBtu of next-day delivered gas at Oasis North Gate. Ex. A-44, CPS-MDL_00009514 at 9524. She did not give him a price for an hour and a half. *Id.* At 9:30 AM, Merritt messaged "$50.00 offer." *Id.* Bordovsky asked Merritt to please "give [him] a sec, please" to get approval to buy the gas. *Id.* Small then started posting offers [redacted], offering gas to the entire market in violation of the Railroad Commission's prioritization order. [redacted]; Ex. A-46, ETP_000000162 (Railroad Commission Order). As Small was posting offers to sell gas at [redacted] he was posting a bid to buy gas for [redacted] At 9:41 AM, a counterparty lifted Small's $75 offer. Ex. A-91C, ICE-ET-EP000001. One minute later, Merritt messaged CPS Energy that she was "out" of her original $50 offer and increased her price to $75. Ex. A-44, CPS-MDL_00009514 at 9524. CPS Energy needed gas at North Gate and Energy Transfer remained CPS Energy's only option for delivered gas at that delivery point. CPS Energy had no choice but to assent to the $75. *Id.*; Ex. B, Bordovsky Aff. ¶ 11.

At this time, Energy Transfer's deals constituted 77% of all reported transactions at Katy as well as 80.6% of the volume traded at Katy on ICE. Ex. D, Bergin Aff. ¶5(g). Energy Transfer's outsize influence at Katy gave it the ability to influence, if not outright control, the price at Katy. *Id.*

As prices fell toward the end of the trading day, Energy Transfer seized its final opportunity of the storm to demand exorbitant prices: Small sold gas to CPS Energy over ICE for $50, the original price Merritt had quoted CPS Energy and then withdrawn earlier that morning. Ex. A-91C, ICE-ET-EP000001; Ex. A-44, CPS-MDL_00009514 at 9524. The next day, gas prices would return to pre-event levels of $2–$3 dollars. Reflecting on the exorbitant profit they had helped make possi-

ble, the commercial development joked about getting paid that month based on a percentage of Energy Transfer's profit. Ex. A-173, ETP_000039858 at 39859 (Ryan Lee asked Riley "How about .5% of book?" and Riegler texted back "BOOM!").

The prices Energy Transfer extracted from CPS Energy on February 18 culminated the weeks-long effort to deploy sharp and oppressive business practices to profit off a statewide emergency and CPS Energy's attendant desperation for gas. Indeed, by February 18, Energy Transfer had perfected its price gouging technique. When CPS Energy reached out in the morning for an offer, Energy Transfer again stalled, giving Small time to bid up prices on ICE. Ex. A-44, CPS-MDL_00009514, at 9524. It leveraged its outsize influence over the Katy index to essentially set that price. Ex. D, Bergin Aff. ¶5(g). Then, it withdrew its original $50 offer and demanded $75 from CPS Energy. Ex. A-44, CPS-MDL_00009514 at 952. Meanwhile, it was unwilling to purchase gas for its own supply for any more than $8. Ex. A-90C, ICE-Energy_Transfer000011. And the cost basis Energy Transfer assigned to the gas it withdrew from storage to sell remained $3. Ex. A-96, ETP_000012086.

Because the totality of the circumstances demonstrate that the prices Energy Transfer charged CPS Energy on February 18, like the prices Energy Transfer charged throughout the storm, were unconscionable, the Court should deny Energy Transfer's motion for summary judgment with respect to the following February 18 transactions:

Transaction No.	**Seller**	**Trade Date & Time**	**Sale Point**	**Price (Note: All fixed price deals)**	**Quantity + Flow Date(s)**
CPSE# 62454	Oasis	Feb. 18 9:50 AM Oasis North Gate	1483 Oasis North Gate Delivered	$75	75,000 (Feb. 19)

2. The prices Energy Transfer charged CPS Energy during the storm bore no reasonable relationship to their supply costs.

The prices Energy Transfer charged CPS Energy are all the more outrageous given the enormous profit it knew it was making throughout the disaster. In price unconscionability cases, courts across the country have consistently held that the degree to which a seller profits from a given price is relevant to whether that price is unconscionable or excessive. *See California Grocers Assn.*, 27 Cal. Rptr. 2d at 403; *Frostifresh*, 281 N.Y.S.2d at 965; *Moran*, 208 Cal. Rptr. at 316; *Jones*, 59 Misc.2d at 191-192. To that end, courts look to the relationship between the prices a party charged and its supply costs. *See id.* Here, the prices Energy Transfer charged during Winter Storm Uri bore no reasonable relationship to its supply costs. For example, as previously discussed, Energy Transfer's commercial development team sourced low-cost gas—in the single digits— from Louisiana producers for Energy Transfer's own weekend supply. Energy Transfer also [redacted] Yet, it demanded prices as high as $500 from CPS Energy. Ex. A-70, CPSE-MDL_00009514 at 9523-9524; Ex. A-71, ETP_000000229; ETP_000000230.

Moreover, Energy Transfer knew—and celebrated—these outrageous profits throughout the disaster. *See supra* at Part A.1.iv. Energy Transfer's exorbitant profits combine with several other factors militating in favor of unconscionability, including CPS Energy's inability to bargain; its lack of alternatives; the context of a once in a generation storm; Energy Transfer's dominant role as a seller of natural gas in many Texas market areas, especially the Houston Ship Channel and Katy, and its corresponding ability to influence if not outright control the index price; Energy Transfer's sharp business practices—including its refusal to wiggle on price, its practice of bidding up prices on ICE before offering gas to CPS Energy, and the many actions it took to capitalize on CPS Energy's desperation to extract excessively high prices. At a minimum, the commercial circumstances that existed during Winter Storm Uri are sufficient to raise a fact issue on CPS Energy's unconscionability defense and summary judgment is therefore improper.

3. Sophisticated entities are not precluded from asserting the affirmative defense of unconscionability.

Unable to contest these facts, Energy Transfer baldly asserts, with no citation, that the Court can ignore them because "[i]n Texas, the affirmative defense of unconscionability is not available to large sophisticated entities in commercial transactions." ET Mot. Summ. J. at 23. Energy Transfer urges that because CPS Energy is "a sophisticated business entity," that "sophistication rules out procedural unconscionability," the Court should "end its inquiry here." *Id.* at 23-24. There is no such rule.

Unconscionability requires a fact-intensive inquiry into the circumstances at the time of contracting. A party's level of sophistication, while potentially probative of various factors, is not dispositive—indeed, no single factor is dispositive because under Texas law, the unconscionability analysis considers "the totality of the circumstances." *Delfingen US-Texas*, 407 S.W.3d at 801; *Besteman*, 272 S.W.3d at 787–88 ("Unconscionability must be determined on a case-by-case basis in light of a variety of factors."). There are no Texas cases indicating that a party's sophistication renders all other considerations immaterial, including the entire commercial atmosphere surrounding the challenged transactions.[16] Likewise, testimony that a party is unsophisticated does not, in the absence of other factors, establish unconscionability. *See, e.g.*, *Brackenridge Healthcare, Inc. v. Camero*, No. 04-22-00271-CV, 2023 WL 3107064, at *5 (Tex. App.—San Antonio Apr. 27, 2023, no pet.). A party's level of sophistication is not dispositive either way.

[16] Indeed, even when courts in Texas have concluded that a contract between two sophisticated entities is not unconscionable, the court's analysis did not begin and end with a party's level of sophistication. Courts in Texas, like those across the country, assess unconscionability in light of all the commercial circumstances existing at the time of contracting. *See, e.g.*, *Transamerican Leasing Co. v. Three Bears, Inc.*, 586 S.W.2d 472, 478 (Tex. 1979) (expressly considering factors such as whether the terms of the contract were "harsh" or "oppressive" and whether the party challenging the contract was in an unfair bargaining position in case involving two corporations); *Franz Chem. Corp. v. Philadelphia Quartz Co.*, 594 F.2d 146, 149–50 (5th Cir. 1979) (explaining that although the corporation was sophisticated, the corporation had the right under the UCC "to present evidence regarding the totality of circumstances surrounding the negotiation and execution [of the agreement] in order to assist the court in making its [unconscionability] determination").

Energy Transfer's proposed rule also altogether ignores that unconscionability is a defense *in the UCC*, which undoubtedly applies to sophisticated commercial entities. TEX. BUS. & COM. CODE § 2.302. "[S]ection 2.302 of the Business and Commerce Code does not limit its protections to only those involved in personal, as opposed to commercial, transactions." *El Paso Nat. Gas Co.*, 964 S.W.2d at 62. Indeed, the UCC also requires that parties be afforded "a reasonable opportunity to present evidence as to [a contract's] commercial setting, purpose and effect" to aid the court in evaluating the defense. TEX. BUS. & COMM. CODE § 2.302(b). "[T]he legislature did not intend to *ipso facto* exclude commercial transactions from the realm of unconscionability." *El Paso Nat. Gas Co.*, 964 S.W.2d at 62. And neither Energy Transfer nor this Court is "in a position to do that which the legislature has not done." *Id.*

Energy Transfer's cases do nothing more than demonstrate that the parties' relative sophistication is one among many factors in the totality of the circumstances analysis. ET Mot. Summ. J. at 23-24 (citing *Lost Maples Gen. Store, LLC v. Ascentium Cap.*, LLC, No. 14-18-00215-CV, 2019 WL 1966671 (Tex. App.—May 2, 2019, no pet.) For instance, in *Lost Maples*, the court's unconscionability analysis did not stop because the challenging party was sophisticated. The court considered whether the challenging party "was afforded ample time to review [the contract's terms] and seek legal counsel before signing them," whether the party had "negotiated [the contract's] terms" and evidence indicating that the challenging party had "considered the option of paying cash for the ice machine and walking away from the financing offer altogether." 2019 WL 1966671 at *6. As required by both case law and statute, the court considered the totality of the commercial circumstances surrounding the challenged transaction and all of plaintiff's evidence before rendering its decision about whether the agreement was unconscionable. *Venture Cotton Co-op.*, 435 S.W.3d at 228; TEX. BUS. & COMM. CODE § 2.302(b).

As for Energy Transfer's assertion that courts across the country have held it a "foundational principle" that sophisticated entities cannot assert an unconscionability defense, that is plainly untrue. Many courts, including in Texas, have applied the UCC's unconscionability framework to sophisticated commercial entities. *See, e.g.*, *Industralease Automated & Sci. Equip. Corp. v. R.M.E. Enterpris-*

es, Inc., 58 A.D.2d 482, 490, 396 N.Y.S.2d 427, 432 (1977) (applying the UCC and concluding that a disclaimer of warranties provision in a contract between two corporations involving industrial equipment was unconscionable because the industrial equipment never operated); *Transamerican Leasing Co. v. Three Bears, Inc.*, 586 S.W.2d 472, 478 (Tex. 1979) (analyzing unconscionability under the UCC in case involving two corporations with no mention of the challenging party's sophistication in its analysis).

In each of these cases cited by Energy Transfer, *see* ET Mot. Summ. J. at 23, the court does not dispense with its unconscionability analysis upon a determination that the challenging party is sophisticated but rather considered the party's sophistication as one of many factors in unconscionability's totality of the circumstances analysis. Indeed, in *Morrison v. Amway*, the court makes that requirement explicit, explaining that unconscionability "has no precise legal definition because it is not a concept but a determination to be made *in light of a variety of factors*" and "no single test exists to determine if a contract is unconscionable." 49 F. Supp. 2d 529, 533-544 (S.D. Tex. 1998) (emphasis added). In *United Teacher's Assocs. Ins. Co. v. MacKeen & Bailey, Inc.,* the court concluded the agreement was not unconscionable because the evidence demonstrated, among other things that the agreement was drafted by counsel, that the agreement provided consideration, and the parties were aware of the risk of conflicting interests. 847 F. Supp. 521, 540 n. 28 (W.D. Tex. 1994), *aff'd in part, rev'd in part sub nom United Tchrs. Assocs. Ins. Co. v. MacKeen & Bailey*, 99 F.3d 645 (5th Cir. 1996). In *NML Cap. v. Republic of Argentina,* 621 F.3d 230 (2d Cir. 2010) and *BBVA Compass Inv. Sols, Inc. v. Brooks,* 456 S.W.3d 711, 715 (Tex. App.—Fort Worth 2015, no pet.), the party's unconscionability claim failed because it rested in part on the occurrence of unfavorable *subsequent events* and a lack of evidence of oppressive conduct *at the time* the agreement was signed. *NML Cap.,* 621 F.3d 230, 237 (Argentina's later financial crisis caused the interest rate at issue in the contract to spike and there was no indication of a lack of meaningful choice or alternatives at the time of drafting; indeed Argentina drafted the very interest rate provision it was challenging); *BBVA Compass Inv. Sols*, 456 S.W.3d at 715 (BBVA Compass's transfer of all of plaintiffs' money into somebody else's account occurred long after plaintiffs signed a brokerage agreement containing the challenged arbitration agreement). And in

SOL Grp. Mktg. Co. v. Lines, No. 14-CV-9929 (SHS), 2016 WL 205444 (S.D.N.Y. Jan. 15, 2016), the court examined evidence demonstrating that the challenging party was "able to negotiate both a VIP rate and an amendment to the contract" and noted the lack of evidence that APL was Sol's only option, *id.* at *7. None of these cases hinged on a party's sophistication alone.

Moreover, in each of these cases, the party challenging the agreement simply failed to provide the kind of evidence CPS Energy has provided here. For instance, in *Morrison*, the court did not throw out the party's unconscionability defense because it was relatively sophisticated; rather, the court concluded the contract at issue was not unconscionable because the party challenging the agreement presented "no evidence" of "overreaching or sharp practices" and no evidence the agreement was "unfair or oppressive." 49 F. Supp. 2d at 534. Likewise, in *BBVA Compass Inv. Sols*, the record contained "no specific evidence" that the plaintiffs would "actually be charged excessive arbitration fees" and there was "no legally sufficient evidence that such fees prevent the [plaintiffs] from effectively pursuing their claim in the arbitral forum." 456 S.W.3d at 724. CPS Energy, by contrast, has presented substantial evidence that it lacked alternatives, had no bargaining ability, and it has demonstrated that Energy Transfer deployed sharp business practices to profit off a declared disaster to.[17] *See supra* at Part III.

Energy Transfer asks the Court to invent a rule without basis in case law or statute. The Court should decline the invitation and see the request for what it is: another attempt by Energy Transfer to avoid the fact-intensive inquiry the unconscionability doctrine requires.

4. Energy Transfer's sideshow arguments are unavailing.

At various points in its motion, Energy Transfer insists that CPS Energy had alternatives to purchasing gas from Energy Transfer at exorbitant prices. Energy Transfer, however, fails to identify a single supplier besides Energy Transfer that was able to sell CPS Energy the volumes it needed at

[17] Importantly, none of the cases Energy Transfer cites involved exorbitant price terms demanded during a declared disaster and the attendant public policy concerns associated with price gouging in times of an emergency. *Venture Cotton Co-op.*, 435 S.W.3d at 228 (explaining that unconscionability considers "public-policy concerns, and the agreement's oppressive or shocking nature").

the locations where it needed it during Winter Storm Uri. CPS Energy has explained why, for each day of the storm, Energy Transfer was CPS Energy's only option. Against that backdrop, Energy Transfer cannot establish as a matter of law that CPS Energy had other alternatives *at the time of contracting. See* TEX. BUS. & COM. CODE § 2.302 (limiting the lens of analysis to the commercial circumstances existing "at the time [the contract] was made").

Unable to identify the existence of actual available alternatives *during the storm*, Energy Transfer next points to supposed options CPS Energy should have pursued *before the storm even started.* These include:

- Purchasing baseload gas;
- Making additional financial hedges;
- Maintaining additional gas in storage which could have been used during Winter Storm Uri; and
- Relying on or storing additional natural gas alternatives, like fuel oil.

See ET Mot. Summ. J. at 2, 4, 25-27. Even if Energy Transfer's proposed "alternatives" were relevant, CPS Energy has adduced sufficient evidence to raise a genuine issue of material fact that these options were not available to CPS Energy or were not feasible in light of Winter Storm Uri. Energy Transfer's related arguments that CPS Energy deliberately chose a "risk profile" that exposed it to spot prices and somehow excuses Energy Transfer's unconscionable prices and that CPS Energy had a so-called "plan" to profit off high gas prices are also red herrings.

a. Energy Transfer's so-called alternatives are not relevant.

As noted above, because the unconscionability defense requires a court to assess the totality of the circumstances as they existed at the time of contracting, Energy Transfer's purported alternatives are not relevant. *See* TEX. BUS. & COM. CODE § 2.302(a); *Delfingen US-Texas,* 407 S.W.3d at 798; *Venture Cotton Co-op.,* 435 S.W.3d at 228. Here, because of the nature of the NAESB, the trial court must look at the particular circumstances when the natural gas transactions at issue were executed

between CPS Energy and Energy Transfer – that is, during Winter Storm Uri. That timing is important. Energy Transfer seems to concede as much at one point in its motion.[18]

Elsewhere, however, Energy Transfer wants this Court to examine hypothetical actions that CPS Energy could have taken in the months before Winter Storm Uri to allegedly better prepare for Winter Storm Uri. Those actions are simply not relevant to the unconscionability determination because none of them were alternatives available to CPS Energy *at the time* the disputed gas transactions occurred.

As Energy Transfer's own expert concedes, none of these so-called "alternatives" are relevant to the Court's unconscionability determination. Energy Transfer's expert, Michael De Laval, admits that CPS Energy's pre-Winter Storm Uri gas purchasing and hedging strategies were a "separate issue" from the question of whether the prices Energy Transfer ultimately charged were excessive. When asked how his review of CPS Energy's gas purchasing strategies for baseload versus swing gas would help the fact-finder determine whether Energy Transfer's prices were excessive, De Laval explained that "[r]egarding the individual prices, I think that's a separate issue." (Ex. A-174, De Laval Dep. 140:3–14.) De Laval then conceded on follow-up questioning that CPS Energy's gas purchasing strategy does not "go toward" the determination of whether a price is excessive because that is a separate issue:

> **Q.** But these specific opinions about their risk strategy don't go toward the determination of whether a price is excessive or not. Right? That's separate?
>
> **A.** That's separate. Correct.

(*Id.* at 140:15–19.)

[18] *See* ET Mot Summ. J. at 27 (quoting *In re Palm Harbor Homes, Inc.*, 195 S.W.3d 672, 678 (Tex. 2006) ("The test for substantive unconscionability is whether, "given the parties' general commercial background and the commercial needs of the particular trade or case, the clause involved is so one-sided that it is unconscionable ***under the circumstances existing when the parties made the contract***.").)

De Laval also admitted that his opinions concerning CPS Energy's hedging strategies would not help the fact-finder determine whether the prices charged by Energy Transfer were excessive, which is the exact question the fact-finder will be asked to resolve:

> **Q.** So I have the same question about what we were discussing with hedging. So how would your opinion with respect to CPS Energy's inter-month hedging strategy help the fact-finder to determine whether the prices Energy Transfer charged were excessive? . . .
>
> **A.** The absolute price, if they were just looking at the price of the transaction to the fact-finder to say if it's excessive or not, it wouldn't.

Ex. A-174, De Laval Dep. 214:5–14.

Even if the Court ventured beyond the permissible, contemporaneous lens of the unconscionability analysis to examine Energy Transfer's proposed alternatives, those proposed alternatives assume the benefit of hindsight. While Energy Transfer concedes that Winter Storm Uri had "no recent precedent," CPS Energy's weather expert, Jeffrey Basara—whom Energy Transfer has not challenged in this case—has testified that Winter Storm Uri was "unprecedented in the climatological record when you consider the combined attributes of its intensity, duration, and precipitation accumulation" and the likelihood of an event like Winter Storm Uri occurring was 1 in over 300,000 years. Ex. A-175, Basara Dep. 24:13-24. CPS Energy could not have taken steps to prepare for what would be an unprecedented event, and this Court should reject Energy Transfer's blame-game. Because all of Energy Transfer's proposed alternatives assume CPS Energy could have predicted Winter Storm Uri and its impact, the Court should reject all of them. Further, as detailed below, there are genuine issues of material fact as to whether these alternatives were available to CPS Energy or feasible.

Baseload gas. In its motion, Energy Transfer asserts that CPS Energy could have "[p]urchased additional baseload gas each month, making it less reliant on spot market prices." ET Mot. Summ. J. at 26. There is no dispute between the parties that CPS Energy could only buy baseload gas for February 2021 during "bid week" in January, long before forecasts ever predicted a storm of Winter Storm Uri's magnitude. Ex. A-37, CPS Corp Rep. Dep. 287:21-288:6. Weather

forecasts during bid week predicted a mild February. Ex. A-175, Basara Dep 42:21-25. Baseload gas is "the minimum amount of usage you can expect in a month." Ex. A-8, Bayazitoglu Dep. 86:20-22. Historically, CPS Energy has its lowest average daily gas consumption in February. So, based on its assessment of historical weather forecasts and its historical demand in a typical February, as even Energy Transfer's expert concedes is the correct approach, CPS Energy purchased a similar amount of baseload gas for February 2021 that it had purchased for the previous five Februaries. Ex. A-8, Bayazitoglu Dep. 78:10-12; Ex. A-174, De Laval Dep. 80:25-81:3. CPS Energy could "not know the kind of consumption month the coming February would be, and the market consensus did not suggest that February was going to be a cold or an above-average month." Ex. A-8, Bayazitoglu Dep. 86:13-17. Energy Transfer can point to no information available to CPS Energy during bidweek in January 2021 that should have signaled to CPS Energy that it needed to depart from what it had done for the past five Februaries.

Because the evidence shows that no one had any indication how bad the storm was going to be during bid week in January, buying additional baseload gas was not a reasonable alternative. *See* Ex. A-175, Basara Dep. 25:22-26:13 (explaining that the Winter Storm Uri forecast was not actionable until February 11, 2021, just days before the storm). And, as De Laval states, even if CPS Energy had additional baseload agreements in place, there is no guarantee that CPS Energy would have received that gas during the storm. Ex. A-174, De Laval Dep. 154:21-155:8 (**Q.** "So setting aside Energy Transfer specific, if CPS Energy had purchased more baseload gas in January 2021, would it have been guaranteed to flow during Winter Storm Uri? **A.** Of course not. But neither would daily gas.").[19]

Moreover, as it does throughout its motion, Energy Transfer refuses to engage with specifics. It asserts that CPS Energy could have "[p]urchased additional baseload gas," but it does not bother to explain how much more or whether a counterparty was interested in selling CPS Energy

[19] CPS Energy has moved to exclude De Laval's opinions and uses his statements here only to demonstrate that no competent evidence exists to support Energy Transfer's argument that reasonable alternatives exist.

that unspecified volume. Energy Transfer concedes that it would be unreasonable for a municipal utility like CPS Energy to meet its full demand requirements through baseload gas. Ex. A-174, De Laval Dep. at 80: 20-22 (**Q.** "So is it your opinion that CPS Energy should meet its full demand requirements through baseload gas?" **A.** Absolutely not.") And, as previously discussed, CPS Energy had to buy delivered gas from Energy Transfer at Karnes, Rio Nogales, and Oasis Northgate because no other counterparty could sell them delivered gas at those points on CPS Energy's system. Ex. B, Bordovsky Aff. ¶¶ 8–11. There is therefore simply no evidence to suggest that had CPS Energy purchased some unspecified increased volume of gas through baseload contracts that it could have avoided Energy Transfer's predatory spot market pricing.

Hedging. As for hedging, Energy Transfer contends that CPS Energy should have "[p]urchased additional financial hedges to protect itself from daily price risk." ET Mot. Summ. J. 26. Setting aside the absurdity of Energy Transfer's insistence that it was somehow CPS Energy's responsibility to protect itself from Energy Transfer's predatory conduct, the only competent evidence that Energy Transfer relies on for this point are two deposition excerpts referencing a BALMO – "balance of the month trade" – at $9 per MMBtu. But as CPS Energy has argued elsewhere, there is no indication that this hypothetical trade was even available to CPS Energy. *See* CPS Energy Mot. to Exclude De Laval at 9; *see also* Ex. A-8, Bayazitoglu Dep. 100:24-101:102:3 (identifying several factors why CPS Energy could not transact this "hypothetical BALMO trade"). Even if Energy Transfer had evidence that such a trade was available, CPS Energy could not have executed that trade under its policies for a host of reasons, including that CPS Energy's risk management policies—vetted by third-party consultant, Siemens—did not contemplate that type of trade, the trade would have exceeded set maximum volume limits, and CPS Energy's risk management policy, by design, does not allow for knee-jerk changes to its hedging strategy to prevent rogue decision making and to protect the public. Ex. A-8, Bayazitoglu Dep. 100:2-14; 101:6-102:3. Moreover, the historical data available to CPS Energy at the time would have indicated that entering into that hypothetical trade would have been foolish because historically, when there has been a price spike in the Houston Ship Channel market, prices have fallen within a day or two. *Id.* at 102:1-3. Nobody knew on Febru-

ary 11 how long Winter Storm Uri would last. Locking in a $9 BALMO price only to have prices subsequently return to $2 would have carried enormous hedging losses for CPS Energy, and its hedging policies are designed to prevent just that kind of risk taking. *Id.* Ultimately, Energy Transfer contends CPS Energy should have purchased a financial product to protect itself from Energy Transfer's price gouging that it has no evidence to suggest was even available, much less allowed under CPS Energy's risk management program. The Court should reject this argument.

Storage Gas. Next, Energy Transfer claims that CPS Energy could have purchased "additional storage contacts to both store additional gas at a lower cost and the ability to withdraw higher volumes each day." ET Mot. Summ. J. at 26. Energy Transfer points to no evidence outlining the terms of these hypothetical contracts or identifies with whom CPS Energy could have contracted to obtain additional storage. Energy Transfer also ignores the risks associated with CPS Energy purchasing natural gas and storing it for later use, the costs associated with obtaining and storing that gas, or the injection and withdrawal limits in these hypothetical storage contracts. The storage contract CPS Energy had with HPL, for instance, limited CPS Energy's daily storage withdrawals to 40,000 MMBTu—and CPS Energy maxed out its storage withdrawals for every day of the storm. [redacted]. Accordingly, there is no evidence to suggest that a hypothetical storage contract, for an unspecified storage volume, with an unidentified counterparty would have ensured that CPS Energy could have withdrawn sufficient gas from storage to avoid Energy Transfer's predatory pricing—much less that the gas would have shown up to the points on CPS Energy's system where it needed it.

Reliance on Additional National Gas Alternatives. Finally, Energy claims that CPS Energy should have used different alternatives to natural gas to avoid the excessive prices charged by Energy Transfer. This is equivalent to a gas station that is accused of price-gouging customers during a disaster arguing that customers should be driving Teslas instead of gas-powered vehicles. The Court should reject this argument.

Thus, even if these pre-storm alternatives were relevant—and they are not—CPS has certainly produced sufficient evidence to raise a genuine issue of material fact as to whether these alternatives were available to CPS Energy or were even feasible.

Energy Transfer is also wrong on the law. Energy Transfer claims that CPS Energy, as the party challenging the contract "must produce evidence that it unsuccessfully attempted to make use of alternatives" and cites a federal case, *Am. Stone Diamond, Inc. v. Lloyd's of London*, 934 F. Supp. 839, 845 (S.D. Tex. 1996), in support of that proposition. But *American Stone Diamond* says nothing of the sort. Instead, the availability of reasonable alternatives is simply one factor—among many—that is part of the highly-specific factual inquiry that the court must undertake to determine whether a contract is unconscionable or not. *Venture Cotton Co-op.,* 435 S.W.3d at 228. And *American Stone Diamond* is distinguishable on its facts. In that case, an insurance coverage dispute, the Houston federal court determined that the plaintiff, the insured, had failed to produce any evidence of any "lack of choice" because the only evidence it submitted was a single affidavit that did not explain whether the insured's agent could have used self-insurance, negotiated with the insurance carrier differently, or negotiated with other insurers. *Am. Stone Diamond*, 934 F. Supp. at 845. Here, by contrast, CPS Energy has produced evidence that it had no choice but to purchase natural gas from Energy Transfer and Energy Transfer has pointed to no evidence suggesting that CPS Energy could have purchased the volumes it purchased from Energy Transfer from another counterparty, or that another counterparty had the ability to get the gas to various delivery points on CPS Energy's system.

Energy Transfer also claims that courts broadly construe a "reasonable alternative" and that parties can arrange "viable alternatives" months beforehand. ET Mot. Summ. J. at 25. But the case it cites for the proposition, *Am. Emps. Ins.' Co. v. Aiken*, 942 S.W.2d 156, 161-162 (Tex. App.—Fort Worth 1997), is distinguishable. In that case, which involved an agent suing an insurer for termination of an agency agreement, the insurer filed a motion to compel arbitration, and the agent claimed that the arbitration provision was unconscionable. The court determined that there were reasonable alternatives in terms of different insurance companies that the agent could have signed with; there was no discussion that those reasonable alternatives included other actions that the agent could take

internally – like hedging differently, adding storage capacity, or purchasing baseload gas. In short, the reasonable alternatives must be tied to the specific unconscionable act.

b. Energy Transfer's risk-allocation argument is a red herring.

At various points in its motion, Energy Transfer claims that CPS Energy adopted a "risk profile" that exposed it to higher prices in the spot market. *See, e.g.,* ET Mot. Summ. J. at 27. Energy Transfer further contends that because CPS Energy allocated risk to the spot market, that somehow excuses the excessive prices charged by Energy Transfer during the storm because the "freedom to contract includes the freedom to allocate risk." ET Mot. Summ. J. at 15. Energy Transfer seeks to craft another exception to the unconscionability doctrine in Texas that does not exist.

First, because the unconscionability defense requires a court to assess the totality of the circumstances as they existed at the time of contracting, TEX. BUS. & COM. CODE § 2.302(a); *Delfingen US-Texas, L.P.*, 407 S.W.3d at 798, CPS Energy's actions before Winter Storm Uri have no bearing on whether the prices charged by Energy Transfer during the storm were excessive.

Second, and more fundamentally, there is no indication that CPS Energy allocated risk as part of its contract with Energy Transfer. Each of the cases Energy Transfer cites involves the allocation of risk between bilateral parties within the four corners of a contract. In *Lost Maples General Store*, for example, a general store purchased an ice machine, and to finance that purchase, entered into a separate agreement with the financer that explicitly "allocated to [the general store] the risk that [the ice machine seller] would fail to perform" by requiring the general store to "begin making immediate payments" to the financer even before the ice machine was delivered. 2019 WL 1966671 at *1. When the ice machine was never delivered, the general store sued the financer. The court ruled against the general store, finding that *the contract itself* contained an allocation of risk provision and "there is nothing unconscionable or against public policy by allowing sophisticated parties to allocate risks as they see fit." *Id.* at *7. Similarly, in *El Paso Field Servs., L.P. v. MasTec N. Am., Inc.*, the construction contract had explicit "risk-allocation provisions" that related to due diligence and that "constitute[d] the allocation by market participants of risks and benefits regarding the pipeline's

construction." 389 S.W.3d 802, 803 (Tex. 2012) (cleaned up). And in *Gym-N-I Playgrounds, Inc. v. Snider*, the commercial lease agreement at issue contained a risk allocation provision by which the commercial tenant leased the property "as is," and assumed the risk of a fire that eventually destroyed the property. 220 S.W.3d 905, 912-913 (Tex. 2007).

Here, by contrast, there is no such risk allocation provision in the NAESB contract between Energy Transfer and CPS Energy. Energy Transfer does not point to any such provision. Instead, the facts show that CPS Energy was compelled to purchase gas from Energy Transfer at the prices Energy Transfer charged. Unlike the contracts at issue in *Lost Maples*, *El Paso Field Services*, and *Gym-N-I Playgrounds*, the NAESB agreement at issue between Energy Transfer and CPS Energy is a form contract; the terms of individual transactions, including the price, quantity, delivery term and delivery point, are memorialized in separate Transaction Confirmations. As a result, CPS Energy could not negotiate or allocate a way to offload the risk of high spot market prices charged by Energy Transfer. Regardless, that CPS Energy could have hedged more, bought more storage capacity, or used fuel oil is simply irrelevant to the risk allocation as *between* CPS Energy and Energy Transfer. The Court should reject Energy Transfer's misguided attempt to craft an exception to the unconscionability doctrine based on risk allocation.

c. CPS Energy did not purchase gas during Winter Storm Uri "with a clear plan to profit."

Energy Transfer next contends that the predatory prices it charged CPS Energy were not unconscionable because CPS Energy bought gas from Energy Transfer "with a clear plan to profit from the subsequent sale of expensive electricity." ET Mot. Summ. J. at 35. According to Energy Transfer, CPS Energy benefited from the exorbitant prices it charged because CPS Energy could burn that "expensive gas" and generate electricity that it could then sell on the wholesale power market for $9,000/MWh. ET Mot. Summ J. at 37. This is nonsensical for several reasons.

First, as Energy Transfer well knows, CPS Energy is neither a for-profit power generator nor a "power generation compan[y]," much as Energy Transfer would have it otherwise. ET Mot.

Summ. J. at 35. CPS Energy is a municipal utility. Municipally-owned utilities are public, government-owned utilities that are owned not by shareholders but by the communities that they serve. CPS Energy does not strive to make a profit, but strives only to serve its customers through the efficient delivery of critical services, including electricity and natural gas on demand. Therefore, CPS Energy buys gas for two purposes, neither of which is profit: (1) for direct distribution to homes and business and (2) for fuel to generate electricity, which is in turn provided to homes and businesses. Any argument about profiting off electricity generation ignores that CPS Energy purchases gas to generate electricity *and for direct distribution to homes and businesses*.

Nevertheless, Energy Transfer, in an effort to distract from its own shocking business practices, declares that CPS Energy bought gas during Winter Storm Uri as part of some "clear plan to profit from the subsequent sale of expensive electricity." ET Mot. Summ. J. at 35. But, the only party that had a grand plan to profit off the statewide disaster was Energy Transfer. [redacted] *see also* [redacted].

Energy Transfer also argues that CPS Energy should be grateful for the predatory prices Energy Transfer charged because that gas "allowed CPS [Energy] to keep its power plants . . . up and running." ET. Mot. Summ. J. at 36. As a preliminary matter, keeping its power plants "up and running" during the storm was not a "benefit" Energy Transfer bestowed on CPS Energy. During Winter Storm Uri, the electrical grid came within 4 minutes and 37 seconds of total collapse; it was not an option for CPS Energy to not run its power plants—it had to provide electricity to its customers and play its part in maintaining the integrity of the electrical grid. Moreover, Energy Transfer's own actions severely limited CPS Energy's ability to run its power plants at full capacity. On February 15, Energy Transfer demanded $300 for any overpulled volumes at Rio Nogales, causing CPS Energy to derate the plant. Ex. A-44, CPSE-MDL_000009514 at 9519. Later, Energy Transfer states that "had [CPS Energy's] powerplants been able to run at capacity throughout the storm," it could have generated and sold more power to the ERCOT grid and made out like Austin Energy. ET Mot. Summ. J. at 37. Again, Energy Transfer ignores that CPS Energy, unlike Austin Energy,

buys gas for direct distribution. Ex. A-178, Gold-Williams Dep. 83:16-19. None of that distribution gas is used to generate power, much less to generate power to then sell to the ERCOT market.

Energy Transfer insists that because ERCOT raised the price of electricity to the regulatory cap to avoid a statewide blackout, the prices Energy Transfer extracted from CPS Energy's desperation for gas were excusable. ET Mot. Summ. J. at 37. But as Merritt explained, [redacted] Moreover, ERCOT did not raise the price of electricity to $9,000 until Monday, February 15. At a bare minimum, none of the exorbitant prices Energy Transfer charged during Winter Storm Uri on February 12 for weekend gas have any relevance to the $9,000 cap imposed on February 15.[20]

B. The prices Energy Transfer charged during Winter Storm Uri are unenforceable because they violate Texas public policy.

Independent of unconscionability, the prices Energy Transfer charged CPS Energy are unenforceable for a separate reason: they violate Texas public policy against taking advantage of a declared disaster by charging exorbitant or excessive prices for necessities. The freedom to contract is "not limitless." *Progressive Cnty. Mut. Ins. Co. v. Caltzonsing*, 658 S.W.3d 384, 397 (Tex. App.—Corpus-Christi-Edinburg 2022, no pet.); *Johnson v. Structured Asset Servs., LLC*, 148 S.W.3d 711, 726 (Tex. App.—Dallas 2004, no pet.) ("Contracts are subject to the public policy of the State."). Instead, it is "well established that courts may refuse to enforce contracts that are either expressly or impliedly prohibited by statute or by public policy." *In re Lee*, 411 S.W.3d 445, 464 n. 9 (Tex. 2013). In examining an agreement to determine if it is contrary to public policy, courts "look to whether the agreement has a tendency to injure the public good. A state's public policy is embodied in its constitution, statutes, and the decisions of its courts." *Johnson*, 148 S.W.3d at 726–27 (cleaned up).

[20] Furthermore, at least one Court of Appeal has determined that the PUCT overstepped its authority when it enacted the $9,000 cap. *Luminant Energy Co. LLC v. Pub. Util. Comm'n of Texas*, 665 S.W.3d 166, 192 (Tex. App.—Austin, 2023), *review granted* (Sept. 29, 2023), *review dismissed* (Dec. 1, 2023).

For decades, Texas has statutorily declared that price gouging during a declared disaster is unlawful in the DTPA. TEX. BUS. & COM. CODE § 17.46(a), (b)(27). Energy Transfer asks this Court to ignore that declaration of illegality because the excessive prices Energy Transfer charged CPS Energy total more than $500,000 and, thus, cannot form the basis of a private cause of action under the DTPA. *See id.* § 17.49(g).[21] But CPS Energy is not asserting a private cause of action under the DTPA and there is no authority for the proposition that Texas's public policy against price gouging is limited to such a private right of action.

1. Exemptions to a DTPA private cause of action do not alter Texas's public policy against price gouging.

Energy Transfer appears to concede that the Texas Legislature has declared price gouging during a declared disaster unlawful. Under Section 17.46(b)(27) of the DTPA, it is unlawful to take advantage of a declared disaster by selling fuel (i.e., natural gas) at an exorbitant or excessive price. And as explained above, Energy Transfer charged CPS Energy a more than 15,000% increase for natural gas during a state declared disaster. This amount significantly passes the threshold that has prompted the Attorney General to pursue price gouging claims under the DTPA before.[22] What En-

[21] Energy Transfer also contends that CPS Energy is not a "consumer" under the DTPA because CPS Energy has assets of $25 million or more and, thus, is a "business consumer." *See* ET Mot. Summ. J. at 40 (citing TEX. BUS. & COM. CODE § 17.45(4)). This is wrong. The DTPA defines *consumer* to include "an individual, partnership, corporation, this state, or a subdivision or agency of this state," but the definition excludes "a business consumer that has assets of $25 million or more." TEX. BUS. & COM. CODE § 17.45(4). Importantly, however, the DTPA makes clear that *business consumer* "does not include…a subdivision or agency of this state." *Id.* 17.45(10). Municipalities are subdivisions of the state, *Ass'n of Sch. Boards Risk Mgmt. Fund v. Benavides Indep. Sch. Dist.*, 221 S.W.3d 732, 734 (Tex. App.—San Antonio 2007, no pet.), and "CPS Energy is treated as a municipality," *Wheelabrator Air Pollution Control, Inc. v. City of San Antonio*, 489 S.W.3d 448, 450 n.1 (Tex. 2016). As such, CPS Energy cannot be a "business consumer" and is therefore a consumer under the DTPA.

[22] *See, e.g.,* Ex. A-179, *In the Matter of State of Texas and Thaman Enterprise, LLC d/b/a Caddo Stop*, No. D-1-GN-18-002665, Travis County (2018) (prosecuting 125% increase in the price of gas during Hurricane Harvey as excessive and exorbitant); *State of Texas and CMDM, LLC d/b/a Hans Chevron*, No. D-1-GN-19001827, Travis County (2019) (same); *State of Texas and Lovely Products, LLC*, No. D-1-GN-20-006547, Travis County (2020) (prosecuting 1,000% increase in face masks during Covid-19); *State of Texas v. Gregory Markwardt d/b/a Hotel Corpus Chrisi Bayfront*, Cause No. 2020DCV-0829-A, Nueces County (2021) (fining hotel for increasing price of hotel rooms by 67% during the Harvey State of Disaster); *State of Texas v. Starlight International, Inc. D/B/A/ Roadeway Inn; Hsiang-Ting Huang and Wei-Cheng Kao*, No. 2009-V-0017 Austin County (2009) (following price gouging claims

ergy Transfer instead argues is that CPS Energy's public policy defense does not apply as a matter of law because, according to Energy Transfer, CPS Energy cannot bring a private cause of action under the DTPA.

Energy Transfer's argument is a red herring. CPS Energy is not asserting a cause of action under the DTPA, and Energy Transfer knows it. Rather, CPS Energy asserts as an affirmative defense that the exorbitant prices Energy Transfer charged during Winter Storm Uri violate Texas's public policy against price gouging during a declared disaster. Texas's public policy against price gouging is reflected in the declaration of unlawful conduct in § 17.46 of the DTPA, TEX. BUS. & COM. CODE § 17.46(a), (b). The fact that the Texas legislature subsequently enacted limitations on private rights of action under § 17.50 of the DTPA does not erase or limit the public policy underlying the declaration that price gouging during declared disasters is unlawful.

Indeed, the interests underlying that public policy—protecting Texans from companies and individuals who would use the peril caused by natural disasters as an opportunity to profit—are directly implicated in this case. If the exorbitant and unlawful prices charged by Energy Transfer are allowed to stand, those excessive charges won't be borne by CPS Energy, but by CPS Energy's customers, the very class of Texas consumers the DTPA was intended to protect. Ex. A-7, Kuchinsky Dep. 44:16–45:18. CPS Energy has no shareholders and it pays no dividends. Instead, CPS exists and operates solely for the benefit of its customers. Ex. A-178, Gold-Williams Dep. 26-2-14; *id.* 80:14-24; *id.* 96:8-12. As a result, whenever CPS Energy purchases gas from a gas supplier, it is acting for its customers since the costs of purchasing such gas will be passed through to, and paid for by, those customers. Ex. A-35, Guinn Dep. 12:4-8; Ex. A-178, Gold-Williams Dep. 119:16-20.

2. Price gouging is anathema to Texas public policy.

Texas's public policy against price gouging during natural disasters is also reflected in communications from the Texas Attorney General's Office. The Attorney General's website, for exam-

during Hurricane Ike, the Court permanently restrained respondent from "taking advantage of any declared disaster by demanding or charging a price for lodging or other necessities that exceeds the normal price by more than ten percent (10%)).

ple, declares price gouging during a statewide disaster "illegal," and states that "if a disaster has been declared by the Governor of Texas or the President, and businesses raise the price of their products to exorbitant or excessive rates to take advantage of the disaster declaration, then it is quite likely that price gouging is taking place." Indeed, the Attorney General's office has issued civil investigative demands ("CIDs") for information about natural gas prices during the storm, and has expanded the scope of its investigation into price gouging related to the storm to include the natural gas industry, including issuing CIDs to Energy Transfer and its affiliates. Ex. A-180 (CID to Energy Transfer); Ex. A-181 (CID to Energy Transfer Fuel); Ex. A-182 (CID to Oasis). And Governor Abbott's disaster declaration itself embodied that same policy by suspending "any state statute or administrative rule regarding contracting or procurement [that] would impede any state agency's emergency response that is necessary to protect life or property threatened by this declared disaster." Ex. A-45, Feb. 12, 2021 Gov. Abbott Decl., CPSE-MDL_000062050.

Contracts can also be void as against public policy in the absence of express statutory declaration. "In the absence of expressed direction from the Legislature, whether a promise or agreement will be unenforceable on public policy grounds will be determined by weighing the interest in enforcing agreements versus the public policy interest against such enforcement." *Fairfield Ins. Co. v. Stephens Martin Paving, LP*, 246 S.W.3d 653, 663 (Tex. 2008). To do so, courts consider four factors: "(a) the strength of that policy as manifested by legislation or judicial decisions, (b) the likelihood that a refusal to enforce the term will further that policy, (c) the seriousness of any misconduct involved and the extent to which it was deliberate, and (d) the directness of the connection between that misconduct and the term." RESTATEMENT (SECOND) OF CONTRACTS § 178(3). In weighing the factors set out in the Restatement, it is clear that Energy Transfer's price gouging during the declared disaster does violate public policy. The strength of the public policy of prohibiting price gouging during a declared disaster is manifested by the unambiguous provisions of Section 17.46(b)(27) of the DTPA. Next, this Court's refusal to enforce Energy Transfer's invoices for exorbitant prices during a declared disaster will further the policy of preventing price gouging during a declared disaster. Third, the magnitude of Energy Transfer's price gouging in relation to pre-storm and post-storm

pricing demonstrates the seriousness of Energy Transfer's deliberate price gouging during the declared disaster.

There is also no dispute that the price gouging during the declared disaster had other serious consequences including multiple bankruptcies of power companies, as well as legislative and regulatory actions to allow utilities to securitize to recoup costs and expenses from high natural gas prices. *See, e.g*, Ex. A-5, Perryman Dep. 114:2-115:3; Railroad Commission of Texas, Notice to Gas Utilities, Procedure for Gas Utilities to File an Application for Regulatory Asset Determination Pursuant to H.B. 1520, Texas Utilities Code, chapter 104, subchapter I, and Participate in Securitization of Extraordinary Costs Incurred as a Result of the February 2021 Winter Weather Event, June 2021, available at https://www.rrc.texas.gov/media/ntrb1r1k/nto-re-securitization-061721.pdf. And finally, finding Energy Transfer's price gouging to be unlawful will disincentivize price gouging during future declared disasters. If the Court were to determine that charging 15,000% more for natural gas during a state declared disaster is permissible, then Energy Transfer – or other gas suppliers – will continue to take advantage of consumers—and municipal utilities like CPS Energy—during the next disaster.

Finally, and alternatively, material issues of fact exist with respect to whether Energy Transfer's price gouging is inconsistent with or contrary to the best interests of the public and, therefore, unenforceable as a matter of public policy. If this Court were to find that there is no "express[] direction" from the Texas Legislature, *Fairfield Ins. Co., LP*, 246 S.W.3d at 663, then the trial court must make further factual inquiries, including weighing evidence relating to the effect the enforcement of the transactions at issue will have upon the public good, to determine whether those transactions were "inconsistent with or contrary to the best interest of the public." *Johnson*, 148 S.W.3d at 727. Based upon the summary judgment evidence submitted by CPS Energy, there are clearly material fact issues relating to CPS Energy's affirmative public policy defense that preclude summary judgment in favor of Energy Transfer.

C. Energy Transfer's arguments regarding $38.83 and "short pay" are more misdirection.

As it has done throughout this case, Energy Transfer repeatedly harps on the fact that, once CPS Energy determined that some of the prices it had been charged during Winter Storm Uri were unconscionable or violated public policy (a determination made well after the storm ended), CPS Energy retained an expert to help it determine what to pay in place of those prices. Energy Transfer misrepresents this banal process as evidence of a premeditated scheme to short-pay Energy Transfer and other gas suppliers during Winter Storm Uri and impose a lasting, market-wide "price cap" on natural gas. ET Mot. Summ. J. at 11-14. As an initial matter, Energy Transfer fails to explain why this conspiracy theory is relevant to determining whether they prices Energy Transfer charged CPS Energy during the seven days of Winter Storm Uri are unconscionable or contrary to public policy. And even if it was somehow relevant, Energy Transfer is wrong on the underlying facts, wrong about CPS Energy's legal position, and wrong about the consequences of CPS Energy's payment of a conceded amount.

The NAESB contract that governs the natural gas transactions between CPS Energy and Energy Transfer in this case contains a dispute resolution procedure at Section 7.4 that provides:

> **7.4.** If the invoiced party, in good faith, disputes the amount of any such invoice or any part thereof, such invoiced party will pay such amount as it concedes to be correct; provided, however, if the invoiced party disputes the amount due, it must provide supporting documentation acceptable in industry practice to support the amount paid or disputed without undue delay. In the event the parties are unable to resolve such dispute, either party may pursue any remedy available at law or in equity to enforce its rights pursuant to this Section.

When Energy Transfer and some other suppliers began seeking to collect on the excessive prices for natural gas sold to CPS Energy during the storm, CPS Energy challenged those excessive prices in good faith and used this dispute resolution provision of the NAESB to pay Energy Transfer "such amount as it concedes to be correct." To calculate the conceded amount, CPS Energy did not pull a number out of hat. Nor did it simply pay the prevailing prices before the storm, which were in the range of $3–$4. Instead, it hired Dr. Perryman, an outside economic expert, who performed an economic analysis showing the upper bound of an appropriate price had the natural gas markets been functionally appropriately, which he determined to be $38.83/MMBtu. That amount ultimately became the conceded price under Section 7.4 of the NAESB. CPS Energy provided

"supporting documentation" in the form of a spreadsheet showing the excessive amounts charged by Energy Transfer along with the conceded amount paid by CPS Energy. *See* CPS Energy's 1st Am. Pet., Ex. F. The conceded amount is a "placeholder" until the ultimate factfinder determines the appropriate price for the transactions. Ex. A-37, CPS Energy Corp. Rep. Dep. 61:2-10.

Contrary to Energy Transfer's argument, Dr. Perryman's calculation is not some overarching price cap on the market for natural gas. Dr. Perryman testified that he did not calculate a price cap. Ex. A-5, Perryman Dep. 153:4-12. Instead, his analysis indicates the "outer range of the price of natural gas should have been if the market had functioned properly during the storm" if "people had not opted to take advantage of the situation of a market failure and . . . charged excessive prices[.]" Ex. A-5, Perryman Dep. 165:19-24. Dr. Perryman also made clear that his analysis was limited to "very specific transactions involving CPS [Energy]." *Id.* at 255:8-18.

Energy Transfer also takes issue with the process, arguing that CPS Energy improperly used Section 7.4 of the NAESB, the dispute resolution procedure. To support this argument, Energy Transfer relies on the testimony of Josefa Castrejana, an Energy Transfer employee, for the proposition that Section 7.4 is only used to "resolve disputes about commercial terms that the parties agreed to at the time the transaction was negotiated," that "[t]here is no basis or precedent for using Section 7.4 to dispute a price after it was agreed," and that Dr. Perryman's report cannot qualify as "supporting documentation acceptable in industry practice" sufficient to challenge Energy Transfer's excessive prices under Section 7.4. ET Mot. Summ. J. at 18-19 (citing ET Mot. Summ. J. at Ex. 40). Of course, as revealed by Exhibit 40 itself, Castrejana's testimony was limited to "her experience" and Castrejana admitted that she did not work "usually" with Section 7.4. ET Mot. Summ. J. at Ex. 40, Castrejana Dep. 199:7-20. In any event, as will be set forth in CPS Energy's objections to Energy Transfer's summary judgment evidence, Castrejana's testimony is improper lay opinion testimony that the Court should not consider. But even if it were proper summary judgment evidence, CPS Energy has raised a genuine issue of fact on this issue because there is ample testimony that CPS Energy properly used Section 7.4 to challenge the invoices at issue in this lawsuit. *See, e.g.*, Ex. A. 37,

CPS Energy Corp. Rep. Dep. 60:18-61:10, 65:5-12; Ex. A-168, Almaraz Dep. 101:5-18, 209:24-210:11; Ex. A-5, Perryman Dep. 146:11-23.

Energy Transfer has also attempted to craft a narrative that CPS Energy concocted a plan to short-pay Energy Transfer and other gas suppliers during Winter Storm Uri. Again, this has nothing to do with determining whether Energy Transfer charged CPS Energy prices that are unconscionable or violate public policy. Further, as already explained in CPS Energy's motion for summary judgment on Energy Transfer's fraudulent inducement claim, there is no competent evidence to support Energy Transfer's theory. Two of the documents that Energy Transfer cites to support their theory are "action items" prepared by members of CPS Energy's financial team that list "partial pay all gas suppliers" as potential "options" to retain cash. ET Mot. Summ. J. at Exs. 25-26. And the third document Energy Transfer cites makes clear that "short pay" refers to one of several options in a "draft Financial Action Plan." ET Mot. Summ. J. at Ex. 27 at CPSE-MDL-000053702. Energy Transfer thus relies on speculation and innuendo to support its argument that CPS Energy concocted a plan to buy gas from Energy Transfer without any intent to pay the prices charged. *See Hurlston v. City of Princeton*, 672 Fed. App'x. 335, 341 (5th Cir. 2016) (speculation and innuendo are not competent summary judgment evidence).

Finally, this Court should reject Energy Transfer's argument that any result other than ordering CPS Energy to pay Energy Transfer an additional $250-plus million would "trigger a public policy crisis." Again, CPS Energy is not asking this Court or any other to make any rulings about any gas transactions at any time in any place other than the transactions during Winter Storm Uri in which Energy Transfer and Enterprise took advantage of a natural disaster to extract previously unthinkable prices from CPS Energy. That being the case, there is no likelihood that CPS Energy's payment of a Conceded Amount would "sow chaos in the Texas gas and power markets." ET Mot. Summ. J. at 41. There is certainly no undisputed evidence to support that contention.

D. CPS Energy's declaratory judgment claims survive.

Finally, the Court should reject Energy Transfer's motion for summary judgment on CPS Energy's declaratory judgment claim for three independent reasons.

First, Energy Transfer argues that CPS Energy's declaratory judgment claims fail because its affirmative defense fail. ET Mot. Summ. J. at 42. As described in extensive detail above, just as the evidence demonstrates that CPS Energy's affirmative defenses of unconscionability and public policy survive summary judgment, so should its declaratory judgment claim.

Second, Energy Transfer forgets that CPS Energy is the plaintiff in this matter. Energy Transfer quotes *Headington Royalty, Inc. v. Finley Res., Inc.*, 623 S.W.3d 480, 499 (Tex. App.—Dallas, 2021), aff'd, 672 S.W.3d 332 (Tex. 2023), for the proposition that a party may not have identical affirmative defenses and a declaratory judgment counterclaim, but here, CPS Energy, as the plaintiff, has an affirmative declaratory judgment claim that it filed before Energy Transfer filed its counterclaim. Energy Transfer's case law is inapposite.

Third, CPS Energy's declaratory judgment is substantially different than its affirmative defenses. CPS Energy's declaratory judgment has three parts: (1) that the amounts Energy Transfer charged in excess of the "Unlawful Price Threshold" ($38.83/MMbtu) are "unconscionable and/or violate Texas policy," (2) that it has no liability to Energy Transfer under the NAESB contracts when it paid amounts up to that "Unlawful Price Threshold"; and (3) that CPS Energy complied with the contracts by withholding payment of the "Unlawful Price Amounts" "as permitted by, and in accordance with, the NAESB Dispute Resolution Procedures[.]" CPS Energy's Am. Pet. ¶ 58. This relief is, on its face and in its entirety, substantially different than the affirmative defenses CPS Energy affirmatively pled in response to Energy Transfer's breach of contract counterclaim. For example and as described above, Energy Transfer has failed to present competent evidence that CPS Energy did not comply with the NAESB Dispute Resolution procedures. Accordingly, Energy Transfer's motion for summary judgment on CPS Energy's declaratory judgment claim should be denied.[23]

[23] In a footnote, Energy Transfer asserts that CPS Energy's affirmative defense of unclean hands is "unavailable" because Energy Transfer is seeking only "legal' relief in its breach of contract counterclaim. ET Mot. for Summ. J. at 19 n. 11. While it is not clear that Energy Transfer is expressly mov-

CONCLUSION

For the foregoing reasons, CPS Energy respectfully requests that the Court deny Energy Transfer's Motion for Summary Judgment on its breach of contract claim and award all other relief to which CPS Energy is entitled.

ing for summary judgment on CPS Energy's unclean hands defense, CPS Energy concedes that the unclean hands defense is available only as a defense to requests for equitable relief. Insofar as Energy Transfer represents that it is not seeking equitable relief as part of its counterclaim for *either* breach of contract or fraudulent inducement, CPS Energy will agree to withdraw its affirmative defense of unclean hands.
